(1) Dosage rate shall be according to Article 1020.05 (b) (12).

(2) Calcium Nitrite Solution

Illinois Department of Transportation  
Bureau of Materials

Qualified Product List  
**CORROSION INHIBITORS**

May 14, 2021

This list supersedes the September 4, 2020 list.

Standard Specifications for Road and Bridge Construction, Article 1021.07 (Adopted April 1, 2016)

**Corrosion Inhibitors-Calcium Nitrite  
Submittal for Approval**

**A. Scope**

The following guidelines are provided to clarify the submittal requirements for approving a corrosion inhibitor-calcium nitrite according to Section 1021 of the Standard Specifications for Road and Bridge Construction.

**B. Procedure**

When submitting a corrosion inhibitor-calcium nitrite to the Department, the following shall be included in the certification:

- The specific product brand name,
- Certification of the manufacturing range for specific gravity according to ASTM C 494,
- Certification of the midpoint and manufacturing range for residue by oven drying according to ASTM C 494,
- Certification of the manufacturing range for pH according to ASTM E 70,
- An infrared spectrophotometer trace (IR) of current production material no more than five years old (the IR scan should be labeled with the date the scan was performed, the product name, and the manufacturer's name),
- AASHTO accredited independent laboratory tests results, no more than five years old, in accordance to:
  - ASTM C 494, Type C, or
  - ASTM C 1582\*

\*The corrosion-inhibiting performance requirements do not apply.
- Safety Data Sheet,
- Technical Data Sheet,
- The amount by weight of chloride bearing compounds, or other similar additives or chemical agents present in the admixture,
- A signed letter stating the subject material will not be changed without written notification to the Department,
- Contact person's name, title, address, email address, and phone number, and
- Acknowledgement by Company (Form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgement by Company form with your product submittal.

The submittal information shall be sent to:

Illinois Department of Transportation  
Bureau of Materials  
Melinda Winkelman  
126 East Ash Street  
Springfield, Illinois 62704-4766

The manufacturer will be notified when the submittal review is complete. For questions regarding the approval process, contact Melinda Winkelman at 217-782-0117.

Prior to approval of an admixture, the Engineer reserves the right to request a sample for testing. If the Engineer decides to test the admixture, the manufacturer shall submit AASHTO T 197 water content and set time test results on the standard cement used by the Department. The test and reference concrete mixture shall contain a cement content of 5.65 cwt/cu yd (335 kg/cu m). The manufacturer may select their lab or an independent lab to perform this testing. The laboratory is not required to be accredited by AASHTO.

**C. Recertification**

Annual recertification of all corrosion inhibitors is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. During recertification, the manufacturer establishes the ranges for specific gravity, residue by oven drying, and pH for the upcoming production season. The recertification paperwork is due January of the following year. For example, the recertification letter is sent late November 2020 and due by January 2021. The recertification paperwork sets the ranges for the products to be made during the 2021 calendar year.

**Corrosion Inhibitors-Other Materials**  
**Submittal for Approval**

**A. Scope**

The following guidelines are provided to clarify the submittal requirements for approving a corrosion inhibitor-other materials according to Section 1021 of the Standard Specifications for Road and Bridge Construction.

**B. Procedure**

When submitting a corrosion inhibitor-other materials to the Department, the following shall be included in the certification:

- The specific product brand name,
  - Certification of the manufacturing range for specific gravity according to ASTM C 494,
  - Certification of the midpoint and manufacturing range for residue by oven drying according to ASTM C 494,
  - Certification of the manufacturing range for pH according to ASTM E 70,
  - An infrared spectrophotometer trace (IR) of current production material no more than five years old (the IR scan should be labeled with the date the scan was performed, the product name, and the manufacturer's name),
  - AASHTO accredited independent laboratory tests results, no more than five years old, in accordance to:
    - ASTM C 1582\*
- \*Note: The ASTM G 109 test information specified in ASTM C 1582 is not required to be from an independent lab.
- Safety Data Sheet,
  - Technical Data Sheet,
  - The amount by weight of chloride bearing compounds, or other similar additives or chemical agents present in the admixture,
  - A signed letter stating the subject material will not be changed without written notification to the Department,
  - Contact person's name, title, address, email address, and phone number, and
  - Acknowledgement by Company (form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgement by Company form with your product submittal.

The submittal information shall be sent to:
