BDE PROCEDURE MEMORANDUM

NUMBER: 11-12

SUBJECT: BDE Manual Revision – Chapter 63

DATE: June 17, 2011

Chapter 63 of the BDE Manual has been revised to reflect the current construction type codes used on the summary of quantities sheets. See Chapter 63 of the BDE Manual on-line to view the revisions.

Background

On July 14, 2010, a new list of construction type codes was issued via memorandum for use on the November 5, 2010 letting. The new list greatly reduced the number of codes and simplified the types of work needing to be broken out separately on the summary of quantities sheets. On January 6, 2011, another memorandum was issued to clarify the existing codes and add few new codes.

Section 63-4.04(c) - This section has been revised to remove the quantity breakdowns no longer required for the summary of quantities.

Section 63-5 – This section has been revised to incorporate the current list of construction type codes.

Section 63-4.03(d) – This section has been revised to update the general notes given as examples. This revision is not related to the construction type codes but to an overall review of Chapter 63.
