Public Information Meeting #3 – February 2007

Illinois Department of Transportation

ALIGNMENT REVIEW
OPEN HOUSE MEETINGS
ILLINOIS 336 HIGHWAY STUDY
FROM PEORIA TO MACOMB

The Illinois Department of Transportation will hold three public open house meetings on the Proposed Illinois Route 336 Four-Lane Highway, extending from I-474 in Peoria To Macomb. The study area includes portions of Peoria, Fulton and McDonough Counties.

Three identical meetings will be held, one in Peoria, one in Canton and one in Macomb. Several alignments were presented in March 2006. The department will recommend a preliminary preferred alignment for further study at the meeting. Maps and exhibits as well as assessment data will be presented.

DATES AND LOCATIONS

When ?	Where?
Tuesday February 20, 2007 4:00 PM to 7:00 PM	ITOO Society Hall 4909 W. Farmington Road Peoria, Illinois
Wednesday February 21, 2007 4:00 PM to 7:00 PM	Canton High School Gym 1001 N. Main Street Canton, Illinois
Thursday February 22, 2007 4:00 PM to 7:00 PM	VFW Post 1921 1200 E. Jefferson Street Corner of S. Candy & E. Washington Macomb, Illinois

Individuals may attend any of these meetings at any time during the open house hours. Displays will be available and discussions will be on an informal basis. Meetings are accessible to disabled individuals. Persons planning to attend the meetings who need a sign language interpreter or other accommodations should notify this office at least 5 days prior to the meeting. Address written requests to:

Mr. Eric Therkildsen, Illinois Department of Transportation, District 4, 401 Main Street, Peoria, IL 61602
or call 309/671-3333 TTY: 309/671-3450

This advertisement ran in the following newspapers on the noted dates:

- Canton Daily Ledger – 02/05/07, 02/16/07
- Elmwood Tri-County News - 02/08/07, 02/15/07
- Fulton Democrat - 02/07/07, 02/14/07
- Macomb Journal - 02/05/07, 02/16/07
- McDonough Democrat-Spoon River Press - 02/05/07, 02/12/07
- Peoria Journal Star - 02/05/07, 02/16/07

IL 336 – PEORIA TO MACOMB – PRELIMINARY PREFERRED ALIGNMENT REVIEW

The Illinois Department of Transportation will hold three public meetings to recommend a Preliminary Preferred Illinois Route 336 Four-Lane Highway Alignment for further study for the corridor extending from I-474 in Peoria to Macomb, IL. The study area includes portions of Peoria, Fulton and McDonough Counties.

The public meetings will be held in Peoria, Canton and Macomb. The meetings will focus on reviewing the remaining preliminary preferred alignment. Maps and exhibits as well as assessment data will be presented. IDOT will use public input at the up-coming meetings to refine the preferred alignment. IDOT staff and consultants will answer questions informally. These meetings will be accessible for disabled individuals. For individuals with special needs, please call the numbers above.

When?	*Where?*
Tuesday **February 20, 2007** **4:00 PM to 7:00 PM**	**ITOO Society Hall** **4909 W. Farmington Road** **Peoria, Illinois**
Wednesday **February 21, 2007** **4:00 PM to 7:00 PM**	**Canton High School Gym** **1001 N. Main Street** **Canton, Illinois**
Thursday **February 22, 2007** **4:00 PM to 7:00 PM**	**VFW Post 1921** **1200 E. Jefferson Street** **S. Candy & E. Washington** **Macomb, Illinois**

Impact Table

The table below lists selected impacts for the preliminary preferred alignment presented in this meeting and illustrated on the map. The alignment and impacts are broken into five sections.

Illinois Department of Transportation

Impact Description	Section 1: Macomb Bypass to 1.5 Miles East of Marietta	Section 2: 1.5 Miles East of Marietta to 1.5 Miles East of Smithfield	Section 3: 1.5 Miles East of Smithfield to 2.0 Miles South of Canton	Section 4: 2.0 Miles South of Canton to 2.5 Miles South of Farmington	Section 5: 2.5 Miles South of Farmington to I-474 at Peoria	Entire Project Totals: Macomb to Peoria
	Middle	IL95	North	West	South	Totals
Existing Road ROW Used acres	127	66	113	87	65	458
New ROW Required acres	498	139	285	522	920	2,364
Total ROW acres	625	205	398	609	985	2,822
Severances (Parallel & Diagonal) each	9	0	9	14	32	64
Land Locked Parcels acres	0	0	0	0	0	0
Wetlands number	3	1	15	6	2	27
Wetlands acres	0.2	0.1	1.4	2.8	0.5	5
Cropland acres	422	99	185	407	878	1,991
Wooded Land acres	39	22	6	47	0	114
Grass Land acres	29	13	73	61	28	204
Other Land acres	8	5	21	7	14	55

Comment: I am pleased to see the consideration of the Illinois 336 cooridor. I prefer Freeway standard for contruction even though the price is higher. Safety is greatly enhanced in the Freeway design. Unfortunately prevoius section of 336 noth of Quincy have been contructed as expressways. Please add me to the mailing list if there is one. Thank you.

e-3

I have been looking at the map of the Peoria to Macomb route. I think it is a waste of tax dollars, but the route running north of Hanna City shows a real lack of information and research on your part. Living here in Hanna City I know this area, and its history. The route you propose will take you through an area you will wish you never saw. The area north of Hanna City is full of abandoned mine shaft and ventilator shafts. There have been tractors lost in that area. For safety sake, I hope you don't chose to take this route. I have heard that there are underground coal mine shafts that extend north of Hanna City, to cottonwood Road. A lot of them! I'm 59 years old, and I have walked a lot of this area, and I know there are swampy area, and springs in your northern route from Hanna City to Farmington. The number of bridges you will have to build, and the homes you would destroy, does not make this a good choice. Again, let me remind you about those old mine shafts. No workers should placed in that predicament. To my knowledge, no one is around anymore that could give you there exact location, If you walk into the wooded areas, you may still find the cement caps that were placed as covers on the ventelator shafts. Talk to some of the real old timers in Hanna City, before you go ahead with any plans.

Dear sirs: I think the project is a waste of taxpayers money and could be used for better use. There is no need for a better road to Macomb. The roads are fine as is. We do not need more urban sprawl in Central Illinois. You better think about saving more farmland when oil goes to 100 dollar a barrell.

Sincerely

Joe Kohler

Comment: Of the latest 2 route options of the propossed 336 the green one cuts my 34 acre property in half and goes directly over my newly constructed home. The road would land lock on half of my property and the remaining half is in a flood plain area where I could not relocate my home. What is the policy for purchasing propertys? Could someone specifically look at my property and give me some idea what the intentions of the state would be?

Comment: Please help me to understand WHY we need a whole new highway. I have lived in and around Canton all of my life and have used the roads in every direction from there. I can see a number of other choices instead of spending ONE BILLION DOLLARS (before it is completed) to do all it will take to get the road from Peoria to Macomb. Routes 116 or 24 could be upgraded to accomodate any use that the proposed 336 is called for. I am sure many others have this same question and many others on this project. Those in the Canton area who are pushing this have little or no need for this highway. It seems that they are not looking at all of the towns along I-80 and other super-highways who have lost nearly all because of the road.

The map you are referring to is not the most recent. The site has been updated and now shows the proposed alignment in yellow and all the other non-proposed alignments in gray. (This comment was made during the period where public meetings were being conducted so the web site showed the alignments under consideration, but did not yet show the preferred alignment.)

e - 11

Greetings,

I just read an article in the Quincy Herald-Whig concerning the proposed Macomb to Peoria alignment of IL336. I want to thank and praise the state for continuing to pursue this needed access between central and west-central Illinois.

However, I have a question: Would not the east portion of this alignment be faster completed and at a lower cost if the direction, after skirting the southern side of Canton, headed towards US 24 and hooked up with the existing four-lane divided highway at Kingston Mines/Mapleton? This becomes a more direct route, fewer miles, creating less expense.

Your response will be appreciated.

THANKS,

Bruce

In the Corridor Report phase of this project, we looked the option you describe. To be consistent with the other options, a 65 mph expressway or freeway would have to be created all the way to I-474 in Bartonville. Creating an expressway or freeway in that area made this alternative much more expensive and disruptive than the other options. This corridor was called Corridor C in the Corridor Report. The following are excerpts from the Corridor Report noting some other reasons this option was not selected:

- If Corridor C is selected, improvements will still be needed on IL 116 between Peoria and Farmington.
- Corridor C has the highest potential for impacts to Section 4(f) and Section 6(f) properties: archaeological resources, wetlands, floodplains, streams, and threatened and endangered species.
- It has an estimated 30 percent more relocations required than either of the other two corridors.
- It has very little public support.

Based on your description of your location, the new road will be further from you than existing IL 95. West of Cuba the new road either is along IL 95 or north of IL 95. Coming from the west, it will follow IL 95 to just west of Grant Keime Road then head north.

The format of the meetings is open house where people come and look at the exhibits and talk to representatives of IDOT if they wish. We do not keep a transcript for these meetings because there is no presentation and the discussions are informal. The local newspapers are a good way to assess what the overall tone of the meetings was like.

Mike, Eric, or others,

I was looking over the site this morning and I just wanted to point out the need to update the answers to a couple of questions in the FAQ section. Especially the ones that include references to funding +/or timelines.

I'm guessing you already had plans to do so but I just thought I'd mention it. I know that keeping ours UTD is a PITA and I too often skip over the FAQ section thinking that I've already answered them once.

Again, THANKS for a job VERY WELL done at the recent hearings.

Did I hear you say that this ought Phase One ought to be wrapped up latter this summer? *(Just Kidding).*

Mark (Johann)

e-17

Eric Therkildeson:

I was just told recently from a friend about this future road from Macomb to Peoria and was just looking at the plans on the Idot website. My question for you is, my husband and I are building a new home on 6 acres on Taylor Road (about 1 mile from 116) and we were curious about where the new road will be and how close to our home/lane. Our address is 1321 N Taylor Road, Hanna City- If you could please let me know if this will be a concern for us I would appreciate it. I am sure there are positives to this road, but for our future and resale value of our home, we would like to check and see actually how close it is to our new residence.

Thank you so much for your time,

Gina Garrett

To	"Gina Garrett" <Garrett_Gina@cat.com>

We suggest that you examine the maps on the website to check out the situation relative to your property. The main IL 336 roadway will be about 0.42 miles north of IL 116. There will be an interchange between IL 336 and Taylor Road. The north ramps for the interchange will be about 0.56 miles north of IL 116. You state that you are located about 1 mile from IL 116. We have located where we think your property is and the house appears to be about 0.72 mile north of IL 116 so the ramps will be about 0.16 mile (850 feet) from that house. There are also frontage roads shown on the maps on the website. The frontage roads are currently being re-evaluated in this area so you should be aware that they probably will change from what is shown on the current project maps.

If you need further assistance you can call Eric Therkildsen at (309) 671-3333 to arrange to view the maps at IDOT.

Comment: I always thought that inter states and express ways were made to go the shortest distance and a straight line.Try from Bartonville route 24 to route 136 south of Lewistown. I really think this is the biggest waste of tax dollars ever spent.I travel from Canton to Macomb at least once every week. The only time you ever see a trailer truck is in the fall when farmers are hauling grain.Get on 136 some time and the trailer trucks will run over you.Thank you for letting me vent my feelings about this project. There are several issues with the route you suggest. It is further from Canton and would not serve the city as well as the proposed alignment. An alignment that is relatively close to Canton is requested by the city. Also, your suggested route goes north, we would have to negotiate around Double T State Fish and Wildlife Area owned by the Illinois Department of Natural Recourses. Finally if we used CH 24 as the route to Farmington, IL 78 would still have to remain in place and in service as a state route. We would then have more highways to maintain.

IDOT,

I am opposed to the entire IL 336 project. It can not be justified. However if you persist and build it, the following should be included in your plans:

- The median widths should be reduced to minimize the impacts to the sensitive natural areas on my property (2miles west of Smithfield). Your highway project prevented these areas from being designated as Nature Preserves. I guess it would be some sort of compromise if you accomodated this request. I'm sure you realize that your IL 29 project plans have reduced the median to 22 feet to minimize the impacts to sensitive natural areas.
- There should be sufficient wildlife passages along the entire route but in particular from the Spoon River east to Smithfield. There are numerous places where wildlife cross IL 95 in that stretch. Ideally I would like to see a wildlife overpass built in this area. If that can not be built then I would like for you to build wildlife passages that provide a sufficiently wide dry crossing area for large mammals. Again this has been incorporated into your plans for IL29 by extending the bridge lengths/openings an additional 10-25 feet and by providing appropriate sized culverts.
- When revegetating the area after construction please use native seed mixes, forbs, shrubs, and trees. I would like to see the medians re-forested.

I would like a response to these comments. Thanks.

Comment: The ONLY reason this road is being pushed is to cut 15 minutes off of the drive from Macomb to Peoria, and to enrich the pockets of the bankers in Canton(you know who I am talking about) who want to make Canton a bedroom community of Peoria. In this time of high priced gas and diminishing supplies of gas, we should not be encouraging high speed travel or bedroom communities. I don't see any justification for building this except to enrich some businessmen and made short term construction jobs.

