Agency: ALTON POLICE

- **Comments**

The data for the Alton Police Department reflects 3,421 stops. In addition, we surveyed the racial data of motorists using our roadways. We made direct observation of 16,903 drivers. 68.4% were Caucasian. 30.8% were African-American with less than 1% other races.

A study was conducted of all persons contacted by officers on a non-discretionary basis. We logged 15,933 contacts of which 56.14% were Caucasian and 42.97% were African-American with less than 1% other races.

The Alton School District is 62.9% Caucasian, 35.5% African-American and less than 1% other races.

Using this data to form a baseline for comparison helps give a better overall picture than simply stating the stop data.

Agency: ARTHUR POLICE

- **Comments**

After reviewing the data from my agency's racial profiling report, I have discovered that for some reason, no written warnings were listed in the report. Upon further review, all written warnings entered by my agency have been counted as citations. As my agency is small, and the jurisdictional area is small, I have reviewed each of the 165 traffic stops. Under the "Outcome of Stop" section the following changes need to be made: total stops of caucasian drivers is 160, of minority drivers it is 5. Citations to caucasian drivers should read 22, for minority drivers it should read 4. Written warnings to caucasian drivers should read 132, for minority drivers it should read 1. In the key indicators section of the report, which should be reasons for the stop, the information should be correct, however, under the section on outcomes, the same adjustments should be made as above. Also note that all traffic stops are entered manually on line, and are checked periodically on line.

Agency: BARRINGTON HILLS POLICE

- **Comments**

The Barrington Hills Police Department takes pride in its people - in their professionalism and impartial enforcement of the law. As a CALEA-accredited agency, to guard against any form of bias-based policing, we have collected and analysed enforcement data for years.

The data collected by this study and its published results serve to validate that which we already knew.

Agency: BENTON POLICE

- **Comments**

I have a concern that the percentage rate for citation issuance to minority drivers will reflect negatively on my Department. BPD Police Officers stopped 263-264 drivers and one was a minority. This minority driver was issued a citation. This equates to 100% citation issuance for minority drivers as compared to 27.86% Caucasian drivers.

Any criticism by me, or others, concerning this particular percentage rate difference could negatively impact the effectiveness of traffic enforcement efforts of this Department. My question is, how does this particular statistic be taken into consideration?

Chief Michael B. O'Neill, Benton Police Department

- **Comments**

We believe that our estimated minority driving population may be a little low. We believe that it should be between 50% and 55%. It has been over 5 years since the last census and we believe that 43% is a little low.

Agency: BLOOMINGDALE POLICE

- **Comments**

Since Bloomingdale has a regional shopping center (Stratford Square Mall), it was hypothesized internally that the actual minority driving population would be greater than the percentage calculated on paper by the Northwestern University Center for Public Safety (NUCPS). The NUCPS percentage included in this report focused on the 2000 census data of Bloomingdale and DuPage County. Therefore, a Traffic Stop Observation Study was conducted (methodology available upon request) in the Fall of 2004. The result of that study validated the hypothesis with the minority driving population traveling through Bloomingdale established as 22.32% vs. the 18.87% as provided by NUCPS. Additionally, each of the five municipalities which border Bloomingdale has a NUCPS provided minority driving population (range of 24.60% to 42.00%) exceeding the Traffic Observation Study benchmark of 22.32%. Using this Traffic Stop Observation Study, Bloomingdale's benchmarking ratio is a more favorable 1.17.

Agency: **BOLINGBROOK POLICE**

- **Comments**

Any conclusions drawn from this study must be tempered with common sense. The published disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 15 and older from the 2000 census, and not of the traffic population of motorists on the roads and highways within Bolingbrook. As such, the "benchmark" numbers used by the Illinois Department of Transportation (IDOT) and Northwestern University are inherently flawed and misleading.

If residential population figures must be used for comparison, we believe that a more realistic benchmark of ethnic breakdown for 2004 can be found in statistical data for Bolingbrook High School and the Valley View School District as published by the Illinois State Board of Education "School Report Card" (located at www.isbe.state.il.us on the internet).

Agency: **BROWNSTOWN POLICE**

- **Comments**

This is extra paperwork that small communities do not have the manpower or finances to pay a police officer to do this study.

Small Villages in Central and Southern Illinois do not have a big problem with racial profiling like a big city might have.

So are these reports necessary for smaller communities.

Thank you.

Brownstown, IL Police Dept.

Agency: CAROL STREAM POLICE

- **Comments**

The Carol Stream Police Department conducted a Traffic Survey of the driving population in Carol Stream during September and October 2004. Traffic was monitored at three different intersections on different dates and times throughout the Village of Carol Stream. Observers sampled 51,461 vehicles during the survey. There were 38,727 Caucasian drivers and 12,734 minority drivers (African American, Native American/Alaskan, Hispanic, Asian/Pacific Islander). The Caucasian population accounts for 75.26% of the total population and minorities account for 24.74% in the sample study.

In the year 2004, the Carol Stream Police Department conducted 15,330 traffic stops and 75.25% were Caucasian and 24.74 % were minorities. The data reveals traffic stops are based solely on traffic violations not racial profiling.

Our Illinois Traffic Stop Study stats are different from your stats. The stats that we have gathered are 515 Caucasian Drivers stopped and 7 Minority Drivers stopped. You indicated we stopped 507 Caucasian Drivers. The actual number of traffic stops performed by us was 522. You are showing us to have performed 514 traffic stops. Also, we wrote 149 Citations, 317 Written Warnings and gave 56 Verbal Warnings. Your stats indicated that we wrote 452 Citations, 0 Written Warnings and 55 Verbal Warnings. All the other data looked to be correct.

Thank you for your assistance and explanation on the phone.

Sincerely,

The Carthage Police Department

Champaign Police Department

Traffic Stop Analysis Report

January-December, 2004

June, 2005
Executive Summary

In January 2004 the Champaign Police Department (CPD) began providing traffic stop data to the Illinois Department of Transportation as required by state law. CPD has striven to comply with not only the statutory requirements, but also the spirit of the law. This has been a challenging ambition as the reporting process has been nebulous and continually evolving. CPD staff recognizes the implications and importance of the process, and continues to provide as complete and accurate information as possible.

This report details the results of the first full year of traffic stop data. It addresses the demographic distribution of motorists stopped, the basis for the stop, and the disposition of the stops, whether the motorists were warned or cited. It appears that drivers of all races are cited at a similar rate, except for those tickets

TSSS COMMENTS TO IDOT

The Chicago Police Department welcomes the opportunity to comment on the results of the Traffic Stop Statistical Study (TSSS), an outcome of Public Act 93-0209, that has been managed by the Illinois Department of Transportation (IDOT).

We appreciate the accomplishments of the Northwestern University Center for Public Safety (NUCPS) and Dr. Alex Weiss in what can only be described as a vast undertaking across the state.

The analytic model developed for this project facilitated the data collection process and has helped the Chicago Police Department enhance our own analytic capacity.

We also recognize the level of effort and cooperation exercised by Chicago police officers. While this study asked officers to do more while conducting traffic stops, and imposed significant unfunded costs, it also presented an opportunity to demonstrate that the overwhelming majority of officers carry out their duties responsibly and within Department guidelines. Further, based on the data collection experiences of other departments, concerns that some level of de-policing could occur did not materialize. Our officers put community safety first and demonstrated the highest degree of professionalism.

This compilation of TSSS data will allow the Chicago Police Department to take a comprehensive look at traffic stops. We have not had this opportunity before and the department intends to make full use of the feedback from TSSS. We see it as an opportunity to improve traffic stop processes and bolster accountability throughout the ranks.

