**Comments:** What the report does not reflect is the way that our community and population base changes from Memorial day to Labor Day. Our community is surrounded by five campgrounds that cater to the Chicago and surrounding area. Our minority population traveling through our community changes dramatically during the summer which is of course the time when most police departments concentrate on traffic violations. The survey is flawed in the fact that it does not take into account the way a community population may change.

**Comments:** Comments on the 2012 IDOT TRAFFIC STOP STUDY

Benchmark Ratio Adjustment:

The IDOT Traffic Stop Study estimates the % of minority drivers in DeKalb for 2012 at 26.96%. This ratio may need to be adjusted to better reflect the reported ratios of local institutions. Northern Illinois University (NIU) and DeKalb School District 428 report a higher % of minority populations with an average of 36% minorities. Also Business Analyst Online (BAO) reports a higher percentage of minorities in the northwest section of the city which houses NIU and DeKalb High School.

Comparable Ratios	Caucasian	Minority
NIU	61	39
DeKalb High School	66	34
BAO (Zone 1*)	64.5	35.5

By using a blended rate of 36% and applying it to the reported traffic stop data for DeKalb for 2012 the minority traffic stop ratios becomes 1.09. \* Zone 1 in the city of DeKalb encompasses the largest concentration of minorities in the high traffic stop areas. Zone 1 has NIU's main campus (total student population of 15,557 and employs nearly 5000 educators and staff) with residence halls, all of the universities main buildings and programs, NIU's athletic fields, arenas, and facilities, the NIU Convocation Center (entertainment & sports venue), DeKalb High School, the DeKalb County Health Department and related facilities, off campus (private) housing including Greek Row, a 500 (+) unit HUD affiliated housing complex, a homeless shelter, and two separate commercial corridors all with the greatest population density of any area within the city. It is also the gateway to Kishwaukee College, a two year community college within five minutes of NIU's main campus that hosts a student population of 10,500.

IDOT acknowledged that there is a process for adjusting the benchmark number, but that it is too late to do this for the 2012 report. Based on the information contained herein it seems to warrant a benchmark review and adjustment for the 2013 report.

Concentration of Minorities in High Traffic Stop Areas:

In addition to concerns about the benchmark rate, the concentration of population and likely higher minority population and/or % of drivers within Zone 1 (northwest section of the city of DeKalb) should also be considered. The DeKalb Police Department reports that Zone 1 receives the highest amount of vehicular traffic stops and calls for service of any area within the city. Zone 1 has a higher minority population % than reported by IDOT impacting the ratio, for example BAO also reports a higher % of minorities in this area. The higher traffic stop volume in an area with a higher concentration of minority population and drivers could impact the overall ratio. Additional information on the % of minority clients that visit these facilities may provide continued insight for the number of likely minority drivers in this area.

**Comments:** Illegal drugs, weapons, cash, and other criminal activity continue to invade every interstate and roadway throughout every county within the state of Illinois. The Illinois State Police (ISP) is one of many law enforcement entities with responsibility for keeping Illinois citizens safe. Traffic stops and consent searches are necessary law enforcement tools in saving lives and preventing violent crime.

Shortly after the release of the 2010 Illinois Traffic Stop Statistical Study (TSSS) report, the ISP began a comprehensive evaluation of the traffic stop card process. The internal review identified the need for policy revisions and training, but suggested officers are in compliance with ISP policy requiring officers to have and articulate reasonable suspicion to request consent to search. In the first full year since the comprehensive evaluation, the ISP continues to monitor its progress.

The 2012 TSSS data shows some advancement. For example, the data establishes the following:

- (a) the gap between the rate ISP officers ticket minority drivers as opposed to white drivers has narrowed slightly;
- (b) the gap between the rate ISP officers request consent to search minority drivers as opposed to white drivers has narrowed; and
- (c) the gap between the rate ISP officers are likely to find contraband on white drivers as opposed to minority drivers has narrowed significantly.

These statistics suggest the policy changes made and statewide training conducted have ensured that ISP officers are more accurately reporting their use of consent searches during traffic stops.

The ISP continues to improve its ability to monitor the data throughout the year, identify problems suggested by the data, and make training available in response to the data. The ISP is committed to using the TSSS data as a tool for ensuring its officers conduct traffic stop enforcement activities in a professional and bias-free manner. Accordingly, the ISP is finalizing plans to empower field level supervisors to utilize the data for management and training.

**Comments:** While I understand and respect the idea behind this initiative, I find it a little insulting that we are required to submit this data. If I were suspected of being a pedophile or drug dealer, I would be required to do nothing to prove my innocence. However, I am required to submit data to show my department is not involved in racial profiling. Isn't that a little backward? It seems if someone alleged, or suspected, we were engaging in inappropriate or illegal behavior we should be investigated, but not required to prove our innocence. The state of Illinois does not give the same presumption of innocence to police officers/departments that it does to criminals. I apologize if I sound disrespectful, that is certainly not my intention. It just seems inappropriate that every time we stop a car for speeding or running a stop sign we have to jump through hoops to prove we aren't doing so because we are racists. Thanks for listening.

**Comments:** As we have previously indicated, the City of LaSalle has had a large increase of minority drivers who have moved into the City which is not reflected by the census. The City also has a large transient population which is also not taken into account. This study also does not reflect the large number of recidivism of the same traffic offenders.

**Comments:** Friday May 31, 2013

This is the Rockford Police Department's response to the 2012 Racial Profiling Study:

The department does not issue written warnings. This information is reflected in the "Outcome of Stop" area. The department only issues verbal warnings or citations. There was an error on one record where one written warning was recorded. This is incorrect and should be merged with the verbal warning count. These combined totals accurately reflect the department's verbal warning information. The report, aside from the specified record, accurately reflects the only two possible outcomes for a traffic stop.

Kim Binder / Becky Bartkowicz  
Crime Analysis Unit  
Rockford Police Department

**Comments:** Winnebago Police Department submitted additional data to Illinois Department of Transportation's Division of Traffic Safety on January 3, 2013, at 1111 hours, which was NOT included within the 2012 Illinois Traffic Stop Study.

According to Illinois Department of Transportation, "getting around Illinois" "Average Daily Traffic Counts," there are 15,900 vehicles that travel through the intersection of US Route 20 and Winnebago Road (Commonly known as "Winnebago Corners") on a daily basis. There are several retail establishments immediately south of this particular intersection, which is within the jurisdiction of Winnebago Police Department.
