

City of Byron (Treatment Plant) w/Rock River Boat Launch 4(f) Impact

Property Description: The City of Byron Wastewater Treatment is located on the eastern edge of the City on the south side of IL Route 2 shown in **GREEN** on the image to the right. On the east side of the property there is an entrance off IL Route 2 with access to a parking lot and boat launch for public use.

Property 4(f) Impact: As part of the construction of IL Route 2 a temporary easement, shown in **ORANGE** on the image to the right, is necessary to grade along the northern edge of the property adjacent to IL Route 2 for a compensatory storage basin. Additionally, proposed right of way, shown in **BLUE** on the image to the right, is necessary in the northwest corner of the property for two culverts under IL Route 2. Changes to the use of the property will not occur and access to the parking lot and boat launch will remain open during construction.

Mitigation/Enhancement Measures: The entrance to the parking lot and boat launch will be upgraded to provide safer access with wider turning radii to better accommodate vehicles with trailers. Steep grades along the existing embankment of IL Route 2 will be lessened and disturbed areas will be seeded or sodded to reduce erosion in the future.

If you have any questions or comments regarding the property's 4(f) impact, please fill out the [QUESTION/COMMENT SUBMITTAL FORM](#)
