Ms. Holly Bieneman
 Bureau Chief of Programming
 Illinois Department of Transportation
 2300 South Dirksen Parkway
 Springfield, IL 62764

Dear Ms. Bieneman:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have jointly reviewed the subject Statewide Transportation Improvement Program (STIP) submitted with your December 4, 2024 letter.

By reference, this STIP includes the Metropolitan Planning Organization (MPO) Transportation Improvement Programs (TIPs) that had previously been approved by our agencies:

MPO Area	TIP Years	FHWA/FTA Approval*
Cape Girardeau	FY2024-2027	March 22, 2024
Champaign	FY2023-2028	March 22, 2024
DeKalb	FY2025-2029	September 9, 2024
Dubuque	FY2025-2028	September 9, 2024
Quad Cities	FY2025-2028	September 9, 2024
Bloomington-Normal	FY2025-2029	September 9, 2024
Springfield	FY2025-2028	September 9, 2024
Peoria	FY2025-2028	September 4, 2024
Decatur	FY2025-2028	October 2, 2024
Rockford	FY2025-2028	October 2, 2024
Kankakee	FY2025-2028	November 18, 2024
St. Louis	FY2025-2028	November 18, 2024
Beloit	FY2025-2028	November 18, 2024
Chicago	FY2023-2028	November 22, 2024

**Most recent joint federally approved TIP/STIP*

The FHWA and FTA finds that the projects in the FY2024-2027 STIP amendment are based on a transportation planning process that substantially meets the requirements of 23 CFR Part 450 Subparts A, B, and C, and 49 U.S.C. Sections 134 and 135. Based upon the FHWA Illinois Division and FTA Region V Federal oversight of the planning requirements described in 23 CFR 450.220 and the 2014 Memorandum of Agreement, we can now consider project authorization requests related to this STIP approval.

The determination is based on certification of the statewide and metropolitan planning processes with the State of Illinois and the FHWA's and FTA's participation in those transportation planning processes, including planning certification reviews conducted in transportation management areas.

If there are any questions concerning this action on this STIP, please contact Ms. Betsy Tracy, FHWA, at (217) 492-4642, or Mr. Mark Kane, FTA, at (312) 353-1552.

Sincerely,

Attention: Betsy Tracy & Mark Kane

Dear Mr. Tolliver and Ms. Brookins:

Enclosed for your approval and use in accordance with paragraph 23 CFR 450.220 is a copy of an amendment to the FY 2024-2027 Statewide Transportation Improvement Program (STIP) for Illinois. The Department is authorizing this amendment to the STIP.

The FY 2025-2027 portion of the FY 2024-2027 STIP has been updated to show the changes that have occurred through the development of the FY 2025-2030 Proposed Highway Improvement Program (MYP), the Transportation Asset Management Plan (TAMP), and the Long-Range Transportation Plan (LRTP). This amendment was placed on the Department's website, as well as its Facebook and X (formerly Twitter) pages for a 15-day comment period and received no comments that would necessitate a change to the STIP. Therefore, the public involvement requirements have been met. The relevant changes made to the STIP are as follows:

- Added Appendix H to include:
 - FY 2024 – 2027 FTA 5311 Operating Assistance and Administration Projects
 - FY 2024 – 2027 Consolidated Vehicle Procurement (CVP)
 - FY 2024 – 2027 Discretionary Transit Programs

- Added Appendix I to include:
 - FY 2025 NEVI Round 1 Non-MPO Awardees

We consider the estimate of costs included in the STIP to be realistic. We concur with the fiscal consistency analysis included in the STIP. The total cost of the STIP remains consistent with the amount of funds expected to be available to the state during the STIP time period. The Department, on behalf of the Governor of Illinois, concurs with the projects listed in this STIP.

Sincerely,

Holly Bieneman
Director
Office of Planning and Programming

FY 2024-2027 Statewide Transportation Improvement Program

Introduction

The Statewide Transportation Improvement Program (STIP) is a four-year program of highway, transit, and intercity rail projects developed to fulfill the requirements set forth in 49 Code of Federal Regulations (CFR) part 613, subpart B, and 23 CFR part 450, subpart B. These transportation planning regulations require that the STIP be updated at least once every four years. The Illinois Department of Transportation (IDOT) updates the STIP on a three-year cycle.

Each time IDOT updates the STIP, the funding and project information for highway improvements is taken from the first four years of the most recently developed six-year Proposed Highway Improvement Program, also known as the Multi-Year Program (MYP). The MYP is a state required document that is updated annually in the spring and is critical to the development of the STIP. The MYP also serves as a focus for public review and comment in that it is presented to the General Assembly and the public for review and discussion during the appropriation process. Each year between official updates to the STIP (three-year cycle), and after publishing the MYP, IDOT revises the STIP through an amendment to include the most recent funding and project information available.

The Fiscal Year (FY) 2024-2027 STIP is based upon funding and project information taken from the first year of the FY 2024-2029 MYP and the first three years FY 2025-2030 MYP. The STIP indicates total transportation improvement costs of \$22.814 billion. This includes \$21.249 billion for highway improvements, \$0.264 billion for transit capital improvements and operating assistance, and \$1.301 billion for intercity rail.

The [FY 2025-2030 Proposed Highway & Multimodal Improvement Program](#), also known as the Multi-Year Program, can be found on IDOT's website at:

[Publication \(illinois.gov\)](#)

The publication of the FY 2024-2027 STIP, as amended July 2024, is based on the department's program planning process which focuses on policies and goals outlined in the Long Range State Transportation Plan (LRTP). The LRTP, most recently revised in 2020 to reflect the Rebuild Illinois Program, complies with all Federal regulations and was developed with input and information from an assessment of needs, Metropolitan Planning Organizations (MPOs), public comments, the Governor, members of the General Assembly, and local officials. The planning process is being carried out in accordance with the requirements of 49 CFR part 613, subpart B, and 23 CFR part 450, subpart B. The STIP is fiscally constrained by year with funding estimates based on anticipated federal, state, and local resources and is consistent with the LRTP. The LRTP is also constrained by the funding resources estimated to be available for the foreseeable future and the tradeoffs that reflect the fiscal capabilities of the department's budget.

The LRTP is posted on the IDOT website at the following link:

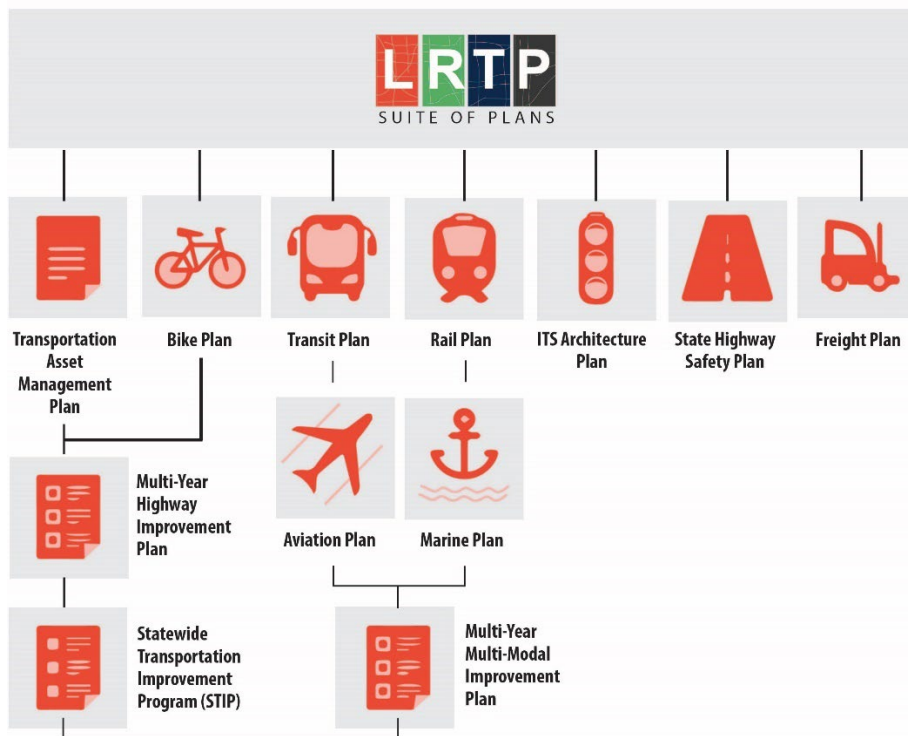

[Long Range Transportation Plan \(illinois.gov\)](#)

Beginning with the FY 2019-2024 MYP and continuing through the FY 2025-2030 MYP, IDOT is working towards performing treatments in all stages of the transportation system's life cycle as prescribed by the Transportation Asset Management Plan (TAMP). The goal is to work toward 80 percent reconstruction and rehabilitation, with 20 percent preservation work based on the number of miles of roads and square feet of bridges programmed in each district. The

preservation work will focus on keeping the good pavements and bridges in a state of acceptable condition before they fall to a lower rating and warrant a higher cost improvement. Small, planned investments in maintenance of our roads and bridges will save the state and taxpayers money in the long run. The FY 2025-2030 MYP weighs the need to preserve the existing system in a state of acceptable condition with the need to enhance or expand the highway network to address congestion and economic development demands. Before being included in the program, improvements are evaluated by the Office of Planning and Programming (OPP) based on goals, needs, and available resources. IDOT's TAMP provides the link between the LRTP and its shorter-term (6-year) bridge and pavement programs in the MYP. The 2024-2029 MYP was the first Multimodal MYP in nearly a decade and it informed and aligned with the STIP. This continues with the FY 2025-2030 MYP.

Once investment levels are established, OPP works with the districts to select projects that will enable IDOT to work towards meeting its performance objectives. To further the department's ability to ensure the correct treatments are being done at the right time during an asset's life cycle and then see the long-term results of this approach. IDOT is implementing an Enterprise Asset Management System. Once the system is in use, the districts will be able to see the best treatments for an asset as well as the optimal mix of projects to obtain the most benefit for the cost. The districts use pavement and bridge condition information and established guidelines to select the projects that best match the intended investments. The final list of projects is incorporated into the STIP.

The following figure illustrates how the programs are connected.