While disparity ratios in general cannot prove or disprove the existence of bias-based policing, we are encouraged by the data analysis presented. The analysis shows that the minority-non-minority ratio of stops is very close and appears to lean in a direction that indicates that the Chicago Police Department does not engage in bias-based policing. The Department has every reason to believe that traffic stop activity in Chicago is based not on the driver's race but on the same criteria that have guided law enforcement for decades—the driver's actions, reasonable suspicion, and probable cause. Consequently, we believe that the ratio is reflective of the Department's targeted policing strategies but also is a result of our efforts over the past decade to strengthen relationships with the minority communities.

However, we recognize that we cannot become complacent. Like any progressive organization, we can always improve. Therefore, this report will help us examine outcomes and consequences of traffic stops.

Further, we will continue to work with the community as we explore the traffic stop data and look for any patterns that may require supplements to current training or policy changes. While we are pleased that CPD currently provides diversity training at a rate of four times what is required to meet state mandates, we know that we can always refresh our training and continue to improve.

In addition, the department is continually striving to ensure diversity in our ranks through our recruitment and hiring processes. We re-instituted the cadet program to encourage those from minority communities to consider careers in law enforcement. We encourage participants in our community forums to identify potential law enforcement candidates from their communities. It is our goal to make sure that the Chicago Police Department reflects the community it serves.

In closing, the TSSS data shows that a police department can engage in aggressive crime control

strategies without employing biased-based policing, and that the Department's success in crime fighting is based on crime data and not race data. The data further reflect the Chicago Police Department's policy that any type of ethnic or racial profiling will not be tolerated. Further, we encourage citizens to report any instance of racial profiling directly to us so the matter can be fully investigated. Our policy does not consider any type of profiling to be a legitimate law enforcement tactic and any officer who engages in such activity will be disciplined. Finally, efforts to strengthen relationships between police and Chicago's diverse communities remain as primary objectives for the organization and for all Chicago police officers.

Thank you for the opportunity to comment. We look forward to continuing our participation in TSSS and in working in partnership with IDOT.

Agency: CLARENDON HILLS POLICE

- **Comments**

A review of the Department's monthly audit of traffic data submissions and an audit of this year's total traffic stop counts indicates that the Clarendon Hills Police Department stopped 2,944 motorists. Of that number, 81.28% were caucasian and 18.71% were minority drivers. Our internal audit finds the ratio to be .99.

- **Comments**

Although initially opposed to this study, mainly because of the size and makeup of our small, rural county, I feel the data provided adequately demonstrates our ability to evenly enforce the traffic laws in a consistent and fair manner. Our goal of a vehicle stop is to seek criminal activity, not to write traffic violators. We have made a sizeable dent in the meth problem here and some may be attributed to the aggressive nature of Deputies to make traffic stops, as well. Thank you for the survey as we have never kept statistics of this nature.

- **Comments**

These outcomes do not appear accurate. The majority of our stops have an outcome of "written warning", however, this is not reflected in your statistics (you indicate "citation" on all outcomes.

Also, we did have one search, and it was not indicated on you stats.

- **Comments**

After further review of statistics, it appears that written warnings resulted in citations on the review even tho they were entered as written warnings.

Thank You,
Scott Cantrell
Crossville Chief of Police

- **Comments**

The City of DeKalb and the DeKalb Police Department have worked for many years to develop a culture that would not tolerate racial discrimination in any form. To say racial discrimination does not exist is, of course, tantamount to closing our eyes to this decades old problem and pretending everything is fine. However, education, complaint procedures before the Human Relations Commission, published policies, and vigilance on the part of public officials and citizens go a long way toward solving the problem.

The City of DeKalb has had an active Human Relations Commission for more than twenty years. This Commission deals with complaints of all types of discrimination issues, including racial discrimination. The DeKalb Police Department has routinely trained its employees in cultural diversity since the 1980's and in recognizing and preventing biased enforcement in more recent years.

- **Comments**

I feel that the data, as presented represents a very balanced ticket writing program at my department. I feel that the data was not properly handled after being submitted by my department, because there is no breakdown of actual citations and written warnings (data shows all as citations) and feel like I have wasted my time to submit this information and have it misused in this manner. I feel that the study was and is a waste of valuable administrative time and hope in the future that traffic enforcement will be left to law enforcement as a tool to gain compliance to traffic laws and not as a pawn for special interest groups.

Chief Ward L. Davis
Decatur Park District
Decatur, Illinois

Agency: DECATUR POLICE

- **Comments**

The greatest number of calls for police service as well as the greatest demand for police presence to control gangs, drug trafficking, prostitution, and violent crime, is in our inner-city. The vast majority of police officers and resources are assigned to patrol and protect the inner-city with focus on those critical issues as well as fulfilling quality of life demands from the residents. The inner-city, according to the 2000 census tracts, has the highest concentration of Minority residents (greater than 50% of the residents are Minorities with fringe areas as high as 23%).

Since the highest concentration of police officers is located in the areas with the highest concentration of Minorities, it is logical that the number of traffic stops of Minority drivers will skew the disparity indexes. In addition, with drugs and weapons being top on the priority list, searches of those persons and vehicles stopped in inner-city neighborhoods also skew the disparity indexes.

IDOT Narrative - Racial Profiling 2004 Summary

Obtaining an accurate external benchmark is difficult if not virtually impossible. Nevertheless, we strive to obtain the most accurate information possible. We do believe our assigned benchmark (20.44) is not reflective of our driving population for several reasons such as surrounding community data, geographic location to O'Hare Airport and other major transportation facilities, hotel, entertainment, restaurants, convention centers, major thoroughfares and toll way access to name a few. To obtain an overall perspective of our non-white population, the below table examines the assigned benchmark (driving population) and the 2000 population census of our neighboring communities. Surrounding Neighborhood Data/Benchmarking

Assigned Benchmark		2000 Census	
Non-White Driving Population	2000 Census Non-White Population	2000 Census	
Hispanic/Latino Population			
Chicago	62.57%	69%	26%
Des Plaines	20.44%	24%	14%
Elk Grove Village	24.6%	17.7%	6%
Mt. Prospect	24.6%	26.2%	12%
Park Ridge	19.61%	6%	3%
Prospect Heights	29.68%	34.8%	27.5%
Rosemont	37.26%	42.2%	35.3%

In order to request an adjustment of our assigned benchmark, we would need to conduct our own traffic study and data analysis for modification consideration or hire an outside consultant. We decided to conduct an abbreviated in-house study first. We chose five locations where officers made the highest amount of traffic stops.

Total Site Survey

Total vehicle count = 32,524

Total driver count= 19,675

White	Non-White
14,576	5,099
74%	26%

Data from this study more accurately depicts our non-white driving population of 26%

Where do the drivers of our traffic stops live?

Driver's City Residence	White	%	Non-White	%	Total
Des Plaines	2193	72%	852	28%	3045
Chicago	928	53.3%	813	46.7%	1741
Mount Prospect	541	73.4%	196	26.6%	737
Park Ridge	264	92%	23	8%	287
Rosemont	71	46.7%	81	53.2%	152
Prospect Heights	74	66%	38	44%	112
Elk Grove	86	82%	19	18%	105
TOTAL	4157	67.3%	2022	32.7%	6179(100%)
Total Traffic Stops 2004					9806

REASON FOR STOPS – We have issued more moving violation tickets to white drivers than non-white drivers. There have been more equipment violations issued to non-white drivers than to white drivers. The rate of Licensing/Registration violations are relatively the same rate amongst white and non-white drivers. There can be a number of other reasons for the stop of a vehicle,

such as time of day (when), beat assignment (where) and directed/non-directed patrol activities (why). (Internal aggregate data available upon request)

Driver's City Residence	White	%	Non-White	%	Total
Des Plaines	2193	72%	852	28%	3045
Chicago	928	53.3%	813	46.7%	1741
Mount Prospect	541	73.4%	196	26.6%	737
Park Ridge	264	92%	23	8%	287
Rosemont	71	46.7%	81	53.2%	152
Prospect Heights	74	66%	38	44%	112
Elk Grove	86	82%	19	18%	105
TOTAL	4157	67.3%	2022	32.7%	6179(100%)
Total Traffic Stops 2004					9806

- Residents of the City of Chicago and Des Plaines represent nearly 50% of the total traffic stops conducted in 2004
- 63% of the total traffic stops in 2004 are residents from Des Plaines, Chicago and our other bordering communities; 32.7 % of those stops are non-white drivers and 67.3% are white drivers

The study and data reveals a more realistic dimension of the racial complexion of our driving population traveling through Des Plaines from bordering communities. Outcome of stop - amongst white and non-white drivers is virtually the same. Searches -White drivers represent 79% and non-white drivers represent 21% of the searches. White drivers are 1.66 more times likely than non-white drivers to be searched.

