Grand Total	198,489	100.0%	616,300	100.0%	814,790	100.0%

- One-quarter international belly cargo, virtually all Chicago
- Three-quarters freighter cargo, largely domestic
- Southern IL within trucking distance of domestic hubs

Freight Passing Through IL

- Total truck VMT was 28 million vehicle miles in 2014
- 38% was from pass-through trucks
- Pass-through rail adds 44% to tonnage

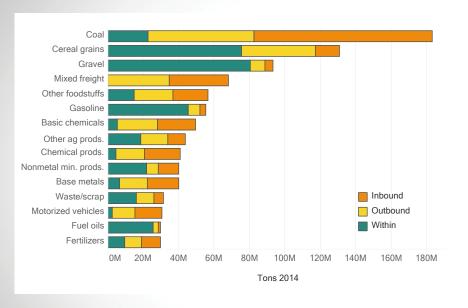

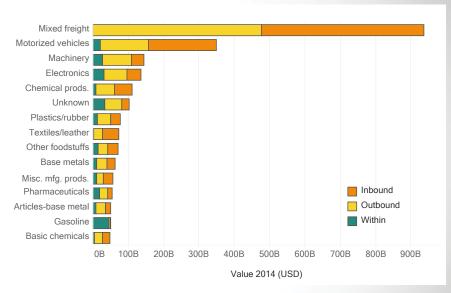

Top 15 IL-Based Commodities: Detail by Direction

Tons: Value:

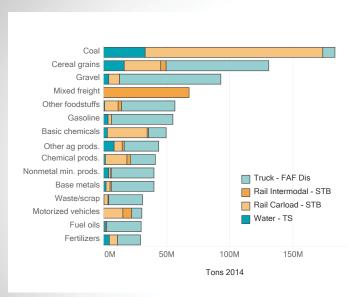

- 75% of Tons, 83% of Value
- → But different commodities

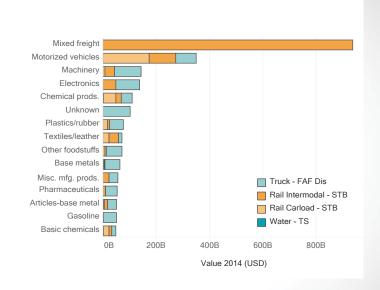

Top 15 IL-Based Commodities: Detail by Mode

Tons: Value:

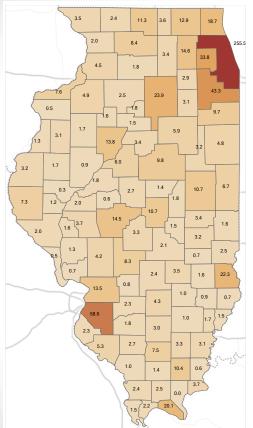

- Rail coal leads Tons, Rail intermodal leads Value
- Truck tons led by bulks, value by machinery & electronics

2045 IL-Based Forecast: Added Volumes & Growth Rates

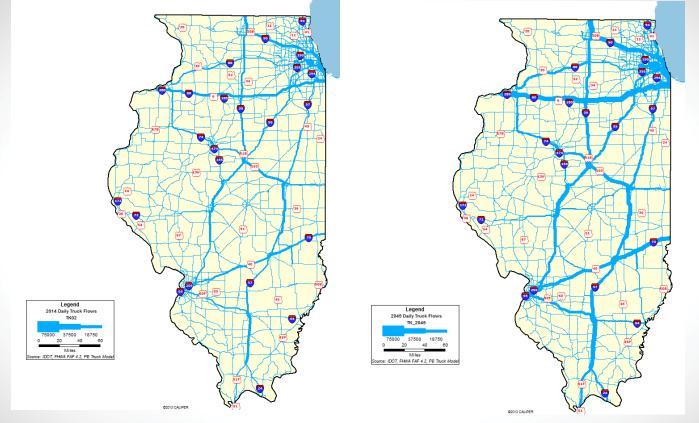

- Tonnage: 40% growth, +493 million tons, 70% by truck
- Value: 56% growth, +\$1.5 trillion product value, 51% by truck

2045 Forecast: Total Truck VMT Grows 82%

2045

→ Through trucks grow faster, add half the new VMT

Agenda

- Freight Traffic & Forecast
- Roadway Freight Bottlenecks

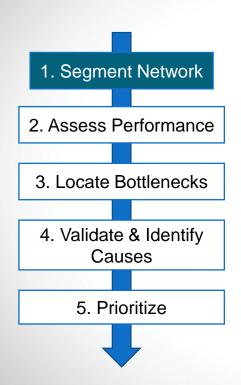

What is a freight bottleneck?

A freight bottleneck is a part of the transportation system that causes disproportionally high costs to the movement of freight in terms of delay and unreliability.