The highway portion of the STIP contains three specific categories which are titled Metropolitan Planning Organization (MPO), Significant, and Grouped. The following describe each category:

MPO Category: The MPO category contains projects that reside in one of the 16 defined MPO boundaries in the State of Illinois. With the 2020 census, Illinois lost two MPO's and

gained another. The two MPO's will lose this status at the end of calendar year 2023. This change will be shown in the next update to the STIP. A MPO is an agency created by federal law to provide local elected officials input into the planning and implementation of federal transportation funds to metropolitan areas with populations of greater than 50,000. A MPO must plan for regional transportation planning and expenditures and are responsible for the continuing, cooperative, and comprehensive transportation planning processes for their urbanized area. The policy leadership, committees, professional staff, and consultants, combined with the administrative capability to support MPO planning processes, constitute the core elements of MPO activities. IDOT is a member of the policy board for each MPO in Illinois and is involved in the planning processes that occur at each.

Significant Category: The Significant category contains projects which provide increased capacity, have regional impact, or require special funding, and are not in an MPO area. Projects are considered Significant if any one of the following criteria is met: Major Construction, Principal Arterial, Illinois Special Bridge Program, and/or special federal funds. More information about Significant funds can be found on page 20.

All Significant highway projects are summarized by year, type of improvement, funding amount, and programmed amount.

Grouped Category: The Grouped category contains those projects that are neither in the MPO nor in the Significant category.

The transit element of the STIP contains the transit projects that are grouped into operating and capital categories. They are summarized for urbanized areas (population over 50,000), rural-small urban areas, statewide and all regionally significant transportation projects requiring an action by the Federal Highway Administration (FHWA) or the Federal Transit Administration (FTA) regardless of anticipated funding source (local, state, or federal).

Transportation programming in metropolitan areas with a population over 50,000 is a collaborative process, led by an MPO and other key stakeholders in the regional transportation system. The current federally approved Transportation Improvement Programs (TIPs) for each of Illinois' 16 MPOs is incorporated into this document by reference. A list of the previous 16 MPOs is included in Appendix A. A new map is being created which will reflect the loss of Danville and Carbondale/Marion as MPO's and the addition of Paducah. This new map will be submitted upon completion.

The department has developed the STIP by building upon ongoing programming activities and good working relationships with state and local officials and MPOs. The multi-year and annual highway improvement programs are published each year. These programs plus other normal budget funding for administration and maintenance allow the existing transportation system to be operated and maintained with the revenues that are provided by federal, state, and local sources. The multi-year and annual highway improvement programs receive widespread media attention and are made readily available for public review and comment.

Projects included in the STIP can be advanced to or deferred from the first annual element without additional action or approvals. Projects being added to or deleted from the STIP that are of significant scale for individual identification are considered amendments and require an opportunity for public review and comment with final approval by FHWA and/or FTA. The implementing agency is responsible for public involvement on STIP amendments in

accordance with the department's public involvement procedures. The notifications of amendments to the STIP are published on the IDOT website and social media platforms, specifically X (formerly Twitter) and Facebook. If needed, notifications can also be published in the major (by circulation) newspapers serving the area impacted by the project being amended.

Copies of STIP amendments and notifications can be found on IDOT's STIP website at: [Statewide Transportation Improvement Program \(illinois.gov\)](https://www.idot.gov/stip)

All comments and/or questions regarding the STIP may be sent to: DOT.STIP@Illinois.gov.

Transportation Asset Management Plan and Performance Measures

Transportation Asset Management Plan

MAP-21 established requirements and both the FAST Act and IIJA subsequently continued these requirements for each state to develop a transportation asset management plan (TAMP). The plan is to address the condition of National Highway System (NHS) assets and the overall performance of the system of NHS roads and bridges. The NHS is a network of strategic highways within the United States, including the Interstate Highway System and other roads serving major airports, ports, rail or truck terminals, railway stations, pipeline terminals, and other strategic transportation facilities.

In addition to the TAMP requirement, seven national goals for transportation performance were established in 23 U.S.C 150 (b). The national goals are as follows:

- Safety
- Infrastructure condition
- Congestion reduction
- System reliability
- Freight movement and economic vitality
- Environmental sustainability
- Reduced project delivery delays

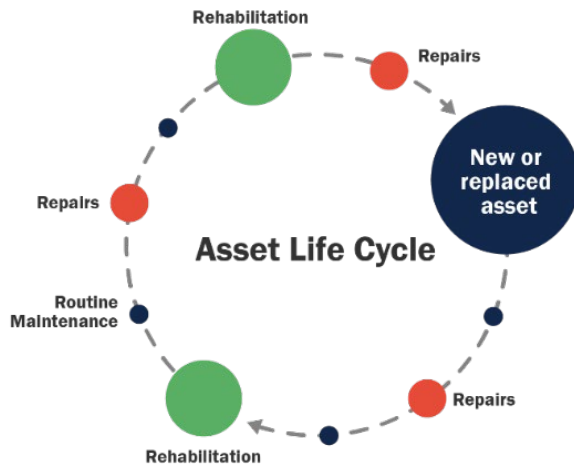

Illinois' TAMP was completed in 2019 and updated in 2022. The TAMP expands beyond the NHS to include all pavements and bridges under IDOT's jurisdiction.¹ The TAMP outlines IDOT's process to consider the entire life cycle of roads and bridges in order to maximize the performance of each asset, and therefore the entire highway network. IDOT's TAMP details a 10-year investment strategy in support of the national goals, with specific attention to infrastructure condition. The projects in the FY 2025-2030 MYP and corresponding FY 2024-2027 STIP and 2025 STIP Amendment have been programmed following the life-cycle planning method and investment strategy described in the TAMP.

Under asset management, a data-driven decision process has been developed and implemented that supports the use of analysis tools and life cycle strategies to reduce the rate of system deterioration as cost effectively as possible. The department will continue to address road and bridge needs to ensure our system is safe and will also spend money on low-cost treatments to preserve those roads and bridges and keep them in acceptable condition. A visualization of this process is shown in the figure below.

The goal is to program 80 percent as reconstruction and rehabilitation, and 20 percent as preservation work based on the number of miles of roads and square feet of bridges programmed in each district. The preservation work focuses on keeping the good pavements and bridges in a state of acceptable condition before they fall to a lower rating and warrant a

¹ <https://idot.illinois.gov/content/dam/soi/en/web/idot/documents/transportation-system/reports/opp/transit/idot-2022-tamp-fhwa-certified-01-24-23.pdf>

higher cost improvement. Small, planned investments for maintenance of our roads and bridges will save the state and taxpayers money in the long run.

Performance Measures

To measure progress toward the national goals, performance measures have been established by the FHWA in three main areas: safety, infrastructure condition, and system performance. The performance measures allow the FHWA to compare progress across all 50 states, Washington D.C., and Puerto Rico. IDOT’s LRTP presents IDOT’s targets for each of the performance measures.²

IDOT’s TAMP provides the link between the LRTP and its shorter-term (six-year) bridge and pavement programs in the MYP. In accordance with 23 CFR 515.9(h), both the MYP and the MYP-derived STIP demonstrate that the TAMP has been integrated into the planning processes beginning in SFY 2019. The current state approved TAMP was determined by the FHWA to meet the requirements of 23 U.S.C. 119 and 23 CFR 515 on January 24, 2023. Annually, IDOT must show that the TAMP has been implemented. On July 31, 2024, the FHWA determined that the funding allocations for the previous 12 months (FY 2024) were reasonably consistent with the investment strategies in the 2022 TAMP.

In addition to the FHWA’s performance measures, FTA was mandated (under MAP-21; Pub. L. 112-141 (2012), codified at 49 U.S.C. 5326) to create a National Transit Asset Management (TAM) System. Section 625.27 requires States to develop a group TAM plan for all subrecipients under the Rural Area Formula Program, authorized under 49 U.S.C. 5311. In July 2016, the FTA released the final ruling to IDOT for implementing the TAM. IDOT is to meet set targets and track the conditions of assets for equipment, facilities, infrastructure, and rolling stock. An assessment of Capital Asset State of Good Repair was completed in 2017. IDOT completed a downstate Transit Asset Management Plan (TAM) for participating Tier II transit agencies in October 2018. In 2022, IDOT released an update to the Tier II TAM. The TAM informs the annual Transit Capital Needs Assessment (CNA) based on criteria identified during the development of the TAM and CNA. The TAM and CNA assist IDOT in setting downstate funding levels for Capital and Operating Programs.

² <https://idot.illinois.gov/content/dam/soi/en/web/idot/documents/about-idot/misc/planning/lrtp-appendix-f-tpm-report.pdf>

For Safety, IDOT must report on the number of fatalities, number of non-motorized fatalities and non-motorized serious injuries, number of serious injuries, rate of fatalities per 100 million vehicle miles traveled (VMT), and rate of serious injuries per 100 million VMT. The IDOT targets for each of these five Safety performance measures are updated every year by the end of August for inclusion in our Highway Safety Improvement Program.

For Infrastructure Condition, IDOT must define targets and report the specific percentage of interstate pavements in both *Good* and *Poor* condition, non-interstate NHS pavements in both *Good* and *Poor* condition, and NHS bridges in both *Good* and *Poor* condition, regardless of jurisdiction. IDOT submitted its first Full Performance Period Progress Report on December 16, 2022, documenting its progress during the first 4 years the performance measures were in place. New baseline, 2-year, and 4-year targets were established at the same time and documented in the 2022 Baseline Performance Period Report. The new targets are shown below, in the Infrastructure Condition Performance Targets section. When the mid performance period progress report is written by October 1, 2024, the 4-year targets may be adjusted as data for the first 2 years indicate.

For System Performance, IDOT must define targets and report on a percentage of person-miles traveled on the interstate and non-interstate NHS, a Truck Travel Time Reliability Index, annual hours of peak hours of excessive delay per capita, percentage of non-single occupancy vehicle travel, and total emission reductions. IDOT updated its targets for each of the six system performance measures on December 16, 2022.

Infrastructure Condition Performance Targets

IDOT's TAMP established targets based on the internal measures in use within IDOT for decades. These targets work alongside the federal performance measures discussed above to ensure the best possible network condition within the limitations of a constrained budget and an aged highway system. The federal measures only apply to pavements and bridges on the National Highway System, while IDOT's internal measures are used for all pavements and bridges on the state system. The federal requirements allow for no more than 5 percent of the interstate system lane miles to be in *Poor* condition and no more than 10 percent of the bridge deck area on the NHS to be considered *Poor* (structurally deficient). The federal targets and conditions achieved using the federal metrics are presented first, followed by IDOT's internal metrics and performance.