June 14, 2005
Deputy Chief Burton

Agency: DUPAGE COUNTY FOREST PRESERVE POLICE

- **Comments**

The demographic percentages assigned to the DuPage County Forest Preserve District are the same as those assigned to the DuPage County Sheriff's Dept. As applied to forest preserves, they are GROSSLY inaccurate. A few large forest preserves account for the majority of the Forest Preserve Police Department's activity. They are near municipalities that have high ratios of minorities. Also, demographics of preserve users are different than those of the general population. The preserves with the highest use are estimated to be upwards to 50% Hispanic and Asian. While the percentages seem to be high, the actual numbers of traffic stops are low. The Department welcomes questions and discussion.

Agency: DU-PAGE COUNTY SHERIFF

Agency: EAST HAZELCREST POLICE

- **Comments**

We believe these numbers indicate that the East Hazel Crest Police Department operates close to the established benchmarks. This report only looks at the police departments as a whole and not at individual officer statistics. The department is committed to this process and has evaluated each officer's performance on an individual basis. Additionally, the department provided all officers with cultural diversity training during 2004. We are pleased with the results during the past year and will strive to continue addressing relevant issues in policing.

Agency: EFFINGHAM COUNTY SHERIFF

- **Comments**

EFFINGHAM COUNTY HAS TWO CROSSING INTERSTATES, TWO CROSSING U.S. ROUTES AND TWO CROSSING RAILROADS THAT BRING APPROXIMATELY 300,000 PEOPLE THROUGH THE COUNTY DAILY. THE ADDITIONAL PEOPLE COMING THROUGH CAUSE THE STATISTICS TO BE DIFFERENT THAN THE POPULATION PERCENTAGES FOR THE COUNTY. THE OUTCOME OF STOP SECTION DOES NOT SHOW ANY WRITTEN WARNINGS AT ALL. THE WRITTEN WARNINGS HAVE BEEN ADDED TO THE CITATIONS, SO IT APPEARS WE WRITE A LOT OF CITATIONS. THESE STATISTICS FOR THESE REASONS ARE INACCURATE, AND THE EFFORT BY THIS AGENCY TO APPROPRIATELY PARTICIPATE IN THE RACIAL PROFILING STUDY IS A WASTE OF TIME.

Agency: ELIZABETH POLICE

- **Comments**

US Route 20 cuts through Elizabeth. Thousands of trucks and Cars use this major east west route each day. The Elizabeth Police Department enforces the speed limit with a zero tolerance toward speeding and unsafe driving in general resulting in a large number of citations being issued by the department.

Agency: ELK GROVE VILLAGE POLICE

- **Comments**

The Elk Grove Village Police Department commissioned Northwestern University Center for Public Safety to conduct a study based upon visual observation of motorists actually using the roadways in Elk Grove Village. Using these observation statistics, rather than court district census or village census statistics as a benchmark, the actual ratio in Elk Grove Village is .77.

Agency: EVANSTON POLICE

- **Comments**

The Evanston Police Department has reviewed the analysis of its 2004 traffic stops and finds a discrepancy of 32 too few records. Further review has determined that this difference is statistically insignificant. The analysis finds that the ratio between stops by the Evanston Police Department and the assigned benchmark is 1 to 1. Therefore, the likelihood of minority drivers being stopped is equal to their presence in the driving population.

- **Comments**

While every effort has been made to ensure the accuracy of the Galesburg Police Department's 2004 data the ongoing review of the submissions indicated that the material displayed was not correct. Efforts to verify the data between IDOT and the Galesburg Police Department will continue until resolved to the satisfaction of all involved. JHS/GPD

Agency: GENESEO POLICE

- **Comments**

The Geneseo Police Department has a strict biased based policing policy that prohibits the enforcement of the law based on ethnicity, creed, color and racial origin. The Geneseo Police Department follows the Constitution of the United States, believes in due process and equal protection of the law. The City of Geneseo is located next to Interstate 80 and has off and on ramps to Interstate 80. Several travelers from coast to coast use the services the City of Geneseo offers, such as restaurants, parks, gas stations and motels. Also State highway 6 runs east and west through the City of Geneseo and highway 82 runs north and south through the City of Geneseo.

Agency: GRAYSLAKE POLICE

- **Comments**

The minority driver population of Grayslake is estimated by IDOT to be 23.59%. We believe that estimate to be low, and that our data is reflective of Grayslake's daytime driving population that includes the student population of a large commuter college (College of Lake County) of over 15,000 students of which 35% are minorities, and Grayslake's nighttime driving population of 39% to 43% minority drivers which was determined in May and September of 2004 during roadside safety checks from a total sample size of 831 drivers. Our consent search data is consistent with our other percentages for all of the race categories, and our warning data is consistent with our data on equipment and licensing violations that allow less police discretion in giving warnings over citations. Chief Larry Herzog 6-9-05

Agency: HAMILTON POLICE

- **Comments**

We are located on the Illinois/Iowa border and one can be in Missouri in less than 5 minutes. Keokuk, Iowa which joins our city limits/state line is a community of roughly 12,000 people. The last traffic count I am aware of was over 15,000 vehicles cross the 4 lane bridge on US 136 into or coming from Iowa in a 24 hour period. As a result our enforcement, I think, reflects a larger demographic and population area than just what is contained within the City of Hamilton. When looking at the raw numbers I don't believe one can come to a conclusion that any type of a Racial Profile is being conducted by this department.

Walter Sellens, Chief of Police

- **Comments**

Dear Sirs,

I have reviewed the 2004 Analysis for our Department and have found it to be inaccurate. The Analysis stated our Department did not issue any Written Warnings, this is highly incorrct. I know our Deputies issued well over a hundred written warnings for moving violations. I do not have the time to go back through all of our warnings and citations issued in 2004, but I do know for sure there was written warnings entered into the study. Furthermore, this study is very time consuming and seems to be a waste of our time.

Respectfully submitted,
Deputy Jason Livingston
Hancock County Sheriff's Department

Agency: ILLINOIS STATE POLICE

- Comments

Law enforcement agencies across Illinois have been awaiting the Illinois Department of Transportation's (IDOT) report on the issue of "bias-based policing" or, more commonly, "racial profiling." The IDOT, as mandated by Governor Blagojevich and the General Assembly, was tasked with collecting data on all traffic stops conducted by Illinois law enforcement agencies. The Illinois State Police (ISP) supported the initial legislation and applauds this data collection initiative and considers it the logical first step in addressing this issue. However, the report should not be considered a panacea in determining bias-based policing. This report provides valuable insight into the actions of all law enforcement – and the ISP is eager to use it as a tool to improve our enforcement efforts, ensuring we meet our primary mission of protecting the public.

Preliminary reviews of the ISP data are encouraging, illustrating the ISP's culture of biased free policing. This culture is largely derived from a strong policy prohibiting bias-based policing and consistent diversity training. Historically, racial profiling was perceived when minorities were stopped at a higher rate than non-minorities - **the report confirms no racial disparity in traffic stops by the ISP**. In fact, the ISP is stopping minorities at a lower rate than expected, given the demographics of the traveling population. However, there is over-representation in the percentage of citations and searches conducted of minorities. In comparison, the state law enforcement agencies in Iowa, Missouri, and Washington, who have been collecting and studying stop card data for several years, have similar citation and search statistics to the ISP's. Each of those states has dedicated considerable resources in an effort to understand what these statistics represent. Suffice to say, there are other variables significantly impacting an officer's decision on whether or not to conduct a search. This over-representation, and review of other agencies' rationale, requires additional analyses of ISP data before presenting any conclusions.

Although the overall data is favorable, the Department will move to solidify the trust between the ISP and communities we serve by implementing several initiatives targeted specifically to ensure officers are not using bias in their policing activities. These initiatives are not in response to an institutional problem, but together are the correct strategy to combat the perception of bias-based policing.

First, data collection will continue. As stated previously, this is the first step in beginning to address this issue. Second, an independent review of the ISP's policies and training, as well as traffic stop data, will be commissioned. Third, internal, in-depth analyses will be initiated, and these subsequent results will become a staple to ensure the ISP is conducting enforcement activity fairly and effectively. Lastly, the ISP will request to convene an advisory policy board to flesh out issues surrounding this controversial topic and provide leadership for the law enforcement community.

In summary, the report does not provide empirical evidence the ISP is engaged in bias-based policing. However, some portions of the report require further scrutiny in order to gain understanding. The ISP is initiating several action items in order to ensure our enforcement activities are conducted fairly, objectively, and effectively.

Agency: ILLINOIS STATE UNIVERSITY POLICE

- **Comments**

Colleagues,

The Illinois State University Police Department began collecting data on citizen encounters in March of 2001. With the implementation of this new law we found the tracking of officer behavior is far more limited than we were able to do previously under our own process/protocol, as we also collected data on pedestrian police encounters.

We are also concerned with the bench marking data of "Estimated Minority Driving Population." We are uncertain if this number takes into account a large university's demographics, especially during specific times of the year when the number of minority drivers can increase, or decrease dramatically. We are also concerned that previous data collection by our department may no longer be a useful benchmark for internal evaluation of departmental behavior or specific officer conduct predicated on changes between our earlier collection protocol and the Illinois law.

Agency: JOLIET POLICE

- **Comments**

The Joliet Police Department finds no alarming information in the data provided by the Illinois Department of Transportation. The data reported is very similar to that the Joliet Police Department has been collecting and analyzing throughout the year. Motorists, irregardless of race have the same probability of receiving a citation or written warning when coming into contact with the Joliet Police Department on a traffic stop.

The ratios presented by the Illinois Department of Transportation are more clearly understood when the Joliet Police Department micro analyzed the location of the motorist traffic stops. A predominant number of minority traffic stops occurred within the minority community, while in areas with small minority populations very few minorities were subjected to traffic stops.

- **Comments**

The form for your data looks nice, but it seems the written warning citations that we wrote were all counted for actual citations. If this is the case then there should not be a category for written warnings, unless this is a way for the institution collecting the data to falsely show the real number of citations against a motorist's license, versus the written warnings given out, that gives the driver a break on their license, but also shows that the motorist was stopped for a violation of the Illinois vehicle Code. I did notice that the verbal warnings that were given out were counted as they should have been. If this is how the data we send to the State is going to be counted, then this program needs to be scrapped as this is not a true reflection as to the job we as law enforcement are doing. Chief Robert McDaniel

Agency: KENDALL COUNTY SHERIFF

- **Comments**

The Northwestern study reports Kendall Counties estimated minority driving population at 8.67%. In May of 2005, the U.S. Census Bureau ranked Kendall County as the second fastest (per capita) growing county in the nation. With the unprecedented growth in Kendall County, it is only reasonable to assume that the numbers presented by Northwestern do not reflect the most current and accurate make up of the Kendall County population.

In an attempt to present a more current view of the racial make up of Kendall County, the Sheriff's Office studied the race break down of student populations reported by Kendall County schools and school districts. The data reviewed was for the 2004/2005 school year. Only school districts where the vast majority of students actually live in Kendall County were included in the study. For example, although Plainfield South High School is located entirely within Kendall County, it was not included in the population averages because very few of the students attending live in Kendall County.

Total enrollment reported by Kendall County schools in 2004/2005 was 16,967 students. 3,460 of those 16,967 students were reported as non-white, and were identified variously as Black, Hispanic, Asian/Pacific Islander or Native American. This represents a self reporting minority student population making up approximately 20.4% of total student enrollment. While this number cannot be definitively linked to minority driving population, it does support the argument that said population is likely higher than the estimate provided by Northwestern in this study.

The Kendall County Sheriff's Office does not claim that the minority driving population of Kendall County is 20.4%. It is very likely, however, that it does fall in the 14-16% range. Assuming a 14% minority driving population, there is still a large discrepancy between that number and the 24.08% minority stops reported by the Sheriff's Office. In an attempt to understand the basis of this discrepancy, Sheriff's Office staff requested the Illinois Department of Transportation to provide them a breakdown of reported stops based on the ZIP code of the driver.

After receiving this data, it was discovered that approximately 54% of all reported stops were made on drivers who claimed to live outside of Kendall County. Further study of stops by ZIP code showed that stops on minority drivers were closely in line with Northwestern's Estimated Minority Driving Population for the drivers' city of residence. For example: the City of Aurora has an Estimated Minority Driving Population of 43.49%. Kendall County Sheriff's Office stops of minority drivers reporting to live in Aurora (by virtue of their ZIP code) was 45.2% according to IDOT figures. Similarly, 23.8% of stops made by Sheriff's Deputies on residents of the City of Joliet were minority drivers. Northwestern reports Joliet's Estimated Minority Driving Population at 34.99%. In contrast, only 14.4% of stops on Kendall County residents were represented as minority stops.

The point that must be made is: Although a study such as this is important to ensure basic fairness and equity to all citizens by law enforcement, benchmarks such as the Estimated Minority Driving Population cannot be arrived at without serious consideration of additional factors. The racial make up of the population surrounding the reporting agency must be assessed, as well the fact that each jurisdiction experiences daily transitory populations resulting from the movement of non-residents in and out of the city or county. These factors have a significant impact on each jurisdictions true minority driving population.

Agency: KENILWORTH POLICE

- **Comments**

The Kenilworth Police Department has prepared a comprehensive Traffic Stop Data Collection Report that is available online at www.kenilworthpd.org or upon request by calling 847-251-2141.

Traffic Stop Study Summary:

Traffic Stops

In 2004 Kenilworth police officers stopped 1,763 drivers for violations of the Illinois Vehicle Code. Caucasian drivers comprised 83.21% (1,467) of the stops and Minorities drivers represented 16.79% (296), generating a ratio of 0.86. Kenilworth's 2004 traffic stop ratio of 0.86 reveals that Minority drivers were stopped at a rate below their estimated driving population.

Reason For Stop

A superficial comparison of this data indicates that Caucasian and Minority drivers were stopped at different rates for different violations. A meaningful examination of these differences is significantly hindered by the limited number of Minority stops performed in 2004. Several years of data will need to be collected to provide an adequate sample size.

- **Comments**

The officers of the Kewanee Police Department are sworn to uphold and protect the Constitution of the United States and the State of Illinois that guarantee the protection of individual liberties and rights. The law enforcement actions of the Kewanee Police Department are initiated from witnessed or reported violations of the law without regards to the race, gender or ethnicity of the person(s) towards whom the enforcement actions are directed. The Kewanee Police Department supports the Illinois Traffic Stop Study and will continue in its efforts to address violations of the law in a fair and impartial manner.

Agency: LAKE FOREST POLICE

- **Comments**

The City of Lake Forest is situated among several communities that have high minority driving populations. Several of the roads in and around Lake Forest are used as major arteries between work and home for these minority drivers.

Agency: LAKE IN THE HILLS POLICE

- **Comments**

The department has a few comments about the study.

First, the lack of clear definitions for classification of minorities creates an environment lacking consistency, especially if the study data is used for comparative purposes among police departments. For example, if one department is classifying persons from India or Pakistan as being Caucasian, while others are using the Federal definitions and recording those individuals as Asian/Pacific Islanders, any type of comparative analysis will be flawed.

The second issue deals with the benchmark used. Simply utilizing census demographic information as the benchmark creates a study that will be in error as it is not accurately reflective of the demographics of the motoring public. In our particular case, traffic accident data and traffic survey data reflects a higher minority driving population than the census benchmark utilized in the study.

Agency: LAKE ZURICH POLICE

- **Comments**

The Lake Zurich Police Department has not issued written warnings since the implementation of the Lake County ETSB Computer-Aided Dispatching System. All activity is captured in an electronic format. Therefore, there is no need for written documentation unless a traffic citation is issued. The Computer-Aided Dispatch System maintains historical cross-referenced information. The Computer-Aided Dispatch activity is exported to a local records package.

The Lake Zurich Police Department is dedicated to delivering law enforcement services in a fair and unbiased manner. This philosophy is applied to the enforcement of traffic laws.

Agency: LINCOLNWOOD POLICE

▪ Comments

The Village of Lincolnwood has a population of approximately 12,359. Lincolnwood is 2.7 square miles bordered on three sides by the city of Chicago and on the north side by Skokie. The Village is adjacent to Niles and Evanston.

The Edens Expressway (Interstate 94) runs through the Village creating a gateway for travel between the northern suburbs and Chicago. The major roads within Lincolnwood are conduits for city travelers from the northeast side of Chicago to gain access to a major expressway.

Traffic volumes obtainable through the Illinois Department of Transportation indicate a considerable volume of traffic on Touhy Avenue near the Edens (44,000 daily), on Devon Avenue (29,600 daily) and on Lincoln Avenue (18,300) which is attributable in part to the Edens corridor. The north and south thoroughfares include Cicero (22,100 daily); Crawford (18,500 daily) and McCormick Road (25,900 daily) also contribute to traffic congestion within the Village limits*. Much of our routine traffic enforcement and all of the Occupant Restraint Safety Zones and IDOT IMAGE enforcement targets these major streets.

These traffic counts over an area the size of Lincolnwood creates one of the two disparities within the Illinois Traffic Stop Study for 2004. The estimation of minority drivers within our driver population is based on a benchmark determined by the 2000 Census for the Village of Lincolnwood. This benchmark identifies the total minority driving population of 24.72% for Lincolnwood. With 9,433 autos licensed by the Village of Lincolnwood for 2004-2005 and the traffic volumes reported, most of the driver population on our major streets is not local.

The second disparity is in the number of stops used by this report. The Traffic Stop Study indicates 2,162 traffic stops reported by the Lincolnwood Police Department for 2004. Our Integrity Shield software package used to track and transmit data to IDOT indicates that 3,950 traffic stops were reported for 2004**.

Our analysis of that data produces a percentage of stops of all minority drivers at 40% but further analysis reveals that of the 3,950 stops reported 90.6% of those stopped live somewhere other than Lincolnwood. Less than 10% of our reported stops were Lincolnwood residents. Considering our population, number of registered autos and traffic counts, it is reasonable to assume that our resident driving population is reflected by those percentages.

We have a distinct advantage in analyzing our traffic stop data due to the fact that we collect more information in our collection database than what is required by the Illinois Department of Transportation. For example, 2,228*** of our stops were on drivers listing Chicago as their home address. They reside in the Judicial District 1 which has a minority driving population of 62.57%. These numbers skew the results of the Traffic Stop Study when measured against the Lincolnwood benchmark used in the study.

When we examine the Lincolnwood residents stopped, they represent 9.4% of all of our 2004 traffic stops. The Lincolnwood minority population stopped is 28.5%**** of our resident driving population. This compares favorably with our prescribed minority population of 24.72% as listed in the Illinois Traffic Stop Study.

The purpose of examining this data in detail is to point out the disparity in using a Lincolnwood based demographic to establish the initial data set listed on the Traffic Stop Study, the ratio of minority drivers who stopped by Lincolnwood officers for traffic violations. The ratio is listed as 1.59 based on the Lincolnwood demographic of 24.72% for minority drivers versus the 39.5% actually stopped. The benchmark for a minority driving population needs to be adjusted to allow for Lincolnwood's proximity to the City of Chicago.

Lincolnwood police officers are not profiling minorities they are stopping traffic violators whose race reflects our actual driving demographic. This point is underscored by the rest of the Illinois Traffic Stop Study and their statistics.

The Illinois Traffic Stop Study for Lincolnwood highlights that the Lincolnwood Police Officers are stopping Caucasian and Minority drivers for the same reasons without any significant statistical deviation. It also demonstrates that all drivers are being cited and warned without any significant deviation. The percentages of consent searches do not show any remarkable disparity.

Using all of the 2004 records in our Integrity Shield database, our percentages that relate to the study are similar. Using the 3950 records from 2004, our data analysis is as follows:

Reasons for Stop	Caucasian Drivers		Minority Drivers	
Totals	2361		1583	
Moving Violations	1882	79.7 %	1244	78.6 %

SUMMARY

The Village of Lincolnwood Police Department is committed to earnestly working toward building trust throughout all segments of the community and to provide equal justice under the law. It is our desire that the collection and analysis of statewide and local data will help identify areas where improvements can be made in our practices and training. While there are limitations in the data collection and analysis process, the data supplied will provide the basis for constructive discussion between law enforcement and the community we serve.

Traffic law enforcement is an essential element in the delivery of effective police services to the community. Traffic stops are necessary in order to enforce traffic laws, deter violations of the vehicle code, promote a highly visible community presence and discourage criminal activity. Comprehensive traffic law enforcement is also essential to ensuring the safe and expeditious flow of traffic through the community.

The Lincolnwood Police Department rejects biased-based policing as a law enforcement tactic, and we will not encourage, tolerate, or condone its use by our members. We are committed to sound practices of bias-free policing based on reasonable suspicion, probable cause, and the use of good discretion. Our purpose is to create the safest atmosphere for our community; promote and foster a positive working relationship with the community; and to treat all people with dignity and respect.

The Lincolnwood Police Department encourages any person who believes that he or she was the victim of biased-based policing to contact the Chief of Police. With the help of each member of our community, we can ensure that the Lincolnwood Police Department continues to operate

fairly and bias free.

The data collected and used for this response is available for viewing by appointment.

Contact Deputy Chief Peter Swanson for details.

Lincolnwood Police Department
6900 N. Lincoln Avenue
Lincolnwood, Illinois 60712
847 673-2166
pswanson@lwd.org

- * Per IDOT at
http://gis.dot.il.gov/idotgis/trafficvolume/adt_main_table.asp
- ** IDOT was notified of this disparity, future data transmissions will be monitored for accuracy.
- *** 56.4% of all 2004 traffic stops were on Chicago residents, minority traffic stops were recorded at 43.9%, well below the minority standard for District 1.
- **** 106 Lincolnwood drivers were listed as minority out of 371 traffic stops on Lincolnwood residents.

Agency: LOMBARD POLICE

- **Comments**

The Lombard Police Department undertook a study to try and more accurately determine the driving population in the community. The study involved recording the race of all drivers involved in accidents during the year, as accidents are random in nature. By recording this data, it was learned that the minority driving population for Lombard ranges from approximately 18-25%. The range reflects the fact that the race of some drivers is unknown as they left the scene.

