AIR-ENTRAINING ADMIXTURES FOR CONTROLLED LOW-STRENGTH MATERIAL (CLSM)

May 14, 2021

This list supersedes the February 22, 2019 list.
Standard Specifications for Road and Bridge Construction, Section 1019 (Adopted April 1, 2016)

Submittal for Testing and Approval

A. Scope

The following guidelines are provided to clarify the submittal requirements and expedite the testing process for approving air-entraining admixture for controlled low-strength material (CLSM) according to Section 1019 of the Standard Specifications for Road and Bridge Construction.

B. Procedure

When submitting an air-entraining admixture for CLSM to the Department, the following shall be included in the certification:

- The specific product brand name,
- A letter stating what dosage rate of the product should be used to attain 15-25% air content for Department Mix 2 (see Section 1019.05),
- Safety Data Sheet [and Supplemental Safety Information \(SSI\) if necessary](#),
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department,
- Contact person's name, title, address, email address, and phone number, and
- Acknowledgement by Company (Form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgement by Company form with your product submittal.

The manufacturer shall submit sufficient product to make one cubic yard of material at 15-25% air content.

The sample and submittal information shall be sent to:

Melinda Winkelman
Illinois Department of Transportation
Bureau of Materials
126 East Ash Street
Springfield, IL 62704-4766

Any sample provided without the required information listed will not be tested. Any changes in the formulation outside the manufacturer's original parameters will necessitate a new sample submittal.

The manufacturer will be notified when the sample testing is complete. For questions regarding the testing and approval process, contact Melinda Winkelman at 217-782-0117.

C. Recertification

Annual recertification of all air-entraining admixtures for CLSM is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due January of the following year. For example, the recertification letter is mailed late November 2021 and due by mid-January of 2022.