Federal Targets

The table below includes the 2-year and 4-year targets set in 2022 for federal pavement reporting. Note the years are the year the data are collected, not the year the data are submitted to the FHWA. The second table below includes the 2018 through 2023 pavement conditions using the federal performance metrics. The data collected in 2021 was submitted in March 2022 and constitutes the baseline for the next 4-year performance period. The federal pavement results are based on the 2018 through 2022 Highway Performance Monitoring System (HPMS) report cards, while the 2023 results are based on the preliminary report card.

IDOT's baseline, 2-Year, and 4-Year Pavement Targets for Federal Reporting.

Performance Measure	2021 Baseline (%)	2023 Target (%)	2025 Target (%)
Percent Interstate Pavement in <i>Good</i> Condition	65.7	65.0	66.0
Percent Interstate Pavement in <i>Poor</i> Condition	0.4	1.0	0.7
Percent Non-Interstate NHS Pavement in <i>Good</i> Condition	29.5	29.0	30.0
Percent Non-Interstate NHS Pavement in <i>Poor</i> Condition	8.0	8.9	8.5

IDOT's 2018 through 2022 Pavement Performance for Federal Reporting.

Performance Measure	2018 (%)	2019 (%)	2020 (%)	2021 (%)	2022 (%)	Prelim. 2023 (%)
Percent Interstate Pavement in <i>Good</i> Condition	63.8	61.1	64.0	65.7	65.0	64.9
Percent Interstate Pavement in <i>Poor</i> Condition	0.4	0.7	0.6	0.4	0.3	0.4
Percent Non-Interstate NHS Pavement in <i>Good</i> Condition	24.2	24.3	25.6	29.5	30.5	30.8
Percent Non-Interstate NHS Pavement in <i>Poor</i> Condition	8.7	8.6	9.4	8.0	7.6	10.1

IDOT began shifting to life-cycle planning as part of asset management in 2018, and the results of that shift began to appear in 2020, with the percent of interstate in *Good* condition increasing nearly 4 percent since 2019. Similarly, the non-interstate NHS pavement in *Good* condition has increased more than 6 percent since 2019. 2023 was the first year all non-interstate NHS miles were collected, as opposed to the previous biennial cycle, which may account for the increase in non-interstate NHS pavements in *Poor* condition.

The next table includes the baseline, 2-year, and 4-year targets set in 2022 for federal bridge reporting.

IDOT's Baseline, 2-Year, 4-Year, and 4-Year Adjusted Bridge Targets for Federal Reporting.

Performance Measure	2021 Baseline (%)	2023 Target (%)	2025 Target (%)
Percent NHS Bridges in <i>Good</i> Condition	22.8	18.5	15.8
Percent NHS Bridges in <i>Poor</i> Condition	12.4	12.4	12.0

The following table includes the 2018 through 2023 bridge conditions using the federal performance metrics. The data collected in 2021 was submitted in March 2022 and constitutes the baseline for the next 4-year reporting period. The federal bridge results are based on the final 2018 through 2022 National Bridge Inspection Standards (NBIS) submittal, while the 2023 results are based on the preliminary NBIS submittal.

IDOT's 2018 through 2022 Bridge Performance for Federal Reporting.

Performance Measure	2018 (%)	2019 (%)	2020 (%)	2021 (%)	2022 (%)	Prelim. 2023 (%)
Percent NHS Bridges in Good Condition	28.1	26.2	23.7	22.8	23.1	22.4
Percent NHS Bridges in Poor Condition	13.6	13.3	13.2	12.4	11.1	10.5

While the percentage of NHS bridges in *Good* condition has declined, the percentage of bridge deck area in *Poor* condition has improved 3 percent between 2018 and 2023. In accordance with the TAMP, emphasis is placed in the programming process on addressing structurally deficient bridges on the NHS system. Comparing the preliminary 2023 data to the 2023 targets, both targets are exceeded, demonstrating the effectiveness of implementing the TAMP's focus on structurally deficient NHS bridges as well as preservation treatments to keep good bridges in good condition.

IDOT Internal Targets

Every year, the department conducts a Condition Rating Survey (CRS) to assess pavement condition on the approximately 16,000-mile state highway system. This information is an important tool to assist the department with its pavement management activities. The CRS assigns a value to each segment of roadway to indicate the current condition of the pavement. A lower CRS value indicates the pavement is in worse condition. A higher CRS value means the pavement is in better condition. The department began collecting CRS in 1974 and has collected the data annually on alternating halves of the state, with data collected on the interstates every year.

The chart below shows the acceptable pavement condition levels for all road system types. The department has determined that the standard for non-interstates will be a Condition Rating Survey (CRS) of 5.0 or higher on a scale of 1.0 to 9.0. Interstates will be held to a higher standard of a 5.5 or higher CRS. Pavements in this condition can be preserved using low-cost preservation treatments.

IDOT's State of Acceptable Condition Targets for Pavements.

The following figures include the 2018 through 2023 pavement conditions using IDOT's internal metrics. The performance in 2018 and 2019 reflects the spending in years prior to the adoption of the Rebuild Illinois capital program. This can be seen in the data for the routes under IDOT's jurisdiction: Interstate, Other NHS State, Marked, and Unmarked. Each of those systems, except Unmarked, hit a low point in condition in 2019 and have improved in the years since the passage of the capital program and the beginning of implementation of the TAMP. The Unmarked system has been, and continues to be, above its target.

Percent of IDOT's Pavement Centerline Miles Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

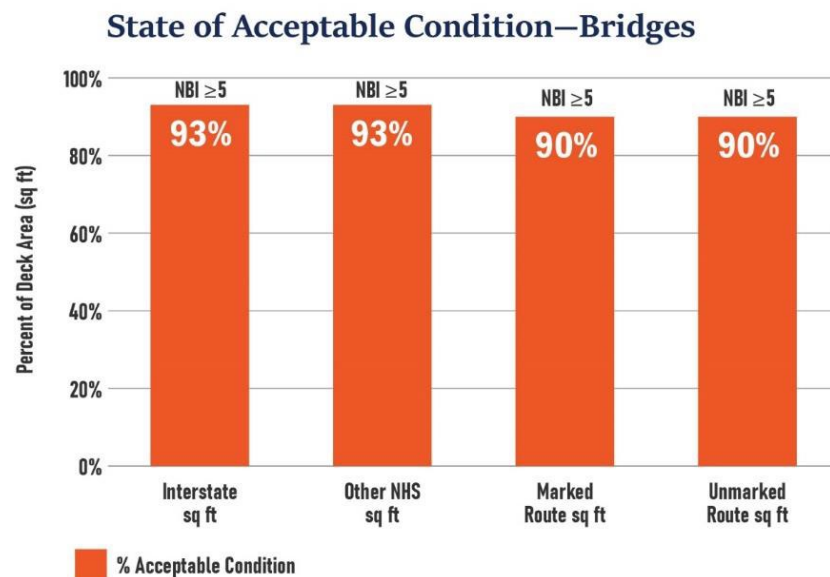

Percent of Other NHS Owners' Pavement Centerline Miles Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

The department manages the state bridge system using a wide-ranging process that incorporates inspection and inventory data, needs analysis and funding allocation methods in order to maximize the use of available funds to address the assigned condition goal. Each bridge is examined by using the structure inspection rating and appraisal data and other

criteria, such as accident data, load limits, and traffic volume. The timely and accurate assessment of bridge condition is critical to the identification, selection, and prioritization of bridge needs in the programming process. For each program development cycle, the bridge inventory is re-evaluated for additional bridge candidates for potential inclusion in the multi-year and annual programs as well as to verify changes in the condition and status of the bridges that were included in the previous MYP.

To align more closely with the FHWA, bridges are discussed in terms of square feet of bridge deck area instead of number of bridges. The department uses component ratings (deck, superstructure, and substructure) for determining the condition of a bridge. The lowest component rating is the overall rating for the bridge. A component rating of 5 or higher on a scale of 0 to 9 is used to classify a bridge as being in a state of acceptable condition.

IDOT's State of Acceptable Condition Targets for Bridges.

The figures below include the 2018 through 2023 bridge conditions using IDOT's internal metrics. The 2018 and 2019 performance reflects the spending in years prior to the adoption of the Rebuild Illinois capital program. Like pavements, the lowest condition of IDOT's Interstate bridges was in 2019; the condition has improved in each subsequent year. IDOT's Other NHS State routes improved from 2020 through 2023. The Marked system bridges have improved in condition through 2021 and held steady in 2022 and 2023. The improvement in the NHS bridges due to the implementation of TAMP and the passage of the capital program are encouraging.

While the Illinois Tollway and Chicago Skyway bridges are in excellent condition, the trend in the local agency NHS bridges is concerning. An investigation into the source of the decline in local agency bridge condition has identified the particular agencies with *Poor* bridges. IDOT's Bureau of Programming is coordinating with the Bureau of Local Roads and Streets to identify how many of the *Poor* bridges are currently programmed and if additional guidelines need to be put in place to encourage the local agencies to better manage their NHS bridges.

Percent of IDOT's Total Bridge Deck Area Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

Percent of Other NHS Owners' Total Bridge Deck Area Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

As discussed in the 2022 TAMP, nearly half of IDOT's bridges are more than 50 years old, and the trend prior to the implementation of the TAMP had been that more bridges were becoming structurally deficient (SD) each year than were being rehabilitated or replaced. Although this trend has begun to be reversed, it will take a considerable amount of time to reduce the inventory of structurally deficient bridges. While the Rebuild Illinois program has enabled a higher percentage of current NHS SD bridges to be funded, there are many bridges right on the threshold of becoming structurally deficient, which hampers the ability to make progress toward the performance targets.

Projects in Support of Other Performance Measures

In addition to the projects in support of the infrastructure condition performance measures, the MYP and STIP also include projects in support of the other performance measures. In the FY 2025-2030 MYP, 73 percent of spending is in support of infrastructure condition (PM2 performance measures). In addition, 1 percent is devoted to safety projects (PM1 performance measures) and 14 percent is used to make progress with respect to measures of system performance (PM3 performance measures). An additional 4 percent is focused on environmental projects, and the remaining 8 percent is applied to other types of projects.