Comment: Construction of the Peoria to Macomb expressway is senseless, destructive, and extravagant. The project should be abandoned. If, despite the dictates of common sense, it is built anyway,IDOT should make every effort to minimize environmental impact, especially in the vicinity of the Spoon River crossing (Smithfield to Marietta). In this area (and perhaps others I am less familiar with) animals are already killed in large numbers crossing Il 95. The highway should be fenced, medians should be reduced to the absolute minimum width, and wildlife under/overpasses suitable for deer should be installed. I am also concerned about the highway's impact on the Rector Woods/ Kedzior Woods "complex", which has the possibility of becoming one of the state's most significant woodland habitat areas.

07 March 2007

To Whom It May Concern
Illinois Department of Transportation

Re: Illinois 336 Proposal

I am writing to voice my opposition to the construction in any way, shape, form, or appearance of a super highway between Peoria and Macomb, Illinois, commonly known at the Illinois Department of Transportation as Illinois 336.

First, the construction of a super highway--Illinois 336--is not justified by current demand or projected demand. Therefore, Illinois 336 must not be built.

Second, the construction of a super highway--Illinois 336--will have irreperable damages to and consequences for the affected environment and wildlife of the proposed location. Therefore, Illinois 336 must not be built.

Third, as has been learned by IDOT in northern Illinois with the rebuilding of the Dan Ryan expressway (Interstate 90/94), costs have soared from an estimated $550,000,000.00 to nearly $1,000,000,000.00 in less than seven years. The idea of building an Illinois 336 within budget is indefensible. Therefore, Illinois 336 must not be built.

Apparently it is your assignment at IDOT to complete the design of a proposed Illinois 336 super highway. In that regard, please reduce the median of this massive and unnecessary boondoggle of a project to no more than 20 feet throughout the expanse of the design. Additionally, please insert into the design safe wildlife passages for the protection not only of wildlife that are oblivious to the perils of a super highway, but also for the protection of the occassional motorist who will face fatal results or paralyzing injury when swerving to avoid crushing the guts of the many species they are likely to encounter without such passage ways.

Thank you for your attention to these requests.

Sincerely,
Greg Kedzior

Illinois 336 continues to be a mega dollar white elephant project, promoted by special interest groups that will profit from the near billion dollar cost to the taxpayers. There are no justifiable economic benefits that will offset the nearly billion dollar day 1 cost to open this road. The western Illinois corridor has suffered significantly from business defections in areas that have similar infrastructure to what is being proposed for Illinois 336. What realistic economic return can be achieved for this cost.
Where will the funds come from to properly maintain this facility, when existing infrastructure cannot be supported to meet standards to safeguard citizens?

Municipalities are strapped today to meet their existing commitments. What portions of government budgets will have to be shorted to eternally subsidize this project? Again schools, healthcare, senior-care, child-care, pension obligations will have to suffer to provide a corridor of convenience for the few, and large windfalls to the even fewer.

For just these few reasons, Illinois 336 cannot be supported by a person of good conscious and common sense. And I am one of many who cannot support this project.

Also what steps have been taken to ensure the protection of local natural resources?
What steps have been taken to protect the area wildlife, and prevent any harm to endangered species?
What impact will this road have on increasing global warming and raising pollution levels throughout the corridor?
Will this road destroy any historic sites, including any native American sites which may be unearthed during the project?

Is the public being fully educated to the impact to these items? I see little detailed comment to these subjects on your website. Comments are mostly driven by comfort issues.

Please provide qualified feedback on these items.

thanks
Bob Kedzior

Comment: I am fully aware that the corridor of Route 336 has been established and will impact several homesteads and residences. One imparticular would be the Ken Kedizor property located just east of the Spoon River. Ken has decicated much time and work maintaining this property as a natural habitat for wild life and native vegetation. I am well aware that the 336 will take part of his property. My request would be to narrow the right of way thru the property in an attempt to lessen the impact on Ken's property and preserving as much of the native habitat that Ken has worked so long and hard to restore to this scenic area near the Spoon River.

IDOT,

I am opposed to the entire IL 336 project. It cannot be justified by either traffic flow or economic reasons. However if you persist in building it, the following should be included in your plans:

- The median widths should be reduced to mininize the impacts to the sensitive natural areas on our property (2 miles west of Smithfield). Your highway project prevented these areas from being designated as Nature Preserves. I'm sure you realize that the IL HWY 29 project plans have reduced the median to 22 feet to minimize the impacts to sensitive natural areas along that route. I expect that no less should and can be done here despite whatever compromise that may suggest.
- There should be sufficient wildlife passages along the entire route but in particular from Marietta east to Smithfield. There are numerous places where wildlife cross IL 95 in that stretch. Ideally I would like to see two or three wildlife overpasses built in this area. Anyone in this area can help identify where these overpasses would be most effective. If those cannot be built then I would like for you to provide wildlife passages that give a sufficiently wide dry crossing area for large mammals. Again this has been incorporated into your plans for IL HWY 29 by extending the bridge lengths/openings an additional 10-25 feet and by providing appropriate sized culverts.
- When revegetating the area after construction please use native seed mixes, forbs, shrubs, and trees. I would like to see the medians re-forested.

I request a response to these comments.

Sincerely,

Dawn Kedzior

Eric,

I thought I better take my own advice and send in my comments which I did via the comments section on the website. I'm sure you can guess at what I had to say.....short and to the point...."Build it Yesterday."

My apologies for sending it before I finished the remittance section. I hit the enter key to go to the next box and ..POOF, it sent itself.

Have a great day.

Mark

The new IL 336 alignment passes to the north of existing North 4th Street. The southern portion of the new road right-of-way is about 500 feet north of the northern end of 4th Street.

We are having some difficulty location your home. If you provide a little more information (is it north or south of IL 95, how far east or west of County Highway 2) perhaps we can locate it and answer your question. Another option is that you examine the maps on the website at http://www.peoriatomacomb.com/ to check out the situation relative to your property.

If you need further assistance you can call Eric Therkildsen at (309) 671-3333 to arrange to view the maps at IDOT.

The anticipated beginning of the actual construction phase of IL 336 cannot be determined at this time because no funding is available for land acquisition or construction in the Department's multi-year highway program. The current planning study is completely funded and we anticipate completion sometime in 2008. Additional funding for a portion of the design phase is available in the multi-year highway program which will be used for soils investigation studies and design plan preparation. It would take approximately three years from completion of this study before a section of construction could begin assuming funding for land acquisition and construction are in place.

Comment: As a new homeowner in Peoira County, I do not support the overall project as I believe the economic impact is not net positive, considering the investment and I am concerned for the value of my propety after construction. Though, if the project proceeds, I also do not support the south corridor route due to noise and congestion factor. I built in the country to have the country atmosphere and I am willing to accept the current limitations with the 2 lane access to major cities.

Comment: In regards to Grid J2, it appears that it might be more cost effective to close the county road 22 at Rt 9 and have that road access the new 336 at the same location as the first entry point north of Rt 9 (the same entry point as the road commonly reffered to as Wertman Road). That would be half the distance from the 2 residences to an entry point.

er 42

In this area, the roadway will be located about one mile south of IL 116. The project will have no direct impact on the house in question. We are planning an intersection at South Texas Road, so your in-laws will be able to get on the new roadway there.

Having carefully reviewed the present plans for Highway 336 in the section from Macomb to Peoria, I commend you on your careful work and fully support the alignment choices you have made.

While I recognize that no plan will be without impact upon some of our neighbors along the route, I believe the need for this roadway in terms of economic vitality and, indeed, future viability for communities in our area makes its construction a major priority in central and downstate Illinois. We need to press on with the greatest possible sense of urgency with this vital project.

Count me among its supporters.

Comment: Sorry I could not attend one of your meetings. How can you provide highway access to Farmington and Canton but miss the second largest voting community in Western Illinois.
Why did you design a highway that was so far away from Bushnell??? Do you expect Bardolph or Marietta to really have economic growth with your design like Bushnell could have. If you have studied the impact on Western Illinois business you would know the amount of growth potential at Bushnell. Why miss out on Bushnell?? It just doesn't make any sense at all. Ken McClintock

Mr. Erik Therkildsen,

I am opposed to the Illinois highway 336.

I own the property that sits west of County highway 1,south of Lasswell road, and north of Rt. 95. Both the gray and yellow proposed routes come thru my property. I am opposed to both but more opposed to the gray .

I would like to point out that the gray route pierces a new wetlands that the FSA/NRCS(contact Kim Smail) just installed and co- payed for. Would you take a wetlands out that another government agency just approved? Did you even know the wetlands existed?Please comment on that.

I would also like to point out that the yellow route cuts the creek bottom woodsy area on my farm off from the woods that sit west of it and thus shut down a wildlife corridor. Many wildlife animals move freely west off my property and east back on to it with sunrise and sunset. I just entered a non-typical 220 class whitetail into the record books 2 years ago.This was THE KEY reason I purchased the farm. Did you consider the impact to wildlife of cutting a creek bottom woods into pieces? Please comment on your plans to ensure a wildlife corridor will or will not exist.

Please respond to this email

e - 51

I am writing in support of funding for the construction of Highway 336 from Peoria to Macomb. This road will provide commercial access to western Illinois and as such be an economic engine for the region. The portions of 336 already completed between Quincy and Macomb have opened up those areas for trade and completing this area will only enhance the overall accessibility.

Sincerely -

Andy Rowe

February 20, 2007

I have a purebred Angus herd in the se ¼, sec. 7, and nw ¼ sec 17, Logan Twp, Peoria Co. If the southern rt. 336 is chosen it will spit my pasture from the buildings and the feeding equipment. Is there any way that a cattle crossing under the right of way in conjunction with the creek crossing would be possible? Also could the bend in the right of way start about ¼ mile east from the current drawing so as not to destroy most of my farm. I don't care if it all comes off of me but the way it is drawn it makes most of the south portion of my farm untillable. It would also make the creek crossing easier.

Thank you for your consideration.

COMMENTS:

Coming N on 78 from Canton @ the Norris intersection why is there not a right hand ramp going toward Peoria, without this ramp you force all Canton to Peoria traffic to make a left hand turn in front of oncoming traffic and block 78 N traffic until the turn is made.

COMMENTS:

I strongly support this project from both a transportation and well as an economic perspective. Illinois 336 will allow people in Illinois located along its Corridor to finally has access to a modern multi-lane highway many years after most other communities in Illinois and rural areas have been served with similar facilities.

Construction can not begin too soon. My hat is off to IDOT and those that have long supported

COMMENTS:

Looks fairly efficient — why a larger interchange at the prison than at the Community College (Sgoon River)?

We would be very interested in reviewing the draft environmental statement. Either send to me

Caroline F Schertz
Chair, Tri County Regional Planning Commission
1675 County Rd 1200E,
Lowpoint IL 61545

or send directly to the Commission Office.

Thank you.

COMMENTS: The access road off of Taylor Rd. that goes to the east on the south side of interstate goes to land that is not landlocked. I farm the farm at the corner of Taylor Rd + Rt 116 and that access road splits the tillable land that is left. I would appreciate further consideration as to whether this access is necessary. If you would want to contact me for further clarification, please feel free.

COMMENTS: It's a bad idea because it goes right through my house and my grandmas house. My coisins and I will not get to play in our creek. It will ruin so many animals homes. My little brother wont get to see much countrey. Besides why do you need another rode, the rode we have is just fine We won't get to swim inthe creek. We won't get to find any more hiding places atthe

(OVER)

COMMENTS (continued): creek it will ruin many trees and plants. We won't get to fish anymore. We won't get to make nests out of moss and water. We won't get to see the beautiful sights. We won't get to go to the big huge dirt pile. We won't get to hide in the little cave we found. We won't get to go sledding in the winter and frig to get on the ice on the lake. We won't get to drink the fresh water of the creek. We do not need another road! We won't even get to play in the corn crib or the old old pig pin. We practically have a museum of very very very old things. We even have an old fashon stove and pot with the lid.

Feel free to include additional sheets. When finished, drop in the "Comment Box". COMMENTS:

1. I think it is a sad thing to take farm VS already ~~more~~ mined ground for this road cause its easier
2. This project will completely destroy my mothers house & farm. This is land that has been in my family for nearly 100 years.
3. My new house was built to be lived in for a lifetime in the country. Not as a shoulder for Rt 336.
4. My land has been in our family for nearly 100 years.
5. Couldn't this money be used for something better!
6. We will completely lose any value in our house

(OVER)

COMMENTS (continued):

as no one will ever buy it. I'm sure I won't ever want to live there!

7. Does any one really care about any of my ~~comments~~? Comments? I feel ~~none~~ no one really cares about 1 family.
We are out of luck.

COMMENTS:

I don't under stand we need another road beacuse the road we've got is just fine. It will run through our creek and we won't be able to play in it. My cousins probly won't like that. It will go all over my Gramas and our land. My Grandma will half to Move. We will not like that. Nether will my family tree.

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: IT IS MOST UNFORTUNATE THAT THIS Highway FEEL BY THE WAY-SIDE ALMOST 50 YRS AGO. WHEN ONE LOOKS AT BLOOMINGTON-NORMAL ONE CAN ONLY WONDER WHAT OUR AREA WOULD be Like at the present had this highway BEEN IN EXISTANCE ALL THOSE YEARS. BRING IT ON! FAST!!

