Subject: Statewide Transportation Improvement Program Amendments – Various Districts

Dear Ms. Sisk:

We approve the amendment to the FY2024-2027 Statewide Transportation Improvement Program (STIP) as submitted with your letter dated January 23, 2025, as outlined in your letter detailing Appendix I detailing locations of Community Fueling Infrastructure electric charging sites and the Low Carbon Transportation Program.

Based on the Federal Highway Administration, Illinois Division's ongoing Federal oversight of the planning activities in Illinois, we find that the transportation planning process substantially meets the planning requirements described in 23 CFR 450. We can now consider project authorization requests related to this STIP Amendment.

Sincerely,

Elizabeth R. Tracy
Team Leader
Planning & Environment

Enclosure

January 23, 2025

Mr. Vershun Tolliver
Division Administrator
Federal Highway Administration
130 S. Martin Luther King Dr., Suite A
Springfield, Illinois 62703

Attention: Betsy Tracy

Dear Mr. Tolliver:

Enclosed for your approval and use in accordance with paragraph 23 CFR 450.220 is a copy of an amendment to the FY 2024-2027 Statewide Transportation Improvement Program (STIP) for Illinois. The Department is authorizing this amendment to the STIP.

Appendix I detailing two grants pertaining to electric vehicle charging sites and a grant for low carbon transportation materials have been updated to show current projects. This update does not change any current funding levels shown in the current STIP. This amendment was placed on the Department's Facebook and X (formerly Twitter) pages for a 15-day comment period and received no relevant comments. Therefore, the public involvement requirements are met.

We consider the estimate of costs included in the STIP to be realistic. We concur with the fiscal consistency analysis included in the STIP. The total cost of the STIP remains consistent with the amount of funds expected to be available to the state during the STIP time period. The Department, on behalf of the Governor of Illinois, concurs with the projects listed in this STIP.

Sincerely,

A handwritten signature in blue ink that reads "Tracinda Sisk".

Tracinda Sisk
Bureau Chief
Bureau of Programming

The Illinois Finance Authority will receive \$14.9 million to install community charging sites to fill gaps in access to electric vehicle charging infrastructure. The project includes 273 project locations, of which 167 are in dense urban communities or small or rural towns, 144 are near disadvantaged communities, and 126 are in places of recreation. In total, 845 Level-2 EV charging stations and 36 DC fast charge stations will be installed statewide.

Low-Carbon Transportation Materials Grants Program

On March 12, 2024, FHWA announced \$2 billion available to fund low carbon materials that create less pollution by reducing the levels of embodied greenhouse gas emissions, including concrete (and cement), glass, asphalt mix, and steel. In FHWA's Low Carbon Transportation Materials (LCTM) Program \$1.2 Billion is available to State Departments of Transportation (including District of Columbia and Puerto Rico) through a Request for Applications (RFA) to fund activities and projects that advance the use of low carbon materials and products. This RFA approach will allow FHWA to quickly provide reimbursement or incentive funds to states to begin eligible activities and incorporate low carbon materials on construction projects now. In the coming months FHWA will also make available \$800 million to target non-State applicants, including metropolitan planning organizations, local governments or agencies, Federally recognized tribes, Federal Lands Management Agencies, and other agencies through a Notice of Funding Opportunity (NOFO). FHWA encourages non-State applicants to partner with states on applications and projects.

On November 14, 2024, FHWA announced the awarding of \$1,199,999,983 in Fiscal Year (FY) 2022 LCTM Program grants to 39 State Departments of Transportation (DOTs) with IL being one of the recipients. IDOT (Illinois Department of Transportation) will be receiving \$31,933,577 to pursue the goals of the project. The project description is as follows:

State Departments of Transportation recipients will pursue a series of activities that create new processes to qualify low-carbon transportation materials (LCTM) then put these processes into practice on construction projects that build with LCTM. Grant activities include identifying eligible materials in the State and preparing acceptance and verification procedures for collecting material Environmental Product Declarations. States will outreach and coordinate with industry stakeholders and conduct training on new procedures. States will benchmark the global warming potential of relevant sets of materials and identify thresholds that define LCTM. States will test and evaluate LCTM to ensure performance is satisfactory and adequate for use on Federal-aid construction projects. Specifications for materials and construction may be updated to accommodate new LCTMs and processes on construction projects. States will identify eligible construction projects to implement LCTM and set up monitoring a process after construction is complete. As grant activities proceed the program website will update with additional details.