Periodic Evaluation of Facilities Repeatedly Requiring Repair and Reconstruction Due to Emergency Events

As part of the asset management rule, the FHWA created a requirement that reasonable alternatives shall be evaluated for roads, highways, and bridges that have required repair or reconstruction activities on two or more occasions due to emergency events. The process to evaluate projects before they are included in the MYP, and therefore the STIP, is included in the Programming Guidelines. To assist in this evaluation, the Department has created a GIS map that represents all locations that have been damaged at least once since January 1, 1997. All districts have been given access to the map. A process has been established where the Central Bureau of Operations, the Bureau of Programming, and the districts work together to update the map when new emergency events occur.

The procedure outlined in IDOT's TAMP for complying with the emergency events rule is described in more detail in the Programming Guidelines. Before any project may be added to the MYP (state or local), the Emergency Events map must be consulted to determine if two or more prior emergency events have occurred anywhere within the project limits. For identified sites, districts will complete:

- A risk assessment.
- An evaluation of treatment alternatives.
- Adding the recommended treatment, if necessary, into the scope of the project before the project is included in the multi-year plan.

The required evaluations are retained by the districts. The Bureau of Programming maintains a list of the evaluated projects included in each MYP cycle. The only location on the NHS damaged more than once by an emergency event has been programmed for permanent mitigation in FY 2027. There is one project on non-NHS locations damaged more than once in the current MYP. The project is a county highway, and it has been determined that the root causes of the previous damage were addressed in previous projects and no additional mitigation is needed.

IDOT FINANCIAL PLAN FOR THE PROPOSED HIGHWAY ELEMENT OF THE STIP

The principal financial assumption made for available federal revenue sources for the development of this STIP is the anticipated level of federal revenue sources provided under the IIJA authorizations, which was signed into law November 15, 2021. In addition to these federal funds, anticipated state, and local funds available for the life of this STIP have been projected. Under these reasonable financial assumptions, there are sufficient federal, state, and local funds to implement all the projects covered in the FY 2024-2027 STIP, as amended July 2024, and fiscal constraint as required by 23 CFR part 450, subpart B is demonstrated. However, these requirements are deemed sufficiently flexible to permit the selection of projects from the second, third, and fourth year of the STIP to replace projects selected for the first year of the STIP.

Federal Funding: The IIJA requires that the federal-aid highway and federal-aid transit projects in the STIP be based on funding reasonably expected to be available. The federal-aid revenues are based on estimates of apportionment (formula), allocations, high priority project funding, August Redistribution, and the Transportation Infrastructure Finance Innovation Act Redistribution.

Federal-Aid Highway Formula Funding: A surface transportation authorization act (currently the IIJA) provides federal highway funding levels over an established period of time. These authorized funds are then distributed by formulas established in law to the states through an annual apportionment process as authorized by the IIJA. In conjunction with these apportionments, there is an obligation limitation that provides the ceiling for the amount of apportionment the state may obligate through a given fiscal year. The obligation limitations can vary from year to year. As such, IDOT has estimated the obligation limitations for the life of this STIP.

Under the IIJA, IDOT estimates the obligation limitation for the total five-year bill to be \$10.97 billion with an average of \$2.19 billion per year for the life of the current legislation.

Federal-Aid Highway Allocation Funding: Funding available from allocations is included in the STIP. Federal-aid highway allocation funding is distributed to the states by administrative formula or by means of a competitive application. Allocated funds include many varied categories of federal aid, including, but not limited to, Rebuilding American Infrastructure with Sustainability and Equity (RAISE) and Federal Land Access. Allocations of categorical funding generally are distributed to specific areas of the state. Annual allocations to individual projects or categories of funding are routinely added to the STIP but due to the timing of project identification may require amendments to be processed.

Federal-Aid Highway Earmarked Funding: Earmarks are funds designated by Congress for the completion of specific projects within the state. Earmarked funding is generally subject to its own obligation limitation that is available until spent. The actual level of funding committed to these projects each year varies based on project delivery schedules and rules on spending these funds. To date, the majority of Illinois' SAFETEA-LU earmarked funding has been spent and the projects have been completed. While the FAST Act did not include any new earmarks, the IIJA does include several new earmarks which can be found in Appendix C.

In recent appropriations acts, Congress has included a provision to repurpose certain earmarks based on their age, obligation level, and completion status. This provision allows unused earmark funding to be utilized on designated projects rather than sitting idle or being returned to FHWA. While this provision does provide additional contract authority, it may not provide additional obligation limitation in each instance. Since the repurposing provision is dependent upon Congressional inclusion in annual appropriations acts, IDOT does not make any assumptions regarding repurposing funds.

Advanced Construction (AC): AC is a federal authorization method that allows IDOT to secure approval from FHWA to construct Federal-aid projects without requiring the associated federal obligation which would use both contract authority and obligation limitation. This allows IDOT to advance projects in anticipation of available contract authority and obligation limitation. To maximize flexibility in use of contract authority and limitation, IDOT establishes all projects in AC status unless a specific federal program funding will not allow it, or the Department deems current funding (obligation) at project onset is the best use of available federal balances. AC projects are converted to current federal funding with the first expenditure of contract authority and when limitation is available. To ensure that the STIP and TIPs reflect the correct status of a project, IDOT notifies both MPO and programming staff when a project is converted, so administrative modifications can be completed.

The Department's use of AC authorizations and conversions complements the intent to maximize the number of federally reimbursable projects. The fiscal constraint model accounts for the level of planned conversions compared to the available obligation limitation, but the Department also forecasts the conversion rate to manage cash flows from federal reimbursements. Under this method, the STIP's fiscal constraint is an approximate amount of planned AC conversions to utilize the estimated annual obligation limitation.

State Funds: Funds for highway projects are primarily generated from motor fuel taxes (MFT), motor vehicle registration (MVR) fees, and bonds. For the FY 2024-2029 MYP, the department continued with increased estimates for state MFT and MVR receipts due to Illinois Senate Bill 1939 being signed into law as part of the Rebuild Illinois capital program. Illinois SB 1939 increased the MFT for the first time since 1990 which was effective July 1, 2019. It also increased the MVR fees to all vehicles which was effective January 1, 2020. Of the first 19¢ collected from motor fuel taxes, 45.6 percent is provided to the state for highway improvements. Of the Rebuild Illinois increase, 48% is provided to the State Construction Account and 20% is provided to Transit through the Capital Improvement Fund. In addition, the state receives reimbursement from the Highway Trust Fund (HTF) and local agencies. Beginning July 2021, a five-year phase in of the state portion of the sales tax on motor fuels will be deposited into the Road Fund instead of the General Fund.

Local Funds: Local funds for highway projects are also generated from MFT. Of the first 19¢ of funds collected from MFT, 54.4 percent is provided to the local agency for highway improvements. Of the Rebuild Illinois increase, 32% is provided to local agencies. Rebuild Illinois bonds were also dispersed in May of 2020, July of 2020, March of 2021, May of 2021, March of 2022, and September of 2022. More information can be found at: <https://idot.illinois.gov/transportation-system/local-transportation-partners/county-engineers-and-local-public-agencies/mft-distribution/index>

Financial Model: The financial model used for development of the MYP is also used for the development of the STIP. The model is designed to account for several factors including but not limited to revenue trends and changes to federal and state law. The Department's revenue

is derived primarily from MVR, MFT, HTF reimbursements, and reimbursements from local units of governments.

Although the actual process to determine annual program size is more complicated, in simplified terms IDOT uses a three-step approach:

Step one is to estimate all available revenue sources including state funds from MVR, MFT, and state sales tax on motor fuels, federal funds from reimbursement of existing projects, future funding assumptions, and local project reimbursement. Step two is to subtract expenses which include debt service, operating, administrative, other agency, and those associated with existing construction projects from prior annual program elements. Step three is to appropriately size the annual element to fit within remaining resources to assure fiscal constraint.

Proposed Highway Element for the FY 2024-2027 STIP

As mentioned earlier, Congress distributes authorized federal funds to the states by formulas through an annual apportionment. These apportionments establish an obligation limitation that may vary from year to year. This results in IDOT having to estimate obligation limitations for the life of the STIP. For the FY 2024-2027 STIP, the obligation limitation IDOT is assuming is 100 percent for FY's 2024, 2025, 2026, and 2027. The STIP will be updated annually with current funding assumptions if they should change.

Funding for State Projects

The \$10.563 billion of state funds in the published FY 2025-2030 MYP are utilized for a variety of purposes in program development. For this MYP program \$23.005 billion was allocated to the state highway system and is derived from federal, state, and local funds. The MYP continues to emphasize maintaining existing roads and bridges on the state system while also providing funding for needed congestion mitigation and system expansion projects. The proposed six-year program will maintain 3,090 miles of state highways and replace or rehabilitate 8,299,727 square feet of bridges.

Available revenue for the FY 2024-2027 highway portion of the STIP will total approximately \$21.646 billion which includes \$9.945 billion of federal funds, \$9.624 billion of state funds, \$1.144 billion of re-appropriations and \$933 million of local funds. This program assumes an obligation ceiling of 100 percent of apportioned funds for FYs 2024, 2025, 2026 and 2027. The following table provides a breakdown of anticipated available revenue by fiscal year. Planned AC conversions are included in the total anticipated federal revenue amounts. While State funds account for 44.4% of the total funds in the FY 2024-2027 STIP, projects will be shown split at 80/20 both to maximize Federal funds and allow the flexibility to convert to federal dollars if needed.

FY 2024-2027 Available Revenue (Table 1)
(\$Millions)

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Obligation Limit	\$2,367	\$2,554	\$2,492	\$2,532	\$9,945
State	\$2,027	\$2,515	\$2,823	\$2,259	\$9,624
State Re-appropriations	\$620	\$524	\$0	\$0	\$1,144
Local	\$230	\$240	\$230	\$233	\$933
TOTAL	\$5,244	\$5,833	\$5,545	\$5,024	\$21,646

The proposed obligations for the highway element of the FY 2024-2027 STIP are summarized in the following table for each category. This program includes \$12.340 billion of projects in the MPO TIP's, \$2.115 billion in projects of significant scale to be identified individually and \$6.796 billion of grouped projects.

FY 2021-2024 Proposed Project Obligations (Table 2)
(\$Millions)

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
MPO TIPs	\$3,019	\$2,966	\$3,517	\$2,837	\$12,340
Significant Projects*	\$516	\$667	\$501	\$430	\$2,115
Grouped Projects*	\$1,505	\$2,032	\$1,744	\$1,515	\$6,796
TOTAL	\$5,040	\$5,665	\$5,762	\$4,782	\$21,249

*(Not in MPO TIPs)

As shown in the above two tables, the obligations are equal to or less than the available funding, and fiscal constraint by fiscal year is demonstrated for this STIP.

FY 2024-2027 Grouped Projects

The following tables represent the grouped projects which are broken into five specific categories which are: Resurfacing, Bridges, Safety, Transportation Alternatives Programs (TAP) and Other. The tables are identified by work type/function and provide anticipated levels of accomplishment with associated dollars shown in millions. All federal aid projects will begin in AC status. Funding is shown at an 80/20 split in order to maximize Federal funds but is subject to change with increase of State funds.

RESURFACING (Table 3)

The resurfacing category includes pavement resurfacing, rehabilitation and/or reconstruction, widening narrow pavements without adding travel lanes, truck-climbing lanes outside the urbanized area, shoulder improvements, increasing sight distance and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Number of Miles	647	718	421	529	2,315
Federal Funds (AC)	\$474	\$642	\$531	\$406	\$2,053
State/Local Funds	\$118	\$161	\$133	\$102	\$514
Total Funds (in Millions)	\$592	\$803	\$664	\$508	\$2,567

BRIDGES (Table 4)

The bridge category includes the repair, rehabilitation or reconstruction of existing bridges, or the construction of a grade separation to replace existing at-grade railroad crossings and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Sq. Ft. of Structures*	323,894	463,145	626,597	326,641	1,740,277
Federal Funds (AC)	\$210	\$379	\$401	\$319	\$1,309
State/Local Funds	\$53	\$95	\$100	\$80	\$328
Total Funds (in Millions)	\$263	\$474	\$501	\$399	\$1,637

*Square Footage of structures was previously showing a total of all categories. Due to better reporting methods, IDOT can now show the square footage that makes up the Grouped Category only to better correlate to the funds projected to be spent.

SAFETY (Table 5)

The safety category includes highway safety or traffic operation improvement projects including signalization and other intersection improvements, skid proofing, railroad/highway crossing improvements, median barrier cable and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$54	\$86	\$98	\$65	\$303
State/Local Funds	\$14	\$22	\$24	\$16	\$76
Total Funds (in Millions)	\$68	\$108	\$122	\$81	\$379

TRANSPORTATION ALTERNATIVES PROGRAM (TAP) (Table 6)

The TAP category includes state appropriations sized for anticipated readiness for projects selected as part of the Illinois Transportation Enhancement Program (ITEP), Safe Routes to Schools Program and Recreational Trails Program. The Safe Routes to School category include infrastructure and non-infrastructure activities for enforcement, encouragement, evaluation, educational and engineering efforts to enable and encourage children in primary and secondary schools to walk and bike safely to and from school.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$49	\$70	\$70	\$71	\$260
State/Local Funds	\$62	\$17	\$18	\$18	\$115
Total Funds* (in Millions)	\$111	\$87	\$88	\$89	\$375

*Includes Transportation Management Area (TMA) funding

OTHER (Table 7)

The Other category includes miscellaneous projects, statewide line items, other engineering and land acquisition associated with non-specific projects that can be grouped including emergency relief, lighting, rest areas and weigh stations.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$9	\$9	\$9	\$9	\$36
State/Local Funds	\$462	\$515	\$156	\$390	\$1,523
Total Funds (in Millions)	\$471	\$524	\$165	\$399	\$1,559

FY 2024-2027 Significant Projects

The State and Local Highway Project Listing Guide, Glossary, and Fund Types for significant projects and other highway projects are located in Appendix H. Significant projects for the FY 2024-2027 STIP are listed in Appendix I. Projects are considered Significant if any one of the following criteria is met: Major Construction, Principal Arterial, Illinois Special Bridge Program and/or special federal funds; i.e. location-specific federal earmark funding, Carbon Reduction, PROTECT, and COVID funds. The department has provided the estimated schedule for improvements and designated the proposed source of funds to satisfy the IJA requirements. The actual fiscal year in which a project is implemented may change for various reasons. Factors influencing the timing of an improvement include environmental considerations, land acquisition, plan preparation, utility movements, hazardous waste clean-

up, climate, level of public support and available funding. The department has published the FY 2025-2030 MYP program and will work to accomplish all the projects included in that program.

The website address for the FY 2025-2030 Proposed Highway Improvement Program is: [Publication \(illinois.gov\)](https://www.illinois.gov)

Amendments and Modifications to the STIP

An amendment will occur for projects being added or deleted from the STIP that fall within the Significant Category and will require an opportunity for a 15-day public review and comment period and approval by FHWA. The implementing state or local agency will be responsible for public involvement on STIP amendments. The 15-day comment period is for state and local projects outside of an MPO area; projects within an MPO area must follow the MPO’s public involvement procedures. In addition, amendments are required when cost changes for significant projects exceed the percentages listed. For example, if the cost of the project is \$5M and it is increased to \$6.250M which is a 25 percent increase, an amendment is required.

Requirements for amendments are based on the percent of change from cost as shown below.

<u>Percent Change</u>	<u>Federal Project of Project Group Cost (\$1,000)</u>
100%	\$0 - \$999
50%	\$1,000 - \$4,999
25%	\$5,000 - \$9,999
20%	\$10,000 or greater

An administrative modification occurs when federally funded projects within the Significant category have minor scope, fund type, project limit changes or project cost changes that do not exceed the percentages listed above. IDOT is required to submit administrative modifications to FHWA for informational purposes.

Projects with Special State Appropriation

Local SAFETEA-LU Earmarks

Separate state appropriation from FY 2007 remains available for local SAFETEA-LU High Priority Project (HPP) earmarks, which includes the required match. The remaining earmarks are listed in Appendix B.

Congressionally Designated Spending

Project listings were approved in both FFY 2022 (Public Law 117-103) and FY 2023 (Public Law 117-328). The federal share of these projects is to be governed by 23 U.S.C. 120. The projects are shown in Appendix C.

IDOT FINANCIAL PLAN FOR THE PROPOSED TRANSIT ELEMENT OF THE STIP

Federal Programs: Federal funds are available for transit projects through Chapter 53 of the Infrastructure Investment and Jobs Act (IIJA). This Act authorizes funding for FFY 2022-2026. Each year the FTA publishes interim guidance as part of its annual apportionments notice of funding. The Department utilizes the FTA published apportionments to determine allocations and direct apportionments.

Section 5307 & 5340: These urbanized area formula funds are available to urbanized areas for planning, capital, and operating assistance. An urbanized area is an incorporated area with a population of 50,000 or more that is designated as such by the U.S. Department of Commerce, Bureau of the Census. These funds are apportioned to the states on the basis of population and as of the 2020 US Census, housing density. The Department apportions these funds to small urban grantees (transit agencies) which allows them to apply directly to the FTA for these funds. The 5307 designated recipients reflect these funds in their individual Transportation Improvement Plans (TIPs) and are not included in the IDOT charts below. IDOT has the responsibility of contract and fund use oversight which is met through grant monitoring through the FTA's grant management system.

Section 5309: Fixed Guideway Capital Investment Grants provides discretionary funding for fixed guideway investments such as new and expanded rapid commuter rail, light rail, streetcars, bus rapid transit and ferries, as well as corridor-base bus rapid transit investment that emulate the features of rail. There are four categories of eligible projects under the program: 1) New Start; 2) Small Starts; 3) Core Capacity; and 4) Programs of Interrelated Projects. Large urban transit agencies such as the Chicago Transit Authority and Bi-State MetroLink apply directly to the FTA for these funds and are wholly responsible to the FTA for compliance and oversight of these funds.

Section 5310: Enhanced Mobility of Seniors and Individuals with Disabilities funds are used to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options. IDOT uses these funds for the purchase of paratransit vehicles supporting these efforts through the Consolidated Vehicle Procurement (CVP) program. IDOT is the designated state agency to receive and disperse these formula funds for rural areas (population under 50,000) and small urbanized areas (population of 50,000–199,999). Funds for large urbanized areas (population over 200,000) are apportioned directly to those respective urbanized areas by FTA. Some of these large urbanized areas designate a portion of their formula to IDOT for paratransit vehicles in their area, and those funds are included in the IDOT charts below.

Section 5311: Rural area (population under 50,000) funds are available for general public transportation in non-urbanized areas for operating, capital, administrative, and planning expenses. IDOT administers these funds through agreements with local governmental agencies.

Section 5339: Grants for Bus and Bus Facilities funds are used to replace, rehabilitate, and purchase buses and related equipment and to construct or rehabilitate bus-related facilities including technological changes, innovations, or to modify low or no emission vehicles or facilities. This program has a formula component and a competitive component. Grantees (transit agencies) apply directly to FTA for the competitive funds. IDOT is the designated state agency to receive and disperse Section 5339 formula funds for rural areas (population under 50,000) and small urbanized areas (population of 50,000–199,999). IDOT has the responsibility of contract and fund use oversight for projects awarded under the formula

funding, which is met through concurrence procedures, reviewing plans, and invoices and may include on-site inspections.

CARES Act: On March 27, 2020, President Trump signed the Coronavirus Aid, Relief, and Economic Security (CARES) Act into law. The CARES Act provides recipients of urbanized area (5307) and rural area (5311) formula programs with additional funding to support capital, operating, and other expenses generally eligible under those programs to prevent, prepare for, and respond to COVID-19. In Illinois, the 5307 program received approximately \$1.585 billion and the 5311 program received approximately \$57 million. Funding is provided at a 100-percent federal share, with no local match required.

CRRSA ACT: On December 27, 2020, the Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA) was signed into law. The CRRSA, similar to the CARES Act, provides recipients of urbanized area (5307 and rural area 5311) formula programs with additional funding to support capital, operating, and other expenses generally eligible under those programs to prevent, prepare for, and respond to COVID-19. The CRRSA directs recipients to prioritize payroll and operational needs.

ARP ACT: On March 11, 2021, the American Rescue Plan Act was signed into law to support the nation's public transportation systems. The ARPA funds are awarded for use in the same manner as CARES and CRRSA. ARPA, when combined with CARES and CRRSA provided 132% of 5307 recipients 2018 operating expenses and 140-150% of 5311 recipients 2018 operating expenses.

State Funding: Funding is provided by legislative authorizations for capital programs and is available for transit projects. Series B Bonds are issued by the state to fund capital transit projects and are also used to match FTA capital funded projects for rural and small urban transit agencies.

The Rebuild Illinois capital improvement program created a new Multi-modal Transportation Bond Fund, Downstate Mass Transportation Capital Improvement Fund, and Regional Transportation Authority Capital Improvement Fund. Collectively, these new authorization programs added approximately \$4.5 Billion to statewide capital programs over a six-year period.

The state provides significant operating assistance to 56 transit systems across the state through the Downstate Operating Assistance Program (DOAP) as authorized and apportioned by the general assembly and reimburses up to 65% of eligible operating expenses.

Local Funding: Local operating funds for transit projects are generated from a variety of sources which are: 1) Metro East Sales Tax in the Metro East area of St. Louis. St. Clair County and Madison County levy a sales tax to assist in funding their operating expenses; 2) Various downstate local sources which allows downstate transit providers to receive revenues from dedicated property taxes to local government appropriations; and 3) Farebox Revenue which are the transit system funds collected from the riders for using the transit service.

Transportation Development Credits: A state is permitted to use certain toll revenue capital expenditures as a credit toward the non-federal matching share of highway programs authorized by Title 23 U.S.C. and the non-federal matching share (soft match) of transit projects eligible under/authorized by Title 49 U.S.C. The program allows the State DOT or any eligible mass transportation carrier upon approval by the State DOT, as defined in ILCS 20/2705, to use Transportation Development Credits (TDCs) to cover all or a portion of the non-federal share on any highway project authorized by Title 23 U.S.C. or any transit project

authorized by Title 49, Chapter 53, U.S.C. TDCs do not provide any additional funding, rather they are used in place of non-federal matching funds making the project 100% federally funded.

FY 2024-2027 PROPOSED TRANSIT ELEMENT OF THE STIP

The Transit Element of the STIP accounts for \$264.486 million in federal and state funding. The Department anticipates receipt of Federal apportionments from the Federal Transit Administration (FTA) for Federal Fiscal Years 2024-2027 of \$193.023 million. The Department will use \$66.48 million in state and local funding as well as TDC funding to match the anticipated federal funds. The following table provides a breakdown of available funds by fiscal year.

**FY 2024-2027 Funding (Table 8)
(\$Thousands)**

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal	\$79,495	\$37,787	\$37,842	\$37,899	\$193,023
State	\$26,121	\$13,453	\$13,453	\$13,453	\$66,480
Local/In-Kind		\$1,661	\$1,661	\$1,661	\$4,983
TDCs*	\$3,034	\$3,046	\$3,056	\$3,067	\$12,203
TOTAL	\$105,616	\$52,901	\$52,956	\$53,013	\$264,486

*TDCs are excluded from Totals

The following table summarizes the programming of the anticipated FFY2024–2027 apportionments. The program includes \$101.31 million identified for rural transit operating assistance and administration activities (see Appendix H for more details). There is also \$91.72 million programmed for capital projects (see Appendix H for more details). In addition, \$12.2 million in TDCs have been programmed.

**FY 2024-2027 Program (Table 9)
(\$Thousands)**

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Operating	\$33,624	\$22,556	\$22,561	\$22,566	\$101,306
Capital	\$45,871	\$15,231	\$15,282	\$15,333	\$91,717
State	\$26,121	\$13,453	\$13,453	\$13,453	\$66,480

TDCs*	\$3,034	\$3,046	\$3,056	\$3,067	\$12,203
TOTAL	\$105,616	\$52,901	\$52,956	\$53,013	\$264,486

*TDCs are excluded from Totals

The Section 5307 small urban federally funded projects are programmed in the MPO’s TIPs for that metropolitan region. The amount of federal funds is known or reasonably expected to be available for the program of projects and demonstrate that the transit projects are fiscally constrained. Additional information on individual MPO’s and their local TIPs can be found through IDOT’s Local Planning webpage under the tab of “Quick Links”.

<https://idot.illinois.gov/transportation-system/local-transportation-partners/local-planning/index>.

Project listings can be found under the “Project Listings” tab at:
[Statewide Transportation Improvement Program \(illinois.gov\)](https://www.illinois.gov)

IDOT FINANCIAL PLAN FOR THE PROPOSED INTERCITY RAIL ELEMENT OF THE STIP

Federal Capital Funding: Federal funds are available for intercity passenger rail capital projects through Federal Railroad Administration (FRA) competitive grant programs. IDOT currently administers FRA grants awarded through the American Recovery and Reinvestment Act (ARRA) of 2009, Omnibus Appropriations Acts of 2009 (FY 2009) and 2010 (FY 2010), and Consolidated Rail Infrastructure and Safety Improvements (CRISI) Program of 2017. All of the FRA competitive grant funding are provided on a reimbursement basis. These grants require a state funding match that varies from 0% to 50% depending on the grant, which is funded by state Series B Bonds.

ARRA: The ARRA legislation included a federal funding expiration corresponding to the end of the FFY 2017 (September 30, 2017). The ARRA grants administered by IDOT include a Tapered Match grant modification that permit the grant’s FRA funds to be spent first, by the expiration date and then the state matching funds to follow. FRA funds expired in the SFY 2017, but the Tapered Match currently allows these ARRA grants to use the state funding match through SFY 2025.

Omnibus Appropriations Acts and CRISI: The legislation in the Omnibus Appropriations Acts of 2009 and 2010 and the CRISI Program of 2017 do not have a federal funding expiration date. The FY 2009, FY 2010, and CRISI grants administered by IDOT anticipate funding through SFY 2024.

State Capital Funding: Funding is provided by legislative authorizations for intercity passenger rail capital programs through two funds which are approved by IDOT: the Federal High Speed Rail Trust Fund (433 Fund) issued to provide positive cash-flow for FRA grants; and Series B Bonds issued by the state to fund capital intercity passenger rail projects and are primarily used to match FRA funds. The FRA grants require IDOT to pay vendors (i.e. consultants, railroads, local municipalities) the federal portion of FRA grants via the 433 Fund and then receive reimbursement from FRA funds.

In 2019, the State of Illinois passed the Rebuild Illinois Capital Infrastructure Bill that provided additional capital for passenger rail projects throughout the state, including new monies for the Chicago to Quad Cities Intercity Passenger Rail Expansion, the Chicago to Rockford Intercity Passenger Rail Expansion, the Chicago to Carbondale Passenger Rail Improvement Project, and for the Springfield 10th Street Rail Consolidation Project.

State Operating Funding: Funding is provided by legislative authorizations for operations of intercity passenger rail programs by state road fund appropriations on an annual basis. These programs include operations of the existing Amtrak state-supported services (i.e., Chicago-Champaign-Carbondale, Chicago-Galesburg-Quincy, Chicago-Normal-Springfield-St. Louis, Chicago-Milwaukee, and Chicago-Milwaukee-St. Paul) and maintenance of the Chicago-Normal-Springfield-St. Louis High Speed Rail corridor as well as maintenance for the long-term overhauls of the Midwest states owned Charger locomotive fleet.

Funding for one daily round trip Amtrak state-supported service between Chicago-Milwaukee, WI-St. Paul, MN commenced in May 2024 in partnership with Wisconsin and Minnesota DOTs

and with significant operating funding assistance granted to Amtrak via a Wisconsin awarded FRA Route Restoration and Enhancement grant. Funding for operation of the new Chicago-Rockford service, anticipated to commence in FY2028 with Metra as the operator, will require additional state road fund appropriation on an annual basis to cover Union Pacific's Franchise Access Fee, Operations and Maintenance Fee, and Metra's cost to operate the service minus farebox recovery.

FY 2024-2027 Proposed Intercity Rail Element of the STIP

Passenger rail in Illinois is comprised of intercity, commuter rail, and light and heavy rail transit. However, the Passenger Rail Improvement and Investment Act (PRIIA) of 2008 defined passenger rail as consisting of intercity and commuter rail.

The State of Illinois has contracted with Amtrak to subsidize passenger rail service since 1971. PRIIA requires an equitable arrangement of cost sharing between Amtrak and state or public agency partners that provide funding for short-distance intercity passenger rail services. By agreement with Amtrak, the State of Illinois supports the operation of trains on three routes between Chicago and downstate Illinois: Chicago and St. Louis (Lincoln Service), Chicago to Carbondale (Saluki/Illini), and Chicago to Quincy (Carl Sandburg/Illinois Zephyr). In addition, Illinois and the State of Wisconsin jointly support seven daily round trip trains between Chicago and Milwaukee on the Hiawatha Service. Illinois, Wisconsin, and Minnesota DOTs initiated the Borealis service in SFY2024 to extend one of the 7 Hiawatha Service round trips north of Milwaukee, WI to St. Paul, MN. The state's operating subsidy with Amtrak was approximately \$60 million in SFY 2024. In FY 2024, ridership increased 9.8% from FY 2023's 4.1 million riders, with a total of 4.5 million riders at Illinois stations in FY 2024. Ridership continues to recover in the aftermath of the COVID-19 pandemic. Before the pandemic, ridership in FY 2019 was near 6.1 million riders. Illinois brought back full train service frequencies in July 2021.

Since the ARRA 2010 grant that initially funded the Chicago-St. Louis High Speed Rail Project (\$1.2 billion), Illinois' signature high-speed rail route has received an additional \$300 million of federal and state funds for corridor improvements between Joliet and St. Louis. The Chicago-St. Louis corridor now features much improved safety with 4-quadrant gates at grade crossings and Positive Train Control (PTC) with increased top speeds of 110 mph.

In addition, Illinois and a consortium of partner Midwest states (Michigan, Missouri, and Wisconsin) has procured and placed into service 33 new Siemens Charger locomotives for intercity passenger rail services. The same consortium of Midwest states has procured and begun placing new Siemens Venture passenger cars into service in FY 2022, which will continue through FY 2025 as the remaining café cars are delivered and commissioned into service.

