

Welcome!!

The Sangamon Avenue and Dirksen Parkway intersection improvement project is an important projection for the Illinois Department of Transportation. We are grateful that you took the time to attend this public hearing.

At this public hearing, we will:

- Provide aerial exhibits of the original and preferred intersection alternatives;
- Identify associated impacts to businesses in the project area; and
- Provide project funding information and anticipated timeline.

**No formal presentations is planned. Please browse the exhibits and project information at your own pace.**

**After reviewing the project materials, we encourage you to complete a Comment Form.**

## Project Team

**Sangamon Avenue  
and  
Dirksen Parkway  
Public Hearing**

**November 12, 2025**

**Northfield Center  
3280 Northfield Dr.  
Springfield, IL**

## Purpose of the Project

The purpose of this project is to help lower the number of crashes at this intersection and increase the safety to the traveling public.

This intersection has been the site of over 50 crashes annually between 2019-2023.

The proposed improvement will add turn lanes and install concrete medians to address the issues at this intersection.

## Timing of the Project

Funding for construction is included in the FY 2026-2031 Multi-Year Highway Improvement Program. Construction plan development, land acquisition, and other coordination may take significant time to complete. Construction is anticipated to begin in the 2027-2028 construction season.

## Project Cost

The total project cost is estimated to be approximately \$24 million. The estimated construction cost portion is \$18 million. An additional \$6 million is estimated for engineering, land acquisition and any necessary utility relocation. The cost estimate will continue to be refined as the project advances through the planning and design phases.

If you have questions or comments about the project, please contact:
