#94-4

Allocation of STR and State
Matching Funds to the Counties

COUNTY ENGINEERS/COUNTY SUPERINTENDENT OF HIGHWAYS

Attached is a list of the FY 94 Surface Transportation Program Rural (STR) allocations for the downstate 96 counties along with the allocation of State matching funds. An information sheet describing the State Matching Assistance and STR Fund distribution method is attached.

The total amount of FY 94 STR funds allocated to the counties is \$18,553,130 with \$16,553,130 to be distributed among the counties in Districts 2 through 9.

The \$3.0 million State match is allotted by first prorating \$1.5 million to all counties that qualify and have a need for matching assistance. The remaining \$1.5 million is allotted to the counties beginning with the county with the highest shortfall percentage and proceeding down the list until the \$1.5 million is exhausted. This method provides matching assistance to 75 counties with 21 counties receiving their full eligible matching assistance needs.

We are pleased to again provide this matching assistance.

Very truly yours,

A handwritten signature in cursive script that reads "Bill Sunley".

William T. Sunley, P.E.
Engineer of Local Roads and Streets

cc-
District Engineers

STATE MATCHING ASSISTANCE

The State normally assists the counties in matching Federal funds where there is an inability to derive sufficient matching funds from local taxation. To qualify to receive State Matching Assistance, a county must meet certain criteria.

1. The county must be unable to realize sufficient matching under Section 5-603, Chapter 12p, to fully utilize its STR allotment.
2. The county must be assessing at a minimum rate of .045 in an effort to generate local matching funds.

Distribution: An individual county's allotment of State Matching Assistance in most cases is equal to the difference between what the county actually needs to match its STR dollars and what it is capable of raising locally. However, the allocation to any county assessing .045 but less than the 0.50 maximum is reduced proportionately.

The calculation of need for State Matching Assistance is based on a 50/50 matching ratio. Although 80/20 matching is the normal maximum allowable for STR projects, it is believed that need based on a 50/50 matching ratio is more equitable since the counties have other Federal-aid programs (HBRRP, Safety & STU) in addition to STR requiring local matching. If, for some reason, the amount of State money available for matching assistance is insufficient to cover all of the needs, priorities for receipt of the assistance normally are based on percentage of shortfall.

Lump-sum use: If a county so desires, it may use its accumulated matching funds to defray any part or the entire non-Federal portion of any local Federal-aid project regardless of the Federal matching percentage. However, the State matching must be committed as a lump-sum amount rather than a percentage of project cost.

Anticipation: There can be no anticipation of State matching funds. In other words, no county can commit more State matching funds to a project than it has available at the time of letting. However, existing agreements for active projects may be amended to increase the amount of State Matching Assistance when it becomes available.

STR FUND DISTRIBUTION METHOD

Each State receives an annual allotment of Surface Transportation Program funds. The Surface Transportation Program Rural (STR) is distributed to the counties in the following manner:

1. \$2,000,000 allotted to the Northeast counties, District 1
2. 10% divided equally between the downstate counties, Districts 2 - 9
3. Balance allocated to the downstate counties on the basis of the following three factors with equal weight being given to each factor:
 - a. Non-urban rural area (sq. miles)
 - b. Non-urban rural population (0-5000)
 - c. Non-urban mileage systems
