Illinois Department of Transportation

Memorandum

To:	Files
From:	Jason Stringer
Subject:	IL 2 Public Information Open House
Date:	March 29, 2011

FAP Route 734 (IL 2)
Section 78R-2
Winnebago County
Job No. P-92-050-06
IL 2 from Auburn Street to Riverside Blvd in Rockford

The second public meeting for the Illinois Route 2 Phase I Study was held on Wednesday, March 9, 2011 at Spectrum School, 2909 N. Main Street, Rockford, Illinois from 1:00pm – 6:00pm. The meeting was held in an open house format with exhibit boards for review and the opportunity for attendees to provide comments, suggestions, issues and concerns.

The primary goal of the meeting was to inform the public of the progress to date of the N. Main Street (IL 2) corridor study that extends from north of Auburn Street to north of Riverside Boulevard in Rockford. In addition, the meeting was intended to provide the study team with a better understanding of the stakeholders' thoughts and concerns regarding the preliminary layout of the corridor.

Exhibits shared as a part of the meeting included:

- Two sets of the aerial plan view of the corridor with the preliminary layout of improvements. These included two alternates for the area between Eddy Avenue & River Bluff Boulevard (see Attachment 1).
- Two sets of the aerial plan view of the area between Burton Street & Eddy Avenue with a continuous version of the layout of improvements (see Attachment 2).
- Typical cross sections of the existing roadway (see Attachment 3).
- Location map displaying the project limits (see Attachment 4).

Handouts included a newsletter (see Attachment 5) describing the project and the study process. It contained a Comment Form (also made available in a larger size) for stakeholders to complete and submit either at the meeting or by mail.

Notice of the meeting was sent to 562 stakeholders (see Attachment 6 for mailing list) and was also advertised in the Rockford Register on February 22 and March 2, 2011 (see Attachment 7).

The meeting was attended by 98 people in total (see Attachment 8 for sign-in sheet).

The following public officials were in attendance:

- Senator Dave Syverson, 34th District, Illinois State Senate

The following organizations/agencies were represented:

- City of Rockford, Patrick Zuroske
- City of Rockford, Jeremy Bahr
- City of Rockford, Jonah Katz
- City of Rockford, Mark Rose
- Rockford Park District, Mark Smith
- Winnebago County Highway Department, Joe Vanderwerff
- Rockford Metropolitan Agency for Planning, Steve Ernst
- Rockford Metropolitan Agency for Planning, Gary McIntyre
- Stateline Area Transportation Study, Bob Soltau

The following local businesses were represented:

- Affiliated Realty
- Anna's Pizza & Pasta
- Burger King
- Deli Italia
- Greenwood Cemetery
- Holiday Express
- Kelly Williamson Company
- Krenek's Clock Haven
- McDonalds
- Mobil
- North Towne Enterprises
- Olson Funeral Home
- Rapunzel's
- Road Ranger
- Rockford Washer
- Special-T Engraving
- Spectrum School
- Stop-N-Go Stores
- Windmill Hill Inc.

The following media were represented:

- WREX
- WIFR

IDOT was represented by the following Project Study Team members:

- Eric Therkildsen (IDOT)
- Jay Howell (IDOT)
- Masood Ahmad (IDOT)
- Sam Abdullah (IDOT)
- Jason Stringer (IDOT)
- Jon McCormick (IDOT)
- Bill McWethy (IDOT)
- Cassandra Rodgers (IDOT)
- Tim Himes (IDOT)
- Mike LeFever (IDOT)
- Jon Estrem (HR Green, Inc.)
- Chris Hartke (HR Green, Inc.)
- Carrie Hansen (Images, Inc.)

Public Comment:
The public was invited to submit comments about the project via the comment form at the meeting or by mail. Comments received by March 25, 2011 will become part of the official public meeting record.

Fifteen (15) comment forms were received on March 9, 2011 at the Public Meeting. Five additional forms were submitted through the mail.

