Illinois Crash Information 2006

Older Population (Aged 70 & Above)

As our population ages, an evaluation of motor vehicle incidents involving the elderly is of increasing interest.

	All Crashes	Crashes Involving Older Population

Fatal Crashes:	1,136	128 ^a
Injury Crashes:	75,736	4,795 ^a
Total People Involved:	960,890 ^b	40,105 ^c
Total Fatalities:	1,254 ^b	135 ^c
Total Non-Fatal Injuries:	106,901 ^b	5,284 ^c

^a Numbers only reflect crashes in which fatality or non-fatal injury was specifically aged 70 & above

^b Totals include occupants and non-occupants; e.g. 960,890 total people = 951,223 occupants + 9,667 non-occupant

^c Numbers include those aged 70 & above only (occupants and non-occupants)

Older adults aged 70 and above were involved in 34,550 (8.5%) of all 408,851 crashes that occurred in Illinois in 2006 as drivers, passengers, or non-occupants of vehicles such as pedestrians and pedalcyclists. They represent 135 (10.8%) of all 1,254 traffic fatalities in Illinois in 2006. Just 4.9% of drivers in all crashes were older adults, but 6.9% of drivers in fatal crashes and 8.7% of fatally injured drivers were older adults.*

Vulnerability

- Among adults, percent fatalities for drivers, passengers and pedestrians all followed similar trends, with percent fatalities increasing as age advanced*
- Overall, older adults who were involved in crashes in Illinois in 2006 in any capacity (driver, passenger or non-occupant) were 2.4 times more likely to be fatally injured than people aged 16 to 69*

* Where driver age was known

Note: Data as of May 23, 2008; with 408,851 crash records, 766,704 vehicle records and 960,890 person records

Seat Belt Use

- 25,411 (85.7%)[†] of all 30,805 older drivers of passenger cars/light trucks[‡] reported using seat belts
 - In comparison, 472,881 (83.6%) of all 565,556 younger drivers (aged 16 to 69) of passenger cars/light trucks reported using seat belts
- 6,824 (89.2%)[†] of all 7,653 older passengers of passenger cars/light trucks[‡] reported using seat belts
 - In comparison, 97,837 (84.3%) of all 116,121 younger passengers (aged 16 to 69) of passenger cars/light trucks reported using seat belts

Older Drivers

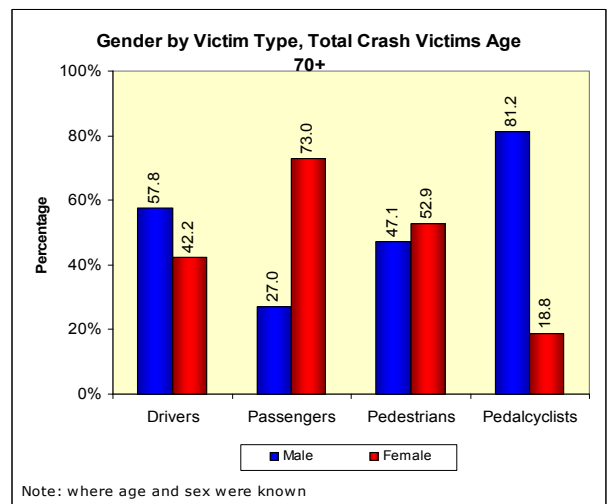

Driving errors and other actions taken by older drivers aged 70 and above before and during crashes tend to be different than those taken by younger drivers.

- Older drivers who were involved in crashes were 1.8 times more likely than younger drivers to have made driving errors such as those shown at right
 - Together, these errors account for 21.7% of older drivers' actions during crashes.
- Older drivers who were involved in crashes were also 1.7 times more likely than other drivers to have been making a left turn prior to the crash, whether or not it was classified by police as an improper turn.
- 17,959 (52.0%) of all 34,550 crashes involving older drivers were intersection-related, compared with 145,243 (38.8%) of all 374,301 crashes in which no older driver was involved
- 2,090 (6.0%) of all 34,550 crashes involving older drivers were speeding-related, compared with 36,777 (9.8%) of all 374,301 crashes in which no older driver was involved
- Where collision type was known, 3,835 (9.3%) of all 34,550 crashes involving older drivers were single vehicle crashes, compared with 83,575 (22.3%) of all 374,301 crashes in which no older driver was involved.

Demographic Facts[§]

- 18,356 (57.8%) of all 31,756 older drivers involved in crashes were male, compared with 357,382 (58.3%) of all 612,639 younger drivers
- 2,108 (27.0%) of all 7,794 older passengers involved in crashes were male, compared with 87,386 (47.1%) of all 185,627 younger passengers
- 154 (47.1%) of all 327 older pedestrians involved in crashes were male, compared with 3,276 (56.7%) of all 5,774 younger pedestrians
- 56 (81.2%) of all 69 older pedalcyclists involved in crashes were male, compared with 2,301 (76.8%) of all 2,995 younger pedalcyclists

[†] Percent using seat belts was defined as the number of people for whom seat belt use was reported divided by the total number of people involved in crashes.

[‡] Passenger cars and light trucks for this analysis were defined as passenger cars, pickup trucks, vans, minivans and SUV's according to classifications used by the National Highway Traffic Safety Administration.

Geographic Facts

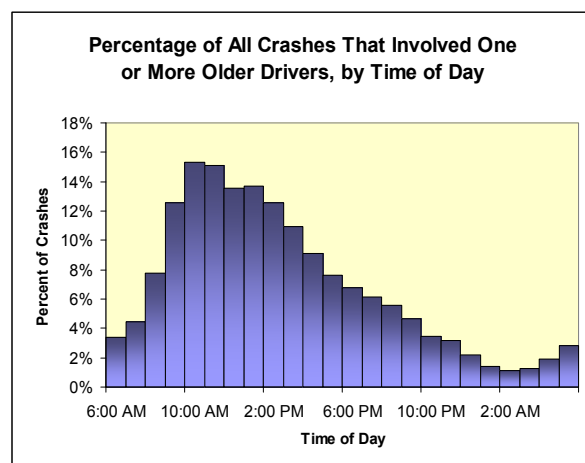

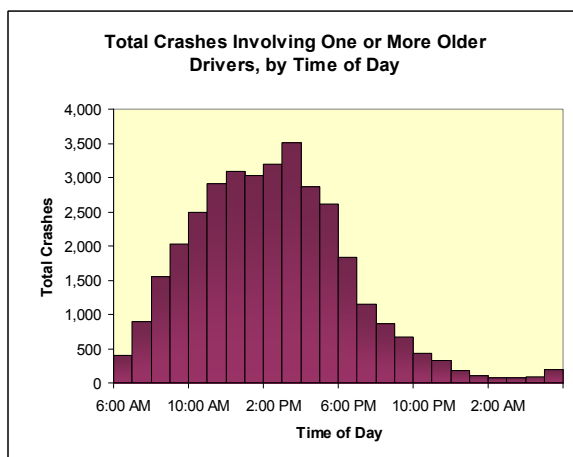

- 15,381 (44.5%) of all 34,550 crashes involving older drivers took place in Cook County
 - In comparison, Cook County accounts for just 27.4% of the overall population of Illinois aged 70 and above** and just 31.0% of the average vehicle miles traveled in Illinois^{††}
- 30,353 (87.9%) of all 34,550 crashes involving older drivers took place on roads or highways that were classified as "urban" use, compared with 320,841 (85.7%) of all 374,301 other crashes
