Work resumes Friday on Weber Road at I-55

CHICAGO – The Illinois Department of Transportation announced today that work will resume on the Interstate 55/Weber Road interchange, in Bolingbrook and Romeoville, weather permitting, Friday, April 8. To complete the work, daytime and occasional overnight lane closures will take place.

The \$47.9 million project involves reconfiguring and widening the existing interchange into a diverging diamond design and adding a third lane of travel to each direction of Weber Road, between Normantown Road and 119th Street/Rodeo Road. The project also includes installing modernized traffic signals at the intersections of Normantown Road, Remington Boulevard/Windham Parkway, Rodeo Drive/Remington Boulevard and at the interchange ramps, as well as new LED lighting, improved drainage, a raised median and landscaping.

In June, to accommodate the installation of traffic signals and crossovers to put Weber Road traffic into the full diverging diamond configuration, left turns at the interchange will not be allowed for approximately two weeks. A detour will be posted.

The project is anticipated to be completed later this summer.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.

Over the next six years, IDOT is planning to improve more than 3,535 miles of highway and nine million square feet of bridge deck as part of the Rebuild Illinois capital program, which is investing \$33.2 billion into all modes of transportation. Accomplishments through Year Two included approximately \$5.2 billion of improvements statewide on 3,020 miles of highway, 270 bridges and 428 additional safety improvements.