In general those in attendance at the meeting expressed support for improvements to the corridor. The Project Study Team explained the CSS process and design features of the corridor. In addition it encouraged input from attendees regarding the layout shown. Several attendees were interested in additional information regarding the N. Main & Auburn roundabout project. It was explained that the Auburn project is being administered by the City of Rockford.

Project issues and concerns expressed either verbally to the Project Study Team or through formal comment forms included the following topics:

- Realignment of N. Main between Custer & Eddy
- Inclusion of a multi-use path
- Raised median from Vernon to Custer and from Eddy to River Bluff
- Various issues regarding the impact to existing businesses & properties

The submitted comment forms are included in Attachment 9. Through these four stakeholders expressed interest in joining the Citizen Advisory Group (CAG).

Notable verbal comments are summarized as follows:

Dick Berman: Resident along Country Club Beach Road. He would like to see different access to N. Main for his neighborhood. He feels tying into Halsted is the best opportunity for this. He also feels the signals at N. Main and Halsted would provide for better accessibility. In addition, he voiced concern regarding a need to address access on the east leg of River Bluff to remedy the problems associated with vehicle queues at that location.

Michael Jones: The display mistakenly labeled the house located Yonge & Wagner with "Dentistry". The dental practice is in the same building as "Vince the Tailor & Sons II". He owns both properties and plans to live in the house & rent out the first floor. He also voiced concern about losing both properties.

Anna & Tony Chiarelli: Co-owners of Anna's Pizza & Pasta. Concerned regarding the loss of parking & feel it would require total acquisition of the property. They are not in favor of the new alignment & are concerned the roadway is being realigned simply to avoid the Olympic Tavern at the expense of their property. They have been in business 30 years & would like to stay at this location with Stop 'n' Go as a tenant if possible.

Andy Bowman: Owner of Stop 'n' Go. Concerned about impacts to the business & is not in favor of the realignment. Feels too many properties are impacted in an effort to save the Olympic Tavern. He questioned the importance of the the Olympic Tavern & would like to see the alignment shifted to the east in this area.

Frank Savitski : Resident. Opposed to Option 2 (raised median).

Doug Sreenan: Owns the residential property on the southwest corner of N. Main & River Bluff as well as three properties along River Bluff to the west of N. Main. He would like the widening of River Bluff to be more symmetric to the existing centerline & would like to see the flush median converted to a left-turn lane.

Jeff Orput: President of Edgewater Neighborhood Association. Voiced support for construction of a multi-use path.

Kathy Reckwald: Spectrum School. Opposed to a raised median between Eddy & River Bluff. Noted that a number of parents & buses turn left out of the parking lot & is concerned those motorists will make U turns at the median opening for the Truck Driving School or use side streets to travel south.

Terry Hall: Spectrum School. Likes Option 2 & sees value in it for aesthetics.

Various teachers & students from Spectrum School: Strongly opposed to a raised median in front of the school. Also noted there is an existing bus stop in front of the school which they feel is a safety hazard as it blocks sight lines for motorists entering the school parking lot.

Linda & Gary Webster and Angeline Sink: Property owners at corner of Louise Street & Deborah Avenue (one block west of the corridor). Do not see much cut-through traffic & believe the project would reduce it even further.

Jeremy Carter: City of Rockford. Voiced overall support for the layout, but has concerns regarding dual left turn lanes at Riverside & the extent of impact to the properties in the southeast & northeast corners of that intersection. It is his belief that traffic volumes will not warrant dual lefts. Also voiced concern about right-in-right-out access at Custer & indicated it serves a lot of traffic.

Celine Daul: Owner of residential property in the southwest corner of Louise & Jonathon. Voiced support for the project & indicated a preference for Alternate 1 (two-way left turn lane between Eddy & River Bluff).

Owner of Dealer Alliance Corp: Has a strong preference for Alternate 1.

Kris Sjostrom: Voiced overall support for the project.

Gene Smith: Owns & rents out the residential property in the northwest corner of Pierce & N. Main. Prefers that the property be a total acquisition. He also noted his property ponds water & hopes that project will remedy it.

Terry Hall: Retired fireman. Voiced concern that the raised median proposed in Alternate 2 would increase response time for emergency vehicles.

Joe Maring: Owner of Schoenig & Sons. Voiced support for the project. He also indicated he would prefer total acquisition of his property.

Jim Capone: Owner of Rapunzels. Voiced support for the project & indicated he understands the need to realign to avoid the Olympic Tavern which he feels is a valuable part of the corridor. He also is supportive of the multi-use path. He is, however, concerned that the project involves total acquisition of his property as he feels it is ideal for his needs & that a comparable property would not be available.

Shelly (Owner of Dog N Suds): Voiced concern regarding a raised median (Alternate 2).

Paula Knapik: Owner of Rockford Washer. Prefers a flush median rather than raised as she is concerned about inability to turn left into her property. She also noted the business name is not “Rockford Weather” as labeled on the display.

Doug Nelson & Bob Krenek: Owners of Krenek’s Clock Haven. They are supportive of the plan to purchase this property & had several questions regarding the land acquisition process which were answered at the meeting.

George Graham & Craig Opheim: Voiced concerns regarding extension of the raised median along the east leg of Riverside beyond their driveways. They would like to shorten the raised median approximately 100’ & widen the east driveway to provide two-way access. They would prefer to keep the west driveway as an exit-only, but noted it is more important that the east driveway & median be adjusted.

Jody Deery: Owner of properties in three of four quadrants of the N. Main & Fulton intersection. Voiced concern regarding the alignment of Fulton. It was explained that the CAG identified the Olympic Tavern as a corridor landmark, and the realignment was made to help preclude impacts to that property. Ms. Deery also had concerns regarding the impact to tenants & loss of income from her properties.

Richard Fang (Windmill Hill LC): Owner & lessor of North Towne Mall properties (southeast corner of Riverside & N. Main). Concerned about impacts to the bank (total acquisition), McDonalds (north-south access to drive-thru reduced to one lane), and elimination of parking along N. Main north of River Bluff which primarily serve Swedish Pancake House, Subway & China Buffet. He explained that impacts to the bank & McDonalds as well as loss of parking along N. Main will severely impact the viability of the entire shopping center. He requested that the multi-use path be routed along River Bluff to lessen impacts to the property. He also requested an onsite meeting.

Douglas Clark: Owner of McDonalds along Riverside. Reiterated concerns voiced by Richard Fang (see above) regarding impacts to the drive-thru. He added this location is the busiest McDonalds in Rockford & that the drive-thru accounts for 75% of his business there. He requested that the path be shifted to the north side of Riverside or along River Bluff.

Scott Olson: Fred C. Olson Funeral Chapel. Is not in favor of Option 2 (raised median). If Option 2 is selected, he would like shared access with Spectrum School & would not be opposed to reducing access to a single driveway.

John Carabelli: Representative of Road Ranger. Noted that from the edge of the canopy to the right-of-way line is currently 24' which is the least of any site they have. He voiced concern that reducing this would be undesirable, would place the new right-of-way line close to the tanks & would necessitate relocation of the on-premise sign at the corner. Road Ranger also owns the adjacent Happy Wok site & are concerned about loss of parking (13 stalls reduced to 7). He suggested reduced lane widths. He also voiced opposition to the raised median concept (Option 2) because he feels traffic would go elsewhere & choose their competition.

Alberto Altamore: Owner of Altamore's Restaurant (south of the project corridor). Concerned about impacts to Health First (northeast corner of Riverside & N. Main) and urged for modifications to save the building. Indicated he understands the need to acquire the properties across from the Olympic Tavern. He also indicated the North End Business Association extends north to the railroad crossing.

Michael Alexander: Owner of properties in northwest & southwest corners of Belmont & N. Main. Supportive of the project as presented but is not in favor of Option 2 (raised median).

PROJECT STUDY OF IL 2
FROM AUBURN ST. TO W. RIVERSIDE BLVD.

