Appendix D	Formal Dispute Resolution Process	Page 96

## 1.0 PROJECT DESCRIPTION

US 30 is a major east-west connector in northern Illinois and serves as a primary link between Iowa and northeastern Illinois. This route was America's first coast-to-coast highway and is also known as Lincoln Highway. The need to improve US 30 was identified decades ago.

In 1967, the Illinois Department of Transportation (IDOT) singled out the need for improvements to US 30 in their "Illinois Highway Needs and Fiscal" report. In 2002, IDOT initiated an engineering study to evaluate the feasibility of an improved transportation system from east of Fulton to west of Rock Falls. After an extensive process of analyzing preliminary traffic reports, engineering data and public comments, IDOT determined that such enhancements are necessary to meet the growth and travel demands projected within the northwestern area of Illinois. Since the completion of the "US Route 30 Corridor Study" in 2006, the project has continued to receive support from the public, special interest groups, federal, state and local leaders, regional chambers of commerce, and economic development agencies. This continued support has resulted in federal funds being dedicated and programmed for an Environmental Impact Statement (EIS) and Phase I Design Report.

The proposed project is located in Whiteside County from IL 136 and Frog Pond Road, east of Fulton, to IL 40 in the city of Rock Falls. The study area is approximately 24 miles long and 10 miles wide which include six townships (Fulton, Ustick, Union Grove, Mount Pleasant, Hopkins, and Coloma) and the communities of Fulton, Morrison, Rock Falls, and Sterling. The city of Fulton resides west of the project's western terminus of IL 136 and Frog Pond Road. Traveling east, the existing US 30 bisects the city of Morrison, which resides in the center of the project study area. Continuing east, the project limits extend to IL 40 in the city of Rock Falls and provides the eastern terminus for the project. The project study area consists of large areas of agricultural land interspersed with rural farmsteads.

## 2.0 PURPOSE OF THE STAKEHOLDER INVOLVEMENT PLAN (SIP)

The Stakeholder Involvement Plan (SIP) is a document that is used as a blueprint for defining methods and tools to educate and engage the public and others throughout the project development process. This document is essential to accomplishing the goals of the Context Sensitive Solutions (CSS) process. The SIP is an "evolving" document and is subject to revisions by the Project Study Group (PSG) at any time deemed necessary by the project's progress.

The SIP identifies a listing of potential stakeholders (see **Appendix A**) and cooperating and participating agencies (see **Table 2**). In addition, the SIP sets the framework for how the joint lead agencies, the Federal Highway Administration (FHWA) and IDOT, will develop the project's National Environmental Policy Act (NEPA) process, as well as how the stakeholders and the public will interact with the joint lead agencies and provide input on the project as it moves forward. The joint lead agencies role will aid the PSG in adhering to all state and federal guidelines during the engineering and environmental study process.

The SIP goals and objectives are as follows:

- Identifies stakeholders to participate in the study process.
- Identifies the cooperating agencies (CAs) and participating agencies (PAs) to be involved in agency coordination.

### ***SIP Goals and Objectives (continued)***

- Identifies the roles and responsibilities of the joint lead agencies.
- Establishes the schedule and type of coordination efforts for engaging stakeholders, CAs, PAs, and the public.
- Defines the process for project development activities.

The coordination points and associated schedule to achieve these goals and objectives are shown in **Table 4**.

## **3.0 LEGAL REQUIREMENTS**

This project involves integrating environmental values and public input into the planning and preliminary design. This process will be achieved by following all state and federal requirements pertaining to a transportation improvement of this magnitude. These requirements include the following: National Environmental Policy Act (NEPA), the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) and Context Sensitive Solutions (CSS).

The FHWA and IDOT developed the Stakeholder Involvement Plan (SIP) to meet the requirements of CSS, and to address the Coordination Plan requirements of 23 USC 139(g) within the context of the NEPA process.

## **4.0 NATIONAL ENVIRONMENTAL POLICY ACT (NEPA)**

The FHWA and IDOT will complete an Environmental Impact Statement (EIS) for the US 30 project in order to satisfy the National Environmental Policy Act (NEPA) requirements. The NEPA process requires federal agencies to integrate environmental values into their decision-making process by considering the environmental impacts of their proposed actions and reasonable alternatives to these actions. NEPA encourages early and frequent coordination with the public and resource agencies throughout the project development process.

Since the mid-1990s, Illinois has had a Statewide Implementation Agreement (SIA) in place that provides for concurrent NEPA and Section 404 (Clean Water Act) processes on federal aid highway projects in Illinois. The purpose of the SIA is to ensure appropriate consideration of the concerns of the U.S. Army Corps of Engineers (USACE), the U.S. Environmental Protection Agency (USEPA) and the U.S. Fish and Wildlife Service (USFWS) as early as practical in highway project development. The intent is also to involve these agencies at key decision points early in the project development to minimize the potential for unforeseen issues arising during the NEPA or Section 404 permitting processes. State highway projects in need of FHWA action under NEPA and a standard individual permit from the USACE under Section 404 of the Clean Water Act are processed under the NEPA/404 SIA. The process requires Signatory Agency concurrence at three key decision points in the NEPA process:

- 1) Project Purpose and Need
- 2) Alternatives to be Carried Forward
- 3) Preferred Alternative

FHWA and IDOT will seek Signatory Agency input and concurrence at these key decision points in conjunction with public and agency involvement through the CSS process at regularly scheduled NEPA/404 meetings.

## **5.0 SAFE, ACCOUNTABLE, FLEXIBLE, EFFICIENT TRANSPORTATION EQUITY ACT: A LEGACY FOR USERS (SAFETEA-LU)**

On August 10, 2005, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) was passed into law which established additional requirements for the environmental review process for FHWA and Federal Transit Administration (FTA) projects (Pub. L. 109-59, 119 Stat. 1144, Section 6002; codified as 23 USC §139). The environmental review process is defined as the project development process followed when preparing a document required under NEPA, and any other applicable federal law for environmental permit, approval, review, or study required for the transportation project.

The SAFETEA-LU requirements apply to all FHWA and FTA transportation projects processed as an EIS, and therefore, the US 30 project is subject to these requirements. The 23 USC §139(g) requires the lead agencies for these projects to develop a Coordination Plan to structure public and agency participation during the environmental review process.

## **6.0 CONTEXT SENSITIVE SOLUTIONS (CSS)**

This project is being developed using the principles of Context Sensitive Solutions (CSS) per the IDOT policy and BDE Procedural Memorandum 48-06. "CSS is an interdisciplinary approach that seeks effective, multi-modal transportation solutions by working with stakeholders to develop, build, and maintain cost-effective transportation facilities that fit into the area's "context."<sup>1</sup> Ultimately through meaningful communications with stakeholders, the goal is to identify projects that should improve safety and mobility for the traveling public, while seeking to preserve and enhance the scenic, economic, historic, and natural qualities of the settings through which they pass.