COMMENTS: I have attended all of the Canton meetings and I am encouraged by the progress. I am 100% behind this project since it is vital to the survival of Canton and Western Ill in the 21st century. The proposed final route appears to have minimal impact on the local farms, housing etc. Some people will be displaced, but I think it will be for the good in the long term. We

need to continue to keep this highway in the fore front of the legislature both state and federal levels. We have come a long way in the past five years or so and we must not ease up at any time or get discouraged. I would like to thank IDOT and all who have continued to make this highway a priority. Keep up the strong effort and I am confident that it will happen.

COMMENTS:

Support Preferred alignment —
If small changes are made around Canton area - I would prefer it closer to access to the Canton community i.e. if it could follow existing route 78 rather than go through prime farm ground.

COMMENTS:

I live in the Farmington area and my work office is in Macomb and I do not feel that this Road is necessary. We do not seem to be able to take care of the Roads we have. We need the farm ground to produce food & fuel for our ~~the~~ future not for more roads. You need to ask how many people need or want to drive to Macomb or vice versa. Most of the people I know in the Macomb and surrounding areas shop in Quincy Springfield or the Quad cities - they are not interested in the drive to Peoria. Other than Western University I don't know many people that drive to Macomb or care to. If you want to do something under

COMMENTS:

As a property owner and tax payer in the area, I absolutely do not support the construction of this highway. The expense is excessive and in my mind unnecessary. If a 4 lane limited access road is necessary, then let's re-vamp 116 as was done north of Macomb on Rt. 67. We should utilize existing roads and access as much as possible.

In addition, this is, again in my opinion, a terrible waste of a very precious and

(OVER)

COMMENTS (continued):

Diminishing resource, that being highly productive farm ground.

Please re-consider this development.

Have surveys been done relative to potential numbers of cars/trucks on this new road?

COMMENTS:

You have no money for this road!
and there is not enough traffic to do
the road justice! Will you be fair
when you are buying the ground?? I doubt
it. Canton will not benefit at all.
This seems to be the way our Country operates
How we have reputed this far surprises me.
such dumb ideas as this.
We are not for it.

Your Thoughts About the Illinois Route 336 Highway Study Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☑ February 22nd in Macomb ☐

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: We definately don't need Route 336. The best solution is make RT. 24 a 4-lane. the prefered route for 336 is too far north of Canton. People will just drive right on to Peoria.

Scrape 336 and Johnson also.

COMMENTS: Regarding County 22 (W of Canton) portion North of Rt. 9: There is a cul-de-sac planned south of the crossover, and an egress planned entering from the west to access what is commonly known as Wertman Rd. Would it be possible to replace the cul-de-sac with an egress to the south at the same point? The employment of both residences necessitates movement North along the county road, and several routes of travel into Canton are north of that point. It will also affect travel of students into, from Spoon River College from Canton.

COMMENTS:

I like the proximity to ~~a~~ new state recreational site a Double T west of Canton. Perhaps the roads closeness to Harper-Reator nature prescrve and the Spoon River will encourage the state in development near these natural treasures also. Progress and its benifits are good for everyone. You cannot put a price on good transportation

COMMENTS:

Overall limited the impact to existing farms and used existing roadways fairly well.

The white non-preferred road south from Norris to west of Canton seems better to me: it would clear the enterprise zone, separate the prison from the town, be nearer Spoon River College, and be more likely to impact Canton positively (being closer) economically.

Thank you for the public forums for comment.

COMMENTS:

My comments are basically the same as I've always stated = the prime farmland that is being swallowed up by this road is a crime against nature, our farm economy and the preservation of prime farm land.

We as farmers seem to have no input in this road and/or our input is not considered or valued. This corridor is splitting our farms so that we will have to be crossing a four lane high, accelerated speed highway to get from one part of our field to the other parts of the same field. Field tile will be destroyed and drainage will become a problem. Our fairly quiet farm life will be ~~invaded~~ invaded with noise, pollution, lights and increased road hazards. Strip mine ground

(OVER)

COMMENTS (continued):

Which is already compromised could have been used and much of it is just pasture land. If you had taken the northern corridor the loss of prime farm land would not have been as great and people's lives would not have been as destroyed. I wish you would rethink this decision seriously!

COMMENTS: Choice of alignment appears to be selected to avoid as many wetlands as possible. Exits to Communities are well positioned. Airport (Rec) near Airport (Canton) to reach airport (Macomb) provides a good connection for intermodal transfers.

Using a widened 116 & 95 looks impossible because of residential growth but I still wonder why Rt 9 W/fm Canton to Bushnell to Connect W/ new N/S at Macomb isn't preferred?.

COMMENTS: The only eastbound entrance from Farmington goes by the school. Southbound out of Farmington on 78 cannot get on eastbound expressway / freeways.

This will create too much traffic by the school since it is the only way off / to Farmington and the only way on.

I feel southbound from Farmington should be able to access the eastbound freeway from 78 and also exit south of Farmington to north 78.

Your Thoughts About the Illinois Route 336 Highway Study Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☐ February 22nd in Macomb ☒

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: Please build this much needed highway as soon as possible! It is essential for the economic development of Forgottonia. I am sad to see all of my bright classmates leave the area for greener pastures.

The currently proposed alignment looks to be ~~close to a hypotenuse of~~ acceptable -

PLEASE BUILD IT NOW!

COMMENTS: 2.22.07 336 in Macomb to Quincy

Our farm (7681 N 900 th) about 1000 ft East of the "Old School House". We understand that the approach (750) to 336 will have 30" culverts. We also assume that this rearrangement of pavement will create more run off water.

Our farm entrance is East of this approach. Our concern is that our existing culvert's ability to handle the excess water. Replacing our entrance would cost quite a lot.

What can be done to help this situation?

Can we have a person's name that would help this situation?

Thank You

COMMENTS:

I am very happy with the proposed alignment – section 1. The only thing I feel strongly about adding is an interchange at Rt. 41 and 336. I feel this is absolutely necessary for the benefit of the city of Bushnell, and for farmers' safety. Thank you so much for listening to the public, and adjusting the alignment.

COMMENTS: I do NOT support construction of this highway because I feel that it is not needed, the costs exceed the benefits, and damage to our environment and loss of prime farmland is inevitable. That being said, I will restrict my comments to Sections 1+2. Using the current alignment of Rt. 95 for section 2 is a good idea because it is least disruptive and minimizes damage to existing resources.

The same principle applies to Section 1's preferred alignment. While it does destroy a significant amount of prime farmland, it is the most direct and poses only a small risk of damage to the water quality of the La Moine River and tributaries. Therefore, I do support the preferred alignment of Section 1. It demonstrates good reason and proper respect for our land.

RECEIVED
FEB 27 2007
REGION 3 / DISTRICT 4
PEORIA, ILLINOIS

February 26, 2007

Dear Mr. Eric Therkildsen, P.D.

I attended the meeting (Feb.21) and learned that the proposed 336 highway, running along the east side of our farm is going to take several acres from it. Not only that but it is going to encompass our waterway located at the extreme northeast corner of the farm. That field has considerable slope to the north and an open 100 ft. deep strip mine lake bordering it. In order to stop the erosion from the field and the slipping of the highwall into the lake, we have had to control the water with a berm and culverts to stop further damage. This conservation system has been in place for decades and something we cannot do with out.

I don't see any reason why you can't build the road without getting the right away on our property. We have this high producing limited black farm land and the on the east slide of the road you have an unlimited amount of waste ground that has been raped by the strip mines of the past. That should be taken into consideration when making these plans! I like to be a good neighbor but I don't want to be taken advantage of either.

We have several concerns about these plans and would like to talk to some one directly on the road sight, discussing issues such as drainage, sources of fill, and other things not obvious on paper.

Would it be possible for us to meet here at the farm some time in the near future? I would be glad to show you our points of concern and anything else of historical interest.
I'll be waiting to hear from you.

Yours Respectfully,

Bill Ripper

A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

Since a strong transportation system is essential to the vitality of a region, Route 336 is an extremely important project. I was particularly impressed with the preliminary preferred alignment. You've proposed an alignment that appears to have made as minimal amount of negative impact on people and property as possible.

Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☒ February 22nd in Macomb ☐

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: Loss of thousands of acres of good farm ground that can not be replaced.

When a farm is divided, how does the farmer move his equipment from one side to the other?

When traveling you don't get off at an exit for a town you can hardly see. How would this benefit Canton?

What is wrong with improving RT 24?

COMMENTS:

Dear Sirs:

I am on the Trivoli Township Cemetery Board. We had a meeting last week. One big concern is the safety of the driveway to the Trivoli Cemetery on Route 116 just west of Trivoli. One of our board members is a lawyer. He suggested that I talk to some of the engineers at the 336 hearing in Canton that evening. I did and they suggested I write my concern on this form which they gave me. They said that perhaps you could forward it to the proper people.

Before Route 116 was rebuilt several years

(OVER)

COMMENTS (continued):

ago, there were signs along the highway showing a Cemetery entrance. These signs were not replaced when the road was finished. The entrance is clearly visible coming from the east. It is the traffic coming from the west that creates a dangerous situation. Our caretaker (who was at the meeting Thursday) was almost hit twice last year as he pulled from the cemetery with his equipment. Others have also complained to us about close calls. With spring coming, there is going to more traffic at the Cemetery. Much of that traffic is older people visiting grave sites.

Please, can't something be done to slow the traffic coming from the west before there is a serious accident?

Sincerely,

Shirley Harman

COMMENTS: I AM GLAD TO SEE IDOT IS TRYING TO DO SOMETHING W/ THE TRAFFIC (CONGESTION) ALONG PLANK RD (116) I KNOW THEIR MAIN GOAL IS TO GET A DIRECT ROUTE FROM PEORIA TO MACOMB. FROM THE DRAWING I SAW LOOKS VERY BENEFICIAL TO EVERY ONE IN CENTRAL/WEST CENTRAL ILLINOIS. GOOD JOB. HOPEFULLY IT WILL BECOME A REALITY.

COMMENTS:

The new plan looks good to me! My only regret is that the highway isn't up and running now.

I was surprised at some of the comments made by those people against the road. What they are missing are two main points:

1. The 4-lane road is much safer than the 2-lane we presently have.
2. The road is not being buolt to "save 15 minutes" drive, as one part suggested, but rather to allow traffic from all over the area to travel more safely, plus, to attract more industy (and more jobs) to the area the road covers.

I am sure that some are upset about it cutting into their property, but then they are to be compensated for the land they loose.

Finally, I am definately for the road. Let's speed it up so we can be driving on it soon --- not in 10 or 20 years.

COMMENTS:

I attended the Macomb meeting about the Illinois 336 Route from Macomb to Peoria. I looked at the Route display and studied the impact table on the back of the highway study you passed to the visitors. I feel that this is the best Route shown to the public and had the least impact to the environment. I recommend that the construction of the highway start as soon as possible.

Thank You

COMMENTS:

This proposed highway has to be compared to Rep. Young's "Bridge to Nowhere" as one of the most egregious examples of political Pork in recent history. Few really want it, it is unnecessary and destructive - terribly destructive. The only proven economic benefit will be to those who build it. I know IDOT has a vested interest in it - it's your job - and you can claim to the public that you are "only following orders". Sounds familiar.

As you can tell, I am very angry at the thought of losing what I have worked for, and on, for three decades. I realize that will not resonate

(OVER)

COMMENTS (continued): with the "just following orders" troops. I am not alone, nor am I the angriest. We will be refocusing our efforts on our politicos, most who are under the spell that somehow new "infrastructure" will bring jobs to the area. Hogwash. This disaster is being crammed down our throats by a greedy few and allowed to limp along by public ignorance and apathy, assisted by IDOT. Not a done deal - yet.

COMMENTS:

I WAS VERY IMPRESSED WITH THE MAP PRESENTATION.
THE MAIN ISSUE DISCUSSED CONCERNED THE CHOSEN ROUTE.
MOST FELT THAT A MORE DIRECT ROUTE WOULD BE MORE BENEFICIAL
BOTH CONCERNING COST AND TIME. MOST THERE PREFERRED
ROUTES FOLLOWING 116 OR ROUTE 9. IN THE CURRENT PROPOSAL,
TAKING ROUTE 9 FROM CANTON WOULD BE A MORE DIRECT ROUTE
AND WOULD CROSS CLOSER TO BUSHNELL. BUSHNELL'S STRONG
MANUFACTURING BUSINESSES WOULD BENEFIT GREATLY BY THIS.
ADDITIONAL CONCERNS WERE DISCUSSED CONCERNING THIS ROUTE
IN REGARDS TO THE NEW WINDING ROUTE. THE GOVERNMENT
CAN NOT PROVIDE FUNDING TO UPKEEP TWO CURRENT ROUTES.
WHY BUILD ANOTHER SEPARATE ROUTE INSTEAD OF IMPROVING
ON WHAT WE NOW HAVE? I SPOKE WITH MANY OF THOSE

(OVER)

COMMENTS (continued):

PRESENT TO ALL WALKS OF LIFE, FROM BUSINESS, GOVERNMENT, FARMING AND LIFE-LONG TAXPAYERS. EVEN STATE ROAD WORKERS THOUGHT WE COULD USE AS MUCH OF OUR CURRENT ROADS. WITH THE FOUR LANES TO BANNER TO BE COMPLETED IN THE NEAR FUTURE, WE COULD THEN LOOK DO TO CANTON FROM THE EAST AS WELL AS THE 336 FROM THE NORTH. THE ROUTE FROM BANNER TO CANTON WILL BE A SHORTER ROUTE AND WITH THE DEVELOPING PORT AUTHORITY IN MAPLETON, MUCH MORE WILL BE DIRECTED WESTWARD, THROUGH CANTON, OR FULTON COUNTY,

I WISH TO THANK THOSE OF YOU ON THE 336 BOARD, WITHOUT YOUR PERSISTANCE NOW OF THIS WOULD BE POSSIBLE. I THANK YOU FOR ALL YOU HAVE DONE FOR OUR COUNTY.

COMMENTS:

The construction of Route 336 project is key to the economic development of West Central Illinois. This is yet another example of how this area supports projects from a regional perspective.

If someone were to look at a map that shows the proposed Route 336 and then looks at where Peta is located, the initial comment would be that it does not directly benefit

(OVER)

COMMENTS (continued):

Pekin in any way. Not true. If the road provides better access from West Central Illinois to the Peoria area, Pekin too benefits.

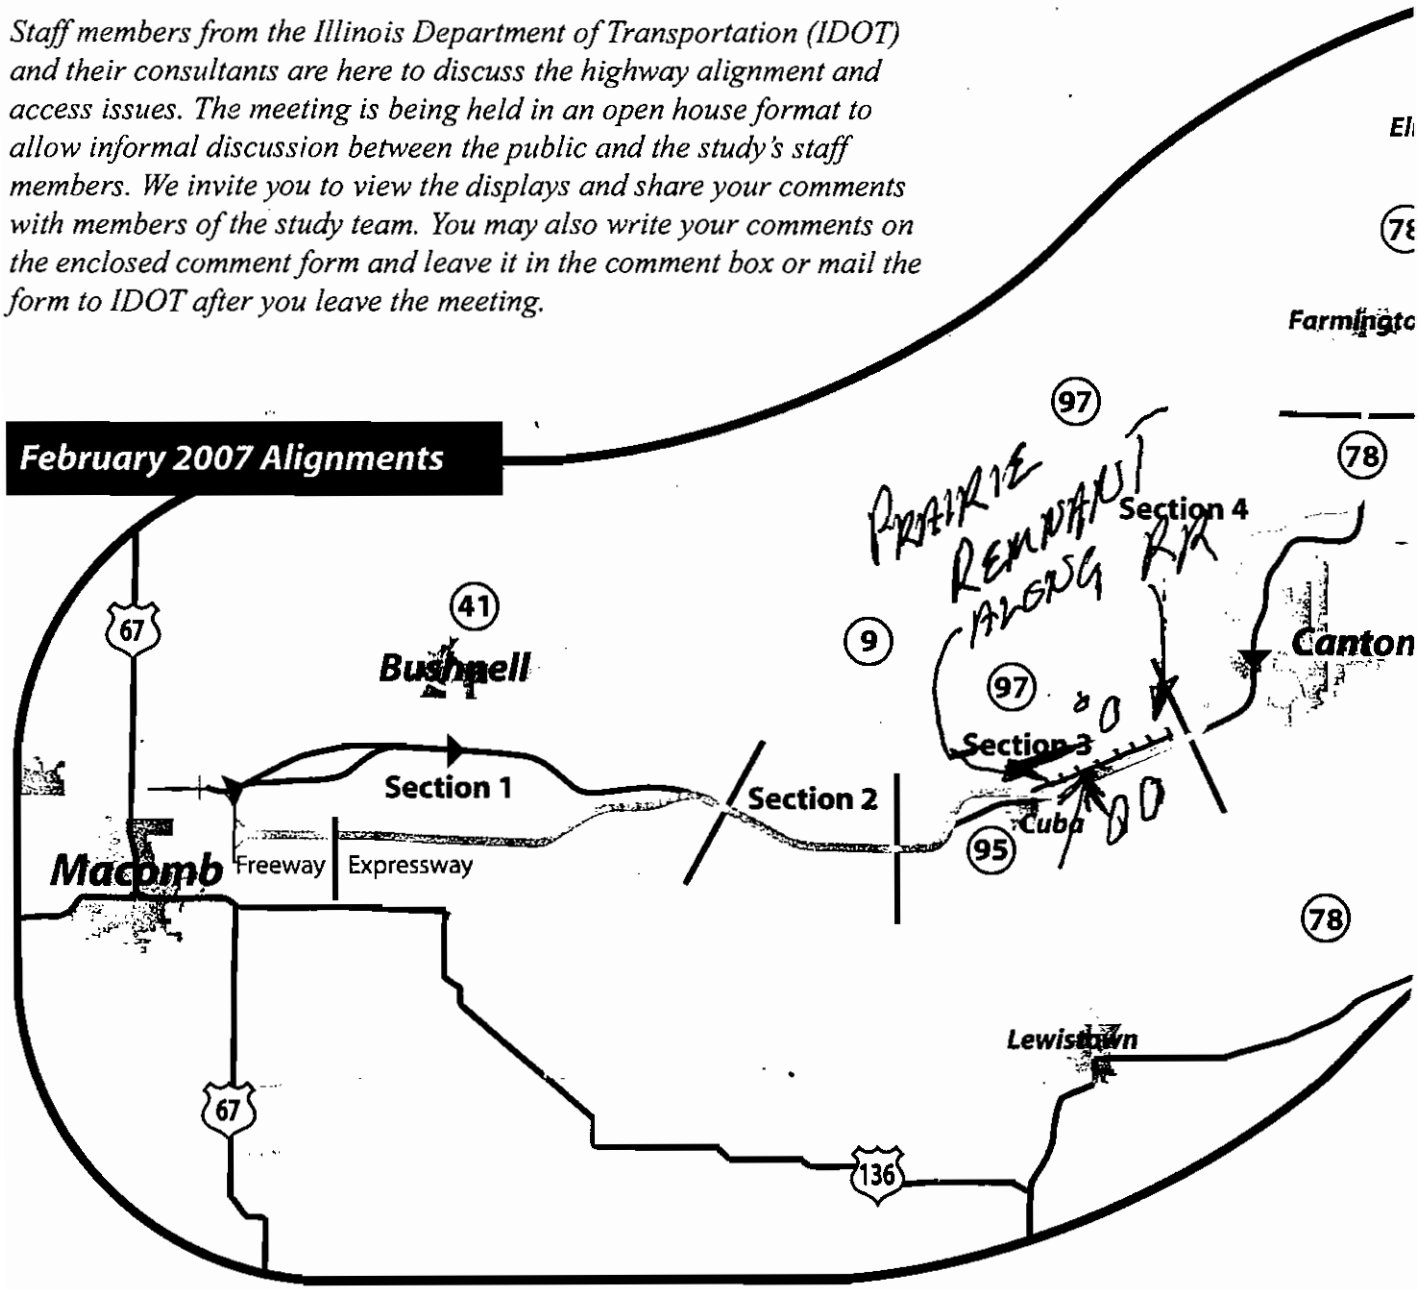
Welcome to this Public Information Meeting for the

Staff members from the Illinois Department of Transportation (IDOT) and their consultants are here to discuss the highway alignment and access issues. The meeting is being held in an open house format to allow informal discussion between the public and the study's staff members. We invite you to view the displays and share your comments with members of the study team. You may also write your comments on the enclosed comment form and leave it in the comment box or mail the form to IDOT after you leave the meeting.



Preliminary Preferred Alignment

The preliminary preferred alignment is shown in yellow on the above map and the large scale exhibits presented in this meeting. The alignments that were shown in the March 2006 public information meeting and are not preferred are shown in gray. The preliminary preferred alignment is being refined with additional engineering, drainage, access and geometric analysis and studies. The alignments shown in gray will not be further studied. The impact table for the preliminary preferred alignment is presented on the back page of this handout. The numbers have been updated since the March 2006 meeting based on changes to the alignment and field assessments of environmental impact that are now available.

A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: I felt most of the comments were positive. As always, the IDOT staff and engineers were helpful, attentive and friendly.

I understand not everyone can avoid being impacted by such a project. I can sympathize.

I hear some others say more should be done to upgrade U.S. Route 24 instead of spending money on Route 336.

(OVER)

COMMENTS (continued):

They have a point. But where were these voices five or ten years ago?

No one suggested anything to that effect when Route 336 was first being proposed -- or several years later.

Upgrading Route 24 as well would be fine, but only as an addition to, not replacement of, improvements to the transportation system Route 336 will bring.

- Sincerely -

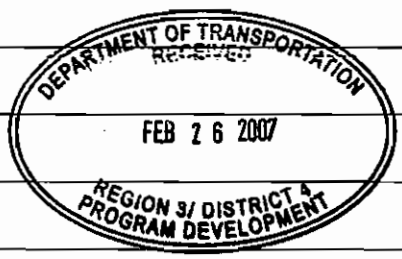
COMMENTS: Bt 336 go for it!!!



See Back side

(OVER)

COMMENTS (continued):

My age 71 yrs old. Rt 336 will not either profit me or cause personal loss. (I am strongly in favor of Rt. 336.) The negative comments that I have seen and heard are 90% selfish by people who aren't willing to give anything up for the good of many. My feelings are that this highway may help some future young and educated people to come back to this area, raise a family and have a good life due to a resurrection of the area.

For people my age, it's like planting a shade tree. It won't help me but it will provide shade the future generations.

no positive guaranty with it but no growth without it.

People had to give up ground for Rt 97, 9, & 78 Etc. that we all have enjoyed the last 50 yrs. (The same roads selfish landowners use today.)

COMMENTS: I like the new preferred alignment and am glad to see sections 2 and 3 are utilizing existing rightaways. To have only 27 residential relocations for a 60 mile project is a plus.

I am a retired electrician and drove 5 years to the Peoria area to work so future generations will benifit.

COMMENTS:

I thought your meeting overall was a good presentation.
The maps were very nicely laid out!
Most of the land owners + tenants I talked to were a lot more happy with the ~~last~~ new proposal.
I live 5 miles south of Marietta but use County 34 to get to Marietta + then always used Rt. 95 to get to Canton, Lewiston, or Peoria! This proposal will still work good for our family!

(OVER)

COMMENTS (continued):

We Dan + Jann 750 acres South of the proposal, the nearest farm is 4.5 miles south so we will not be affected land wise.

Thank you for our thoughts!

Sincerely,

Dan A. Farr

COMMENTS: My brother and I attended the Canton meeting because our family owns a small farm 1 mile east and 1 mile south of Tiwoli. It appears that the highway will go immediately south of it or take a small portion of the south border of the farm. This will not hurt our farm and we are in favor of that route.

We like that the highway will be designed as an expressway because it will not "dead-end" a lot of rural roads. This will make it easy to move farm equipment and travel for us. We also like the route around the south border of Farmington. This will

(OVER)

COMMENTS (continued):

make it easy for commercial and school traffic to and from the new school development. Route 78 will have good access both for the North and South traffic. You will not have to go thru the city of Washington if there is no reason to travel there.

travel to the West side of Canton is excellent although Route 78 in Canton should be upgraded from the present 2 lane to a 3 or 4 lane to accelerate traffic going North to the expressway and further. There is a lot of commercial development North of Canton as well as the high school which could use this improvement.

Full speed ahead — God luck.

COMMENTS:

I am in favor of this project and agree with the current use of the expressway section through the majority of the improvement. I also think that the priority for construction should be on the east end of Illinois 336.

I would also like to suggest that the state get involved with the conversion of the existing railroad(s) to a bike / walking trail. This would be a very positive benefit to the surrounding communities that might reduce the negative impact of the loss of properties and homes. The cost savings from grade crossings + RR quality grade separations would go a long

Your Thoughts About the Illinois Route 336 Highway Study Peoria to Macomb

Which Public Information Meeting did you attend? Check box. — None

February 20th in Peoria ☐ February 21st in Canton ☐ February 22nd in Macomb ☐

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

I was born in Adams Co., but reside in the Farmington area. I made many trips to Ipava and Fall Creek to care for my parents, now deceased. If you have traveled Rt 24 you would appreciate having a safe highway! There is a definite need for 336 - for safety, business and improvements to highways in this part of the state.

The first part of this road was built on land I grew up on - Rt 57 at Fall Creek. I know the heartache it caused my

COMMENTS:

QUESTION -

WHY ISN'T RTE 9, WEST OF CANTON, UTILIZED??

BY THAT, THE EXPENSIVE COST OF RELOCATING THE RR TRACK BETWEEN COBA + CANTON, THEREFORE CAUSING THE ELIMINATION OF THE COBA - CANTON BLACKTOP. (HICKORY ST)

WHY NOT? IT APPEARS ALL CONTACT WITH THE WETLAND LANES COULD BE AVOIDED, BY USING RTE 9.

(OVER)

COMMENTS (continued):

Why come NEAR CUBA? By so, we loose our Local Rte to CANTON. Why CAN'T 336 come WEST OF CANTON ON Rte 9, by pass FLATT, EXTEND WEST of the Rte 97, Rte 9 AT THE INTERSECTION South West, CONNECTING with the Proposed 336, APPROXIMATELY NEAR the WEST Section # 2 INDICATING MARK, ON your Feb. 07 HIGHWAY Sheet. COMMENTS: No 1 this area needs improved highways.

