

CHAMPAIGN-URBANA

# INTERCHANGE RECONSTRUCTION

**Serves 29,000 vehicles/day...  
22% are freight trucks!**

**1,091,878  
yards<sup>3</sup> of earth  
to be moved**

This could fill up the  
University of Illinois State Farm Center  
more than twice!

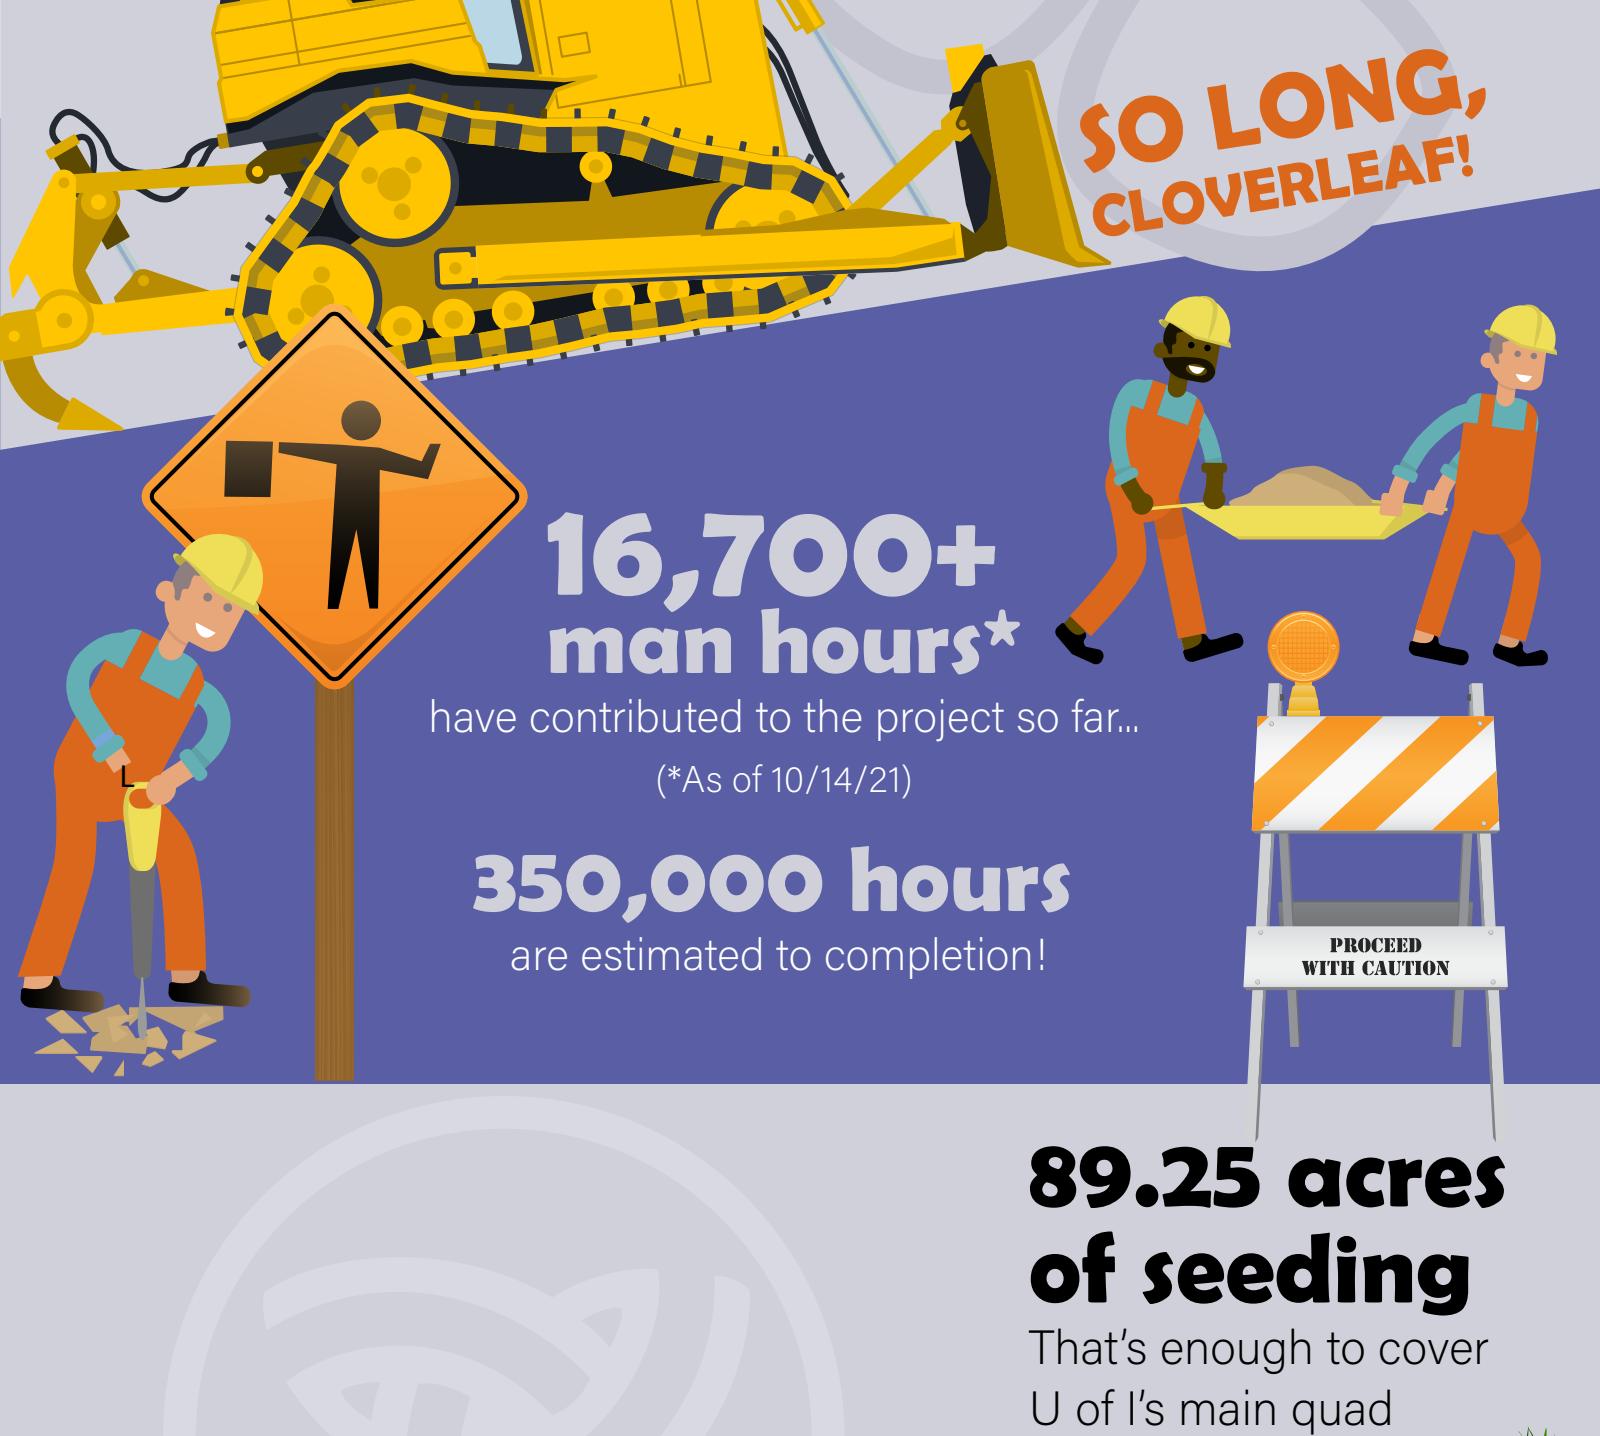

Built in **1965**, the **I-57/74** interchange no longer  
meets current traffic volumes and demands.  
The new, modern-designed interchange,  
with anticipated completion in **2025**, will  
improve traffic flow, efficiency and safety,  
while the project brings economic opportunity  
and jobs to the region.

**1,195,790 lbs  
of stainless steel rebar**

That's equivalent to 6 Chicago Bean sculptures!

**SO LONG,  
CLOVERLEAF!**

**16,700+  
man hours\***

have contributed to the project so far...

(\*As of 10/14/21)

**350,000 hours**

are estimated to completion!

**89.25 acres  
of seeding**

That's enough to cover  
U of I's main quad  
over 20 times!

**33,411 yards<sup>3</sup>  
of concrete**

(3,713 concrete trucks)
