

FY 2017

Proposed Improvements for Illinois Highways

FISCAL YEAR 2017 HIGHWAY IMPROVEMENT PROGRAM

Introduction

The Fiscal Year 2017 Highway Improvement Program provides \$2.023 billion of the \$11.173 billion included for highways in the FY 2017-2022 Proposed Highway Improvement Program. In addition, included are projects totaling \$74 million that use appropriations from previous fiscal years scheduled to be implemented in FY 2017. As a result, the FY 2017 Highway Improvement Program totals \$2.148 billion.

The FY 2017 program level is slightly higher compared to the FY 2016 program level. The higher program level is a result of an increase in federal transportation funding from the Fixing America's Surface Transportation Act (FAST Act) and a slight growth in state motor fuel tax revenues. Even though this fiscal year's program is up from the previous fiscal year, the rate of deterioration of roads and bridges far exceeds the available funding to improve the system to acceptable conditions.

A total of 506 miles of highways and 149 bridges will be improved or constructed through the FY 2017 program. Safety and traffic improvements are scheduled at 50 locations. The FY2017 program includes \$1.425 billion for projects on the state highway system and \$723 million for projects on local roads and bridges.. The chart below displays the funding sources for the program.

FY 2017 Program Funding (\$Billions)

<u>Fund Source</u>	<u>FY 2017</u>
Federal Aid	1.441
State Funds	0.482
Reappropriations	0.125
Local Funds	<u>0.100</u>
Total	2.148

The following table shows a summary of the program with each category discussed further over the next few pages.

FY 2017 Highway Program Category Summary

<i>Category</i>	<i>\$ Millions</i>	<i>Miles</i>	<i>Structures</i>	<i>Intersections</i>	<i>Spot Improvements</i>
Interstate	563.6	67	20		1
Major Construction	125.6	6	3	3	
Resurfacing	133.6	164			2
Bridge Work	232.8		42	3	
Selected Principal Arterial Corridors	6.9				
Traffic & Safety Improvements	99.0	2		25	1
Statewide and Various Projects	263.5	50			
Local Projects	672.2	217	84	15	
Local Benefit Grants	50.8				
Total	2,148.0	506	149	46	4

State Program

The FY 2017 State Program focuses on maintaining the state highway system at a total cost of \$1.425 billion, with improved safety an overarching goal. The current condition of state-maintained roads and bridges is 79 percent and 92 percent acceptable, respectively.

In order to address our state system's backlog of road mileage and to keep backlog from continuing to increase, Illinois needs a sustainable revenue source for highway funding. Under the current funding levels, roads and bridges will continue to deteriorate. The ability to fund and implement new expansion projects that support economic growth is limited.

The FY 2017 Highway Improvement Program includes \$1.425 billion for improvements on the state highway system. This investment allows for 289 miles of roads to be improved or added to the existing highway system, along with 65 bridge improvements and 35 intersection and spot improvements.

Interstate

The Interstate System in Illinois is the third-most extensive in the nation at 1,892 miles. The FY 2017 interstate program provides \$563.6 million in improvements to 67 miles using federal and state funding. Included in the interstate work are 20 bridge improvements and one spot improvement.

Highway Freight Program

The Interstate System is a high priority for the state and requires significant investment to maintain. Interstates are the primary routes used for freight movement across the country. The FAST Act created a new federal fund program called the National Highway Freight Program (NHFP) focusing on providing efficient freight movement. In addition, the FAST Act created the "Nationally Significant Freight and Highway

Projects" (NSFHP) program (also known as the FASTLANE grant program) to provide Federal financial assistance to projects of national or regional significance.

The department is working closely with local partners and implementers like the Chicago Metropolitan Agency for Planning (CMAP) and Cook County to support freight improvements in the Chicago region that have been identified as priorities in regional and county transportation plans. The department will continue to coordinate with local partners on project applications for NHFP and NSFHP discretionary funds as they become available.

Jane Byrne/Circle Interchange

Consistently ranked as one of the nation's worst bottlenecks, the reconstruction of the Jane Byrne Interchange – the confluence of Interstates 90, 94, 290 and Congress Parkway in Chicago – will continue through FY 2017. The Jane Byrne Interchange is critical to the nation's transportation system, particularly for freight movement on interstate and arterial roads. Of the more than 400,000 vehicles per day that pass through the interchange, 33,000 are trucks. This traffic significantly impacts road capacity and levels of service.

The total project cost is \$600 million. To date, 13 contracts have been awarded totaling \$198 million. The total to be programmed in FY 2017 is \$54 million, which includes land acquisition and engineering. This includes \$40 million of apportioned NHFP funding.

The three contracts included in the FY 2017 program are:

- Interstate 290 westbound from Congress Parkway to Racine Avenue
- Interstate 290 westbound east of Des Plaines Avenue and over Interstate 90/94
- Interstate 90/94 Northbound Ramp to Eastbound Congress Parkway

Overall, this project will result in a 50 percent reduction in vehicle idle time per day, with up to 5,500 gallons of fuel saved daily. A reduction of up to 5 million hours annually of drivers sitting in congested traffic compared to today's conditions results in significant improvements to the freight movement in the Chicago region.

Interstate 55 Managed Lanes

Interstate 55 in DuPage and Cook counties is a congested route handling 170,000 vehicles a day. Approximately 15 percent are trucks hauling freight in and out of the Chicago area. In order to expand this route and alleviate congestion, the department is exploring a managed lane concept that would include the addition of one managed lane in each direction within the existing median of Interstate 55. In January 2016, the department advertised for a Public-Private Partnership (P3) advisor to assist in the analysis and potential procurement for the managed lane study.

The FY 2017 annual program includes, engineering for design, location and environmental studies, along with engineering for contract plans and wetland credits for Interstate 55, from Interstate 355 (Veterans Memorial Tollway) to Interstate 90/94 (Dan Ryan Expressway), is programmed at a cost of \$62.7 million.

Interstate 74/U.S. 6 over Mississippi River

Iowa and Illinois are working together to construct a new bridge on Interstate 74/U.S. 6 over the Mississippi River in Moline. Iowa is the lead agency on this project. Illinois' share of the project is \$220 million, of which \$27.5 million is programmed in FY 2017. On the Illinois side, one of three contracts is programmed in FY 2017 for a total of \$124.6 million. This contract is for work that will connect the Mississippi River Bridge to the existing Interstate 74 alignment.

There are a number of other significant interstate projects programmed in FY 2017, including:

- Resurfacing of 14.55 miles, bridge deck repairs, bridge joint repair, surveillance, drainage and construction engineering on Interstate 55 from Weber Road to Willow Springs Road and east of Pulaski Road at a cost of \$40.5 million,
- Resurfacing of 4.47 miles on Interstate 74 east of Leroy to the DeWitt County line at a cost of \$8.4 million,
- Resurfacing of 3.17 miles, bridge repair, thin concrete overlay, bridge deck repairs, bridge joint repair, bridge painting, culvert repair and rip rap on Interstate 55 from 0.4 miles north of Stevenson Drive to 0.6 miles north of Interstate 72 east of Springfield at a cost of \$12 million,
- Resurfacing of 6.35 miles, bridge painting, bridge repair, bridge replacement, bridge joint repair, bridge deck sealing, rip rap and bridge deck overlay on Interstate 70 from 0.1 mile west of Prairie Road to the Bond County line at a cost of \$22.2 million,
- Resurfacing of 7.08 miles on Interstate 64 from Interstate 57 to 2.6 miles east of Illinois 142 east of Mount. Vernon at a cost of \$10.7 million.

Major Construction

The major construction category includes improvements that address traffic congestion and other high-cost projects. These types of improvements include items such as relocation, new construction, additional lanes, reconstruction and new location projects. Because revenues generated in Illinois do not keep up with the rate of deterioration of the current system, the department continues to focus primarily on maintaining existing roads and bridges and less on new construction. Major construction improvements total \$125.6 million.

Major construction projects programmed in FY 2017 include:

- Construction of additional lanes for 3.7 miles, bridge repair, retaining wall and ADA improvements on Wood Street north of

- Little Calumet River to south of U.S. 6 (159th Street) at a cost of \$45.2 million,
- Bridge replacement, intersection improvement, and retaining wall on U.S. 41 at Illinois 132 under the Union Pacific Railroad in Gurnee at a cost of \$12 million,
- Land acquisition for a future reconstruction project on U.S. 20 Business (West State Street) from Day Avenue to Independence Avenue in Rockford at a cost of \$2.1 million,
- Reconstruction and additional lanes for 2.1 miles, bridge replacement, culvert replacement, utility adjustment and construction engineering on US 34 from east of Eldamain Road to Center Parkway in Yorkville at a cost of \$23.7 million.

Resurfacing

Resurfacing included in the FY 2017 Highway Improvement Program totals \$133.6 million and improves 164 miles statewide. This category includes improvements such as urban and rural resurfacing, widening and resurfacing and surface maintenance.

A highlight of this program is that it will support a number of necessary ADA compliance upgrades. The department's ADA Transition Plan sets forth a goal to make all facilities fully compliant to the maximum extent feasible over the next 25 years. Programmed in the FY 2017 program is about 1/25 of the current inventory. ADA improvements are either included in the existing scope of resurfacing projects or as stand-alone projects in the program.

Major resurfacing projects programmed in FY 2017 include:

- Resurfacing and reconstruction of 1.37 miles, new storm sewer, drainage, railroad crossing improvement and utility adjustment on Illinois 75 from Rock River to Illinois 2 in Rockton at a cost of \$10 million,

- Resurfacing of 4.28 miles, ADA improvements on Illinois 23 from 0.5 mile south of Illinois 64 in Sycamore to Fourth Street in DeKalb at a cost of \$4.9 million,
- Resurfacing of 8.43 miles on Illinois 41 from south of Monmouth Boulevard in Galesburg to south of West Hunter Street in Abingdon at a cost of \$4.3 million,
- Resurfacing of 5.28 miles, ADA improvements on U.S. 45 from Saline Branch Ditch south of Thomasboro to north of Interstate 74 at Urbana at a cost of \$4.9 million,
- Resurfacing of 1.21 miles on Interstate 55 Business from Kenwood Drive to south of Illinois 10 in Lincoln at a cost of \$3.5 million.

Bridge Work

The bridge category includes new bridges, bridge replacement, bridge rehabilitation and bridge repair. There are 42 stand-alone bridges programmed for bridge replacement, rehabilitation or new construction totaling \$232.8 million in the FY 2017 Highway Improvement Program. Also included is \$15 million for bridge preventive maintenance and bridge painting.

Significant bridge projects programmed in FY 2017 include:

- Bridge replacement and construction engineering on Illinois 178 over Illinois River south of Utica at a cost of \$32.5 million,
- Railroad grade separation and utility adjustment on U.S. 150 at BNSF Railroad at East Main Street in Galesburg at a cost of \$22 million,
- Bridge superstructure over Big Muddy River at the east city limits of Murphysboro at a cost of \$2.7 million,
- Bridge replacement on U.S. 50 over Big Muddy Creek at Clay County line at a cost of \$10.2 million,
- Bridge replacement on Illinois 143 over Shoal Creek 0.9 mile east of Pierron at a cost of \$18.5 million.

Selected Principal Arterial Corridors

This category involves highway improvements for economic development and/or expansion necessary to address congestion. Due to limited resources for funding high-cost expansion projects, the FY 2017 Highway Improvement Program includes only \$6.9 million for pre-construction activities of major construction items, such as additional lanes, reconstruction or new roads.

The Federal Highway Administration (FHWA) requires states to measure progress toward implementing performance measures. However, the FHWA is still in the process of developing final performance measure requirements set forth in MAP-21. IDOT plans to utilize these measures when they are released. To complement federal performance measures, the department is in the process of creating a transparent project selection process to be used to evaluate expansion type projects. The goal is to develop performance measures to ensure that new infrastructure projects provide the highest value, meet local goals, and ensure that the state is investing its limited resources wisely. This project is being developed in concert with the department's 2017 long-range transportation plan and is anticipated to be in use during the next fiscal year.

