Comments:

The population stated in the report is incorrect. As of the 2010 census, the population for Collinsville was 25579. Local data also indicates the population has grown since 2010.

Comments:

Normal, IL and Bloomington, IL are twin cities, separated only by common city streets with no physical or geographic barriers. The estimated minority driving population in Normal, IL (as assigned by IDOT) is 14.55%, compared to 20.79% in Bloomington, IL (as assigned by IDOT). The Normal Police Department conducted 27.01% of the recorded traffic stops on residents of Bloomington, more than the 23.89% of the recorded traffic stops that were conducted on residents of Normal. 49.10% of recorded traffic stops for this agency were conducted on residents with addresses which were outside of the Bloomington/Normal area. Many residents of Bloomington, IL work, shop, attend school and visit family and friends within the Town of Normal, traveling between the two jurisdictions multiple times every day. Based on shared community borders and resources, the minority driving population of Bloomington/Normal should reflect very similar numbers, therefore it is our position that a minority driving population of 14.55% is comparatively low for the driving community as a whole in Bloomington/Normal and not reflective of the actual driving community. The assigned percentages do not accurately depict the culturally diverse driving population in this community. There are several large employers, as well as multiple colleges and universities all bringing large numbers of temporary residents to the area. This is clearly illustrated through the analysis conducted on the recorded address of drivers stopped in 2018, with higher numbers from residences recorded in Bloomington than in Normal, and an overwhelming majority of stops effected on drivers outside of the community.

Comments:

The Northlake Police Department is committed to fair and impartial traffic enforcement. Our officers fully support the purpose of Pedestrian and Traffic Stop Data collection and stand against race profiling. In furtherance of this mission, Northlake has embraced the concept by committing resources to the development of real time stop data reviews by each officer and supervisor. Our officers support the ability to recognize and understand unintended trends well before the release of the state mandated annual report. Northlake has implemented software applications to review all officer traffic and pedestrian stops in real-time.

The true minority make up of Northlake drivers:
The driving population in suburban Chicago is truly a transient one. The City of Northlake shares borders and several major roadways with jurisdictions, some of which have a 90% Estimated Minority Driving Population (EMDP). It should also be noted that according to Illinois Department of Transportation figures, as many as 80,000 vehicles travel through roadways in Northlake on any given day. Because Northlake is a destination for shopping and commerce, many drivers from high EMDP communities commute to or through the City of Northlake.

Driving population considerations:
The Illinois School Report Card is described as the state's official source of information of public schools across Illinois. The latest report for 2017-2018 identifies two high schools serving Northlake as having a minority population of 97% and 84% respectfully. Comparing the official demographics of the state school records to IDOT census assigned EMDP for Northlake, reflects a variance of above 25 points. Northlake has used the inclusion of current and up to date quantified governmental data resources such as the School Report Card, and real- time officer stop data reviews, as a mission wide commitment to fair and impartial traffic enforcement in our city. Assigning Northlake an EMDP score solely on residential censes data leaves out important and readily available sources of driving population demographics.

Comments:

The Estimated Minority Driving Population assigned in this study is 63.88%. According to the US Census Bureau, the "White, alone, not Hispanic or Latino" estimated population of Park Forest as of July 1, 2018, was 25.7% . The remainder of 74.3% would be the total estimated minority population of Park Forest, and is over 10 percentage points higher than the Estimated Minority Driving Population assigned in the study.

Also of note is that the racial composition of Park Forest is not spread out evenly among age groups. For example, the high school district which serves the majority of Park Forest residents is District 227. The student body population in 2018 was 2.6% white, with the remaining 97.4% of the student body of a minority demographic.

Furthermore, analysis of Park Forest Police Department traffic stops for 2018 revealed that 29% of all traffic stops were made with drivers who reside in Park Forest (902 stops). Of the 71% of traffic stops that did not involve Park Forest residents, the next highest percentage of communities represented were Chicago Heights (9%, or 288 stops), Chicago (7%, or 212 stops), University Park (7%, or 212 stops), and Richton Park (6%, or 174 stops).

According to the US Census Bureau, the July 1, 2018 population estimate shows the "White, alone, not Hispanic or Latino" population of Chicago Heights to be 21.5% . As a result, the estimated minority population totals 79.5%.

The "White, alone, not Hispanic or Latino" population of University Park is listed as 6.6% and that of Richton park is listed as 10.7% , leaving estimated minority populations of 93.4% and 89.3%. Park Forest borders University Park to the south and Richton Park to the west.

Finally, looking at the Estimated Minority Driving Population data from the 2017 Illinois Traffic Stop Study of the Villages which border Park Forest, we find that all but one have significantly higher Estimated Minority Driving Populations than Park Forest:

Village	Estimated Minority Driving Population (2017)
Matteson	82.51
Olympia Fields	71.72
Richton Park	86.38
Chicago Heights	71.56
University Park	93.13
Steger	61.92

Steger, which is the only Village which had a lower assigned Estimated Minority Driving Population in the 2017 Illinois Traffic Stop Study, was represented in only 4% (120 total) traffic stops by the Park Forest Police Department in 2018.

The data reflects that the assigned Estimated Minority Driving Population of Park Forest in the 2018 Illinois Traffic Stop Study at 63.88% is low and does not reflect the actual driving population of the community.

The Park Forest Police Department is committed to policing in a manner that is procedurally just and takes significant efforts to ensure our practices are fair and equitable to all. We support the Illinois Traffic Stop Study in principle, however an Estimated Minority Driving Population which does not accurately reflect the population of motorists travelling through the community makes use of the provided ratio problematic.

Comments:

While the benchmark Census data is likely a fair representation of demographics of individuals of driving age living in the City of Urbana in 2010, it does not account for the fact that nearly 58% of traffic stops conducted in the City of Urbana in 2018 involved drivers who do not live in Urbana. Accordingly, we believe that Census data is not a useful or valid benchmark for developing metrics related to traffic stops in the City of Urbana. The Urbana Police Department regularly conducts in-depth analyses of traffic stops on many metrics, including racial disparities, using a benchmark of drivers involved in traffic accidents. We believe this benchmark more accurately represents the driving population in the City of Urbana. These analyses can be found on our website at: https://www.urbanaillinois.us/police.

Comments:

The Illinois Department of Transportation is estimating
population distribution across race based upon data from 2010. The methodology for the study and estimating population distribution across race may be found at:
http://idot.illinois.gov/Assets/uploads/files/Transportation-System/Reports/Safety/Traffic-Stop-Studies/2004/2004%20Illinois%20Traffic%20Stop%20Summary.pdf

As it states in the 2004 report, “using a population based estimator may introduce some error”;.
The Zion Police Department believes that using population data from 2010 can only exaggerate any errors.