Additional federal and state funds, including state funds from the Rebuild Illinois Capital Infrastructure Bill, have been applied to these other passenger rail projects of significance:

- Chicago to Quad Cities Intercity Passenger Rail Expansion which totals \$448 million of federal and state funding for construction of necessary improvements to establish Amtrak passenger rail service to Moline including a new intermediate station in Geneseo;
- Chicago to Rockford Intercity Passenger Rail Expansion which totals \$275 million of state funding for construction of necessary improvements to establish Metra intercity

passenger rail service by 2027 to Rockford including new intermediate stations in Elgin, Huntley, and Belvidere;

- Chicago to Carbondale Passenger Rail Improvement Project which totals \$100 million of state funding for construction of improvements to improve on-time performance or potentially expand frequencies on the route; and
- Springfield 10th Street Rail Consolidation Project which totals \$122 million of state funding for the consolidation of rail traffic on the 10th Street corridor in Springfield.

The FY 2024-2027 intercity rail portion of the STIP totals \$1,300.7 million. The federal portion of the program represents \$145.6 million of the total funding, with the state contributing \$1,155.1 million. The 2024-2027 STIP-Intercity Rail is included in Appendix D. The following tables provide a breakdown by fiscal year.

FY 2024-2027 Available Funding (Table 10)
(\$Millions)

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal	36.2	44.6	64.3	0.5	145.6
State	183.9	216.6	407.1	347.5	1,155.1
TOTAL	220.1	261.2	471.4	348.0	1,300.7

FY 2024-2027 Proposed Expenditure (Table 11)
(\$Millions)

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
TOTAL	220.1	261.2	471.4	348.0	1,300.7

State Planning and Research

The FHWA approved \$39.9 million in State Planning and Research (SPR) funds and \$28.3 million in Metropolitan Planning (PL) funds for FY 2025 on July 16, 2024. The SPR-PL work program provides for the continuation of the state and metropolitan transportation planning programs for the period from July 1, 2024 through June 30, 2025. This category includes a state planning work program and supplemental work programs for urbanized areas over 200,000 population. Below is the estimated apportionment of SPR and PL funds per the FAST Act apportionment tables.

FY 2024-2027 Funding (Table 12)
(\$Millions)

Fiscal Year	SPR FUNDS	PL FUNDS
FY 24	\$43.1	\$29.3
FY 25	\$39.9	\$28.3
FY 26	\$39.3	\$31.1
FY 27	\$40.1	\$32.0
TOTAL	\$152.2	\$101.7

Outreach

Public involvement is an important component of all transportation system plans and programs. In Illinois, public input on transportation issues is sought and considered on a continuous and ongoing basis. The STIP is the culmination of the programming process. Therefore, public involvement activities associated with the STIP build on public involvement efforts conducted by the Department on the MYP and by local MPOs throughout the programming process.

Outreach for FY 2024-2029 MYP had continued opportunities for members of the general public to become involved in transportation planning. It is IDOT's intent to continue providing current information through social media such as Facebook and Twitter. Additionally, IDOT's Office of Planning and Programming (OP&P) has implemented a website where the general public can fill out comment sheets with their questions and concerns on the MYP. This allows all members of the general public the chance to be involved in the planning process. Finally, IDOT has a tent at the Illinois State Fair that is manned by Department staff where the general public can review and ask questions regarding both the MYP and the STIP. IDOT and OP&P continue to refine the MYP Outreach process to stay current with public formats. The Outreach information can be found under the Public Outreach section at:

[Statewide Transportation Improvement Program \(illinois.gov\)](https://www.illinois.gov/transportation)

23 CFR part 450, subpart B requires that the public be offered an opportunity to review and comment on the draft STIP prior to FHWA taking approval action on the STIP. IDOT must provide citizens, affected public agencies and jurisdictions, employee representatives of transportation or other affected agencies, private providers of transportation, freight shippers, users of public transit and other interested parties a reasonable opportunity to review and comment on the proposed STIP. As such, while the outreach for the annual MYP directly ties to outreach for the STIP, IDOT also publishes the draft STIP and makes it available to the public for review and comment for a minimum of 30 days (15 days if amended). The various MPO's throughout the state are responsible for public outreach on projects within their TIP's.

In accordance with federal requirements, the STIP is published with reasonable notification of its availability for review through regionally significant newspapers, public outreach throughout the state, including the Illinois State Fair in Springfield (except for 2020 when cancelled due to COVID-19), Twitter, Facebook and IDOT's website. Also, the Department provided internet access of the Draft STIP to the county board chairman of all 102 Illinois counties, asking for assistance from appropriate members of their staff who work with populations of interest. This effort should increase the opportunity for low-income and minority populations to interact with and comment on the STIP. An electronic version is available through the Illinois Document Depository library system and on the IDOT website which is:

[Statewide Transportation Improvement Program \(illinois.gov\)](https://www.illinois.gov/transportation)

Written comments regarding the FY 2024-2027 STIP should be forwarded to the Office of Planning and Programming in Springfield at the following address using the form on page 31:

**Illinois Department of Transportation
Office of Planning and Programming
2300 S. Dirksen Parkway, Room 307
Springfield, Illinois 62764**

Individuals can also email at DOT.STIP@Illinois.gov or contact the Department concerning planning, programming, and public involvement issues at 1-800-493-3434.

IDOT welcomes public comment on the draft STIP as well as all transportation issues. The Department responds to telephone inquiries, letters, and e-mail comments for all issues. The Public Review and Comment form on page 30 is provided for public use but is not necessary. A record of comments and responses is maintained by the Office of Planning and Programming.

In addition, the department responds to hundreds of letters and inquiries from the general public, legislators, congressmen, and various groups annually regarding the status of projects and various transportation related topics and issues.

The Department will continue to explore various opportunities for review and comment to ensure public participation. The Department is committed to continuing good faith efforts to encourage and obtain public participation in the STIP as well as all program development process. The Department's efforts exceed the requirements for public involvement in 23 CFR part 450, subpart B. The Department actively seeks public input throughout the transportation decision-making process from the earliest stages through the development and implementation of specific solutions.

Special Appropriations

The 94th Illinois General Assembly passed a special appropriation to cover local SAFETEA-LU earmarks and required match for High Priority Projects and Transportation Improvement Projects. The funding of these particular projects is dependent upon when the local agency is prepared to move forward with the projects. Listed below are the remaining local federal earmarks programmed in the STIP timeframe, in district order.

District 6

Bill No.	Earmark Amount	Bill Language	Improvements	Total Cost	Project Number
1984	1,200,000	The extension of MacArthur Blvd. from Wabash to Iron Bridge Road, Springfield	Paving, Widening & Resurfacing	462,000	6-10245-0200
4058	1,000,000	Expand US 67, Brighton to Bunker Hill Road, Macoupin County	Reconstruction	2,500,000	6-10059-0010
4110	1,000,000	Expansion of US 67 from Brighton to Bunker Hill Road in Macoupin County			

FY 2022/2023/2024 Congressionally Directed Spending

FFY 2022 Congressionally Directed Spending (Table 13)

Account	Project	Recipient	Amount
Highway Infrastructure Programs	St. Clair County - Greenmount Road from Lebanon Avenue to South of Frank Scott Parkway Widening	IL	\$2,500,000
Highway Infrastructure Programs	St. Clair County - Greenmount Road from Route 161 to Lebanon Avenue Widening	IL	\$2,500,000
Highway Infrastructure Programs	Barrington - Pedestrian Grade Separation at Main Street and the Canadian National Railroad	IL	\$500,000
Highway Infrastructure Programs	Deer Park Boulevard - Road Program	IL	\$614,000
Highway Infrastructure Programs	Iron Bridge Road to MacArthur Boulevard Extension	IL	\$3,000,000
Highway Infrastructure Programs	Grand Avenue and George Street Traffic Safety Enhancement	IL	\$650,000
Highway Infrastructure Programs	US Route 6 Multi-Use Path Extension	IL	\$900,000
Highway Infrastructure Programs	National Parkway and Higgins Road (IL 72) Pedestrian Signal Improvements	IL	\$200,000
Highway Infrastructure Programs	Lincoln Avenue Reconstruction	IL	\$3,500,000
Highway Infrastructure Programs	Lincoln Park ADA Accessibility Improvements	IL	\$1,000,000
Highway Infrastructure Programs	Wolf Road Sidewalk, City of Prospect Heights	IL	\$1,126,734
Highway Infrastructure Programs	St. Clair County - Frank Scott Parkway East/Thouvenot Lane Widening	IL	\$5,000,000
Highway Infrastructure Programs	West Grand Avenue - Highway/Rail Grade Separation	IL	\$3,100,000
Highway Infrastructure Programs	Alton Great Streets - Phase 1 Implementation: Broadway between Ridge Street and Third Street	IL	\$500,000
Highway Infrastructure Programs	Randall Road from Alexandra Boulevard to Polaris Drive/Acorn Lane	IL	\$8,000,000
Highway Infrastructure Programs	Chicago - State/Lake Loop Elevated Station Improvements	IL	\$1,000,000
Highway Infrastructure Programs	Decatur/Macon County Reas Bridge Replacement Project	IL	\$3,500,000
Highway Infrastructure Programs	Marion Main, Bainbridge, Penecost Streets Project	IL	\$600,000
Consolidated Rail Infrastructure and Safety Improvements	City of Decatur Brush College Road Faries Parkway Grade Separation Project	IL	\$2,000,000

FY 2024-2027 Intercity Rail Program (Table 16)
(\$ Millions)

Corridor	Project Location and Description	Est. Cost	Est. FY
Chicago to St. Louis	Joliet – Alton: Improve signals, tracks, grade crossings, passenger equipment to permit 110 mph service; additional reliability improvements and new equipment deliveries.	\$221.6	FY 2024-2027
Chicago – Quad Cities IPR Expansion	Construct new track connection near Wyanet, a train layover facility, and other improvements necessary to establish Amtrak-operated service.	\$371.3	FY 2024-2027
Chicago – Rockford IPR Expansion	Construct necessary improvements to establish Metra-operated passenger rail service between Chicago and Rockford with intermediate stations in Elgin, Huntley, and Belvidere.	\$270.0	FY 2024-2027
Chicago – Carbondale Improvements	Construct necessary improvements between Chicago and Carbondale to improve on-time performance of the service or increase service frequencies.	\$80.0	FY 2024-2027
Springfield 10 th Street Rail Consolidation	Construct improvements to consolidate rail through Springfield along the 10 th Street rail corridor	\$42.0	FY 2024-2026
Chicago Terminal Planning Study	Study with partners, FRA, Metra, and Chicago DOT to analyze existing and proposed Amtrak, Metra, and freight operations in the Chicago Terminal area.	\$6.0	FY 2024-2027

FY 2024-2027 Federal Lands

The FHWA's Eastern Federal Lands Highway Division has approved the following projects for the State of Illinois using the Federal Lands Access Program and Federal Lands Transportation Program.