Agency: MACON COUNTY SHERIFF

- **Comments**

The data shows no written warnings were issued and we know that these were entered as such, apparantly the data was combined instead of broken into two different items.

Captain Bright
Macon County Sheriff's Admin

- **Comments**

The collection of the data is faulty. Our total number of stops and the number of written warnings and citations are wrong.

- **Comments**

Was surprised that there was no warning tickets showed on end of year report. We write hundreds of warning tickets. Each warning ticket is entered by myself as sheriff, than the warning ticket is black checked and given back to the issuing officer. I keep no further record in my files.

Agency: MCHENRY COUNTY SHERIFF

- **Comments**

McHenry County lies between four major metropolitan population centers, Chicago, Rockford, Milwaukee and Madison. Lake, Kane and Winnebago Counties are also heavily populated and result in traffic moving through McHenry County. The County is traversed by persons traveling between these population centers and by persons traveling to recreation areas in this County and in Wisconsin. The proximity to the Wisconsin border also translates into a significant number of out of state drivers contacted by this agency during traffic stops.

Fully 33.28% of all traffic stops made by this agency as recorded in the submitted data were conducted on out-of-county drivers.

When comparing similar statistical bases, the rate of contact with resident, minority drivers was 11.58%, as compared to the benchmark for our agency, which was set at 8.94%.

- **Comments**

Our review of this report and our documents indicate a substantial error in the system in that we show approximately 908 citations and 664 written warnings for 2004. My conversation with Suzie Myers of IDOT indicates that there is a computer problem which accounts for part of this error but there was no explanation for the remaining deficiencies between this report and our records. This is despite the fact that we manually loaded all of the records required to comply with the program. It is also my firm belief that if this system can't be corrected to reflect accurate data there isn't any sense in loading any of this information. Also I can't believe that this data was loaded for an entire year and no one caught that our agency had absolutely no written warning citations.

Village of Montgomery's Response

The Village of Montgomery supports all efforts to eliminate discriminatory practices in government operations. This support extends to efforts to eliminate racial profiling in traffic stops. In order to examine its practice, the Village of Montgomery initiated its own study of traffic stops in the Village of Montgomery using more relevant data and actual data. The Assessment of Police-Motorist Traffic Encounters Study (hereinafter referred to as the Study) can be viewed at the Village's Website at <http://ci.montgomery.il.us>. The Village's Study was prepared by the Northwestern University Center for Public Safety.

The Village's Study makes clear that the State's statistical benchmark data for Montgomery traffic stops is not "an appropriate benchmark." As stated in the Village Study, "for the statewide effort, there is no way to learn the demographic mix traveling through each municipality..." Moreover the Study goes on to state that "[the Study] clearly suggests that the ethnic mix of drivers is not representative of the census distribution."

The Village shares a long common border with a city that does not share its demographic profile. Moreover, the Village of Montgomery is home to, or is adjacent to, several large manufacturing enterprises (and many small ones) that draw their workforce from other areas that do not share the same demographic information. Accordingly, the State Report, which bases its calculations on modified census data (averaged for the entirety of Kane County; Montgomery is also in Kendall County), cannot be taken as representative or accurate for the populace of who drives on the Village's streets.

Further, the State benchmarks and traffic stop data lumps all dates and all times into one single numerical value. No attempt to compare like times, to like times is made. Therefore, the State Report is assuming again that the driving populace on Village roads is identical at all times. This is simply not accurate. The driving populace at noon is not the same as the driving populace at midnight. The Village's Study compared data for like times (i.e. an apples to apples approach of comparison).

The Village's Study sets benchmarks based on more reliable information (observational data) and based upon the Village's Study of a comparison of like times (i.e. like times for both traffic stops and traffic observations). That Study culminates in the data presented in Table 8 of the Village Study which shows as follows:

Traffic Stops	White	Black	Hispanic	Native American	Asian	Total	
Number of Stops		510	83	254	1	6	854
Percentage	59.8%	9.7%	29.7%	0.1%	0.7%	100.0%	

Observed Population	White	Black	Hispanic	Native American	Asian	Total
Number	5,930	708	2,452	1	115	9,206
Percentage	64.4%	7.7%	26.6%	0.1%	1.2%	100.0%

Benchmarking Limits

On the Number of

Traffic Stops	White	Black	Hispanic	Native American	Asian
Lower Limit	518	51	203	0	4
Upper Limit	575	83	256	1	17

As to the issue of the "outcome of the stop," the State Report does not show a substantial difference in result based upon race. The vast majority, in each case, were given written

warnings rather than citations, regardless of race. To the extent of any difference, the Village Study also addresses this question. The Village Study demonstrates that minority stops result in substantially more "must cite" situations than for White stops. This distinction from White stops explains any minor distinctions in the State Report as to the outcome of the stop.

As the Study states: "It is recognized that the individual police officer has considerable discretion in what action to take as a result of a traffic stop." For almost all registration and licensing violations, however, the officer is given little discretion and issuance of a citation is expected; insurance violations are also in this "must cite" category. Hispanics and Blacks are more likely than others to be stopped for equipment violations and for license and registration violations. A possible reason for the latter is that an examination of the Montgomery Police Department stop data shows that the average vehicle driven by Blacks and Hispanics are more than three and two years older, respectively, than the average vehicle driven by Whites.

It is reasonable to expect vehicle and related equipment defects to increase with vehicle age. As can be seen in [the Village Study table 12], Montgomery police officers issue most of their citations for "must cite" violations. Hispanics are more likely than other groups to receive citations in this category, with over 90% of their citations being considered "must cite" violations. The next highest group in this category, Blacks, shows almost 84% of their citations for "must cite" violations. Almost 67% of citations issued to Whites were for "must cite" violations."

In conclusion, as is stated in the Village's Study; "The findings indicate that Montgomery police encounters with motorists are unbiased. No significant differences occur between the proportion of drivers stopped for traffic violations and the observed driver population. Differences between the population of observed drivers and traffic stops by race or ethnicity likely arose by chance.... Table 8 shows that there is nothing that indicates any bias in stops conducted by Montgomery police officers." The data supports the fact that Montgomery does not support or practice racial profiling. The Village does stop and prosecute persons who commit crimes, regardless of their race.

- **Comments**

The data provided by the Illinois Department of Transportation (IDOT) does not accurately reflect the data collected by the Mount Prospect Police Department. Due to a software error, the data was not correctly categorized. This is evident in the fact that the Mount Prospect Police Department does not issue written warnings as indicated in the IDOT data table. Below is a breakdown of the data properly categorized.

Total Stops

- **Comments**

Our data indicates we transmitted a total of 10449 traffic stop instead of 10436 listed in report. We also have 214 consent searches as opposed to 212 listed in the report. Both numbers are statistically insignificant towards the final percentages and ratio.

WE WOULD LIKE TO SUGGEST ADDING A SECTION THAT IDENTIFIES THE OFFICERS RACE AND GENDER. ALSO, COULD A BOX BE ADDED UNDER THE RACE SECTION FOR MIDDLE EASTERNERS? OUR DEPARTMENT HAS HAD SOME CONFUSION ON HOW TO CLASSIFY THIS RACE. ANY SUGGESTIONS?

Agency: NORTH AURORA POLICE

- **Comments**

This study compares the North Aurora Police Department's traffic stop statistics to a benchmark number created specifically for this study. This benchmark theoretically represents the driving population within all of Kane County. As such, North Aurora's benchmark is identical to other communities within the county that are not representative of the population base we serve here. This benchmark was determined without allowing for the fact that North Aurora is geographically located immediately adjacent to the City of Aurora, with the largest minority population in Kane County. This benchmark also ignores the fact that Illinois Rt. 25, Illinois Rt. 31, and Randall Rd. pass through North Aurora. These roads are the most direct routes between Aurora, Elgin and Carpentersville; the three communities in Kane County with the largest minority populations.

