*Individual salary offers are computed based on an applicant's current position and experience level in comparison to the posted title as well as internal equity of staff in the organizational unit.

**Technical Application PM1080 (revised 6/1/17) is required. No previous version of the PM1080 will be accepted.

**ILLINOIS DEPARTMENT OF TRANSPORTATION
POSITION DESCRIPTION**

DATE:	September 17, 2015	POSITION:	Construction Civil Engineer Trainee
APPROVED BY:	Ann Berube	OFFICE/DIVISION:	OHPI/District One/Construction
CODE:	PW110-23-51-201-00-01	REPORTS TO:	Resident Engineer

Position Purpose

This position is accountable for assisting a Resident Engineer in performing the beginning professional layout, inspection, documentation and other construction supervision functions required on various construction projects. This is a training position.

Dimensions

Indeterminate

Nature and Scope

This position reports to the Resident Engineer/Technician as do other engineers and technicians performing inspection duties.

This position, under the direction of the Resident Engineer/Technician, provides the contractor with the necessary layout and inspection assistance required on all types of highway construction projects.

Typical problems faced by the incumbent are to ensure correct interpretation of the plans and specifications while inspecting and directing the contractor's performance of the construction work and modifying the planned work to coincide with existing field conditions. The greatest challenge to this position is to assist in providing accurate and timely construction information for the contractor.

The incumbent personally may act as the instrument technician or note keeper on the survey party; inspects construction operations such as earthwork, drainage, asphalt or concrete pavements, concrete and steel structures and other miscellaneous items involved in road and bridge construction; provides the necessary reports; documentation for pay items; reduces survey notes, plots cross sections, computes quantities, checks computations, documents pay items and others; and assists the Resident Engineer on specific construction problems.

The incumbent refers more difficult problems or necessary plan changes to the Resident Engineer, but accepts or rejects materials incorporated in the project on the basis of visual or field tests and ensures that all materials have been properly inspected prior to being incorporated into the project.

The incumbent has contact with resident engineers, project engineers and personnel from the district Bureau of Materials, other bureaus as well as with contractors and the general public.

The effectiveness of this position will be measured by the timeliness and accuracy of layouts, inspections and required documentation.

Principal Accountabilities

1. Provides accurate measurement, computation and documentation of contract items to ensure compliance with plans and specifications.
2. Keeps Resident Engineer informed of any construction problems encountered or changes made.
3. Provides accurate and timely layouts to meet contractor's schedule.
4. Ensures that the items inspected are in accordance with the specifications.
5. Provides records and reports required for project finalization.
6. Performs duties in compliance with departmental safety rules.
7. Suggests resolutions to construction problems.
8. Performs other duties as assigned.