No 2 I am sure the extension of rt. 24 + 9 to this area + locations to the west would be much more cost efficient than the 336 project.

The port authority + truck + river traffic would welcome any improvements in this area. The Canton community, Cuba, Bushnell all need highway relief now. Am I correct in assuming that the extension of 24 + 9 is closer to reality than the 336 area.

No 3 Last personal: I have question that the proposed alignment three miles west of Canton will have much effect on the Canton Community.

(OVER)

COMMENTS (continued):

#04 If the alignment north of RT 9 could follow county rd 22 North widening the existing road right of way the existing drainage should not be disturbed. There are only 5 dwellings on this road to the Norris Farview blacktop. at least one of them would not be adversely effected. This would eliminate the need to cut angled across several parcels of prime farmland & Pastoral; some of these parcels are owned by our family.

Sincerely
John Wertman

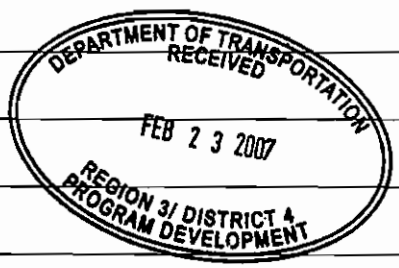
Plsturn to back –



(OVER)

COMMENTS (continued):

February 22, 2007

To: Illinois Department of Transportation

From: Carol VanWinkle

Re: Peoria to Macomb Highway Study

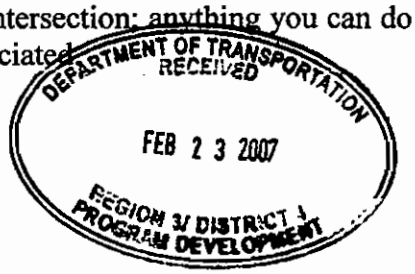
I live on Taylor Road. My chief concern about this proposed Highway is not regarding the route, nor the plan to implement.

I am concerned because of the current number of large trucks that turn north off 116 and use Taylor Road as a shortcut to I-74. Taylor Road is not built to carry this type of traffic; not their weight, their size, and most particularly the residential egress onto a road with a very large vehicle bearing down upon one. The road is quite narrow for large trucks, with dramatic drop offs that have little shoulder and no guardrails in some areas. I am very apprehensive about the number of trucks that would use this shortcut if a freeway were to allow them to exit at Taylor Road.

There are numerous dips and dives in the road that prevent the oncoming vehicle from seeing the car exiting a driveway, as well as prevent the driver of the car from seeing the truck - and it is quite disconcerting to pull out onto the road, look in your rearview mirror, and find a rapidly approaching truck that you know cannot easily slow down.

So - you push on the gas to get up to speed as soon as possible and hope for the best (this also happens with other vehicles).

I am asking you to keep this in mind as you make your plans for signage at the Taylor Road/116 intersection; anything you can do that would alleviate this potential problem is much appreciated.



Feel free to include additional sheets. When finished, drop in the "Comment Box". If you need more time to make a comment, this form can be mailed to: Mr. Eric Therkildsen, P.E., Program Development Engineer, IDOT, District 4, 401 Main St., Peoria, IL 61602. COMMENTS:

The roads between Peoria and Macomb are heavily traveled as well as Peoria and Canton. This area is long over due for a four lane highway. A highway of this magnitude will bring job growth to an area of the State of Illinois that seen higher than average unemployment since International Harvester left Canton. I realize that with the construction of any road there will be an adverse affect on ~~peo~~ some people that live, work and farm along the corridor but when compared to all the positives; jobs, traffic flow, safety, economic groth for the entire area of Peoria to Canton to

(OVER)

COMMENTS (continued):

Macomb. this becomes a project that must be done. I.D.O.T. has done a very good job of picking the best route for the new highway 336. I heard at the pt public meeting that the highway is tem or more years away, meaning that route 336 will have taken nearly fifty years, this is far to long to wait. I know you have alot to do before construction can start but if done in five years labor and material costs will be less, taxes from job growth ~~we~~ as well as from property will lessen the cost of the project. It is time that the State of Illinois to do a project with a positive impact for West Central Illinois.

COMMENTS:

I Thought your MEETING WAS AN Excellent way to show The Residents The Proposed Routing. I personally prefer your preferred (yellow) Routing As it takes The highway far enough away from The City of Canton and yet access from the North or West is still very convient.

Given a choice I would prefer to see The building schedule for the ROAD START AT The Peoria End of the Project. This would Allow TRID Time to Peoria to be Reduced congestion.

COMMENTS:

BY THE CROWD THAT ATTENDED THIS MEETING, THE NEED FOR THIS 336 CONSTRUCTION HAS BEEN SHOWN. HAVING LIVED HERE SINCE 1969 AND WORKING IN THIS AREA SINCE 1961 THE NECESSITY OF THIS ROAD IS VERY IMPORTANT TO OUR WEST CENTRAL ILLINOIS AREA. BEING BORN AND RAISED IN TAZEWELL COUNTY I HAVE SEEN WHAT THE INTERSTATE SYSTEM HAS DONE FOR PEORIA - MORTON - BLOOMINGTON/NORMAL AREA AND POINTS IN BETWEEN. THIS HIGHWAY SYSTEM WILL BE A BUST TO THE ECONOMIC DEVELOPE-MENT OF THE FARMINGTON - CANTON - CUBA - MACOMB

(OVER)

COMMENTS (continued):

AREA. THIS 60 MILE STRETCH HAS MUCH POTENTIAL FOR GROWTH. WE HAVE SKILLED LABOR, GREAT FARM GROUND, RECREATIONAL POTENTIAL, AND TOWNS WITH GROWTH POTENTIAL 35 YEARS AGO I WORKED ON THE HIGHWAY COMMITTEE OF THE CANTON AREA CHAMBER OF COMMERCE. MY HOPE THEN AND NOW IS THAT THE INTERSTATE HIGHWAY SYSTEM WOULD COME WEST FROM PEORIA AND HOOK UP TO QUINCY, ILL. AND PARTS WEST.

COMMENTS:

My name is Mike Keppler and I am the President of Doubl-Chuck Farms, Inc. We are in favor of Route 336. All possible routes go through our land. We highly endorse the West Route as the endorsed route. I believe it serves as a natural corridor between the stripped ground and the highly tillable, fertile soil. This route also allows the proper space for Canton to grow. I also believe it is the cheapest. I endorse your recommendation.

COMMENTS:

As a party with a beneficial interest in property along the proposed corridor, in the area where Maxwell and Farmington Road intersect, I have attended the 2006 and 2007 IDOT Open Houses. I thought they were very well done. In the area I am interested in regarding Maxwell Road/Farmington Road/336, it appears the corridor is right where it should be. This is a very worthwhile project which will benefit all of the areas west of Peoria to the Mississippi River. These are beautiful areas for living and recreation and, with this new highway, industry and job growth should follow as well. Hopefully young persons growing up in these western counties won't have to leave to find work because this highway will promote job growth in the area where they live.

Keep up the good work and hope to see ground broken in the next couple of years on this project.

Thomas L. Lemmon

COMMENTS:

I AM SO GLAD TO SEE THAT THIS NEW HIGHWAY IS TO BECOME A REALITY. HAVING DRIVEN FROM PEORIA AREA TO MACOMB AND CARTHAGE HUNDREDS OF TIMES OVER MY 44 YEARS OF DRIVING, IT HAS ALWAYS BEEN MY OPINION "THERE'S NO GOOD WAY TO GET THERE."

AN OPERATING ENGINEER BY TRADE, I OF COURSE WELCOME EXPANDED WORK OPPORTUNITIES FOR MYSELF AND MY FELLOW OPERATORS. A COMPLETED, 4 LANE HIGHWAY WILL BE A BOON FOR OUR "FORGOTTONIA" COUNTIES IN TERMS OF ECONOMIC OPPORTUNITY AND EXPANSION.

THE PERILS OF TRAVELING EXISTING ROUTES,

(OVER)

COMMENTS (continued):

ESPECIALLY DURING INCLEMENT WEATHER SHOULD BE A PRIMARY JUSTIFICATION FACTOR TO BUILD THE HIGHWAY, NO MATTER THE FINAL SELECTED ROUTE. TRAILING TRACTORS AND GRAIN WAGONS DURING PLANTING + HARVEST CREATES UNSAFE SITUATIONS EVERY DAY. IF ONLY FOR CORRECTION OF THOSE SCENARIOS, PLEASE GO FORWARD WITH ROUTE 336.

THE SMALL COMMUNITIES ALONG THE ROUTE WILL CERTAINLY BENEFIT AND WILL PROSPER AS A RESULT.

Your Thoughts About the Illinois Route 336 Highway Study
Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☐ February 22nd in Macomb ☒

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: I support the current Macomb alignment plan — it would make more sense to use the existing 136 and Rt 95 though.

Rt 41 needs an intersection! This would be a definate improvement over the current plan

To Whom It May Concern:

I was at your February 22nd meeting in Macomb, IL. About Illinois 336 and thought you should be aware of the City of Bushnell's Gas main that will be along part of the route shown at this meeting. The City of Bushnell has a 6" 300lb. Gas main that runs along the north side of County hwy. 5 in Putman and Buckheart Township in Fulton County.

I have enclosed maps with the general location of this main. It runs on the north side of county hwy 5 from section 1 in Putman Township to section 5 & 6 in Buckheart Township. It is between the road on the railroad that run along side hwy 5 and is approximately 48" deep.

If you have questions about this gas main you can call our office and talk to either Mike McCleery or Kevin McCleery at the enclosed numbers.

Your Thoughts About the Illinois Route 336 Highway Study
Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☑ February 22nd in Macomb ☐

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

I have attended each of the Public Information Meetings in Canton on the current project. I feel the February 21, 20077 presentation refected a genuine response to public input. It was more specific and therefore more informative. I especially liked the alignment in the vicinity of the Illinois River Correctional Center and Spoon River College. Presently, the college is hidden from much of the public. Most of the people who get exposed to a view of the college are those who attend it.

That's a trait of Canton's. Hidden from view are Graham Hospital and YMCA that have big investments, but aarae not located to be showcased to travelers.

I talked to a friend of mine at the meeting, John Wertman, who os a very knowledgeable and successful farmer. His appraisal of the plan was very high. In essence he said, "Care had been shown in trying to avoid chopping up the very good farm land." He owns property on the north side of Route 9 and said, "His property will not be affected as much as was expected a year ago, due to slight alignment changes."

COMMENTS (continued):

He did express concern for Phil Randolph who was quoted in the Canton Daily Ledger Feb 22, 2007. Randolph stated, "Three of the four farms I farm will be ruined by this. It will impact around 580 acres of the land I farm." He went on to say the farm land has been in the family since 1812.

If in fact the farm will be impacted as much as he suggests and there is a way it could be corrected without compromising the objectives of the planning, it possibly would be to the interests of IDOT to make alignment changes if that is possible.

I"ve been exposed during the past 40 years to all kinds of ideas from analysis of the needs, to a Supplemental Freeway, Toll Road and several others. This is by faaar the most feasible engineering plan to be submitted, to serve the interests of West Central Illinois. Bravo to IDOT for producing the plan without one of our traditional tribal dances.

COMMENTS:

The new pwposed "yellow" alignment is my preferance because it uses more existing right-of-ways.

However, the proposed destruction of prairie along the railroad between Cuba and Canton is unacceptable.

Additionally, a number of wildlife underpasses should be included in the final plans.

FEB. 26, 2007

COMMENTS:

MY COMMENTS OF MARCH 25, 2006 STILL STAND. HOWEVER, I'M SORRY THAT NOT ALL OF MY COMMENTS WERE ANSWERED

THE FOLLOWING THREE COMMENTS CONCERN THREE ENVIRONMENTAL PROCESSES YOU CAN AND I HOPE YOU WILL DO:

1. INCLUDE MANY WILDLIFE CROSSINGS FOR ALL KINDS OF PLANTS + ANIMALS. THIS MINIMIZES HABITAT FRAGMENTATION AND ALLOWS FOR MORE CORRIDORS FOR THEIR DISPERSAL & MIGRATION. PERHAPS THESE CAN BE MODIFIED TO ALLOW FARMERS TO GET TO THE OTHER SIDE OF THEIR FRAGMENTED LAND.
2. INCREASE & INTEGRATE THE MITIGATION AREAS INTO THE DISTURBED HABITAT RATHER THAN JUST A SET-ASIDE SQUARE OR RECTANGULAR AREA. USE MULTIPLE AND LINEAR AREAS.