The CSS approach will provide stakeholders with the tools and information they require to effectively participate in the study process including providing an understanding of the NEPA process, transportation planning guidelines, design guidelines, and the relationship between transportation issues and project alternatives. This integrated approach to problem solving and decision-making will help build community consensus and promote involvement through the study process.

The goals defined by the CSS process during the study phase of this project are as follows:

- Understand stakeholder's key issues and concerns.
- Involve stakeholders in the decision-making process early and frequently.
- Establish an understanding of the stakeholder's project role.
- Address all modes of transportation.
- Apply flexibility in design to address stakeholder's concerns whenever possible.

---

<sup>1</sup>Illinois Department of Transportation, "What Is CSS?,"n.d. <[www.idot.illinois.gov/projects/us-30-fulton-to-rock-falls/](http://www.idot.illinois.gov/projects/us-30-fulton-to-rock-falls/)> (accessed November 5, 2013)

## 7.0 PARTICIPATING AGENCIES AND PROJECT ADVISORY GROUPS

### 7.1 Joint Lead Agencies

Per SAFETEA-LU, the joint lead agencies for this project are FHWA and IDOT. As shown in the table, FHWA and IDOT are responsible for managing the environmental review process and preparing the environmental document for the project.

Joint Lead Agency Roles & Responsibilities			
Agency Name	Role	Other Project Roles	Responsibilities
FHWA	Lead Federal Agency	* NEPA/404 Agency * PSG	* Manage environmental review process * Prepare EIS * Provide opportunities for public and participating/cooperating agency involvement
IDOT	Joint Lead Agency	* NEPA/404 Agency * PSG	* Manage environmental review process * Prepare EIS * Provide opportunities for public and participating/cooperating agency involvement * Collect and prepare transportation and environmental data * Manage CSS process

### 7.2 Cooperating Agencies (CAs)

Per NEPA, a cooperating agency is any federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved in a proposed project. This could be a state or local agency of similar qualifications or when the effects are on lands of tribal interest, a Native American tribe, and may be a cooperating agency by agreement with FHWA and IDOT. By request of the lead agency, cooperating agencies (CAs) are permitted to assume responsibility for developing information and preparing environmental analyses for topics which they have special expertise. Furthermore, without re-circulating, they may adopt a lead agencies' NEPA document when they conclude that their comments and suggestions have been satisfied after an independent review of the document. See **Table 2** for a list of CAs and their roles and responsibilities. The responsibilities shown in the table are in addition to those listed below:

- Identify as early as possible any issues of concern regarding the project's potential environmental and socioeconomic impact.
- Communicate issues of concern formally in the EIS scoping process.
- Provide input and comment on the project's Purpose and Need Statement.
- Provide input and comment on the procedures used to develop alternatives or analyze impacts.
- Provide input on the range of alternatives to be considered.
- Provide input and comment on the sufficiency of environmental impact analyses.

### 7.3 Participating Agencies (PAs)

Per SAFETEA-LU, a participating agency is any federal, state, tribal, regional, or local government agency that may have an interest in the project. All agencies may not serve as participating agencies (PAs). Some agencies identified that are not environmental resource agencies may be represented on the Community Advisory Group. A current list of PAs is shown in **Table 2**.

## 7.4 Project Study Group (PSG)

In accordance with IDOT's CSS procedures, an interdisciplinary technical committee, defined as a Project Study Group (PSG), will be formed to provide guidance and recommendations to the leadership at IDOT and FHWA during the study process. The committee is comprised of individuals who represent environmental, engineering, and technical disciplines from IDOT, FHWA, USACE, and the Illinois Department of Natural Resources (IDNR). The PSG is a standing committee that may evolve depending on the phase or context of the project. The primary objectives of the PSG include:

- Expedite the project development process.
- Identify and resolve project development issues.
- Promote partnership with stakeholders to address identified project needs.
- Work to develop consensus among stakeholders.
- Provide project recommendations to the joint lead agencies.

A current list of PSG members is shown in **Table 1**.

## 7.5 Stakeholders

As defined by the CSS manual, a stakeholder is anyone who could be affected by the project and has a stake in its outcome. This may include property owners, business owners, state and local officials, special interest groups, and motorists who utilize the facility. The role of the stakeholder is to advise the PSG and the joint lead agencies, FHWA and IDOT, on various project-related engineering and environmental impacts or concerns based on the stakeholders interests. A consensus from stakeholders is sought, but ultimately the project decisions remain the responsibility of the joint lead agencies. Consensus is defined as a majority of the stakeholders in agreement, with the minority agreeing that their input has been considered. The stakeholders list will be updated throughout the project as additional interested parties are identified. A current list of project stakeholders is shown in **Appendix A**.

## 8.0 ADVISORY GROUPS

Advisory groups are a subset of the stakeholder list. Each group will have a defined role during the study process. These groups focus on specific issues affecting various aspects of the project, including technical, environmental, infrastructure, and economic conditions. In general, the role of the advisory groups will be to provide project input and advice, as well as assistance with building overall consensus as the project moves forward. Advisory groups may be formed for this project if recommended by the PSG or if a need becomes evident during the study process. The applicable advisory groups for the project study are noted in sections 8.1 and 8.2.

### 8.1 Community Advisory Group (CAG)

Community Advisory Group (CAG) involvement is essential to the CSS process. As a fully-engaged committee, CAG members are comprised of individuals who represent a special interest group in the area identified by the PSG, as well as those individuals or groups expressing an interest in serving on the committee. All CAG members will be required to participate in a number of workshop style exercises developed to solicit input and garner consensus from the members when managing community issues, addressing design/environmental and technical issues, and defining proposed design alternatives.

## **8.2 Technical Advisory Group (TAG)**

The Technical Advisory Group (TAG) is a specific and structured form of an advisory group. The group is assembled to review specific planning and design materials and to advise the PSG at key milestones before the information is finalized. If deemed necessary by the PSG, a TAG may be formed for this project.

