BUILDING CAREERS ACROSS ILLINOIS

In collaboration with the Federal Highway Administration, the Illinois Department of Transportation initiated a Highway Construction Careers Training Program in late 2009, in an effort to increase access to highway construction jobs for minorities, women and disadvantaged individuals. The HCCTP emphasizes life-long learning and provides opportunities for further education and assistance to improve employability in Illinois' highway construction industry. The program is implemented through ten community colleges throughout the state.

“ All the sacrifice and hard work was well worth it to be able to step into not only a job, but a career I love. Nothing beats the feeling of driving over a bridge knowing you built it!”

Sierra Keller
Journeyman Carpenter
Southwestern Illinois College Graduate

Each community college holds one to five training sessions per year in which individuals receive intensive training in highway construction-related skills, such as mathematics for the trades, job site readiness, carpentry, concrete flatwork, blueprint reading orientation, introduction to tools, forklift operation and OSHA 10 certification, etc.

Each community college provides its graduates with assistance in obtaining placement in Illinois' highway construction trade unions, apprenticeship programs and/or with IDOT highway construction contractors.