MARCH 9, 2011

MEETING LOCATION:
SPECTRUM SCHOOL
2909 N. MAIN ST., ROCKFORD, ILLINOIS

WELCOME TO THE PUBLIC MEETING

Welcome to the Public Informational Open House meeting for the Project Study of IL 2 from Auburn Street to Riverside Blvd. Personnel from the Illinois Department of Transportation, HR Green, and Images, Inc. are here to answer your questions and receive your comments regarding the proposed project.

This meeting is being held in an Open House format to allow informal discussions between the public and study team members. Participants are encouraged to submit written comments about the project. Written statements may be given to us today or mailed to the Deputy Director of Highways. A form is provided in this handout that you may use to submit your statement.

The purpose of the meeting is to share the recommendations from the Citizen Advisory Group (CAG) work sessions and solicit feedback. Interested persons may visit anytime between 1:00 and 6:00 p.m. IDOT will provide information regarding preliminary project details, the study schedule and process, study area characteristics & public involvement opportunities. Attendees will have the opportunity to review exhibits, provide comments, and meet with IDOT and study team representatives on a one-on-one basis.

FOR FURTHER INFORMATION CONTACT:

- All comments and recommendations will receive consideration
- Maps, drawings and other pertinent information are available at the IDOT District 2 Office located at 819 Depot Avenue, Dixon, Illinois, 61021
- Telephone (815) 284-2271 or Text Transmission (888) 642-3457
- Further Questions may be addressed to:

Title	Name	Telephone
IDOT—Studies & Plans Engineer & Acting Bureau Chief	Jay Howell	(815) 284-5351

PROJECT STUDY LIMITS BEGIN NORTH OF AUBURN ST. AND END NORTH OF RIVERSIDE BLVD.

ON BEHALF OF IDOT

This information is published on behalf of the Illinois Department of Transportation, District 2, to assist citizens in understanding the various elements of the project from earliest concepts to the completion of the roadway. This information allows you to learn about what has been done thus far, and what remains to be done to allow us to construct the project.

We, as a Department, hope you will find this handout useful and that it will help you understand what it takes to study, design, and construct a highway project. This handout should help answer some of the most commonly asked questions by the public regarding a project.

YEAR ONE — FEASIBILITY STUDY

A feasibility study is typically initiated to assess whether or not a proposed highway improvement warrants further study or whether additional Phase I Engineering Studies are needed. Feasibility studies typically are conducted to address the following types of questions.

- Will a new highway or major river bridge promote economic development in a certain region of the State and create more benefits than costs, or would upgrading existing highways be a better solution for satisfying State and local needs?
- Is a missing link of a four-lane highway causing traffic operational problems which, in turn, are creating a high number of accidents?
- Would it be possible and cost effective to build a new four-lane highway on new alignment through rugged terrain in comparison to upgrading the existing alignment?
- Other similar situations where additional information is needed before making a decision to proceed with more detailed engineering studies (e.g. major drainage alternatives, alternate locations for a proposed interchange).

Illinois Department of Transportation

IL Route 2 (North Main Street) Public Informational Open House

March 9, 2011

The Illinois Department of Transportation (IDOT) is studying IL Route 2 (North Main Street) within the City of Rockford. The IL Route 2 study area is comprised of approximately 2.0 miles, extending from north of Auburn Street to north of Riverside Boulevard. The study will take a detailed look at the current and future transportation needs of the corridor and will involve a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, affix a stamp, and mail.

Please send your comments related to the IL Route 2 project by Friday, March 25, 2011. Comments received by this date will become part of the public awareness meeting record.

YEAR TWO–THREE — PHASE I STUDIES & ENGINEERING

SCOPE

Phase I Studies include both Engineering and Environmental Studies, each requiring a separate decision-making process.

Phase I work can vary from a very minor type study to an in-depth investigation of corridors, alternative alignments and cross sections, different highway types, and other design features with consideration of social, economic, environmental, and engineering factors.

PURPOSE

Phase I studies are developed to ensure that, as practical, highway locations and proposed designs are consistent with Federal, State, and local goals and objectives. The following are considered when performing a Phase I study:

1. Design Uniformity: to ensure that the proposed improvement will satisfy a need and that uniform designs are used Statewide.
2. Public Involvement: develop the final design with input from the general public. (This is the stage of the project which we are in now.)
3. Public Interest Consideration: make final project decisions in the best overall public interest.
4. Adverse Effects of Project: ensure that the potential adverse economic, social, and environmental effects of proposed action have been fully considered.

SOCIAL, ECONOMIC AND ENVIRONMENTAL CONSIDERATIONS

The following items are discussed when developing a highway improvement:

- Effects on regional and community growth
- Conservation and preservation of natural resources
- Public facilities, services, and recreational areas
- Community cohesion
- Displacement of people, businesses, and farms
- Air, noise, and water pollution
- Aesthetic value

The depth of social, economic, and environmental analysis will vary depending upon the scope and nature of the project, the stage of project development, and magnitude of any adverse impacts. For major projects, the District will prepare a separate environmental document, i.e., an Environmental Impact Statement (EIS) or an Environmental Assessment (EA). For most projects the Project Report will document the environmental analysis.

DESIGN AND ENGINEERING CONSIDERATIONS

Phase I studies are used to identify the following:

- Need for highway improvement
- Capacity deficiencies
- Need to improve safety
- Project termini
- Typical Section
- Need for right-of-way
- Drainage concerns
- Location of traffic control devices
- Project Cost

The scope and depth of engineering analyses will vary depending on the scope of work.

YEAR FOUR—PHASE II ENGINEERING

PLAN DEVELOPMENT STAGE

The designer is responsible for preparing the final plans so that they can be constructed. To ensure the plans are correct and complete, the designer will review the Phase I report and the project commitment files. The plans are reviewed at the preliminary, pre-final, and/or final stages to ensure that they are free from errors and omissions.

Preliminary Plan Review, This is the stage that various bureaus, sections, agencies, etc. have a chance to conduct an overall review of the plans. The preliminary plan review will occur after the designer has essentially completed the plans, including the cover sheets, plan and profile sheets, detail sheets, cross section sheets, determined pay items, special provisions, etc.

During this stage the designer will address any utility conflicts and determine if adjustments and/or relocations are necessary. For major projects, several reviews may be necessary to avoid having to make substantial changes later in the plan preparation process.

LAND ACQUISITION

This phase is where the amount of right-of-way and easements are determined. Once the amount of property is determined, an appraiser will determine the value of the property we will need to acquire and the effect it will have on the remaining parcel. When the appraisal has been completed, it is then given to a negotiator who will meet with the property owner and discuss the value of the property. After the price has been set, either by negotiation or determined by a court, the sale of the parcel is completed and the transfer of the land is recorded. Another part of the land acquisition activity is relocation assistance for persons in legal physical possession of the real estate acquired, which may be tenants or owner/occupants. Those occupants may be residents, businesses (including farms and non-profit organizations), or just personal property that needs to be moved. In any case, anyone displaced by acquisition will be afforded relocation assistance.

UTILITY WORK

Utility coordination starts in Phase I where preliminary plans are provided to the utility owners. The utility owners mark their locations on the plans and return them to IDOT, where they are incorporated into the project files. The designer will do their best to minimize impacts to the utilities. Pre-final plans are then sent to the utilities so they can design the relocation of the facilities being impacted. Final plans are sent out with a 15 day notice to submit for a permit. This is done when the project is submitted for letting. Once the permit is approved and the new right-of-way purchased, the utilities have 90 days to complete the relocation. If the proper coordination is not done between IDOT and the utilities, it could effect the timing of the project.

YEARS FIVE—SIX—PHASE III ENGINEERING

CONTRACT PROPOSAL AND ADVERTISING FOR BIDS

After all the design plans and contract documents are completed, the construction improvement project is included on the Department's regularly scheduled advertisement for bids. All contractors must meet the Department's pre-qualification requirements.

