BDE PROCEDURE MEMORANDUM

NUMBER: 17-03

SUBJECT: BDE Manual Revision – Chapter 53

DATE: February 24, 2017

Chapter 53 of the BDE Manual has been revised to address how to correctly choose a quality management program for HMA design, to add an option for intelligent compaction in lieu of density testing for leveling binder placed under QPC, and to make revisions to bureau names and work functions to match the 2016 Department reorganization. Please see the BDE Manual on-line to view the revisions.

Background

Chapter 53 of the BDE Manual has been revised to address how to correctly choose between Pay for Performance (PFP), Quality Control for Performance (QCP), and Quality Control/Quality Assurance (QC/QA) when selecting a quality management program for HMA design.

The revised chapter also adds an option for intelligent compaction in lieu of density testing for leveling binder placed under the QCP program.

Also, in 2016 a major reorganization of the Department's bureau names and work functions was initiated to better align the agency to its ongoing mission. This necessitated numerous revisions throughout Chapter 53 of the BDE Manual to match revised bureau names, job titles, and work functions.

Please see the BDE Manual on-line to view the revisions.

A handwritten signature in black ink, appearing to read 'Maureen Addis'.

Maureen Addis
Bureau Chief
Bureau of Design & Environment