Agency: NORTHBROOK POLICE

- **Comments**

The Northbrook Police Department has reviewed its traffic stop data and offers the following comments.

The Northbrook Police Department is pleased that the Traffic Stop Study for 2004 shows that the Department's ratio for traffic stops is within a tiny fraction of the expected ratio assigned to it by the Illinois Department of Transportation (IDOT). The Department is also pleased that its percentages for citations and written warnings for Caucasian and Minority motorists are nearly identical and that its consent searches are also on target and consistent with the stop data's expected ratio of 19%.

Since implementing its program, the Northbrook Police Department has constantly and closely monitored its stop and search data. The Department carefully reviews the data and produces the required data to IDOT on a quarterly basis. By producing the data on a consistent basis, the Department is able to analyze the data at regular intervals and compare it to previously produced data.

Agency: NORTHFIELD POLICE

- **Comments**

Establishing this benchmark is inexact, at best, and somewhat controversial. Northfield census data does not accurately reflect the racial composition of the motoring public on Village streets because it only seems reasonable to believe a certain percentage of drivers do not live here but are driving through Northfield, or are coming here to work or to visit. A recent traffic analysis of Willow Road revealed that 67,000 cars a day pass through Northfield along Willow Road. This does not take into account the other major thoroughfares such as Waukegan Road and the I94 Edens Expressway.

Agency: **PAYSON POLICE**

- **Comments**

For the noncaucasian stops the arrest percentages are higher because the 1 hispanic had multiple violations and was wanted on a warrant, the 4 blacks were all arrested for speeding in excess of the 6 mile over the limit warning zone (43/30,39/30,40/30,41/30).

- **Comments**

You have all of our stops as citations which is incorrect.

Also, why is there no category for race of officer. Why do you need address of violator? You should add a entry for violation so you know exactly why the violator was stopped instead of an other category.

Agency: PEORIA COUNTY SHERIFF

- **Comments**

I am satisfied with the results of the racial profiling study that this office participated in. The findings confirm what I have known all along and that is the Deputies of the Peoria County Sheriff's Office stop the violation and not the person. The study shows traffic enforcement conducted by the deputies on this department is consistent.

The study shows that percentage of minority drivers stopped is less than one percentage point of the estimated minority driving population. After a stop was made, 43.39% of the Caucasian and 43.09% of the minority offenders were issued traffic citations.

Sincerely,
Sheriff Michael D. McCoy PCSO

Agency: RANTOUL POLICE

▪ Comments

The data in your study is, I believe, not entirely accurate and needs clarification to better reflect the true picture of traffic stops by the Rantoul Police.

First, I believe your estimate of minority drivers to be flawed and underestimated. I am certain your estimate of 19.71% minority is taken from the year 2000 census. I believe there to be an undercount of the minority residents of Rantoul. I base that on two facts: 1). the census of 2000 lists the number of Hispanics to be 346 persons or 2.7% of Rantoul's population. We believe the actual number of Hispanics in Rantoul has doubled in the last four years and is now between 5-6% of Rantoul's population.

Second, 49.2% of occupied housing in Rantoul is rental housing. We strongly suggest there was an undercount of this population since much of this rental housing is low income and the natural tendency for some renters is to not report and others to under report those in the rental unit. There are few communities which have the quantity (by percentage) rental housing as does Rantoul. We believe this factor further questions the real credibility of Rantoul's estimated minority driving population.

Third, the minority student enrollment of the Rantoul High School is 26.9%. However, this total enrollment includes small towns and rural areas which are over 97% white. The racial composition of Rantoul Township High School of students from Rantoul only can be extrapolated from the racial composition of all students from only Rantoul in the ninth grade and that reveals 42% of those students are minority (non-white) and 58% white.

Fourth, there were 3670 factory and plant workers inside and nearby the Village of Rantoul in 2004. Some of these plants have a second or third shift and many of those employees do not reside in the corporate limits of Rantoul – but they travel throughout the community. The race of those employees is currently unknown.

One factor about driving habits is that younger drivers are the predominant offenders in the driving population. We have done an analysis of potential drivers in that age category in which there is more risk taking behavior, more driving offenses and more traffic accidents and that is the age group of 15 years of age to 44 years of age. The one thing that is unique to Rantoul's driving population is that the non-white driving population, proportionally, is much younger than the white driving population. Consider these facts:

- 1). 16.4% of Rantoul's white population is over 44 year of age whereas only 2% of the non-white population is over 44 years of age.
- 2). 70% of the non-white driving population in Rantoul is in the age range of 15-44 years of age whereas 58% of the estimated white driving population is in that age range.

When one closely examines the dynamics of who exactly is the driving population of Rantoul one must question the validity of the traffic stop data provided for review in June 2005. We believe the percentage of the estimated minority driving population of the Village of Rantoul to be considerably more than that listed. We believe that given all the facts presented in this commentary that the minority driving population to actually be 25-30% of Rantoul's driving population and given that by census data, those drivers in the high risk group (15-44 years of age) is proportionately higher for non-white drivers, that the data from the Rantoul Police Department is non-aberrational.

Chief Paul Dollins

Agency: RIVERSIDE POLICE

- **Comments**

It the written policy of the Riverside Police Department that it's police officers will not affect a stop of, detain, or search any person when such an action is solely based upon considerations of age, gender, race or ethnicity as that action would constitute a violation of the civil rights of that person. The men and women of the Riverside Police Department in the performance of their traffic enforcement duties are to act in a fair and impartial manner without regard to race or ethnicity of a motorist or the occupants of a motor vehicle.

All of our police officers have received extensive anti-racial profiling instructions and all traffic enforcement stop data are reviewed monthly to ensure that our police department's policy is being adhered to.

- **Comments**

Tuesday June 14, 2005

This is the Rockford Police Department's response to the 2004 Racial Profiling Study:

The department does not issue written warnings. This information is reflected in the "Outcome of Stop" area. The department had officers transmit their stop information electronically via the mobile data terminal through an access database. There was error on the department's fault as to the numbering sequence in the field modules of the database. Officers were checking an incorrect field placed in the database. The written warning numbers should be merged with the verbal warning/ stop card field. These combined fields accurately reflect the department's verbal warning/ stop card total information.

All other information on the report is an accurate representation of the 2004 driver stops.

Deputy Chief Chet Epperson
Rockford Police Department
Administration Bureau

Agency: **ROMEOVILLE POLICE**

- **Comments**

On behalf of the Romeoville Police Department I would like to comment on the racial profiling data provided by our agency.

? Police officers do not know the race of the driver they are stopping.

? Our data on measures of action remain the same for all stops.

? The Village of Romeoville's roadways are traveled daily by a large and diverse transportation community.

? Weber Road and Route 53 are highly traveled, providing direct access onto Interstate 55. Weber Road has an approximate daily traffic count of 50,000 and Route 53's daily count is approximately 40,000 vehicles.

Agency: ROSELLE POLICE

- **Comments**

The Roselle Police Department has carefully reviewed the traffic stop data we have collected and reported for 2004. We are confident our traffic stops approximate the driving population on the streets and highways in our community. The Roselle Police Department has collected the same demographic information for motorists involved in traffic crashes investigated by officers of the department in 2004. We believe this to be an appropriate measure of the driving population in Roselle of which the police have no control or influence. The Roselle Police Department's traffic stop data closely matches the data collected from traffic crashes in our community.

Agency: ROUND LAKE PARK-HAINESVILLE POLICE

- **Comments**

After extensively studying and analyzing one year of traffic stop data collection, representatives from the Round Lake Park - Hainesville Police Department met with Dr. Alexander Weiss the Director of the Center for Public Safety at Northwestern University to request a benchmarking adjustment based on the following justification.