## **9.0 GROUND RULES**

The SIP will operate under a set of ground rules to ensure there is a protocol and respectful interaction with all stakeholders and advisory participants involved in this process. The ground rules are as follows:

- The purpose of the stakeholder involvement process is to gather and duly consider input on the project from all stakeholders in order to yield the best solutions to problems identified by the process.
- Input from all participants in the process is valued and considered.
- The role of the stakeholder is to advise the PSG, which will make project recommendations to the leadership of IDOT and FHWA. A consensus of stakeholders is sought, but the decisions are ultimately the responsibility of IDOT and FHWA.
- All participants should keep an open mind and participate openly and honestly.
- Consensus is defined as the majority of the stakeholders in agreement, with the minority agreeing that their input was considered.
- All participants in the process must treat each other with respect and dignity.
- The list of stakeholders is subject to revision at any time.
- Minutes of all stakeholder contacts will be maintained by the PSG, with the content subject to stakeholder concurrence.
- The project must progress at a reasonable pace, based on the original project schedule.
- The PSG will make all final recommendations with a goal of seeking stakeholder consensus.
- All decisions by IDOT and FHWA must be arrived in a clear and transparent manner and stakeholders should agree that their input has been actively solicited and considered.
- Members of the media and the public are welcome to all stakeholder meetings, but must remain in the role of observer, not participants in the process.

## **10.0 PROJECT DEVELOPMENT ACTIVITIES AND STAKEHOLDER INVOLVEMENT**

The intent of the public involvement requirements as defined by NEPA, SAFETEA-LU and CSS is to involve various stakeholders early and often throughout the project development process. The goal is to inform, educate and gather input from various interest groups throughout the progression of the project. Highlighted in sections 12 through 23 are detailed procedures that the PSG will implement in an effort to develop the EIS and seek opportunities for stakeholder involvement. FHWA and IDOT will ensure that all public and agency involvement meets or exceeds the standards established in the CSS Policy for Illinois, the Public Involvement Guidelines in the IDOT Bureau of Design and Environment (BDE) Manual (Chapter 19) and the Concurrent NEPA/404 Merger Process for Transportation Projects in Illinois.

## **11.0 NOTICE OF INTENT (NOI)**

FHWA and IDOT will jointly prepare the Notice of Intent (NOI) to plan an Environmental Impact Statement for this project.

## **12.0 COOPERATING AND PARTICIPATING AGENCY INVITATION LETTERS**

IDOT and FHWA will send invitation letters along with sufficient information to potential federal, state and local agencies for them to review and determine if they have any jurisdiction or authority, special expertise or interest related to the project. IDOT will be responsible for identifying all potential state and local participants. FHWA will be responsible for sending invitations to federal agencies identified as potential cooperating or participating agencies and any non-federal agency that is identified as a potential cooperating agency. IDOT and FHWA will send the letters after FHWA publishes the project NOI and after FHWA and IDOT have agreed on the draft SIP.

Federal agencies invited to participate will automatically be treated as participating agencies unless they submit in writing by hardcopy or email to FHWA or IDOT that they:

1. Have no jurisdiction or authority with respect to the project
2. Have no expertise or information relevant to the project
3. Do not intend to submit comments on the project

Non-federal agencies must respond to the invitation in writing by hardcopy or email within the specified timeframe (no more than 30 days) in order to be recognized as participating agencies. If FHWA and IDOT disagree with an invited agency declining to participate, FHWA and IDOT will attempt to resolve the disagreement through established dispute resolution procedures (see section 21.0).

Agencies not initially invited to participate or that have declined an invitation to participate may become involved for reasons listed below:

1. An invited agency declines to participate, but the lead agencies think the invited agency has jurisdiction or authority over the project which will affect decision making.
2. An agency declines invitation, but new information indicates that the agency indeed has authority, jurisdiction, special expertise, or relevant project information.
3. An agency declines invitation and later wants to participate, then the agency should be invited to participate, but previous decisions will not be revisited.
4. An agency was unintentionally left out and now wants to participate, the agency should be invited and determined whether previous decisions need to be revisited.

FHWA and IDOT will determine if the new information and input warrants revisiting previous decisions. Any agency that declines to be a participating agency may still comment on a project through established public involvement opportunities.

It is the responsibility of PAs to provide timely input throughout the environmental review process. Failure of PAs to raise issues in a timely manner may result in these comments not receiving the same consideration as those received at the appropriate time. FHWA and IDOT will address late comments only when doing so will not substantially disrupt the process and established timelines. If a participating agency disagrees with the methodologies FHWA and IDOT propose, they must describe a preferred alternative methodology and explain why they prefer the alternative methodology.

## **13.0 SCOPING**

Scoping is a formal coordination process required by the NEPA regulations. Scoping is intended to focus the study effort on issues that are truly significant and avoid the collection of needless detailed information on insignificant issues. This process may be done by letter, phone or a formal meeting.

Scoping will initiate the stakeholder involvement process and engage both affected agencies and the interested public. Early coordination of the process connects with the principles of CSS, provides an introduction of the project to stakeholders and determines the issues to be addressed in the EIS. Agency and public scoping will be conducted concurrently.

According to Part 1501.7 of the Council on Environmental Quality (CEQ) Regulations, a formal scoping meeting may or may not be necessary.

## **14.0 EARLY STAKEHOLDER INVOLVEMENT**

An initial round of stakeholder briefings will be held with state and federal legislators, city councils, mayors, city managers, economic development directors, chamber of commerce representatives, state and federal resource agencies and any local, regional, statewide, or national groups with potential interest in the project. The purpose of the meetings is to share information regarding the project milestones and the next steps moving forward. It also allows the study team to acquire a better understanding of what the issues are according to the interest groups.

### **14.1 Context Audit**

As required by the CSS process, a Context Audit will be conducted in an effort to gather input from various stakeholders on what they believe is unique community characteristics within the project study area. The audit will survey community characteristics, infrastructure, environmental conditions, economic development, rural conditions, and resources within the study area.

### **14.2 Problem Statement**

A Problem Statement is required during the EIS process to identify transportation and infrastructure problems in the area. The Statement is developed to be realistic under the constraints of engineering considerations, available funding and geographic limitations. Based on data gathered from the Context Audit, the CAG in coordination with the PSG will use the information to develop a Problem Statement.

## **15.0 NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) PROCESS**

### **15.1 Purpose & Need (P & N)**

The Purpose and Need (P & N) section is an important chapter of an Environmental Impact Statement (EIS). It establishes why the agency is proposing to spend taxpayers' money while at the same time causing significant environmental impacts. A clear, well-justified P & N chapter explains to the public and decision makers that the expenditure of funds is necessary and worthwhile and that the priority the project is being given relative to other needed highway projects is warranted. Although significant environmental impacts are expected to be caused by the project, the P & N chapter should justify why impacts are acceptable based on the project's importance.

