A. Scope
The following guidelines are provided to clarify the submittal requirements and expedite the testing process for approving packaged, dry, combined materials for mortar according to the Standard Specifications for Road and Bridge Construction (Adopted April 1, 2016).

B. Procedure
When submitting a packaged, dry, combined material for high-strength mortar to the Department, the following shall be included:

- The specific product brand name,
- A signed and dated letter certifying the product meets specifications outlined in ASTM C 387,
- Independent laboratory test results showing the water soluble chloride ion content, in lbs/yr$^3$, according to ASTM C 1218 at 28 – 42 days of age. Test results shall be performed and resubmitted every 2 years (during recertification for even numbered calendar years; for example, 2018, 2020, etc.),
- Safety Data Sheet,
- Technical Data Sheet, including the mixing instructions, for the submitted product,
- A signed letter stating the subject material will not be changed without written notification to the Department,
- Contact person’s name, title, address, email address, and phone number, and
- Acknowledgement by Company (see next page). If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the company acknowledgement form with your product submittal.

The manufacturer shall submit three “as-sold” packages of the subject material intended for use on Department projects. Each bag shall show the product name and mixing instructions.

The sample and submittal information shall be sent to:

Melinda Winkelman
Illinois Department of Transportation
Bureau of Materials
126 East Ash Street
Springfield, IL  62704-4766

Any sample provided without the required information listed will not be tested. Any changes in the formulation outside the manufacturer’s original parameters will necessitate a new sample submittal.

The manufacturer will be notified when the sample testing is complete. For questions regarding the testing and approval process, contact Melinda Winkelman at 217-782-0117.

D. Recertification
Annual recertification of all packaged, dry, combined materials for high-strength mortar is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due January of the following year. For example, the recertification letter is mailed late November 2020 and due by mid January 2021.
Material Code No. 22109

Instructions for Acknowledgement by Company:
The owner, partner, or corporate officer shall complete the following and return a signed and dated copy with the product submittal or recertification.

____________________ desires to obtain advance approval of materials to be supplied to Department of Transportation contractors as more fully described herein. I and ______________________ understand that the Department of Transportation reserves the right in its contracts to approve materials at the source of supply as provided in Article 106.01 of the Standard Specifications for Road and Bridge Construction. I and ______________________ further understand that approval of company supplied material pursuant to this request does not constitute a contract to supply material to the State of Illinois or any of its contractors, and that the Department of Transportation does not assure or guarantee that any materials approved hereunder will be supplied to the State or any of its contractors. In consideration of approval, I and ______________________ agree to the terms, conditions and performance standards of the Standard Specifications for Road and Bridge Construction.