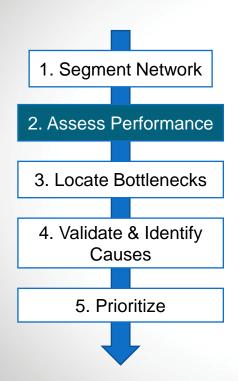

- Segments should have comparable characteristics
 - Congestion
 - Traffic levels/operations
 - Geometry
- Adopt segmentation in NPMRDS
- Focus on highways

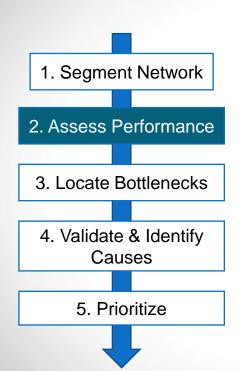

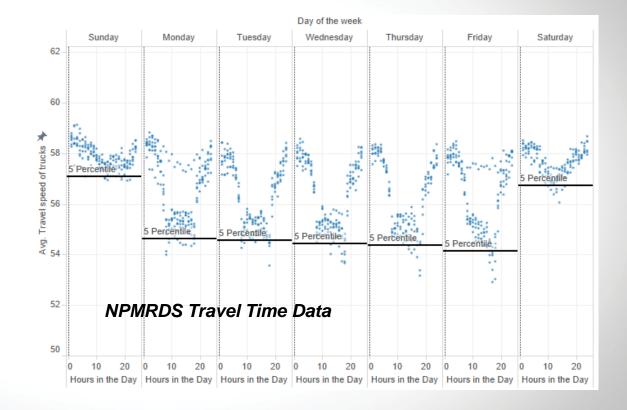

- Calculate two metrics based on NPMRDS and Truck AADT
 - Recurring Travel Time Delay: Can be anticipated
 - Non-Recurring Travel Time Unreliability:
 Cannot be anticipated
- Set thresholds based on policy
- Different thresholds for urban and rural

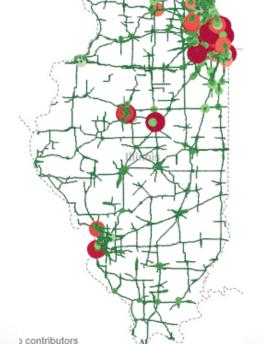

2. Assess Performance

- 3. Locate Bottlenecks
- 4. Validate & Identify Causes
 - 5. Prioritize

Recurring Travel

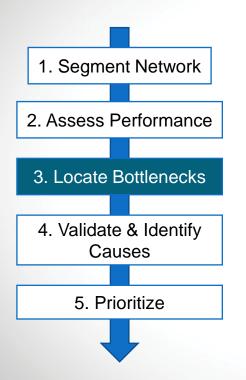

Time Delay

Non-Recurring Travel Time Unreliability

Threshold Transpo Delay (hr/mile-yr)	Threshold Unreliability	Bottleneck Miles	% Bottleneck Miles of Total	Number of TMC Bottlenecks
38,048.0	11,891.2	498.28	2.5%	749

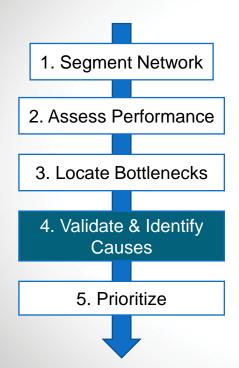

1. Segment Network 2. Assess Performance 3. Locate Bottlenecks 4. Validate & Identify Causes 5. Prioritize

- Listened to stakeholders
- Got confirmation on performance issue locations

- Use complementary data sets to validate performance issues
- Search for agreement between data sets
- Start to find causes for performance issues
- Correlate performance issues with:

Demand

- Freight Analysis Framework Tons 2014
- Freight Analysis Framework Incremental Tons 2045 to 2014
- Volume to Capacity Ratio

Incidents

 Frequency of truck related collisions, injuries, and fatalities per year (2010 to 2014)

• Pavement Condition

- Pavement CRS
- Pavement IRI

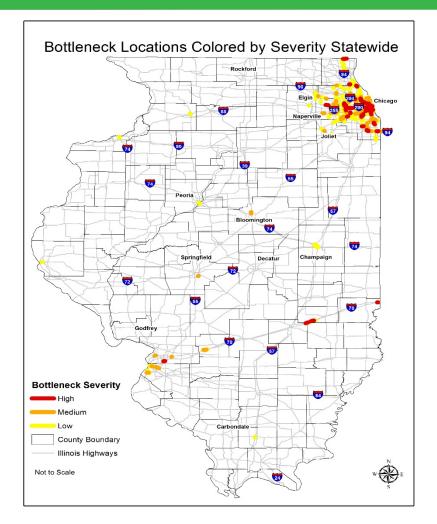

- Rank High, Medium, Low
- Combined percentile rank of Delay and Unreliability