## **15.2 Alternatives Analysis**

Based upon the completed P & N, the PSG will work with the CAG to develop the reasonable range of alternatives. The PSG will then take the input received from these efforts and make any further needed refinements to the alternatives to be carried forward. If major changes are made to the alternatives to be carried forward additional advisory group meetings may be required. If additional meetings are not required then IDOT and FHWA will take the alternatives to be carried forward to the next regularly scheduled NEPA/404 concurrence meeting. Upon obtaining concurrence from the NEPA/404 Merger agencies, the alternatives will be considered finalized for inclusion in the EIS. IDOT and FHWA will consider input of the public and agency; however, the environmental review process does not require agency and public consensus on the range of alternatives chosen.

## **15.3 Draft EIS (DEIS)**

IDOT will prepare the Draft EIS (DEIS) in cooperation with FHWA. The P & N and the alternatives analysis conducted on two build alternatives and the no-build alternative will be incorporated into the DEIS. Approval of the DEIS lies solely with FHWA. FHWA will be responsible for ensuring the public availability notice is in the Federal Register and IDOT will be responsible for circulating the DEIS for comments. The CAs will receive a preliminary DEIS for a 30 day review prior to FHWA approval.

Within 15 days after the DEIS Notice of Availability is published in the Federal Register, IDOT will host a public hearing. Notices about the meeting will be advertised in local newspapers and on the project website. Flyers advertising the hearing will be mailed to organizations and individuals listed in the project database. Comments on the DEIS will be accepted for 45 days following the publication of the Notice of Availability in the Federal Register. A public hearing will be held after the DEIS is signed by the FHWA. A hearing is required by NEPA to gather input from the public on a preferred alternative. The comments received at the public hearing will aid the PSG in its recommendation of a preferred alternative.

## **15.4 Preferred Alternative**

Input from the CAG, the public hearing, comments on the DEIS, and stakeholder briefings will be used by IDOT and FHWA to make a decision on the selection of the preferred alternative and preliminary mitigation measures. The PSG will present the preferred alternative to the CAG to obtain consensus.

With consensus from the CAG, the PSG will then review and analyze the input received to make further refinements if needed to the preferred alternative. If major changes are made to the preferred alternative at this point, additional advisory group meetings may be required. If additional meetings are not required, IDOT and FHWA will take the preferred alternative to the next regularly scheduled NEPA/404 Merger meeting for agency concurrence on the preferred alternative. Upon obtaining concurrence from the NEPA/404 Merger agencies, the preferred alternative will be considered final for inclusion in the EIS. Ultimately FHWA and IDOT will consider public and agency input in selecting the preferred alternative; however, the environmental review process does not require agency consensus on the preferred alternative.

## 15.5 Record of Decision (ROD)

The Record of Decision (ROD) will be prepared by IDOT and input will be requested from FHWA. After the ROD has been revised by the Department and reviewed by FHWA, FHWA will approve the ROD and the agency will assume responsibility for its issuance. This will complete the study phase; however it does not mean the end of the CSS process or the SIP. Following the signed ROD, the SIP will be reconsidered and revised to include further phases of project development and implementation.

## 16.0 LIMITATIONS ON CLAIMS

SAFETEA-LU Section 6002 establishes a 180-day statute of limitations (SOL) on claims against federal agencies for certain environmental and other approval actions. The SOL established by SAFETEA-LU applies to a permit, license, or a specified approval action such as an action related to a transportation project. The SOL notification is published in the Federal Register. See PART A on page 44 of the FHWA/FTA SAFETEA-LU Environmental Review Process Final Guidance (November 2006) for the FHWA process for implementing the SOL. The SAFETEA-LU Environmental Review Process Final Guidance (November 2006) is available on the FHWA website at [www.environment.fhwa.dot.gov/strmlng/es2safetealu.asp#sec\\_6002](http://www.environment.fhwa.dot.gov/strmlng/es2safetealu.asp#sec_6002).

## 17.0 COORDINATION POINTS AND RESPONSIBILITIES

The SIP shows key coordination points where the agencies and the public have an opportunity to provide input in the NEPA process. Additionally, the SIP specifies the timeframe in which the agencies and the public will be expected to provide their input. The coordination points, including which agency is responsible for activities during that coordination point, are listed in **Table 4**.

## 18.0 PUBLIC OUTREACH TOOLS

Various public outreach tools will be used to engage, inform and solicit the communities input. Such tools include:

- Project Website – The project website, [www.idot.illinois.gov/projects/us-30-fulton-to-rock-falls](http://www.idot.illinois.gov/projects/us-30-fulton-to-rock-falls), was activated in November 2007. The website presents project status/updates, timelines, frequently asked questions, project maps, contact information, email, and space to comment.
- Project Hotline – A hotline was activated in July 2007. The number is 1-866-ROUTE30 (1-866-768-8330). This is another opportunity for the public to voice their comments or concerns regarding the project.
- Project Newsletter – A newsletter may be published and mailed to provide updates as the project meets major milestones.
- Project Fact Sheet(s) – Fact sheets are designed to provide project highlights and contact information. They will be published (as needed) at major project milestones. Each document published will be made available on the website and at project meetings.

## 19.0 OTHER METHODS OF CONTACT

Media relations will be a very important tool to inform and engage the public during the design/environmental study phase. The media outlets are often the primary sources of information for the public; therefore, measures to ensure information is conveyed accurately and consistently will be vital as the project moves forward.

Proposed media relations strategies developed to initiate interest and address outstanding questions centered on the project status are outlined in section 20.0. A list of media, newspaper and radio contacts are shown in **Appendix B**.

## 20.0 STRATEGIES

- Editorials/Op Ed – At the appropriate time, featured articles may be drafted for local or special interest papers to publish. These articles would either highlight the project progress or respond to project related issues.
- Media Appearances/Press Conferences – At appropriate times, opportunities may be sought for television and/or radio coverage of specific project activities and milestones. Additionally, the media may request an interview with a project representative.
- Press Releases – As needed, project related information will be released to the media in an effort to engage and inform the public of project status and/or meetings.
- Media Kits – Created for media use only, comprehensive media kits will be developed to include information about the goals of the project, the project anticipated schedule and opportunities for the public to get involved. Such information will include project description or fact sheets, major milestones or timelines, pictures, and a project staff contact list.

## 21.0 AGENCY DISPUTE RESOLUTION

This section describes the overall project dispute resolution process that will be used by IDOT and FHWA as part of the project stakeholder involvement program. Additionally, FHWA and IDOT will follow the existing dispute resolution process outlined as part of the NEPA/404 Merger agreement for resolving issues with signatory agencies.

IDOT and FHWA are committed to building stakeholder consensus for project decisions. However if an impasse has been reached after making good-faith efforts to address unresolved concerns, IDOT and FHWA may proceed to the next stage of project development without reaching consensus. IDOT and FHWA will notify agencies of their decision and a proposed course of action. IDOT and FHWA may propose using an informal or formal dispute resolution process as described in sections 21.1 and 21.2.

