WHY REBUILD ILLINOIS?

Illinois is the transportation hub of the nation and the sixth-largest state in the United States but has not had a comprehensive capital plan since 2009. Illinois infrastructure is in dire shape.

- \$30 billion maintenance backlogs for our road and transit systems
- The state is in danger of losing federal funds due to historically insufficient funding commitments by the state and deteriorating system conditions
- Average motorist paying \$564 in repairs annually due to poor infrastructure

Rebuild Illinois repairs our crumbling roads, bridges and transit.

- \$44.8 billion invested over six years, with \$33.2 billion of that on transportation across all modes
- 540,000 direct, indirect, and induced jobs, including almost 431,600 in transportation, supported over six years of Rebuild Illinois
- Provides necessary funding to secure federal dollars for transportation
