## Illinois Crash Information 2009

### Overnight Crashes Involving Pedestrians

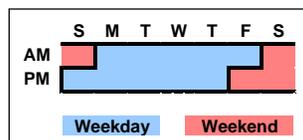

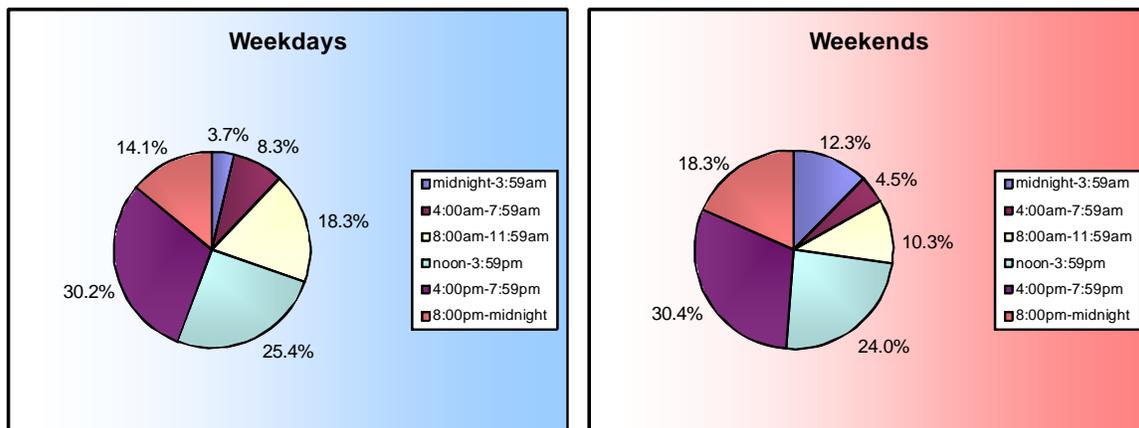

A large proportion of motor vehicle-related pedestrian fatalities in Illinois in 2009 took place at night.

- Of 111 total pedestrian fatalities, 79 (71.2%) occurred during darkness, dusk or dawn.
- Use of protective equipment—including contrasting clothing, reflective clothing and other light sources—varied by lighting condition (i.e. time of day) among pedestrians who were fatally injured.

In general, a disproportionate number of traffic crashes involving pedestrians took place specifically during weekend nights. These are among the peak times for alcohol-related incidents, and alcohol may play a contributing factor in these crashes.

- 3.7% of all weekday crashes occurred between 12:00 AM and 3:59 AM
- 12.3% of all weekend crashes occurred between 12:00 AM and 3:59 AM
- 56.5% of all crashes that occurred between 12:00 AM and 3:59 AM took place in the two weekend nights (Friday night/Saturday morning and Saturday night/Sunday morning)
- Weekend crashes accounted for 47 pedestrian fatalities (42.3% of all 111 pedestrian fatalities in Illinois in 2009)

Note: Data as of October 4, 2010; with 292,439 crash records, 539,717 vehicle records and 673,839 person records.

The law regarding the reporting threshold for Property Damage Only crashes was amended effective January 1, 2009, resulting in decreased reporting of crashes in this specific category. It did not affect the reporting of injury or fatal crashes. For details of the reporting amendment, see also <http://app.idph.state.il.us/emsrpt/crash.asp>.
