Allocation of FAS and State
Matching Funds to the Counties

COUNTY SUPERINTENDENT OF HIGHWAYS

#90-36

Attached is a list of the FY 91 FAS allocations for each county along with the allocation of State matching funds. An information sheet describing the State Matching Assistance and FAS Fund distribution method is also attached.

The total amount of FAS funds allocated to the counties is \$15,081,557. The total FY 91 FAS apportionment available was \$16,580,261. The normal 1 1/2% for Highway Planning and Research (HPR) and \$1.25 million for the State Reserve Fund were deducted from the total prior to calculating the allocations to the counties.

The \$3.0 million State match was allotted by first prorating \$1.5 million to all counties that qualified and had a need for matching assistance. The remaining \$1.5 million was allotted to the counties beginning with the county with the highest shortfall percentage and proceeding down the list until the \$1.5 million was exhausted. This method provides matching assistance to 75 counties with 27 counties receiving their full eligible matching assistance needs.

We are pleased to again provide this matching assistance.

Very truly yours,

A handwritten signature in cursive script that reads "Bill Sunley".

District Engineers

STATE MATCHING ASSISTANCE

The State normally assists the counties in matching Federal funds where there is an inability to derive sufficient matching funds from local taxation. To qualify to receive State matching assistance, a county must meet certain criteria.

1. The county must be unable to realize sufficient matching under Section 5-603, Chapter 12p, to fully utilize its FAS allotment.
2. The county must be assessing at a minimum rate of .045 in an effort to generate local matching funds.

Distribution: An individual county's allotment of State matching in most cases is equal to the difference between what the county actually needs to match its FAS dollars and what it is capable of raising locally. However, the allocation to any county assessing .045 but less than the 0.50 maximum is reduced proportionately.

The calculation of need for State matching assistance is based on a 50/50 matching ratio. Although 75/25 matching is the normal maximum allowable for FAS projects, it is believed that need based on a 50/50 matching ratio is more equitable since the counties have other Federal-aid programs (HRRP, Safety & FAU) in addition to FAS requiring local matching. If, for some reason, the amount of State money available for matching assistance is insufficient to cover all of the needs, priorities for receipt of the assistance normally are based on percentage of shortfall.

Lump-sum use: If a county so desires, it may use its accumulated matching funds to defray any part or the entire non-Federal portion of any local Federal-aid project regardless of the Federal matching percentage. However, the State matching must be committed as a lump-sum amount rather than a percentage of project cost.

Anticipation: There can be no anticipation of State matching funds. In other words, no county can commit more State matching funds to a project than it has available at the time of letting. However, existing agreements for active projects may be amended to increase the amount of State matching assistance when it becomes available.

FAS FUND DISTRIBUTION METHOD

Each State receives an annual allotment of Federal-aid Secondary (FAS) funds. From this total allocation, 1 1/2% is deducted for Highway Planning and Research (HPR). In addition, the Illinois Department of Transportation normally deducts \$1.25 million for use on State FAS routes. The balance is distributed to the counties in the following manner:

1. 10% divided equally between the eligible counties.
2. Balance allocated on the basis of the following three factors with equal weight being given to each factor:
 - a. Non-urban rural area (sq. miles)
 - b. Non-urban rural population (0-5000)
 - c. Mileage of all non-urban systems