### 21.1 Informal Dispute Resolution Process

In the case of an unresolved dispute between the agencies, the PSG will notify all agencies of their decision and proposed course of action. The decision to move an action forward without consensus does not eliminate an agency's statutory or regulatory authorities, or their right to elevate the dispute through established agency dispute resolution procedures. The PSG recognizes and accepts the risk of proceeding on an action without receiving a signatory agency's concurrence and will work with any agency to attempt to resolve a dispute.

## **21.2 Formal Dispute Resolution Process**

The 23 USC §139(h) established a formal dispute resolution procedure for the environmental review process. This process is only intended for use on disputes that may delay a project or result in the denial of a required approval or permit for a project. Only the project sponsors or the Illinois State Governor may initiate this formal process; they are encouraged to exhaust all other measures to achieve resolution prior to initiating this process.

**Appendix C** contains a copy of a diagram illustrating the formal dispute resolution process included in the FHWA/FTA SAFETEA-LU Environmental Review Process Final Guidance (November 2006).

## **22.0 MODIFICATION OF THE STAKEHOLDER INVOLVEMENT PLAN**

Revisions to the SIP may be necessary. The PSG will provide updated versions of the SIP to all agencies involved, as necessary. Agency contact information may require updating as staffing changes occur over time. Cooperating and participating agencies should notify FHWA and IDOT of staffing and contact information changes in a timely manner. FHWA and IDOT will ensure that the PSG maintains the current contact information listed in the SIP.

The PSG will coordinate the timeline as shown in **Table 4** with the identified potential cooperating and participating agencies. Formal agency concurrence in the schedule is not required. Only the PSG may modify the established periods in the SIP. They may lengthen the established periods only for good cause and must document the reasons for the lengthening in the administrative record. The PSG may only shorten the established periods in the SIP with the concurrence of affected CAs. While other participating agencies will not concur in schedule changes, the PSG will consider their views in their decision to shorten the schedule. The PSG will document the cooperating agency concurrence in the administrative record.

A proposed schedule, topics, and objectives of upcoming stakeholder briefings, advisory group meetings, and public informational meetings and hearings can be found in **Table 5**.

The PSG will maintain a record of modifications to the SIP. The PSG will make this record available to all agencies and the public upon request.

## **23.0 PUBLIC AVAILABILITY OF THE STAKEHOLDER INVOLVEMENT PLAN**

The SIP is available for public review on the project website. Opportunities to review any modifications to the SIP will be made available to the public. An announcement notifying the public of those opportunities will be made available on the project website no later than 30 days after the finalization of any approved modifications.

## **24.0 CONTEXT SENSITIVE SOLUTIONS (CSS)/ PUBLIC INVOLVEMENT ACTIVITIES**

From the beginning of the project, the PSG have been actively engaged in reviewing various engineering and environmental data gathered. Also, the project study team has solicited input from the public, the CAG and community stakeholders at each major milestone as required by IDOT, NEPA and the CSS process.

Listed in this section are highlights of the CSS efforts to-date. They are as follows:

**Notice Of Intent (NOI)** – A Notice of Intent (NOI) was published in the Federal Register on August 9, 2007.

**Scoping Activities** – The scoping efforts for the US 30 project took place during the September 2008 NEPA/404 Merger meeting. IDOT, with input from FHWA, developed an impact assessment methodology the PSG utilized in the environmental analyses for the project. IDOT assumed primary responsibility for providing the methodologies to the cooperating and participating agencies for their review and comment. IDOT and FHWA took into consideration the input of various CAs while developing the methodologies; however, the environmental review process does not require agency consensus on the methods chosen.

**Stakeholder Meetings** - An initial round of stakeholder briefings was held in mid-2007. The project study team met with state and federal legislators, city councils, mayors, city managers, economic development directors, chamber of commerce representatives, state and federal resource agencies and any local, regional, statewide, or national groups with potential interest in the project. The purpose of the meetings was to share information regarding the project status and to also, share information on the next steps moving forward. The second round of stakeholder meetings was held in late 2007 to provide a project update to various stakeholder groups. A third round of meetings was held in early 2009 to present a project progress report, share comments and concerns conveyed during the first and second round of meetings, and to gather input from the stakeholders. The fourth round of meetings was held in mid-2009. The purpose of the meetings was to present the project progress; share comments and concerns conveyed during the public meeting and discuss the potential alternatives. The fifth round of meetings was held in mid-2010 to present the project progress, and to gather input and garner support from the farming and business stakeholder groups. The sixth round of meetings was held in mid-2012. The purpose of the meetings was to provide the public hearing results and discuss revisions to the two build alternatives as a result of the statewide floodplain modernization and the development of a Supplemental Draft EIS.

**Public Meetings** –The first public informational open house was held on July 25, 2007 with 252 people in attendance. The purpose of the meeting was to present the results from the US Route 30 Corridor Study, highlight the next steps of project development, interact with the public, and explain the public involvement process known as CSS. The meeting was set up as an open house format, allowing participants the opportunity to view display boards at various stations and to interact with the project study team. The following were three key issues from the comments received by the public: concern about environmental impacts, economic development and opposition to a bypass of the city of Morrison.

The second public informational open house was held on January 29, 2009 with 237 people in attendance. The purpose of the meeting was to present the corridors in which alternatives would be developed and to gather public input. An open house format was used to present information to the public. The following were three key issues from the comments received by the public: concern regarding farmland/environmental impacts, preference for a southern corridor and some opposition to a northern corridor.

**Context Audit** – A Context Audit was conducted as required by the CSS process. The CAG was tasked to complete the Context Audit during their first meeting on September 12, 2007. Below are a listing of characteristics identified:

- Rock Creek and Morrison-Rockwood State Park (Community Characteristics)
- Community Cemeteries (Community Characteristics)
- Farmland (Community Characteristics)
-

### ***Context Audit (continued)***

- The cities of Fulton, Morrison, Rock Falls, and Sterling (Historical Significance)
- Centennial Farms (Historical Significance)
- Underground Railroads (Historical Significance)
- South Morrison Industrial Park (Economic Development)
- Ethanol Production Facility (Economic Development)
- New Development around Wal-Mart Distribution Center (Economic Development)
- Agriculture/Farmland (Rural Significance)
- Union Grove/Forest Inn (Rural Significance)
- Emerson Road (Rural Significance)
- Access (Infrastructure)
- Bypass Impacts to businesses and communities (Infrastructure)
- Truck Traffic/Safety (Infrastructure)

***Problem Statement Identified*** – A Problem Statement was drafted at the second CAG meeting held on October 17, 2007. The committee utilized the completed Community Context Audit to develop and receive consensus on a comprehensive statement of the transportation problem to be solved by the project. The statement was developed to be realistic under the constraints of engineering considerations, available funding and geographic limitations. The Problem Statement developed is as follows: “The problem with US 30 in Whiteside County from Fulton to Rock Falls is increasing traffic volume and congestion which overloads the area-wide traffic system, comprises safety, mobility and reduces the quality of life of the adjacent communities. There is a need for improved economic development and accessibility to the region while preserving agricultural and environmentally significant areas.”

***Purpose & Need Statement Identified*** – The PSG reviewed the project context through engineering and environmental criteria presented, then further defined and reached consensus on the project Purpose and Need (P & N) Statement. The PSG used the Problem Statement and developed a preliminary outline of the project P & N Statement. The preliminary outline was presented by the PSG to receive FHWA approval in late 2007.

The PSG took the approved outline and developed a draft P & N Statement. IDOT provided an opportunity for the cooperating agencies (CAs) and participating agencies (PAs), the CAG, and the general public to give input on the draft P & N Statement. IDOT provided this opportunity to the general public by publishing notices in local newspapers that the P & N was available on the project website, on the IDOT Environment website, at local libraries, and at the IDOT-District 2 office. IDOT and FHWA sent a copy of the draft P & N Statement to the CAs and PAs for their review and comment prior to the September 2008 NEPA/404 meeting. The comment period was no more than 30 days. After the comment period, the PSG took the comments received and made refinements to the P & N Statement. If major changes were made to the P & N Statement at this point, additional advisory group meetings would have been required. Additional meetings were not required; therefore, IDOT and FHWA were able to take the P & N Statement to the next regularly scheduled NEPA/404 process meeting for agency concurrence. The P & N Statement was presented and received concurrence at the September 4, 2008 NEPA/404 Merger meeting.

***Alternatives Analysis*** – Following the second public informational open house held on January 29, 2009, the two proposed corridors were presented at a NEPA/404 Merger meeting on February 3, 2009. As a result of the presentation, a corridor that had been eliminated by the PSG was added back into the corridors for development of alternative alignments. Therefore, three corridors moved forward for the development of alternatives.

### ***Alternative Analysis (continued)***

The alternatives developed were screened against environmental and engineering factors and adjusted to reduce impacts to the natural resources, agriculture, cultural resources, and residences. Six alternatives were then presented to the PSG on April 27, 2010 and to the CAG on June 2, 2010. The purpose of the PSG and CAG meetings were to gain input on the alternatives and obtain consensus on carrying only two proposed build alternatives and the no-build alternative forward for further study.

In August 2010, the public had an opportunity to comment on the six alternatives under evaluation as part of the US 30 Draft Environmental Impact Statement (DEIS). IDOT received 67 public comments during the public comment period. The following were key issues from the comments received by the public: preserving farmland, economic development, environmental impacts, and funding for the project. The input gathered on the alternatives was utilized to aid the PSG in identifying two build alternatives to be studied further in the DEIS, as well as the no-build alternative.

Following the June 2011 public hearing, further evaluation of the build alternatives became necessary as a result of the statewide floodplain modernization efforts including the expansion of the floodplain associated with French Creek. Subsequently, the joint lead agencies determined that it would be feasible to realign the proposed build alternatives outside of the of the French Creek floodplain while retaining the basic nature of the original alignment. As a result, a Supplemental Draft Environmental Impact Statement (SDEIS) is required as an additional step within the EIS process.

***Public Hearing I-*** Following the signed DEIS in April 2011, a public hearing was held on June 15, 2011 with 212 people in attendance. The purpose of the meeting was to afford the public with an opportunity to view the US 30 Draft Environmental Impact Statement (DEIS) document, discuss their concerns regarding the project with the study team, and provide comments on the two build alternatives, 4 (northern) and 5 (southern), and the no-build alternative. The meeting was set up as an open house format, allowing participants to view exhibits and meet with IDOT personnel and representatives from the consultant team. IDOT received a total of 88 comments prior to the period end date, July 29, 2011. The following is a summary of common concerns from the stakeholders: farmland preservation, safety, economic development, environmental impacts, and funding of the overall project. The no-build alternative was preferred by farmers/farmland owners, homeowners and Morrison residents. Build alternative 4 (northern) received limited stakeholder support. Build alternative 5 (southern) was favored by special interest groups, business owners and developers.

***Public Hearing II-*** Following the updates to the Flood Plains, and the signed Supplemental Draft Environmental Impact Statement (SDEIS) in September 2014, another Public Hearing was held on Thursday, October 9, 2014, with 309 people in attendance. The purpose of the meeting was to afford the public with an opportunity to view the US 30 SDEIS document, discuss their concerns regarding the project with the study team, and provide comments on the two build alternatives, 4 (northern) and 5 (southern), and the no-build alternative. The meeting's objective was to gather input on the revised two build alternatives, and the no-build alternative, to aid in the decision-making process of a preferred alternative. The meeting was set up as an open house format, allowing participants to view exhibits, and meet with IDOT personnel and representatives from the consultant team. IDOT received a total of 139 comments prior to the period end date, November 10, 2014. The following is a summary of common concerns from the stakeholders: farmland preservation, safety, economic development, environmental impacts, and funding of the overall project. The no-build alternative was preferred by farmers/farmland owners, homeowners and Morrison residents. Build alternative 4 (northern) received limited stakeholder support. Build alternative 5 (southern) was favored by special interest groups, business owners and developers.

**TABLE 2: LIST OF AGENCIES, ROLES AND RESPONSIBILITIES**

The following is a list of agencies that may have jurisdiction, technical expertise or an interest in the project:

<b>TABLE 2-1: Lead Agencies</b>			
<b>Agency Name</b>	<b>Role</b>	<b>Other Project Roles</b>	<b>Responsibilities</b>
Federal Highway Administration	Lead Federal Agency	NEPA/404 Agency PSG*	Manage environmental review process; prepare EIS; provide opportunity for public & participating/cooperating agency involvement
Illinois Department of Transportation	Joint Lead Agency	NEPA/404 Agency PSG*	Manage environmental review process; prepare EIS; provide opportunity for public & participating/cooperating agency involvement; collect and prepare transportation and environmental data; manage CSS process