Federal Lands Access Program (Table 17)

District	County	Description	Improvements	Programmed Amount
7	Moultrie	Lake Shelbyville	TR 119 Joe Pound Road	\$345,000
9	Franklin	Rend Lake	Gun Creek Recreation Area	\$350,000
9	Williamson	Crab Orchard National Wildlife Refuge	Rocky Comfort Road Resurfacing	\$700,000

Federal Lands Transportation Program (Table 18)

District	County	Description	Improvements	Programmed Amount
1	Will	Midewin National Tallgrass Prairie	Iron Bridge Rehabilitation And Painting	\$400,000
8	Calhoun	Two Rivers National Wildlife Refuge	Trailhead Replacement	\$254,298
9	Pulaski	Cypress Creek National Wildlife Refuge	Cache Bend	\$255,000
9	Williamson	Crab Orchard National Wildlife Refuge	Inter-City Trail Planning	\$1
9	Williamson	Crab Orchard National Wildlife Refuge	Campground/Prairie Creek	\$1
9	Williamson	Crab Orchard National Wildlife Refuge	Crab Orchard Auto Tour Culvert Repair	\$50,000
9	Williamson	Crab Orchard National Wildlife Refuge	Line 6 Road	\$500,000

Emergency Relief for Federally Owned Roads (Table 19)

District	County	Description	Improvements	Programmed Amount
7	Shelby	Lake Shelbyville	2019 IL May COE Spring Flood SL District	\$4,915,665

Recreational Trails Program (Table 20)

A Memorandum of Understanding between the Illinois Departments of Transportation and the Illinois Department of Natural Resources (IDNR) was signed on 04/25/18, which states that IDNR will oversee both the scope of projects and the financial aspects of the Recreational Trails Program (RTP), however funding will continue to pass through IDOT.

Below is a listing of all Recreational Trails projects outside of an MPO area. All projects within an MPO area are included in this document by reference.

IDOT District	Project Sponsor	Project Title	County	Improvement	Description	RTP Funds Amount	Total Cost
2	IDNR	Rock Cut State Park	Winnebago	Recreational Trail Improvements	Replace stairway off Lone Rock	\$160,000	\$200,000
3	IDNR	Matthiessen State Park	LaSalle	Recreational Trail Improvements	Replace 2 timber stairways	\$272,000	\$340,000
1	IDNR	I&M Canal State Trail	Will	Recreational Trail Improvements	Pearl St pedestrian bridge	\$60,000	\$75,000
1	IDNR	I&M Canal State Trail	Will	Recreational Trail Improvements	Aux Sable pedestrian bridge	\$144,000	\$180,000
3/1	IDNR	Kankakee River State Park	Kankakee/Will	Recreational Trail Improvements	Gabion retaining wall replacement	\$148,000	\$185,000
6	IDNR	Sangchris Lake State Park	Sangamon/Christian	Recreational Trail Improvements	Renovate 11 bridges on nature trail	\$96,000	\$120,000
8	IDNR	Eldon Hazlet State Park	Clinton	Recreational Trail Improvements	Cherokee Trail bridge	\$160,000	\$200,000
8	IDNR	Pere Marquette State Park	Jersey	Recreational Trail Improvements	Repair retaining wall	\$160,000	\$200,000
3	Kendall County Forest Preserve District	Hoover-Fox River Bluffs	Kendall	Recreational Trail Improvements	Trail connection	\$200,000	\$389,000
1	Forest Preserve District of Kane County	Fitchie Creek Trail	Kane	Recreational Trail Improvements	Improvements/Restoration	\$200,000	\$300,000
5	Champaign County Forest	Lake of the Woods	Champaign	Recreational Trail Improvements	Bike trail renovation	\$200,000	\$250,000

APPENDIX F

7	Macon County Conservation District	Rock Springs Scoville Park	Macon	Recreational Trail Improvements	Trail connection	\$172,000	\$218,000
1	Lake Forest Open Lands Association	Skokie Recreation Trail	Cook	Recreational Trail Improvements	Trail and accessibility improvements	\$200,000	\$735,000
1 - 9	Illinois Association of Snowmobile Clubs	Statewide	Statewide	Recreational Trail Improvements	Trail and equipment maintenance	\$232,000	\$290,200

Total RTP Funds amount: \$2,404,000

Total Cost amount: \$3,682,200

Danville/Carbondale-Marion Transit Listing

Due to DATS and SIMPO ceasing MPO status at the end of the 2023 calendar year, the following approved transit projects are listed from the corresponding TIP's.

Danville Area Transportation Study (Table 21)

Provider	Project Number	Project	Fund	Agency \$	State \$	Federal \$	Total \$
Danville Mass Transit	DMT-25-01	Operating Assistance	5307	\$0	\$2,417,000	\$1,301,000	\$3,718,000
Danville Mass Transit	DMT-26-01	Operating Assistance	5307	\$0	\$2,492,000	\$1,342,000	\$3,834,000

Southern Illinois Metropolitan Planning Organization (Table 22)

Provider	Project Number	Project	Fund	Agency \$	State \$	Federal \$	Total \$
Jackson County MTD	JCMTD-25-01	Capital – Scheduling Software / ADA paratransit vehicle / Used Heavy Duty Buses / Employee HR Software / Maintenance Equipment / Farebox / Camera / Bike Racks	5307	\$0	\$140,000	\$700,000	\$840,000
Jackson County		Section 5339a Jackson County Admin & Maintenance Facility in Carbondale	5339a	\$0	\$475,000	\$1,900,000	\$2,375,000

Fund Types

Federal Transportation Bill discretionary funds types are shown below:

Short Name	Long Name
ADJ STATE TO ILL ***	IL LEAD AGENCY
ILL TO ADJ STATE ***	ADJACENT STATE IS LEAD AGENCY
CMAQ	CONGESTION MITIGATION AND AIR QUALITY
HSIP	HIGHWAY SAFETY IMPROVEMENT PROGRAM
DEMONSTRATION / DEM	DEMONSTRATION FUNDS
INT. MAINT. DISC. / IM	INTERSTATE MAINTENANCE DISCRETIONARY
BRIDGE – DISCRETIONARY	DISCRETIONARY HBRRP FUNDS
BRRP	BRIDGE REPLACEMENT REHABILITATION PROGRAM
MAJOR BR	ILLINOIS MAJOR BRIDGE PROGRAM
HPP **	HIGH PRIORITY PROJECT
STLU	FEDERAL SAFETEA-LU HIGH PRIORITY PROGRAM
NAT'L & REG SIGNIF *	NATIONAL & REGIONALLY SIGNIFICANT
NAT'L CORR INFR IMP	NATIONAL CORRIDOR INFRASTRUCTURE IMPROVE
TRANSP IMP / TI *	TRANSPORTATION IMPROVEMENT
NHS	NATIONAL HIGHWAY SYSTEM
DELTA REGION PGM *	DELTA REGION TRANSPORTATION DEVELOPMENT PGM
NAT'L CORR. P & D *	NATIONAL CORRIDOR PLANNING & DEVELOPMENT
SECTION HWY DEMO	SECTION HIGHWAY DEMONSTRATION
HWY PRIORITY PROJ	HIGHWAY PRIORITY PROJECTS (NOT HPP)
ST PRIORITIES	SURFACE TRANSPORTATION PRIORITIES
TIGER FUNDS	TIGER FUNDS
BUILD GRANT	BUILD TRANSPORTATION DISCRETIONARY GRANT
RAISE GRANT	RAISE TRANSPORTATION DISCRETIONARY GRANT
RECONNCTING COMMUNITIES	RECONNCTING COMMUNITIES PILOT PROGRAM
GREAT LAKES RESTORATION	GREAT LAKES RESTORATION INTIATIVE (GLRI)
HIGHWAYS FOR LIFE	FY 2012 HIGHWAYS FOR LIFE
TCSP PROJECTS	TRANSPORTATION, COMMUNITY & SYSTEM PRESERVATION
TDC	TOLL DEVELOPMENT CREDITS
NRT	NATIONAL RECREATIONAL TRAILS
SR	SAFE ROUTES TO SCHOOL
RRS	RAILROAD SAFETY
STP	SURFACE TRANSPORTATION PROGRAM
STPE	SURFACE TRANSPORTATION PROGRAM (ENHANCEMENT)
L	LOCAL
S	STATE
OTH	OTHER

*Federal SAFETEA-LU Earmarks

**Federal TEA-21 High Priority Program

***State funds provided by Illinois and/or appropriate adjacent state

Work Zone Safety Grants	80

2024-2027 State and Local

Highway Project Listing Guide

Projects identified for FY 2024-2027 are listed on the following pages. The lists are comprised of Significant projects for each of the department’s nine geographical districts. The listing will be State Significant projects by District then Local Significant projects by District. Within the project listing the following sequence is used:

1. Interstate marked routes in ascending numerical order
2. US marked routes in ascending numerical order
3. Illinois marked routes in ascending numerical order
4. Unmarked routes in alphabetical order by street name

The listing of projects is arranged in six columns:

Route/Street	County	Location	Improvements	Est. Cost	Projected Programming Year/Project ID
Identifies the marked route(s) street name	Identifies County	Identifies limits, length and location of the project	Identifies type of improvement	Identifies the estimated cost in current dollars and fund type to be used	Identifies the estimated fiscal year / Project Number

STATE AND LOCAL HIGHWAY PROJECT LISTINGS

The remaining pages will list all state and local projects in the STIP with the following format:

District 2 state projects categorized as Significant.

District 3 state projects categorized as Significant.

District 4 state projects categorized as Significant.

District 5 state projects categorized as Significant.

District 6 state projects categorized as Significant.

District 7 state projects categorized as Significant.

District 8 state projects categorized as Significant.

District 9 state projects categorized as Significant.

District 2 local projects categorized as Significant.

District 3 local projects categorized as Significant.

District 4 local projects categorized as Significant.

District 5 local projects categorized as Significant.

District 6 local projects categorized as Significant.

District 7 local projects categorized as Significant.

District 8 local projects categorized as Significant.

District 9 local projects categorized as Significant.
