Submittal for Approval

A. Scope

The following guidelines are provided to clarify the submittal requirements for approving foaming agents for cellular concrete according to Section 1029 of the Standard Specifications for Road and Bridge Construction.

B. Procedure

When submitting a foaming agent for cellular concrete to the Department, the following shall be included in the certification:

- The specific product brand name,
- Test data showing compliance with ASTM C 869 (required to be from an independent lab),
- An infrared spectrophotometer trace (IR) of current production material, no more than five years old (the IR scan should be labeled with the date the scan was performed, the product name, and the manufacturer's name),
- Safety Data Sheet,
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department,
- Contact person's name, title, address, email address, and phone number, and
- Acknowledgement by Company (Form [BMPR 101](#)). If your company does not already have a product included on an IDOT QPL, submit a signed copy of the Acknowledgement by Company form with your product submittal.

The submittal information shall be sent to:

Melinda Winkelman
Illinois Department of Transportation
Bureau of Materials
126 East Ash Street
Springfield, IL 62704-4766

The manufacturer will be notified when the submittal review is complete. For questions regarding the approval process, contact Melinda Winkelman at (217) 782-0117.

C. Recertification

Annual recertification of all foaming agents for cellular concrete is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due January of the following year. For example, the recertification letter is mailed late November 2021 and due by mid-January of 2022.
