All applicants who want to be considered for this position MUST apply electronically through the illinois.jobs2web.com website. State of Illinois employees should click the link near the top left to apply through the **SuccessFactors employee career portal.**

Applications submitted via email or any paper manner (mail, fax, hand delivery) will not be considered.

Agency Mission Statement

The Illinois Department of Transportation is seeking to hire Engineering Technicians (ET I).

The IDOT team works diligently to provide safe, cost-effective transportation for Illinois in ways that enhance quality of life, promote economic prosperity and protect our environment. We are problem solvers and leaders, constantly searching for innovations and improvements in support of our commitment to providing the best multimodal transportation system for Illinois.

Our team fosters a culture of inclusivity. We value diversity and hold ourselves to the highest ethical standards as we work together for a common purpose. Team members frequently collaborate with colleagues and others outside the department to best meet customer needs.

The department offers extensive training and career advancement opportunities.

- As a Engineering Technician I, you have the possibility of promoting to an Engineering Technician II within 18-24 months.
- A possibility of promoting to an Engineering Technician III within 30-36 months.

Engineer Technician I's with the Illinois Department of Transportation are trained in a variety of specializations during their career. They work with engineers from diverse backgrounds, experiences, and careers. They are exposed to both external and internal engineering professionals. This program is a unique opportunity to expand your knowledge and career while networking within a vast engineering network. IDOT offers an ideal program to start and expand an engineering career.

Employees also receive a robust benefit package including:

- Monday-Friday work schedule
- Flexible work schedules are available in many program areas.
- Health, Life, Vision, and Dental Insurance
- Pension Plan
- (10) Weeks paid Maternity/Paternity Leave
- Deferred Compensation Program and other pre-tax benefit programs (Medical/Daycare)
- Employees earn (12) paid Sick Days annually.
- New Employees earn (10) paid Vacation Days their first year of service and can earn up to (25) paid Vacation Days annually.
- Employees earn (3) paid Personal Days annually.
- (13-14) paid holidays annually (based on start date)
- Tuition Reimbursement

We invite qualified applicants to apply to become part of our team. We are confident that you will take pride in serving Illinois and its residents and visitors.

Job Responsibilities

This position is accountable for performing very simple and fundamental field and office surveying operations for the preparation of precise large-scale topographic mapping and light detection and ranging (LiDAR) projects for the Office of Highways Project Implementation. In addition, this position assists other members of the Surveys, Mapping and Modeling Section in photo services, computer aided design and drafting (CADD), geographic information systems (GIS), remote sensing, and photogrammetric support and functions.

Photogrammetric survey program value: \$1,000,000
Photogrammetric survey equipment value: \$500,000

This position reports to the Photogrammetric Surveys Supervisor. There are no subordinates reporting to this position.

This position exists in an area where photogrammetric surveying, including target map and control survey preparation, field target setting, and processing and computation of those surveys is a critical function that must be accomplished prior to the implementation of most department projects. The Surveys and Photo Services Unit is the centralized location in the department for statewide survey support, while providing assistance to the districts in performing precise surveying for photogrammetric mapping. This position plays a unique role in the survey process as a member of the field photogrammetric survey crew responsible for gathering complete and accurate field data through the preparation and setting of survey control and processing of target control data.

The major challenge facing the incumbent will be familiarizing surveying knowledge and skills to the specialized surveying requirements for photogrammetric mapping and LiDAR projects. A typical problem is ensuring assigned survey responsibilities are completed accurately and in a timely manner to support the Surveys, Mapping and Modeling Section's mapping program.

The incumbent, as a survey crew member, assists in global positioning system (GPS) surveys, performance of reconnaissance surveys, project targeting development and field operations, selection of vertical and horizontal picture ties, processing of GPS data, and control monumentation. The incumbent operates and maintains general and advanced survey equipment and assists district and the Bureau of Design and Environment staff in performing surveying functions and support related to the design and construction of department roadway and structure projects. The incumbent assists other members of the Surveys, Mapping and Modeling Section in photo lab, CADD, GIS, remote sensing, and photogrammetric duties and functions.

(Job Responsibilities continued)

The incumbent is constrained by all department policies and must conform to department approved surveying practices. Problems of a sensitive nature are referred to the Photogrammetric Surveys Supervisor for resolution.

The incumbent's primary internal contacts are with district field survey personnel for the purpose of gathering information, accomplishing responsibilities, reviewing collected data, or resolving routine surveying problems. Externally, the incumbent has contacts with the general public for geodetic control monuments and with property owners explaining projects and requesting access to private property, in addition to contacts with consultant personnel who also collect survey data under the direction of the department. Occasional statewide travel with overnight stays may be required in the completion of field duties.

Effectiveness is measured based on the incumbent's ability to assist a survey crew to perform the survey tasks in a manner that ensures data is complete, accurate, and provided in a timely fashion.

Principal Accountabilities

1. Assists the survey crews in performing necessary field and office work in preparation of large-scale precise topographic mapping and LiDAR projects.
2. Assists district and the Bureau of Design and Environment staff in performing surveying functions related to the design and construction of department roadway and structure projects.
3. Assists in maintaining survey equipment.
4. Assists other members of the Surveys, Mapping and Modeling Section in photo lab, CADD, GIS,

photogrammetric, and remote sensing duties and functions.

5. Performs duties in compliance with departmental safety rules. Performs all duties in a manner conducive to the fair and equitable treatment of all employees.

6. Performs other duties as assigned.

Qualifications

Position Requirements

- Education/Experience:
 - Completion of two years of college in civil engineering technology, pre-engineering, or a job-related technical/science curriculum; OR
 - Two years of engineering experience
- Valid driver's license
- Occasional statewide travel with overnight stays

Position Desirables

- Knowledge and experience in preparation of photogrammetry, aerial survey, and LiDAR workflows, targeting, and control
- Experience using survey equipment and CADD software in survey processing or roadway and bridge design fields
- Knowledge of general roadway and structure design and construction practices

Work Hours: 8:00 A.M. - 4:30 P.M. Monday-Friday

Work Location: 2300 S Dirksen Pkwy Springfield, IL 62764-0001

Office: Office of Highways Project Implementation/Bureau of Design and Environment

Agency Contact: DOT.CONTACTHR@ILLINOIS.GOV

Job Family: Transportation; Sciences and Natural Resources; Technology