\*PSG = Project Study Group

<b>TABLE 2-2: Cooperating Agencies and Agency Responsibilities</b>			
<b>Agency Name</b>	<b>Cooperating Agency Response</b>	<b>Other Project Roles</b>	<b>Responsibilities</b>
Federal Aeronautics Administration	Declined		Potential impacts within 2 miles of public airports, 1 mile of private airports, ½ mile of restricted landing strips or require ROW from an airport. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Federal Emergency Management Agency	No Response		Federally assisted acquisition or construction project in an area identified as having special flood hazards. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
US Army Corps of Engineers	Accepted	PSG* NEPA/404 Merger Member	Section 404 permits jurisdiction; environmental reviews; wetlands. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
US Environmental Protection Agency	No Response	NEPA/404 Merger Member	Environmental reviews; wetlands. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
US Fish & Wildlife Service	Declined	NEPA/404 Merger Member	Fish & wildlife resources; endangered & threatened species; migratory birds; wetlands. Provide comments on Purpose and Need, methodologies, range of alternatives & preferred alternative

\*PSG = Project Study Group

**TABLE 2-3: Participating Agencies and Agency Responsibilities**

Agency Name	Other Project Roles	Responsibilities
City of Fulton	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
City of Morrison	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
City of Prophetstown	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Illinois Department of Agriculture	NEPA/404 Merger Member	Agricultural Land. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Illinois Historic Preservation Agency	NEPA/404 Merger Member	Archaeological & historic resources. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Union Grove Township	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Whiteside County Board	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative
Whiteside County Highway & Public Works Department	CAG*	Function varies by jurisdiction. Provide comments on Purpose and Need, methodologies, range of alternatives, & preferred alternative

\*CAG = Community Advisory Group

**TABLE 2-4: Agencies Declining Participating Agency or Cooperating Agency Status**

Agency Name	Reason For Response
Federal Aeronautics Administration	No airports impacted by or near the highway project
Illinois Department of Natural Resources, Office of Water Resources	Would have little information to add to the EIS effort
Sterling Township	No jurisdiction or authority with respect to this project

**TABLE 2-5: Cooperating and Participating Agencies not Responding to Invitation**

Agency Name	Requested Role
City of Clinton	Participating Agency
City of Rock Falls	Participating Agency
City of Sterling	Participating Agency
Illinois Division of Aeronautics	Participating Agency
Illinois Environmental Protection Agency	Participating Agency
Illinois Nature Preserve Commission	Participating Agency
Illinois Department of Natural Resources	Participating Agency
Albany Township	Participating Agency
Coloma Township	Participating Agency
Clyde Township	Participating Agency
Garden Plain Township	Participating Agency
Hopkins Township	Participating Agency
Lyndon Township	Participating Agency
Montmorency Township	Participating Agency
Mount Pleasant Township	Participating Agency
Ustick Township	Participating Agency

**TABLE 3: AGENCY CONTACT INFORMATION**

The contact information includes the lead, joint-lead and cooperating and participating agencies that have agreed to take part in the development of the proposed project. The contact person is the agency representative that is responsible for attending project meetings and reviewing environmental documents.

<b>Agency</b>	<b>Contact Person/Title</b>	<b>Phone</b>	<b>E-mail</b>
Federal Highway Administration Illinois Division	Catherine (Kay) Batey Division Administrator	(217) 492-4640	<a href="mailto:Illinois.FHWA@dot.gov">Illinois.FHWA@dot.gov</a>
Illinois Department of Transportation	Omer Osman Director of Highways	(217) 785-0888	<a href="mailto:Omer.Osman@illinois.gov">Omer.Osman@illinois.gov</a>
US Army Corps of Engineers (C)	Col. Mark Deschenes District Commander Susan Yager, Admin. Assistant	(309) 794-4200	<a href="mailto:Susan.e.yager@usace.army.mil">Susan.e.yager@usace.army.mil</a>
US Environmental Protection Agency, Region V (P)	Susan Hedman Regional Administrator	(312) 886-3000	<a href="mailto:hedman.susan@epa.gov">hedman.susan@epa.gov</a>
US Fish & Wildlife Service, Region 3 (P)	Richard C. Nelson Field Office Supervisor	(309) 757-5800	<a href="mailto:RockIsland@fws.gov">RockIsland@fws.gov</a>
Federal Emergency Management Agency, Region V (P)	Andrew Velasquez III Regional Administrator	(312) 408-5500	<a href="mailto:Andrew.velasquez@Dhs.gov">Andrew.velasquez@Dhs.gov</a>

(C) = Cooperating Agency (P) = Participating Agency

**TABLE 4: COORDINATION POINTS, INFORMATION REQUIREMENTS, RESPONSIBILITIES, AND TIMING**

<b>Coordination Point</b>	<b>Information “In”</b>	<b>Agency Responsible</b>	<b>Information “out”</b>	<b>Agency Responsible</b>	<b>Typical Timeline</b>	<b>Target Date</b>
Project Initiation	Send project initiation letter to FHWA Division Administrator or FTA Regional Administrator	IDOT	N/A	N/A	N/A	7/13/2007*
Notice of Intent (NOI) to Adopt	Publish NOI in Federal Register, send participating agencies a copy of the NOI; publish notice in newspaper	FHWA IDOT	N/A	N/A	N/A	8/9/2007*
Participating Invitations	Identify cooperating and participating agencies; send agencies invitation letters; conduct initial agency scoping activities	FHWA IDOT	Send response accepting or declining invitation to participate; identify potential issues associated with the project	Cooperating and participating agencies	30 days	9/24/2007*
Scoping	Prepare scoping materials; invite agencies and public to agency and/or public scoping meetings	FHWA IDOT	Participate in project scoping	Cooperating and participating agencies; public	30 days	Mid 2008 (Sept. 2008 NEPA/404 meeting)*
Impact Assessment Methodologies Collaboration	Provide methods on environmental surveys & analyses; solicit agency input on methods	FHWA IDOT	Comment and agree on methods & analyses of environmental resources; propose alternative methods, as necessary	Cooperating and participating agencies	30 days	Mid 2008 (Sept. 2008 NEPA/404 meeting)*
Purpose and Need Development	Provide participating agencies and public with a draft Purpose and Need Statement; solicit agency and solicit public comments	FHWA IDOT	Comment on Purpose and Need Statement	Cooperating and participating agencies; public	30 days	Spring 2008*
Purpose and Need Finalization	Consider comments in refining and finalizing Purpose and Need Statement; seek concurrence from NEPA/404 Signatory Agencies	FHWA IDOT	Concur on final Purpose and Need Statement	NEPA/404 Merger Signatory Agencies	30 days	9/4/2008*
Range of Alternatives	Provide participating agencies and public with information regarding alternatives being considered; identify resources located within project area, general location of alternatives, and potential impacts; solicit comments, public info. mtg.	FHWA IDOT	Comment on preliminary alternatives	Cooperating and participating agencies; public	30 days	Early 2009*