The Round Lake Park-Hainesville Police jurisdiction is located in the heart of Lake County. Illinois Route 120 passes directly through our jurisdiction and the middle of Lake County ending in the East in Waukegan and in the West in McHenry County. This highway provides access from and to all geographical areas within Lake County including I-294 that has an entrance point off of Route 120 thus making our jurisdiction a central traffic hub.

Additionally our area serves the needs of the Latino community within Lake County by providing bilingual retail services, such as food markets, restaurants and automotive repair.

- **Comments**

Thank you for allowing us to comment on the Racial Profiling. The study results show what we knew prior to the legislation, we do not racial profile in Sangamon County. The additional burden to the Deputy on the street is time consuming and causes the Deputies to spend more time on each individual traffic stop due to the additional paperwork he/she must complete. While they are spending additional time on one traffic violator and filling out the Racial Profiling information, other traffic violators are able to go about undetected. We also believe that our productivity involving traffic stops is less since this requirement was mandated.

Thank you,
Neil M. Williamson
Sheriff of Sangamon County

Agency: SENECA POLICE

- **Comments**

I would just like to say that this was a good idea and the data used will be very helpful to the Seneca Police Department. I.D.O.T. is to be commended for the good job they are doing in keeping these kind of stats.

Chief Ray Meglan

Agency: SOUTH HOLLAND POLICE

▪ Comments

The formula used by IDOT to determine the minority (Black, Hispanic, Asian and other non-whites) driving population in the Village of South Holland relied upon outdated 2000 Census data, therefore; IDOT's estimate of the minority driving population is significantly flawed.

IDOT further assumed that South Holland streets would be traveled by citizens from all communities of the 6th Judicial District, which includes towns as far away as Crestwood and University Park. IDOT's analysis would have yielded accurate results if it had focused on the communities that either border South Holland or are in close proximity to South Holland along major feeder routes.

A far more accurate estimate of the minority driving population in South Holland is 80% not 50.67%. This estimate is based on a current departmental study of the customers patronizing South Holland businesses and on an analysis of the racial make-up of communities that border South Holland or are in close proximity to South Holland along major feeder routes.

1. Departmental Study

During 2004, the South Holland Police Department conducted a survey of customers patronizing businesses in South Holland.

The types of businesses included in the survey were limited to major hotels, grocery stores, gas stations and national chain restaurants. The survey tabulated only the drivers of the vehicles that visited these businesses. Of these, approximately 73% were minorities and 27% were caucasian.

2. Analysis of Bordering Communities

The Village of South Holland is located just 2 miles from the Chicago City limits. The Village has 4 major County and/or State routes running through it, and has an interchange with the Bishop Ford Freeway on the north and I80-294 on the south.

The estimated driving population of communities that border South Holland or are in close proximity to South Holland along major feeder routes was analyzed. These communities are Calumet City, Harvey, Markham, Dixmoor, Lansing, Dolton, Riverdale, Thornton, Phoenix, Calumet Park, East Hazel Crest and neighboring south Chicago Districts. If we use the 2000 census information, the estimated minority driving population of these communities is approximately 80%.

The major feeder routes into the Village are the:

- Bishop Ford Freeway
- Interstate 80-294
- Route 6 (159th-162nd St.)
- Sibley Blvd. (Rt. 83)
- State Street/Indiana Ave.
- South Park Ave./Chicago Rd.
- Halsted St. (Rt. 1)
- 170th St.
- Cottage Grove Ave.
- 154th St.

It is important to note that the Village of South Holland is a major regional draw in the Chicago Southland region. The Village has the largest industrial park in the Chicago Southland, which employs a significant amount of people from the region. This Industrial Park is home to major companies such as Ed Miniat Co., Carl Buddig, Con Agra, and Accurate Dispersions. In addition, South Suburban College and the 6 private schools draw students from all of the surrounding communities. Known as the "Community of Churches", South Holland has 28 churches that also attract parishioners from the local region.

The profound economic vitality of the Village of South Holland draws many residents from other communities. They travel into the Village for employment and to patronize businesses that are unavailable to them in their communities.

Examples are:

- Major banks and financial institutions
- Seven Car dealerships
- Major national restaurant chains and independent restaurants
- National grocery chains

Based upon the above information, we are confident that our departmental analysis of the data is more accurate than those developed by IDOT.

- **Comments**

The members of the St Charles Police Department, its officers and employees, are adamantly opposed to the use of any discriminatory actions. We do not encourage nor tolerate the use of any discriminatory enforcement actions. This department is accredited by CALEA maintaining high standards for excellence in our law enforcement mission. We are committed to the use of sound police strategies and pledge to maintain public trust and confidence in carrying out our duties.

Agency: **SUMMIT POLICE**

- **Comments**

The Village of Summit has a rising population of minority residents and transient motorists. At the present time, the Village has a hispanic populous of approximately 45 percentile. It is in my opinion, that in the near future, the benchmark figure of 57.64% calculated for the Village of Summit will have to be increased.

Chief Charles Wasko
Summit Police Department

- **Comments**

Our data reflects without question that there is no racial profiling in our jurisdiction. We believe in fair and impartial traffic enforcement across the board without regard to race, religion, nationality, sex, or any other denominators. Enforcing the law equally, leaves no areas left for possible law enforcement inadequacies. Complaints will inevitably still continue as do our taxes. We just have to accept it as human nature. We issue a large amount of written warnings to show that every stop does not have to result in a citation. It has been proven that more results of corrective driving behavior have been attributed to written warnings than receiving a citation. After all, no one likes to get a ticket. We continually strive to serve the public in the most efficient and professional manner possible. We also strive to keep a very positive attitude.

- **Comments**

The Racial profiling discourages officers to write tickets it takes longer to do the paper work as we all know officers are covered up with paper work.If I had to guess that maybe 5% of the officers in the state of illinois is profiling.Also what would keep an officer from cheating on the profile sheet.

- **Comments**

June 15, 2005

The Warrenville Police Department would like to comment on the updated report when the corrected total stops appear on this report. The total submitted stops should be 4455 total stops for 2004. This report reflects 3991. We will add our comments when the corrected report appears in this file.

Thank you, Warrenville Police Department.

Agency: WINFIELD POLICE

- **Comments**

The Village of Winfield is located in west central DuPage County. It is located directly to the east of the City of West Chicago with a 50.19% and to the south of the Village of Carol Stream with a 25.03% minority driving population benchmarks. Winfield is also home to Central DuPage Hospital, the area's regional trauma center that serves Winfield, West Chicago, Carol Stream, and Wheaton, as well as other communities within a ten mile radius. Central DuPage Hospital sees over 4,000 patients, visitors, and staff daily. The DuPage County Criminal Courts and County Jail are located directly on the Village's southern boarder on County Farm Road, one of the most heavily traveled streets in Winfield. County Farm Road experiences significant traffic volumes during morning travel times and also has a high level of traffic collisions at major intersections to the north of the county complex in the Village limits.

Agency: WOOD DALE POLICE

- **Comments**

Wood Dale's benchmark percentage has been established by Northwestern using the DuPage County minority population. There was no individual analysis conducted on the driving population for Wood Dale. The Wood Dale Police Department does not view this as a proper representation of the driving population for several reasons. Wood Dale is at the far northeast corner of the County, and is surrounded by towns with a much larger minority population than the rest of the county to the south and west of us. In addition, the industrial park, which makes up a large part of the city does not get figured in the census numbers. Several towns spent a great deal of money to conduct a complete analysis of their driving population. Wood Dale did not pursue this option, as it was not viewed as a cost effective measure. Instead, as a professional organization whose reputation relies on our integrity, the Department feels that it can objectively provide reasoning why the numbers for Wood Dale are dif