Cost: \$31,933,577 (100% Federal)

Illinois Department of Transportation

Office of Planning and Programming
2300 South Dirksen Parkway / Springfield, Illinois / 62764

January 23, 2025

Mr. Vershun Tolliver
Division Administrator
Federal Highway Administration
130 S. Martin Luther King Dr., Suite A
Springfield, Illinois 62703

Attention: Betsy Tracy

Dear Mr. Tolliver:

Enclosed for your approval and use in accordance with paragraph 23 CFR 450.220 is a copy of an amendment to the FY 2024-2027 Statewide Transportation Improvement Program (STIP) for Illinois. The Department is authorizing this amendment to the STIP.

Appendix I detailing two grants pertaining to electric vehicle charging sites and a grant for low carbon transportation materials have been updated to show current projects. This update does not change any current funding levels shown in the current STIP. This amendment was placed on the Department's Facebook and X (formerly Twitter) pages for a 15-day comment period and received no relevant comments. Therefore, the public involvement requirements are met.

We consider the estimate of costs included in the STIP to be realistic. We concur with the fiscal consistency analysis included in the STIP. The total cost of the STIP remains consistent with the amount of funds expected to be available to the state during the STIP time period. The Department, on behalf of the Governor of Illinois, concurs with the projects listed in this STIP.

Sincerely,

A handwritten signature in blue ink that reads "Tracinda Sisk".

The Illinois Finance Authority will receive \$14.9 million to install community charging sites to fill gaps in access to electric vehicle charging infrastructure. The project includes 273 project locations, of which 167 are in dense urban communities or small or rural towns, 144 are near disadvantaged communities, and 126 are in places of recreation. In total, 845 Level-2 EV charging stations and 36 DC fast charge stations will be installed statewide.

Low-Carbon Transportation Materials Grants Program

On March 12, 2024, FHWA announced \$2 billion available to fund low carbon materials that create less pollution by reducing the levels of embodied greenhouse gas emissions, including concrete (and cement), glass, asphalt mix, and steel. In FHWA's Low Carbon Transportation Materials (LCTM) Program \$1.2 Billion is available to State Departments of Transportation (including District of Columbia and Puerto Rico) through a Request for Applications (RFA) to fund activities and projects that advance the use of low carbon materials and products. This RFA approach will allow FHWA to quickly provide reimbursement or incentive funds to states to begin eligible activities and incorporate low carbon materials on construction projects now. In the coming months FHWA will also make available \$800 million to target non-State applicants, including metropolitan planning organizations, local governments or agencies, Federally recognized tribes, Federal Lands Management Agencies, and other agencies through a Notice of Funding Opportunity (NOFO). FHWA encourages non-State applicants to partner with states on applications and projects.

On November 14, 2024, FHWA announced the awarding of \$1,199,999,983 in Fiscal Year (FY) 2022 LCTM Program grants to 39 State Departments of Transportation (DOTs) with IL being one of the recipients. IDOT (Illinois Department of Transportation) will be receiving \$31,933,577 to pursue the goals of the project. The project description is as follows:

State Departments of Transportation recipients will pursue a series of activities that create new processes to qualify low-carbon transportation materials (LCTM) then put these processes into practice on construction projects that build with LCTM. Grant activities include identifying eligible materials in the State and preparing acceptance and verification procedures for collecting material Environmental Product Declarations. States will outreach and coordinate with industry stakeholders and conduct training on new procedures. States will benchmark the global warming potential of relevant sets of materials and identify thresholds that define LCTM. States will test and evaluate LCTM to ensure performance is satisfactory and adequate for use on Federal-aid construction projects. Specifications for materials and construction may be updated to accommodate new LCTMs and processes on construction projects. States will identify eligible construction projects to implement LCTM and set up monitoring a process after construction is complete. As grant activities proceed the program website will update with additional details.

Cost: \$31,933,577 (100% Federal)
