We invite qualified applicants to apply to become part of our team. We are confident that you will take pride in serving Illinois and its residents and visitors.

Job Responsibilities

This position is responsible for the structural analysis and design of bridge repair and rehabilitation projects, the review of structural repair designs prepared by others, structural investigations of deteriorated and damaged structures, and the preparation of emergency repair plans.

Annual projects: 75 - 100

Contract value: \$2,500,000 - \$5,000,000

This position reports to the Repair Plans Group Leader. There are no subordinates reporting to this position.

This position has the responsibility for performing the structural analysis and design of repairs and rehabilitation of structures. These structures may require detailed analysis and the development of unique and innovative repairs as well as solutions to many structural engineering problems. The incumbent operates within an environment of ensuring that repairs to damaged or deteriorated structures are designed economically, are structurally sound, and provide the traveling public with the least amount of inconvenience. S/He may be required to perform structural inspections and investigations of deteriorated or damaged structures and to prepare associated reports.

Typical problems encountered by the incumbent include the necessity to develop and maintain a comprehensive knowledge of structural engineering theories and principles so that s/he can design structural repairs. Repairs and retrofits designed by the incumbent are unique and the structure types vary in size and complexity. The greatest challenge faced by the incumbent is keeping abreast of the advancements in the various facets of bridge work through continued pursuance of information on bridge design, construction procedures, construction equipment, and fabrication and welding technology. The incumbent is also challenged to prepare or review emergency repair plans in the shortest possible time while ensuring structural integrity.

The incumbent is personally responsible for the preparation of structural repair plans for routine maintenance or structures damaged by vehicles or river traffic, and the review of repair and retrofit plans and documents prepared by other members of the Bridge Investigations and Repair Plans Unit or by the districts. S/He is responsible for the design of detailed structural repairs for deficiencies found during the annual state line joint maintenance inspections of border bridges and in-depth inspections of major structures within the state of Illinois. The incumbent also reviews and recommends approval and/or disapproval of contractor proposals for shoring, bracing, and jacking.

Under general supervision, the incumbent is guided by the American Association of State Highway Transportation Officials (AASHTO) specifications and current interim specifications and applicable departmental

(Job Responsibilities continued)

policies. The incumbent must refer to the Repair Plans Group Leader for the resolution of problems concerning actual or potential deviations from accepted design practices, policies, specifications, and procedures.

The incumbent has internal contact with the districts when resolving structural problems occurring in the field. S/He also has frequent contact with the Bridge Ratings and Permit Unit and the Bridge Management and Inspection Unit in the Structural Services Section as well as the Bridge Design Section and Bridge Planning Section. The incumbent also will have occasional contacts with consultants or contractors doing work with the state. Occasional statewide travel with overnight stays is required.

The effectiveness of this position can be measured by the technical expertise displayed by the incumbent in the analyses required for the completion of repair projects, the incumbent's ability to solve varied types of structural engineering problems, and by the timely completion of assigned projects.

Principal Accountabilities

1. Develops structural repairs for varied types of structures which incorporate innovative repair procedures with current methods and technology.
2. Prepares emergency repair plans for structures damaged by vehicles or river traffic.
3. Reviews repair and retrofit details prepared by others in the Structural Services Section or by district personnel.
4. Performs the structural analysis of defects discovered on structures.
5. Performs field investigations of damaged or deteriorated structures and recommends corrective action.
6. Reviews and recommends approval or disapproval of contract proposals for shoring, bracing, and jacking.
7. Performs duties in compliance with departmental safety rules. Performs all duties in a manner conducive to the fair and equitable treatment of all employees.
8. Performs other duties as assigned.

Qualifications

Position Requirements

- Completion of a bachelor's or master's degree in engineering from an ABET accredited college OR Engineer Intern license in the state of Illinois
- 43 months of civil engineering experience
- Valid driver's license
- Occasional statewide travel with overnight stays

Position Desirables

- Thorough knowledge of bridge design
- Knowledge of construction and maintenance practices
- Knowledge of inspection technology
- Ability to coordinate multiple projects with variable emergency repair characteristics
- Ability to develop and maintain cooperative relationships with departmental staff, consultants, and contractors
- Strong oral and written communication skills

Work Hours: 8:00 A.M. - 4:30 P.M. Monday-Friday

Work Location: 2300 S Dirksen Pkwy Springfield, IL 62764-0001

Office: Office of Highways Project Implementation/Bureau of Bridges & Structures

Agency Contact: DOT.CO.BPM.EmploymentApplications@Illinois.gov

Job Family: Transportation
