Submittal for Testing and Approval

A. Scope
The following guidelines are provided to clarify the submittal requirements and expedite the review process for approving thin polymer overlay systems according to the Department’s Guide Bridge Special Provision for Bridge Deck Thin Polymer Overlay.

B. Procedure
When submitting a thin polymer overlay system to the Department, the following shall be included:

- The specific product brand name,
- Independent laboratory test results showing the product meets Department specifications,
- Safety Data Sheet,
- Technical Data Sheet,
- A signed letter stating the subject material will not be changed without written notification to the Department,
- Contact person’s name, title, address, email address, and phone number, and
- Acknowledgement by Company (Form BMPR 101).

If your company does not already have a product included on an IDOT QPL, please submit a signed copy of the Acknowledgement by Company form with your product submittal.

The sample and submittal information shall be sent to:

Melinda Winkelman  
Illinois Department of Transportation  
Bureau of Materials  
126 East Ash Street  
Springfield, IL 62704-4766

Any changes in the formulation outside the manufacturer’s original parameters will necessitate new submittal of independent laboratory test results.

The manufacturer will be notified upon completion of the Department’s review. For questions regarding the review and approval process, contact Melinda Winkelman at 217-782-0117.

C. Recertification
Annual recertification of all bridge deck thin polymer overlay systems is required. During the last quarter of the calendar year, a recertification letter will be sent to the manufacturer. The recertification paperwork is due January of the following year. For example, the recertification letter is mailed late November 2020 and due by mid-January 2021.