The pre-qualification process reviews each contractor's experience; quality and timeliness of previously constructed work, and the equipment and capital they have available to complete the project. This pre-qualification rating establishes the size of project each contractor is able to bid on and the type of work they are qualified to do (i.e. bridges, resurfacing, concrete paving, traffic signals, etc.). This helps to assure that the contractor is capable of completing the work in a quality manner within the scheduled time limits.

All interested contractors are given four weeks to review the contract plans for the proposed project and prepare their bids to complete the work. The sealed bids are then reviewed at the scheduled bid opening. The contract is then awarded to the lowest bidder on the project who meets all the contract requirements and pre-qualifications.

CONTRACT AWARDED: CONSTRUCTIOIN BEGINS

During construction of the project, the Department inspects all materials used in the improvement, monitors the contractor's operation to ensure all specifications are followed, and completes all the required documentation

Materials inspection involves testing and approval of all items used on the contract, including aggregates, concrete, asphalt, culverts, traffic signals and metal products. Everything from trees and topsoil to pavement marking paint, must meet specifications before it can be used on the project.

Construction engineers and inspectors are assigned to each project to monitor progress and complete the necessary documentation. They make sure everything is located properly and built to correct dimensions.

Re: IL 2, Auburn Street to Riverside Boulevard

February 15, 2011

To Whom It May Concern:

Attached is a copy of an advertisement for a Public Informational Open House to be held on March 9th for the Illinois Department of Transportation's IL 2 (North Main Street) Project Study. The time and location have been highlighted for your convenience. This ad will be published in the Rockford Register Star on February 22nd and March 2nd. The project, currently in the preliminary engineering phase, is expected to include both widening and some realignment of North Main Street.

A Citizen's Advisory Group (CAG) has been working with our office to develop a design concept for the corridor. The attached drawings depict the initial design concept that has come out of the CAG process. The purpose of this meeting is to share the recommendations from the CAG work sessions and solicit feedback from local individuals. We hope you will plan to stop in and view the project displays and provide input.

If you have any questions regarding this meeting, please contact Masood Ahmad at 815/284-5510 or Jason Stringer at 815/284-5513.

Sincerely,

Eric S. Therkildsen, P.E.
Acting Deputy Director of Highways,
Region Two Engineer

March 9, 2011

The Illinois Department of Transportation (IDOT) is studying the IL Route 2 (North Main Street), from Yonge Street to Riverside Boulevard. The IL Route 2 study area is comprised of approximately 2.0 miles located between north of Yonge Street on the south and north of Riverside Boulevard on the north, within the City of Rockford. The study is taking a detailed look at the current and future transportation needs of the corridor and involves a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, place a stamp and mail.

Please send comments related to the IL Route 2 project by Friday, March 25, 2011. Comments received by this date will become part of the Public Awareness Meeting record.

Jason Stringer:

My concerns in regards to project IL2 center with the Burger King at 909 W. Riverside Blvd. At the March 9, 2011 meeting we had the chance to discuss all of my concerns regarding the following: We have asked that the median strip in the center of the road be shorted. We have asked that the median end somewhere near in a line with our road sign. We have asked that the East access to our property be widened to make that access an enter and exit point rather than just an enter point. We have asked if it is going to be possible to provide some type of "suicide" lane for motorists to use to help expedite the flow of traffic to the East. We have asked that the West exit of the lot be left in place to serve the customers wishing to exit to the West.
Thank you for taking all of our concerns seriously and giving them consideration.

Sincerely:

George B. Graham

Comments/Questions: Making the intersection at Fulton an awkward angle makes no sense. The city's interest in rehabilitating the roadway should coincide with a general urban renewal plan for the corridor. Find a more suitable space within the corridor to relocate the Olympic Tavern and anchor some of the urban rehabilitation around it. This proposed design affects a lot of properties adversely. More consideration should be given to the cost/benefit of saving the Olympic instead of relocating it. Do the right thing and don't give in to politics over common sense.

