\*\*Technical Application PM1080 (revised 6/1/17) is required. No previous version of the PM1080 will be accepted.

**ILLINOIS DEPARTMENT OF TRANSPORTATION  
POSITION DESCRIPTION**

<b>DATE:</b>	September 11, 2018	<b>POSITION:</b>	Construction Inspection Engineer
<b>APPROVED BY:</b>	Kevin Marchek	<b>OFFICE/DIVISION:</b>	OHPI/Region 2/D2
<b>CODE:</b>	PW110-23-52-201-10-01	<b>REPORTS TO:</b>	Resident Engineer

---

***Position Purpose***

This position is accountable for assisting in the layout, inspection, and documentation required on various highway improvement construction projects. This is a training position.

***Dimensions***

Subordinate Personnel:	Direct - None Indirect - 1-2 on an as-needed basis
Value of Construction Projects:	\$10,000 - \$20 Million

***Nature and Scope***

This position reports to the Resident Engineer. This position may be assigned to a resident technician on a project-by-project basis. When this occurs, the incumbent would report to the resident technician. There are no direct subordinates reporting to this position, but he/she may supervise one to two technicians on direct assignments.

This position assists in providing the contractor with the necessary layout, direction, and inspection required on highway improvement and/or construction projects. His/Her position operates within an environment which ensures the contractor provides quality improvements in accordance with plans, specifications, and special provisions in a timely manner.

Typical problems faced by the incumbent are in the interpretation of the plans and specifications while inspecting and directing the contractor's personnel with compliance of specifications. The greatest challenge is to maintain the application of civil engineering principles to field conditions.

The functions performed by the incumbent include acting as a member on the survey party; inspecting construction operations such as earthwork, drainage, asphalt or concrete pavements, concrete, steel, and other miscellaneous items involved in road and bridge construction; providing necessary reports and documentation for pay items; reducing survey notes; plotting cross-sections; computing quantities; checking computations of others; and assisting the resident engineer on small and uncomplicated construction contracts.

The incumbent is governed by the plans and specifications of the project. He/She refers major problems or necessary plan changes to the Resident Engineer. He/She does, however, accept or reject materials incorporated in the project on the basis of visual or field tests, and assures that all materials have been properly inspected prior to being incorporated into the project.

The incumbent has contacts with resident engineers, project engineers, and personnel from the Bureau Project Implementation, as well as with contractors and the general public.

The effectiveness of this position will be measured by the timeliness and accuracy of layout, inspection, and reports provided by the incumbent.

***Principal Accountabilities***

1. Provides accurate measurement, computation, and documentation of contract items to ensure proper payment and completion of pay items in accordance with the contract plans and standard specifications.
2. Keeps Resident Engineer informed of any construction problems encountered or changes made to all for proper engineering judgment to be applied and working plans updated.
3. Inspects pay items and materials to ensure compliance with standard specifications and production of a quality improvement project.
4. Provides the contractor with accurate and timely layouts to allow for project completeness in accordance with the contract plans and the time frame outlined.
5. Performs duties in compliance with departmental safety rules. Performs all duties in a manner conducive to the fair and equitable treatment of all employees.
6. Performs other duties as assigned.