(OVER)

COMMENTS (continued):

3. DO NOT BURN CLEARED PLANT MATERIALS SO AS NOT TO INCREASE ATMOSPHERIC POLLUTION. USE THESE MATERIALS POSITIVELY TO CONSTRUCT WILDLIFE HABITAT (AS BRUSH PILES) TO HELP MITIGATE THE HABITAT DESTRUCTION. I'M SURE IDNR CAN PROVIDE YOU INSTRUCTIONS ON HOW TO DO THIS & WHAT WOULD BE DESIRABLE. ALSO REQUIRE CONTRACTORS TO HAVE CONVERTERS ON THEIR MACHINERY TO PREVENT AIR POLLUTION VIA ENGINE COMBUSTION EXHAUST. HAVE YOU NOTICED THE CLOUDS OF BLACK EXHAUST FROM THE HERD OF MACHINES? THIS IS UNNECESSARY & SHOULD BE PREVENTED

THREE COMMENTS ON THE YELLOW CORRIDOR-ALIGNMENT:

1. USE MORE EXISTING RIGHT-OF-WAY PARICULARLY ROUTES 95 & 116. AT LEAST THEY COULD BE TWO OF THE FOUR LANES
2. WHY NOT USE ROUTE 9 FROM CANTON TO BARKER AND ROUTE 24 TO PEORIA 474? IT USES MORE EXISTING RIGHT-OF-WAY IT SEEMS.
3. DON'T DESTROY THE CUBA TO CANTON RAILROAD PRAIRIE. IT'S OUR NATURAL HERITAGE REMNANT (IF DESTROYED SHOULD BE MITIGATED).

THANKS FOR THE WELL DONE OPEN HOUSE. GREETINGS TO PAULA GREEN & GREG LARSON.

COMMENTS:

I am again writing in response to the Open House Public Information Meeting I attended at Canton High School on Wednesday, February 21, 2007. My father is Robert Murphy and property owned by my family is one of the most heavily effected on the West side of Cuba. The highway passes through 3 fields, 1 pasture, and numerous acres. This highway will be very unfortunate for my son who wishes to continue the family's farming operation. However, I am very pleased to see the highway no longer passes right in front of my parents house taking out the 2 primary farming fields and the quite country lane leading to their house that has meant so much to me for all my life.

My closing remarks are that the officials making the decisions for this project do not get caught up solely in the challenge of completion. Think, long and hard, about the people it will effect and the money it will take. What will happen to the small towns in its path went everyone has a "fast track" to Peoria? Will their small town businesses die? Would our children benefit better from the money for this project going into our school systems? Are we willing to destroy more of our countryside in the name of progress?

<u>Quincy to Macomb is good enough for me, how about you!</u>

Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

I am satisfied overall with the preliminary preferred alignment displayed. As a long-time supporter of Spoon River College, I would have preferred the plan that brought the highway closer to the college and believe the city of Canton would benefit more with the alignment closer to the town.

However, I realize there are many factors to consider and believe that the college and our town will benefit greatly even with the displayed alignment.

COMMENTS: I was pleased to see that the most recent alignment is using less farm ground on the west side of Canton, and is instead following existing roadway near the Randolph farm in Section 4. I was also pleased to see the roadway south of Route 116 is following property/section lines as opposed to crossing through the center of existing farm ground.

I live at Wee Ma Tuk Hills and travel to both Peoria & W.I.U. on a regular basis. I support this project and look foward to seeing the construction process begin.

COMMENTS:

Adding an expressway to the Peoria area is nothing but an asset. This expressway will control traffic (Rt. 116 - Rt 78 - Rt 95). The current conditions are dangerous. To many motorist are stopping the traffic trying to turn at intersections driveways, ect., let alone crossing on coming traffic.

Also this expressway would be an economic pipeline to the smaller towns outside of Peoria to Macomb area.

COMMENTS:

Canton desperately needs this route done. Having the route go through or as close as possible to the Industrial Park makes the most sense to me. Is there no way to speed up this process? I wonder if I will live to really see it happen. Feels like it has been on the agenda forever.

PROGRAM DEVELOPMENT

March 7, 2007

Mr. Eric Therkildsen, P.E.
Program Development Engineer
Illinois Department of Transportation, District 4
401 Main Street
Peoria, IL 61602

Dear Mr. Therkildsen:

I am a land owner west of Cuba, and I totally support the building of Illinois 336 even thought it looks like the route goes directly through my land. My family and I have owned this farm land for nearly 100 years.

I would like for you to take a closer look at one interchange approximately two miles west of Cuba. In the Section 3 study, you show a new entrance for Cameron Road and 336. You propose buying up productive farm ground and building a new approach to 336 but then leaving an unnecessary gravel road of Cameron Road.

The current proposal show the occupants living in the home of Lyle Lefler and Greg Deakin will have to travel back north ½ mile before they turn and head back south over ½ mile to reach a point less than 100 yards from where they started. Why build the new approach? Why not improve or maintain the existing road and make it curve straight before crossing 336? By reshaping the existing township road, local farmers do not lose their land, existing roads are improved and state road construction funds are saved.

I own the tract of land just west of the proposed new intersection and this engineering design just needs to be reviewed.

Thank you for your consideration. If you have any questions, please contact me at 217-529-8973.

Sincerely

Garrett Deakin

COMMENTS:

1) We should be fixing the roads we have not building newones.

2) We should make Rt 9 four lanes from Canton to Rt 24.

3) Our farm has been in the family for over 100 years. Our grandchildren live in Farmington & they think it is wonderful to come to the farm. No traffic – lots of space to play & help Grandpa. If this highway goes through – it will

(OVER)

COMMENTS (continued):

Be just like living in town. Country living is lost.

④ Exactly what is achieved by taking some the best black flat farmland in Peoria County out of production. My husband lost his #40,000/yr job several years ago & was ~~not~~ many depending on the farm for returned income.

⑤ We need to worry more about education in Illinois instead of building ~~no~~ new roads. It a shame when you have better prisons than you do schools.

⑥ This has nothing to do with the people of this state or county — its all about politics.

Re: Our phone conversation on 3-06-07

COMMENTS:

Thank you for your help explaining the proposed alignment of 336 in the Cuba area. Your group conducted very informative meetings.

First, I am opposed to the 336 route - especially from Rte 9 to the south and west. If the road must come to the prison area it would appear better to follow Rte 9 west to Bushnell and on to Hood Hope Jct and connect to the present 4 lane Rte 67. This would disturb less prime farmland, especially in McDonough County and be on the north side of Macomb closer to 336 West of Macomb. The Macomb bypass would still serve the east side of town to Rte 67 South.

If the road must come west on the Cuba-Canton

(OVER)

COMMENTS (continued):

blacktop past our farm and seed business I have some concerns that need your consideration.

We have a seed business that creates considerable traffic to and from our farm - including tandem and semi-trucks. At present, no crossover is shown at our driveway. It would be inconvenient and very dangerous for traffic to and from our farm to have to make U-turns at Tenth St. intersection and/or at next shown crossover at unnamed township road to east of our driveway.

Large trucks cannot make a U-turn from a left turn lane, so would have to start turning from the right lane, making it a very dangerous situation.

We also must haul grain from all fields South of road (shown on map) crossing the highway at our present driveway. No crossover at this point would require more dangerous U-turns. The crossover at the unnamed township road to our east has little to no traffic. This location could get by with a right turn only.

In the matter of an access road on the south side of road, it need only come to Township road from 10th street. Properties on east could be accessed by right turn only at the

Your Thoughts About the Illinois Route 336 Highway Study
Peoria to Macomb

Comments:
Dear Sirs:
I am opposed to the Peoria to Macomb, but it appears inevitable that the Highway 336 will be built by the State of Illinois. I believe that such a highway if it is necessary could have been built along a different corridor so as to disturb less farm land and private property such as our family farm.

I am partner in a family farm that is currently in the path of Highway 336 north of Cuba, Illinois. The recent meetings unveiled a plan to route Highway 336 through the south side of the Raymond Hackett Farm. The farm is located in Fulton County, Putnam Township Section 17 and Section 8. Highway 336 will form a large loop around the north side of Cuba and cross our alfalfa field. The 300 foot wide corridor will ruin the productivity of the field and divide the 20 acre field into smaller less viably patches. Therefore, if the Highway 336 must follow the proposed route north of Cuba we suggest our southern alfalfa field be spared and the road shifted farther south. The road would cross land that is currently not in utilized for agriculture on the east and west of Section 17, NE 40 NE Quarter of the SW quarter. The road would only cross a 300 foot wide swath of a 5-7 acre row crop field between a pasture (not in use) and woods (not in use).

If the road is shifted slightly to the south, it will still allow High way 336 to continue around the north side of Cuba without disturbing this working farm and allow engineers to straighten the curve and make it last severe.

We pray that you will consider our request to shift the Highway 336 south away from our farm, which we believe could be done with the least amount of impact to our productive family farm.

Thanks for your consideration in this matter.
Regards,

Tim A. Hackett

Your Thoughts About the Illinois Route 336 Highway Study
Peoria to Macomb

Comments:

Dear Sirs:

I am opposed to the Peoria to Macomb Highway 336, but it appears inevitable that 336 will be built by the State of Illinois. I believe that such a highway, if it is necessary could have been built along a different corridor so as to disturb the least amount of productive farm land and private property such as my Uncle's family farm.

My Uncle, Raymond "Tim" Hackett and his son, Tim A. Hackett have a viable and productive grain and cattle operation, that is currently in the path of Highway 336 north of Cuba, Illinois. The recent meetings unveiled a plan to route Highway 336 through the south side of the farm, located in Fulton County, Putnam Township Section 17 and Section 8. Highway 336 will form a large loop around the north side of Cuba and cross their alfalfa field. The proposed 300 foot wide corridor will ruin the productivity of the field and divide the 20 acre field, into smaller less viable patches. Therefore, if Highway 336 must follow the proposed route north of Cuba; I suggest the southern alfalfa field of the Hackett Farm be spared and the road shifted farther south. The road would traverse land that is not currently utilized for sustainable agriculture production. The land is located on the east and west of Section 17, NE 40 NE Quarter of the SW quarter. The road would only traverse a 300 foot wide swath of a 5-7 acre row crop field between a pasture (not in use) and woods (not in use).

If the road is shifted slightly to the south, it will still allow High way 336 to continue around the north side of Cuba without disturbing this working farm and allow engineers to straighten the curve and make it less severe.

We pray that you will consider our request to shift the Highway 336 south away from the Hackett farm, which we believe could be done with the least amount of impact to the productive Hackett family farm.

Thank you for your consideration in this matter.

Respectfully,

Donald "Ike" Hackett

Your Thoughts About the Illinois Route 336 Highway Study Peoria to Macomb

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ☐ February 22nd in Macomb ☑

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

My husband and I live at 21250 N. 1400th Rd. Macomb. His parents live next to us at 21040 N. 1400th Rd. We operate our farming operation and our family owned grain business from his parent's house.

Our main concern is having traffic moving sixty-five miles per hour at the end of our one hundred foot driveway. Our second concern is access to our fields and the ability to go the one thousand feet between our two houses without having to travel several extra miles. If you could just leave the blacktop road in front of our houses between Route 41, west of our houses, and the railroad tracks east of our houses, we would greatly appreciate it. When we built our once in a lifetime farm home fifteen years ago we did not build it on Route 41 because we did not want to live on a highway.

(OVER)

COMMENTS (continued):

During the day I work at the office in my in-law's house, frequently coming home to have lunch, do laundry, look up farm records, let the dog out and do other work at home. Without an access road, these trips would be considerably longer. Also, we farm on both sides of the road and an access road on the north side would at least make farming those fields more accessible.

Our other concern is we have semi-trucks going in and out of his parent's house all day long, everyday, year-round. Your proposal has them entering Route 41 directly north of the intersection with Route 336. We are questioning if they will even have room to make the turn south before coming to the stop sign.

Please consider moving the new road slightly to the south and leaving our blacktop as an access road.

Thank you,

Molly Ferguson

Dear Sirs,

I am entirely in favor of building Illinois 336. I compliment you on your efforts and as a landowner who is affected and someone who has lived here all my life, the project is needed.

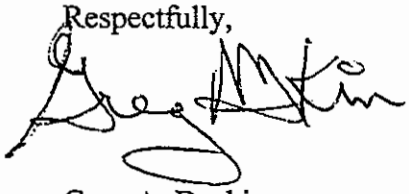
I have one exception to the route. Approximately two miles west of Cuba in your Section 3 study you show a new entrance for Cameron Road to cross 336. I own the field which you propose to bisect to have traffic come up to a stop before it crosses 336. That is a terrible destruction of a very productive field and also creates an unnecessary spur of Cameron Road for our already financially challenged township to maintain.

Your current proposal show the occupants living in the homes of Lyle Lefler and Greg Deakin will have to travel back north over 1/2 mile before they turn and head back south over 1/2 mile to reach a point less than 100 yards from where they started. I asked the representative at the meeting in Canton why build this new spur rather than improve or maintain the existing road and make it curve straight before crossing 336. They did not know why.

These are rural country roads where traffic only goes 30-40 miles per hour. The traffic will have to come to a complete stop before it crosses 336. You can make a small curve on Cameron Road before traffic crosses 336 and save enormous expense building the spur and having 2 Cameron Roads with one destroying a field. I own three other properties you will be crossing and those make sense. The current proposal regarding Cameron Road just needs re-thought.

Thank you for your consideration. For questions please feel free to contact me at my office at 309/785-5058.

Respectfully,



Greg A. Deakin

March 5, 2007

I live near the intersection of Co. Highway's #21 and #22, west of Canton, near the preferred alignment in Section 4 for Hwy 336. An IDOT engineer at the February 21, 2007 meeting told me to use this comment sheet as an avenue to inform the Dist. 4 IDOT group about the proposed 336 running perpendicular to my private water line. Fairview has a pump station, located at the #21 and #22 intersection. My line extends east (1000 ft.) from a tap south of the pump station. Please make a note of this information unless the proposed highway project is scrapped.