Comments/Questions: The two alternatives offer very different visions of the corridor and I would advocate for consistency with the Envision North Main plan in which shows some medians and landscaping in between Riverside and Eddy Avenue. Concerns with business access should be considered.

Comments/Questions: We fully understand the need for improvement. But it is our opinion that other options be explored to save our building. The building provides jobs and income for multiple families. This is our livelyhood. We also feel there more economical ways of doing this project, from the IDOT's point of view as well. While still maintaining the issues at hand.

March 9, 2011

The Illinois Department of Transportation (IDOT) is studying the IL Route 2 (North Main Street), from Yonge Street to Riverside Boulevard. The IL Route 2 study area is comprised of approximately 2.0 miles located between north of Yonge Street on the south and north of Riverside Boulevard on the north, within the City of Rockford. The study is taking a detailed look at the current and future transportation needs of the corridor and involves a public involvement process.

IDOT encourages your input throughout the study process of this project. Please place your comment forms in the boxes marked COMMENTS, or fold in thirds, tape closed, place a stamp and mail.

Please send comments related to the IL Route 2 project by Friday, March 25, 2011. Comments received by this date will become part of the Public Awareness Meeting record.

Comments/Questions: ~~This Issue~~ I am in favor of the plan A of N. Main. As of right now I am a student of Spectrum High School and the addition of the left hand turn lane would greatly ease the turning of Spectrum parents and students. I am in favor of IL Rout 2 project, and would think it would make N. Main St. a lot safer.

Comments/Questions: We much prefer the "turn lane" concept instead of the median with restricted access. We own two businesses on the corner of N. Main + Belmont and it would restrict our customer's access if they can't make a left turn on to Belmont from N. Main. Please consider the small businesses along N. Main who's access would be restricted by the median.

Comments/Questions: We have no objections to Alternate #1. Alternate #2 however would have a dramatic impact on our business. By placing a raised median in, it's current location, we would no longer be able head south with a funeral procession. This would cause two possible dilemmas: 1.) A longer route to the cemetery which would create a greater ~~change~~ chance of an accident. OR, 2.) Forcing the procession to make a "U" turn.

which would create obvious safety concerns. Additionally, Alternate #2 would prevent South bound traffic from safely entering our parking lot.

Comments/Questions: We are against the installation of a raised median down the center of Rt. 2. It would prohibit south-bound traffic from entering our business. The opening in the median would allow for exit only from our parking lot. Incoming traffic cannot enter at our ~~North~~ exit because of the drive-thru traffic flow around the bulding.

Comments/Questions: We, at Karl Schoening & Sons, Inc. (Schoening's), are in full support of the proposed N. Main Street improvements. However, we do have some concerns. Business interruption and possible re-routing, etc. will not affect us, but it may affect the smaller, retail businesses. This is especially true for those affected by the hard median between Vernon and Custer since there are no left-turn (west) possibilities. My biggest concern are the buildings that will be affected by actual demo work. I believe the owners of these buildings should have firmer dates regarding project commencement. The uncertainty doesn't allow for many businesses to plan ahead. Our building, for instance, is for sale. Who would buy a building with an uncertain future? We are all for the roundabout and total revamping of N. Main Street, especially if it would involve aesthetics upgrades, such as no telephone poles and more green space or possibly street lights.

Comments/Questions: We have concerns on both Versions

Version 1

Bike Path (on both Versions)

* Runs right Through our Tank farm
will have to relocate tanks and fuel lines
* Lot is already tight coming on that for
will put us out of business, with all
of the set backs that would be required
* only way it might work - would be to
eliminate the 5' Green Space or put the
bike Path on the other side of the street

Comments/Questions: Bike Trail on Riverside will block access to my Drive-Thru - our DT serves 550,000 cars a year and is 75% of our business The big trail in front of the store will limit the access and will make me do a very expensive Remodel -