Significant portions of principal arterial projects programmed in FY 2017 include:

- Land acquisition for construction of a new road on Illinois 390 from Interstate 290/Illinois 53 to O'Hare West Bypass at a cost of \$5.1 million,
- Land acquisition for bridge replacement on Illinois 29 under BNSF Railroad north of Chillicothe at a cost of \$0.17million,
- Construction engineering and landscaping for new roads and bridges on Illinois 336 from US 136 (west) to US 67 (north) in McDonough County at a cost of \$1 million,

Traffic and Safety Improvements

The traffic and safety improvements programmed in the FY 2017 Highway Improvement Program total \$99 million and include 26 intersection and spot improvements. Of the \$99 million, \$69.3 is slated for safety projects at high-accident locations. Another \$4.3 million in funding is provided from a set-aside of Highway Safety Improvement Program funds for railroad protection safety improvements.

Traffic and safety improvements include items such as signal work, intersection improvement and railroad crossing work. Significant traffic and safety projects programmed in FY 2017 include:

- Traffic signal installation, intersection reconstruction and resurfacing of 1.56 miles on Illinois 59 at Petite Lake Road and Highwoods Drive to Illinois 132 (Grand Avenue) in Lake County at a cost of \$3.2 million,
- New shoulders and safety improvements on US 40 at UP Railroad in St. Elmo to Illinois 128 in Altamont at a cost of \$1 million,
- New shoulders, safety improvements and tree removal on US 45 from West Salt Creek to .2 mile south of 500th Avenue Effingham County at a cost of \$3.1 million,
- Intersection reconstruction on Illinois 14 at Illinois 14/37 in Benton at a cost of \$0.8 million.

Statewide and Various Projects

The FY 2017 Highway Improvement Program includes \$263.5 million for statewide and various projects. The statewide projects total \$126.1 million and provide funding for:

- Traffic control improvements
- Contract maintenance, which includes intermittent resurfacing, crack and joint sealing, bridge repairs and other related improvements that are performed by non-state forces
- Emergency road and bridge repairs

- Federally authorized Equal Employment Opportunity training programs and support services
- Economic Development Program providing highway improvements and access to new or expanding industrial and manufacturing developments,
- National Recreational Trails Program
- Environmental studies
- Engineering for various work statewide

The remaining \$137.4 million is for various engineering, land acquisition and smaller improvement projects that will be identified throughout the fiscal year.

Local Program

The FY 2017 Highway Improvement Program includes improvements on local streets and highways utilizing federal funds. A portion of the federal funding is allocated based on population to local agencies throughout the state. The local program provides \$723 million to fund improvements on 217 miles of roads and 84 bridges, along with 15 traffic and safety improvements. In addition, \$7 million is included in the program to help local governments upgrade designated truck routes.

The FY 2017 Highway Improvement Program also provides \$50.8 million of state funds to assist local governments that are not listed in this document and are allocated directly to local governments by formula. The breakdown is as follows:

- \$10 million for needy townships
- \$4 million for high-growth cities
- \$21.8 million to counties under one million in population
- \$15 million for the local township bridge program

Approximately \$582.5 million of state motor fuel tax funds will be directly distributed to municipalities, counties and townships for administration and the repair of local roads and

bridges during FY 2017. This distribution is in addition to the state's \$2.148 billion highway improvement program.

Guide to the Project Listing

The projects included in the FY 2017 program are grouped by State Highway District. Within each district, projects are listed under six headings:

- State Construction
- State Engineering
- State Land Acquisition
- Local Construction
- Local Engineering
- Local Land Acquisition

Individual projects are listed within these six headings in descending route marking order, i.e., Interstate, U.S., Illinois, and other. Each project's funding type is identified by eligibility with symbols. The symbols and their funding categories are shown in Table 1. Projects in some categories, such as railroad-highway grade crossing safety and some statewide and districtwide items, will be identified and selected during the fiscal year. A glossary with abbreviations is listed in Table 2.