The engineer I spoke to also indicated that IDOT originally wanted to use some of the recently purchased IDNR property, farther west, but was turned down by the Director of IDNR. Apparently the IDNR failed to read the IDOT Initiatives pamphlet that states that the two departments (IDOT and IDNR) along with IHPA work together to meet the needs of the public.

I had the opportunity to observe IDOT in action, up close, within the last few years, and have not been impressed with the planning or the execution.
The field engineering was wasteful and lacking in common sense. I have no faith in this initiative and I do not believe that the benefits will be that significant for Illinois. I feel that we could do better by maintaining and improving the roads we have.

COMMENTS:

My husband and I are new to Macomb. We have heard the process was very thoughtful regarding planning a route to avoid wildlife areas of importance. We would just like to mention that we would love to see more train routes or mass transit. We need to think "energy conservation" and "future," (seven generations in advance). Then our decisions will be (more likely) sustainable ideas to build upon, rather than to repair in the future.

Thank you, Lisa Graves

Peoria to Macomb

DEPARTMENT OF TRANSPORTATION MAR 07 2007 REGION 3 / DISTRICT 4 PEORIA, ILLINOIS

Which Public Information Meeting did you attend? Check box.

February 20th in Peoria ☐ February 21st in Canton ■ February 22nd in Macomb ☐

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS: When the previous maps of the three corridors were shown to the public it appeared there was the possibility that 336 could be located approximately 500 yds more or less behind our home. I have lived one mile West of Cuba at 11867 E. Lassiter Rd. since 1990 and have spent many thousands of dollars renovating this property. I also realize there is a definite need for a four lane highway in this area. This is the only way to attract industry here and even if it doesn't, if we do nothing its a certainty that industry will not be interested in "Forgottonia". I am willing to sacrifice in order to keep the businesses we have and to encourage more of the same. I have immediate family members that have had to leave this area to pulfil their future in what they have spent much time and (OVER) money in college and/or training

COMMENTS (continued): Making part of Rt #24 a four lane would only end up a dead-end in Canton and do nothing of the rest of West central Illinois. Some people seem to think 336 is just a road from Peoria to Quincy. Mr. Randolph (farmer) of Canton feels this is a better answer. Apparently if some other farmer has to give up land that's alright because it isn't his land. 336 represents approximately 2000 acres of tillable ground lost which provides jobs for 2 full time and 1 part time persons. 336 will surely generate more employment than what is lost in jobs created by 2000 acres of row crop ground. Farms are so large now that farmers think nothing of moving equipment 30 miles + more to put in crops and yet complain about having to drive across the highway that splits their farm. I'm a previous farmers wife and understand. I'm sure people will be paid the going price for ground needed for 336.

I commend the people responsible for all their hard work on this project and am looking forward to the next step in achieving this goal and the time is now!

Beverly Bishop

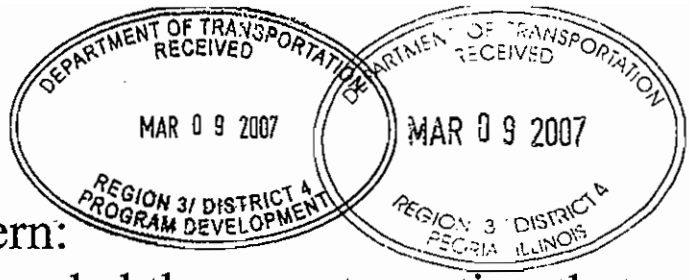
Please Open The East Haulage Road To 336
CHY 17
To Fairview
To Norris
Allowing access from the East haulage road would remove some of the farm land access roads.
Closing the east haulage road forces several new people to use the Cypress Rd. south enterance. Also, this would create a deadend road with only one exit. The condition of the road would need to be greatly improved especially if there is only one exit.
West haulage road
East haulage road
Canton Country Club Lake
East haulage road
Cypress Rd.
To Double T
To Canton
Big Creek Park



To Whom It May Concern:

My husband and I attended the recent meeting that you held at the Canton High School in Canton, Illinois, last week and have attended every meeting that you have scheduled to see how much of our farm land you are going to destroy.

Even though you are planning to go through two of our farms and destroying land that we get our income from, the 2007 route is a better route for us instead of the 2006 route where you would have put that road through destroying our best ground that was purchased by my husbands Grandfather many years ago for his family, which is now 5 generations.

I think of all the business in Canton that are for this project because they think it will increase their business, which is a joke, because if this big highway goes through everyone will jump on that road and go to Peoria or Macomb for our purchases not Canton. o I wonder how well those business would like it if you said to them, "Gee I am sorry but we are putting the road right through the middle of your store or business, and you won't be able to get any income from your business anymore". I bet they would be very up set and say how could can we make a living if you take our business. It amazes me that all of you who think that this project is necessary feel that it is right to come to people and say we are taking your land rather you like it or not even when we DO NOT

WANT TO SELL OUR LAND. Isn't this the land of the free and the land that your ancestors purchased your land.

We have another concern that we would like to mention. If you take the tax dollars away from all of the farm land that you are going to destroy with this road where will the money come from for our township to maintain the roads that we travel, our schools to stay open, and our small town to keep running.

We just returned from Chicago today because of a doctor appointment for my husband at the Lung Transplant Center in the Loyola University Hospital and if you have all that money to waste on a road take route 55 from Cuba to Chicago and see all the road work that needs to be done. Use the money for that. Take care of the roads that we all ready have.

When we have elderly people who can barely meet their bills and have to decided what medicine they can afford and what medicine they can do without, and young families with small children going to bed hungry and doing without doctors care and medicine because they can not afford it. Doesn't it bother you to know that this is happening to people in our state and yet you want to waste all that money on a road that we do not need. How do you sleep nights wasting all that money?

COMMENTS:

ILLINOIS NEEDS TO TAKE CARE OF THE CURRENT HIGHWAYS RT 116 & RT 24 - WHY SPEND MORE MONEY ON SOMETHING THAT THEY WON'T MAINTAIN ANY BETTER USE THE MONEY TO UPGRADE CURRENT HIGHWAYS LEAVE OUR PRIME FARM GROUND ALONE -

~~WHY THE SOUTH RT 9 NOT THE NORTH~~ - LOOKS TO ME LIKE YOU COULD OF WENT NORTH OF HANNA CITY & SAVED SOME GOOD FARM GROUND

WHAT'S THE TIMELINE ON THIS THING -

NOT HAPPY IN HANNA CITY

March 9, 2006

District Engineer
Illinois Department of Transportation
401 Main Street
Peoria, IL 61602-1111

To: Mr. Eric Therkildsen,

I am writing regarding the proposed Route 336 from Macomb to Peoria. I feel it is a foolish use of tax dollars to be using McDonough County township road 1400 for the alignment of 336 rather than using US Highway 136 which is just 2 miles south. US Highway 136 all ready has much of the right of way needed to build a four lane highway.

I am also writing on behalf of Bill and Donna Ferguson who live at 21250 N. 1400th Rd., Macomb, IL and Tim and Molly Ferguson who live at 21040 N. 1400th Rd., Macomb, IL. They are farmers and own a grain business from their home.

I am concerned with traffic moving sixty-five miles per hour at the end of their one hundred foot driveway. My second concern is the access to their fields and the ability to go one thousand feet between their two homes without having to travel several extra miles. It would be much easier for them if the blacktop road in front of their houses was left in place between Route 41 and the railroad tracks east of their homes. They do not wish to live on a highway.

Molly Ferguson manages the grain business office located in Bill and Donna Ferguson's home. Because of this, she frequently makes trip back and forth from her home to the grain business office. Without an access road, these trips would be considerably longer. Also, they farm on both sides of the road. An access road on the north side would at least make farming those fields more accessible.

The other concern is the semi-trucks going in and out of Bill and Donna Ferguson's driveway all day long every day year-round. The current proposal has the trucks entering Route 41 directly north of the intersection with Route 336. I am questioning if they will have room to make the turn to the south before coming to the stop sign.

I am asking you to please reconsider using US highway 136 for the 336 route from Macomb to Peoria. If this is not a possibility, then please consider moving the proposed road slightly to the south and leave the blacktop as an access road.

Thank you for your consideration.

Sincerely,

Robert E Ferguson

The current proposal has the trucks entering Route 41 directly north of the intersection with Route 336. I am questioning if they will have room to make the turn to the south before coming to the stop sign.

I am asking you to please reconsider using US highway 136 for the 336 route from Macomb to Peoria. If this is not a possibility, then please consider moving the proposed road slightly to the south and leave the blacktop as an access road.

Thank you for your consideration.

Sincerely,

Judy Leighty

March 9, 2006

District Engineer
Illinois Department of Transportation
401 Main Street
Peoria, IL 61602-1111

To: Mr. Eric Therkildsen,

I am writing regarding the proposed Route 336 from Macomb to Peoria. I feel it is a foolish use of tax dollars to be using McDonough County township road 1400 for the alignment of 336 rather than using US Highway 136 which is just 2 miles south. US Highway 136 all ready has much of the right of way needed to build a four lane highway.

I am also writing on behalf of Bill and Donna Ferguson who live at 21250 N. 1400th Rd., Macomb, IL and Tim and Molly Ferguson who live at 21040 N. 1400th Rd., Macomb, IL. They are farmers and own a grain business from their home.

I am concerned with traffic moving sixty-five miles per hour at the end of their one hundred foot driveway. My second concern is the access to their fields and the ability to go one thousand feet between their two homes without having to travel several extra miles. It would be much easier for them if the blacktop road in front of their houses was left in place between Route 41 and the railroad tracks east of their homes. They do not wish to live on a highway.

Molly Ferguson manages the grain business office located in Bill and Donna Ferguson's home. Because of this, she frequently makes trip back and forth from her home to the grain business office. Without an access road, these trips would be considerably longer. Also, they farm on both sides of the road. An access road on the north side would at least make farming those fields more accessible.

The other concern is the semi-trucks going in and out of Bill and Donna Ferguson's driveway all day long every day year-round. The current proposal has the trucks entering Route 41 directly north of the intersection with Route 336. I am questioning if they will have room to make the turn to the south before coming to the stop sign.

I am asking you to please reconsider using US highway 136 for the 336 route from Macomb to Peoria. If this is not a possibility, then please consider moving the proposed road slightly to the south and leave the blacktop as an access road.

Thank you for your consideration.

COMMENTS: As a regular traveler from Cuba to Peoria, & I am greatly opposed to the proposed route for 336. & I personally feel that with some repair, the already existing roads are just fine. & I also do not believe that 336 will in any way benefit any of the small towns between Macomb & Peoria. & I have not been provided any benefits for these small towns. & I further believe it will destroy many small, privately owned businesses that have been around for many years, just struggling to get by. Why would consumers continue to patronize these businesses when they can hop on the interstate & travel to Peoria in just a few minutes to receive the same products from corporations who

(OVER)

COMMENTS (continued): cheat their employees to offer these same products at a much cheaper rate. Also, as a tax payer, I see no reason to spend money we currently do not have. I fear that my children & grandchildren will have to pay for our mistakes. I would much rather pay more for educating our children since they are our economies future. However, if 336 cannot be stopped, I pray that it will not be placed along IL 95. I see no purpose in destroying all of the homes along the route only to use a small portion of it. I would like to see 336 far from Cuba.

COMMENTS:

Based on the preferred alignment recently unveiled I am in favor of the IL Rt 336 Highway.

It is important that this highway stays outside the western boundary of Canton's city limits

COMMENTS:

THE SHORTEST DISTANCE BETWEEN TWO POINTS IS A STRAIGHT LINE. ILL 336 NEEDS TO BE COMPLETED ASAP! A BLENDING OF ORIGINAL CORRIDORS YIELDING THE PRESENT PLAN IS PROBABLY A REASONABLE ACCOMODATION WHEN CONSIDERING ALL FACTORS, INCLUDING NATURAL TERRAIN AND LINKS WITH OTHER MAJOR HIGHWAYS. OVERALL, I AM PERSONALLY DISAPPOINTED IN IDOT'S PLANS FOR CENTRAL ILLINOIS. POLITICIANS HAVE TUNNEL VISION AND DON'T VISUALIZE BEYOND THEIR JURISDICTION. DUMP THE PLANS FOR AN I80 CONNECTION AND E. PEORIA RING ROAD. A PLANNED EXPENDITURE OF 1.4 BILLION DOLLARS (PJS) WOULD BE BETTER SPENT ON FOLLOWING:

A. UPGRADE US 24 EAST FROM ILL. 89 (32 miles) TO GRIDLEY WITH A NORTH BY-PASS OF EUREKA. THIS WOULD PROVIDE BETTER ACCESS TO WI via I39 AND CHICAGO AREA I55. (GIVE PEORIA A REST!)

B. UPGRADE US 34 FROM MONMOUTH (23 miles) TO BURLINGTON, IA.

March 9, 2006

District Engineer
Illinois Department of Transportation
401 Main Street
Peoria, IL 61602-1111

To: Mr. Eric Therkildsen,

I am writing regarding the proposed Route 336 from Macomb to Peoria. I feel it is a foolish use of tax dollars to be using McDonough County township road 1400 for the alignment of 336 rather than using US Highway 136 which is just 2 miles south. US Highway 136 all ready has much of the right of way needed to build a four lane highway.