Coordination Point	Information "In"	Agency Responsible	Information "out"	Agency Responsible	Typical Timeline	Target Date
Alternatives to be Carried Forward	Refine data on resources located within project area, general location of alternatives, and potential impacts; prepare recommendation of alternatives to be retained	FHWA IDOT	Comment on alternatives to be carried forward or dropped; concur or non-concur on alternatives to be carried forward	NEPA/404 Merger Signatory agencies	30 days	09/14/10*
Circulation of Pre-DEIS	Send pre-DEIS to cooperating agencies	FHWA IDOT	Comment on pre-DEIS	Cooperating Agencies	30 days	11/24/10*
Circulation of DEIS	Send DEIS to all agencies and appropriate legal counsel; make DEIS available for public review; solicit agency and public comments; hold public hearing	FHWA IDOT	Comment on DEIS	Cooperating and participating agencies; public	45 days	06/15/11*
Circulation of Supplemental DEIS	Send Supplemental DEIS to all agencies and appropriate legal counsel; make Supplemental DEIS available for public review; solicit agency and public comments; hold public hearing	FHWA IDOT	Comment on Supplemental DEIS	Cooperating and participating agencies; public	45 days	10/09/14*
I.D. Preferred Alternative	Present rationale for preferred alternative to and solicit input from NEPA/404 Signatory Agencies	FHWA IDOT	Concur or nonconcur on preferred alternative	NEPA/404 Merger Signatory Agencies	30 days	Early 2015
Circulation of Pre-FEIS	Send pre-FEIS to cooperating agencies	FHWA IDOT	Comment on pre-FEIS	Cooperating Agencies	30 days	Mid 2015
Circulation of FEIS	Send FEIS to all agencies and appropriate legal counsel; make FEIS available for public review	FHWA IDOT	Identify any unresolved environmental issues	Cooperating and participating agencies	45 days	Late 2015
Issue ROD	Publish notice of availability of ROD in Federal Register; Publish Notice on Statute of Limitations in Federal Register, as appropriate; Make ROD available to public, as appropriate	FHWA	N/A	N/A	N/A	Late 2015
Completion of Permits, Licenses or Approvals After ROD	Issue applicable permits, licenses or approvals	Jurisdictional/ permitting agencies; FHWA	File documentation in administrative record	FHWA, IDOT	Varies by permit, license or approval	Late 2015
<b>*Completed Task</b>						

**TABLE 5: SUMMARY OF STAKEHOLDER, ADVISORY GROUPS AND PUBLIC OPEN HOUSE SCHEDULE**

<b>Stakeholder/ Advisory/ CAG Meetings</b>	<b>Target Date</b>	<b>Topic</b>	<b>Objectives</b>
First Round-Stakeholder Briefings	July 2007	Present project update, CSS process, and address any outstanding issues	Regenerate interest, educate and inform stakeholders and garner project support
First Public Informational Meeting	July 25, 2007	Present project update, CSS process, address any outstanding issues, and seek volunteers for CAG	Regenerate interest, educate and inform the general public, as well as garner project support
First CAG Meeting	September 12, 2007	Develop Problem Statement, present CSS process, address key issues, preview Purpose and Need Statement	Garner consensus on SIP and ground rules, conduct Community Context Audit
Second Round – Stakeholder Briefings	August/September/ October 2007	Project update and address key issues	Keep stakeholders informed; and garner consensus from all groups on issues listed
Second CAG Meeting	October 17, 2007	Review the project context through engineering and environmental criteria, further define Purpose and Need Statement, identify fatal flaws, review study bands, present potential corridor (s)	Development of Problem Statement & consensus, consensus on draft Purpose and Need Statement outline, and development of potential corridor (s)
Third CAG Meeting	May 8, 2008	Review of traffic analysis, crash analysis, SIP, logos, draft Purpose and Need Statement, and corridor (s)	Garner support and consensus on draft Purpose and Need Statement and corridor screening process
Fourth CAG Meeting	November 6, 2008	Review of corridors screening process, matrix, and corridors to be carried forward for further study	Garner support for corridors to be carried forward for further study
Third Round – Stakeholder Briefings	January/February 2009	Project update on corridors	Keep stakeholders informed and garner consensus to keep the project moving forward with the potential corridors
Second Public Informational Meeting	January 29, 2009	Present preferred corridors	Garner community support on design recommendations
Fifth CAG Meeting	June 10, 2009	Update on public meeting, results of ESR, review potential alternatives	Gather input on potential alternatives
Fourth Round – Stakeholder Briefings	June 2009	Update on public meeting, review corridors and potential alternatives	Keep stakeholders informed and gather input on potential alternatives
Sixth CAG Meeting	June 2, 2010	Present six reasonable alternatives and impacts	Gather input on the six alternatives
Fifth Round - Stakeholder Briefings	April/September 2010	Project update on alternatives and impacts	Keep community informed and garner support from farming and business stakeholders
Seventh CAG Meeting	June 8, 2011	Present two build alternatives studied in the DEIS	Gather input on the two build alternatives to aid in the decision-making process of a preferred alternative

<b>Stakeholder/ Advisory/ CAG Meetings</b>	<b>Target Date</b>	<b>Topic</b>	<b>Objectives</b>
Public Hearing	June 15, 2011	Present two build alternatives and the no-build alternative studied in the DEIS	Gather input on the two build alternatives and the no-build alternative to aid in the decision-making process of a preferred alternative
Eighth CAG Meeting	May 8, 2012	Update on public hearing, flood plain modernization, two revised build alternatives, and the Supplemental DEIS	Keep CAG updated on the two revised build alternatives, and the no-build alternative to aid in the decision-making process of a preferred alternative
Sixth Round – Stakeholder Briefings	May 2012	Update on public hearing, flood plain modernization, two revised build alternatives, and the Supplemental DEIS	Keep stakeholders informed and garner consensus to keep the project moving forward with the process of a preferred alternative
Public Hearing	October 9, 2014	Present two revised build alternatives and the Supplemental DEIS	Gather input on the two build alternatives to aid in the decision-making process of a preferred alternative
Ninth CAG Meeting	January 14, 2015	Update on the Public Hearing results	Gather input on the revised two build alternatives and the no-build alternative to aid in the decision-making process of a preferred alternative
Tenth CAG Meeting	2015	Update on public hearing Results	Provide the CAG with input from the community following updates to the floodplain and the Gather input on preferred alternative
Public Meeting	2015	Present the final alternative	Gather input on the preferred alternative

Appendix D: FORMAL DISPUTE RESOLUTION PROCESS, FHWA/FTA SAFETEA-LU

*Environmental Review Process Final Guidance, November 2006, page 40*

Figure 1. The SAFETEA-LU issue resolution process. Note that where two steps are not separated by a “yes” or “no” decision diamond, both steps must be taken.