I am also writing on behalf of Bill and Donna Ferguson who live at 21250 N. 1400th Rd., Macomb, IL and Tim and Molly Ferguson who live at 21040 N. 1400th Rd., Macomb, IL. They are farmers and own a grain business from their home.

I am concerned with traffic moving sixty-five miles per hour at the end of their one hundred foot driveway. My second concern is the access to their fields and the ability to go one thousand feet between their two homes without having to travel several extra miles. It would be much easier for them if the blacktop road in front of their houses was left in place between Route 41 and the railroad tracks east of their homes. They do not wish to live on a highway.

Molly Ferguson manages the grain business office located in Bill and Donna Ferguson's home. Because of this, she frequently makes trip back and forth from her home to the grain business office. Without an access road, these trips would be considerably longer. Also, they farm on both sides of the road. An access road on the north side would at least make farming those fields more accessible.

The other concern is the semi-trucks going in and out of Bill and Donna Ferguson's driveway all day long every day year-round. The current proposal has the trucks entering Route 41 directly north of the intersection with Route 336. I am questioning if they will have room to make the turn to the south before coming to the stop sign.

I am asking you to please reconsider using US highway 136 for the 336 route from Macomb to Peoria. If this is not a possibility, then please consider moving the proposed road slightly to the south and leave the blacktop as an access road.

Thank you for your consideration.

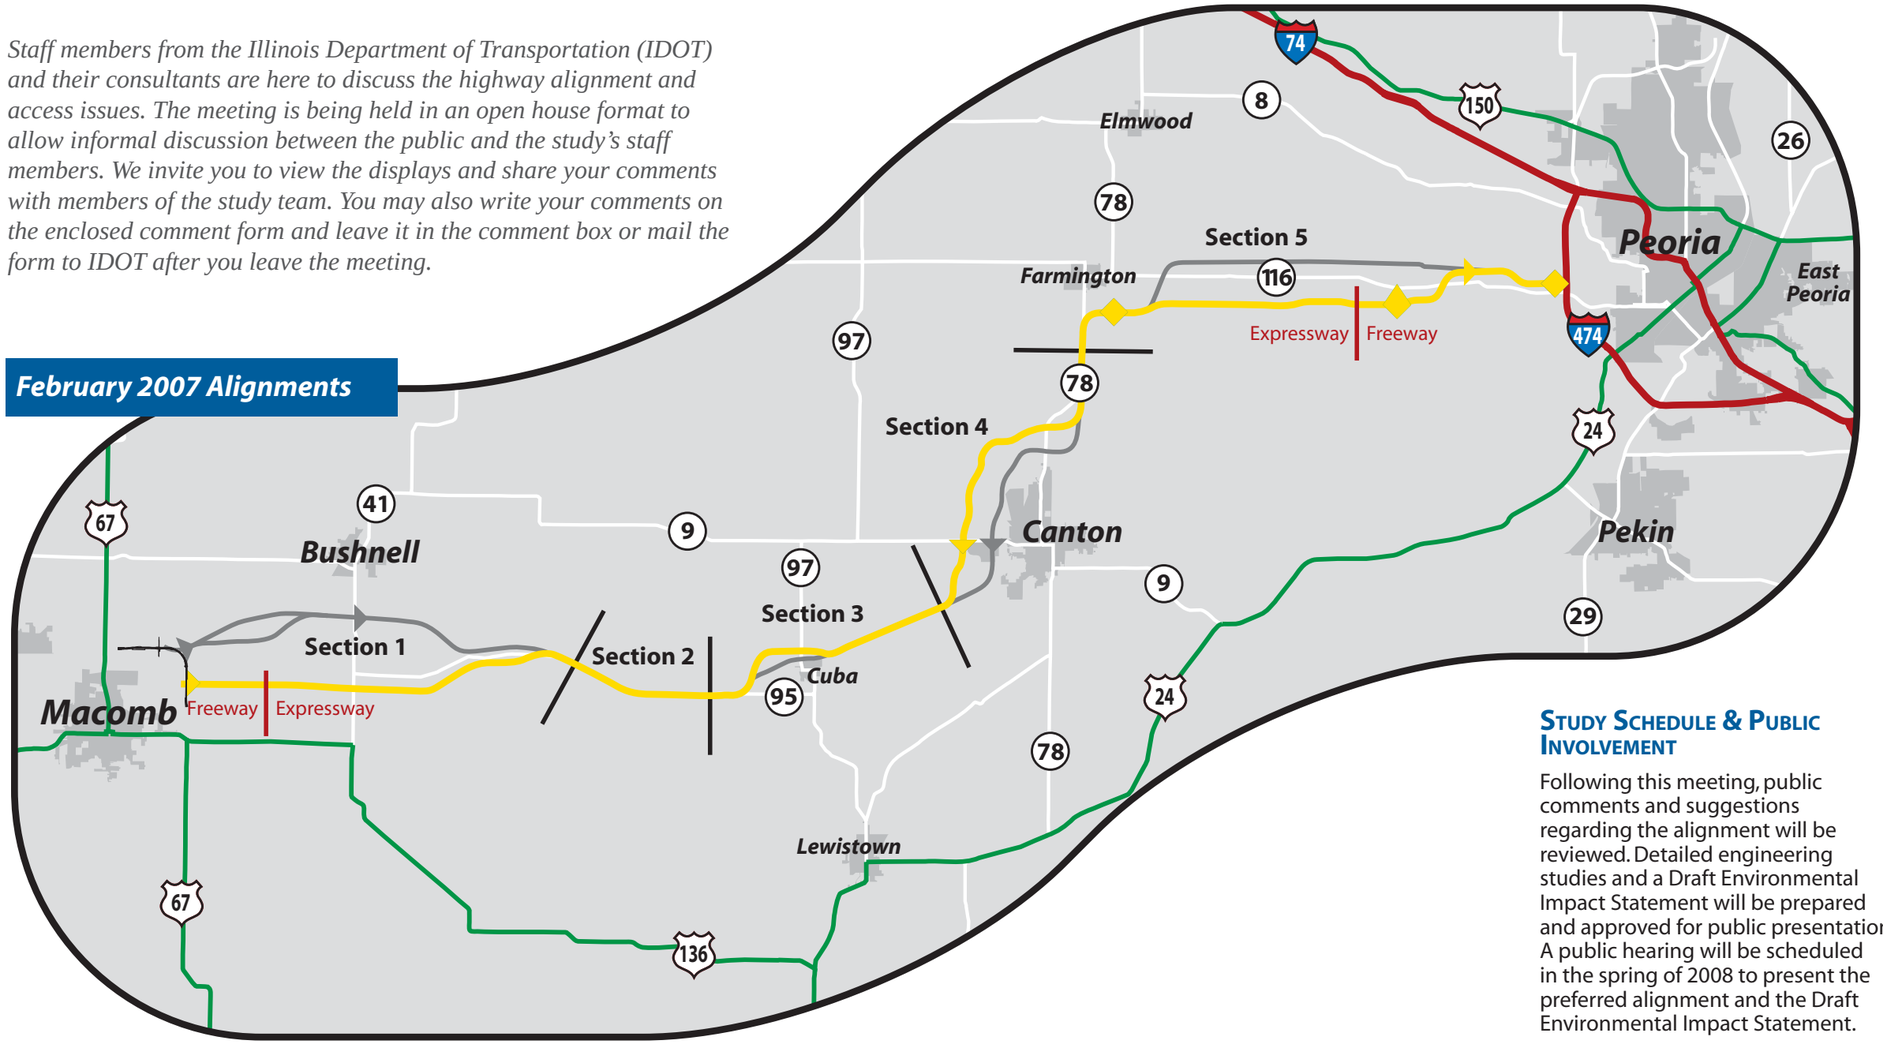
Welcome to this Public Information Meeting for the Illinois 336 Peoria to Macomb Highway Study

Staff members from the Illinois Department of Transportation (IDOT) and their consultants are here to discuss the highway alignment and access issues. The meeting is being held in an open house format to allow informal discussion between the public and the study's staff members. We invite you to view the displays and share your comments with members of the study team. You may also write your comments on the enclosed comment form and leave it in the comment box or mail the form to IDOT after you leave the meeting.



Preliminary Preferred Alignment

The preliminary preferred alignment is shown in yellow on the above map and the large scale exhibits presented in this meeting. The alignments that were shown in the March 2006 public information meeting and are not preferred are shown in gray. The preliminary preferred alignment is being refined with additional engineering, drainage, access and geometric analysis and studies. The alignments shown in gray will not be further studied. The impact table for the preliminary preferred alignment is presented on the back page of this handout. The numbers have been updated since the March 2006 meeting based on changes to the alignment and field assessments of environmental impact that are now available.

Alignment Progress and Development

In March of 2006, IDOT held three open house public meetings to discuss alternative highway alignments, freeway/expressway locations and access issues. About 1,000 people attended the meetings and IDOT received over 250 written comments. These were the highest attended meetings to date for the project, however, the number of written comments has remained consistent with the past meetings. As with the past comments, most pertained to preferences of one alignment versus another within each segment. Also, some have taken a stance of either opposed to or in favor of the entire project. Of those that expressed an opinion on the overall project, about half supported and half opposed the project. Following that meeting, work has progressed in these areas:

- Alignments were reviewed based on public comments, engineering, environmental impacts and socio-economic assessments.
- Field environmental inventories and surveys were conducted.
- A preliminary preferred alignment was selected for further study and more detailed development.
- Final decisions were made regarding which parts of the new facility will be freeway and which parts will be expressway.
- The preliminary preferred alignment was presented to federal and state agencies who will ultimately need to approve the project Environmental Impact Statement.

Study Schedule & Public Involvement

Following this meeting, public comments and suggestions regarding the alignment will be reviewed. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement.

The Federal Transportation Bill signed in August of 2005 included continued funding for further studies on IL 336. These funds will be used for construction plan preparation and soils studies. The location of the first construction sections is currently under review by IDOT.

Thank you for attending this meeting and for your continued interest in this study.

Following this meeting, public comments and suggestions regarding the preliminary preferred alignment will be reviewed. IDOT will use public input to refine the preferred alignment. Detailed engineering studies and a Draft Environmental Impact Statement will be prepared and approved for public presentation. A public hearing will be scheduled in the spring of 2008 to present the preferred alignment and the Draft Environmental Impact Statement. Please provide any specific comments or concerns you have about the alternative alignments that were presented at this meeting.

COMMENTS:

The proposed route you have recommended appears to be environmentally friendly. However, I am opposed to the highway because I don't feel we need it, and a few families will have to be relocated, & seriously construction of a new highway will cause irreparable damage to the environment. My suggestion is to improve the existing highway.

COMMENTS:

The heading on this form refers to the next leg of 336 as the **Peoria to Macomb** Highway Study. Does this mean that the next phase of construction will begin at Peoria and continue west to connect at Macomb? This would make sense to me because I'm confident that traffic counts show a much higher count between Peoria and Canton than Macomb and Canton. Therefore, more people will be served sooner if the next leg of construction begins at Route 474 in Peoria and proceeds west to connect at Macomb.

I support the **Peoria to Macomb** approach.

Thanks for all you are doing to make Illinois 336 a reality. It is a much-needed project for Canton and west-central Illinois, and even Peoria would greatly benefit.

Dear Eric:

I would like to first thank you for the information and feedback on my questions regarding the future Route #336 project. As Superintendent of the Farmington Central CUSD #265, one of my main concerns is to provide our students safe transportation to and from school. It is with this premise that I write this letter to make you aware of some items which may be affected by the future Rt. #336.

It is my understanding that the present Rt. #78 will be re-routed to pass directly in front of the District #265 school site. This road is presently Lightfoot Road and is a part of the City of Farmington. While I applaud the progressive planning of a four lane highway from Peoria to Macomb and the potential exit near our school and the City of Farmington, there are some concerns.

The District and City are presently planning a bike/walking path directly west of the school (across from Lightfoot Rd.). In the future, we hope to have numerous students biking and/or walking to and from school. Students must cross the future Rt. #78 (Lightfoot Rd.) and safety is a major priority for our district, city, and parents.

In addition, the speed limit along the new Rt. #78 is a concern. Our hope is that the entire area west of the present Lightfoot Road is developed with possible housing and businesses. In fact, the local library has already purchased four acres across from school entrance 'A' for a future building site. Adjusting the speed limit to insure slower traffic is warranted when Rt. 78 is changed.

In our previous discussions, I understood that the expected amount of daily traffic is 2,000 additional vehicles per day (vpd) on Lightfoot Rd/Rt. 78. This raises a concern regarding the amount of traffic immediately in front of the school site as well. It is imperative that the safety of all individuals be taken into account in the future plans for Lightfoot Rd./Route #78.

Thank you for your time and consideration on this matter. Please contact me if there are further questions.

Sincerely,

Mark E. Doan
Superintendent
Farmington Central CUSD #265

COMMENTS:

For the record, we are strongly opposed to the further study & subsequent development of IL. Rt 336! We understand the process and will not support the coalition in it's efforts! We beleive the $'s can be better spent on much more important issues! You need to a step back and truely ask yourself and the coblition how this project will provide safe cost-effective transportation??? Enhance quality of life??? Promote economic prosperity??? and demonstrate respect for our enviroment??? Not true for ourselves ~~&~~ or our surrounding neighbors!!!
