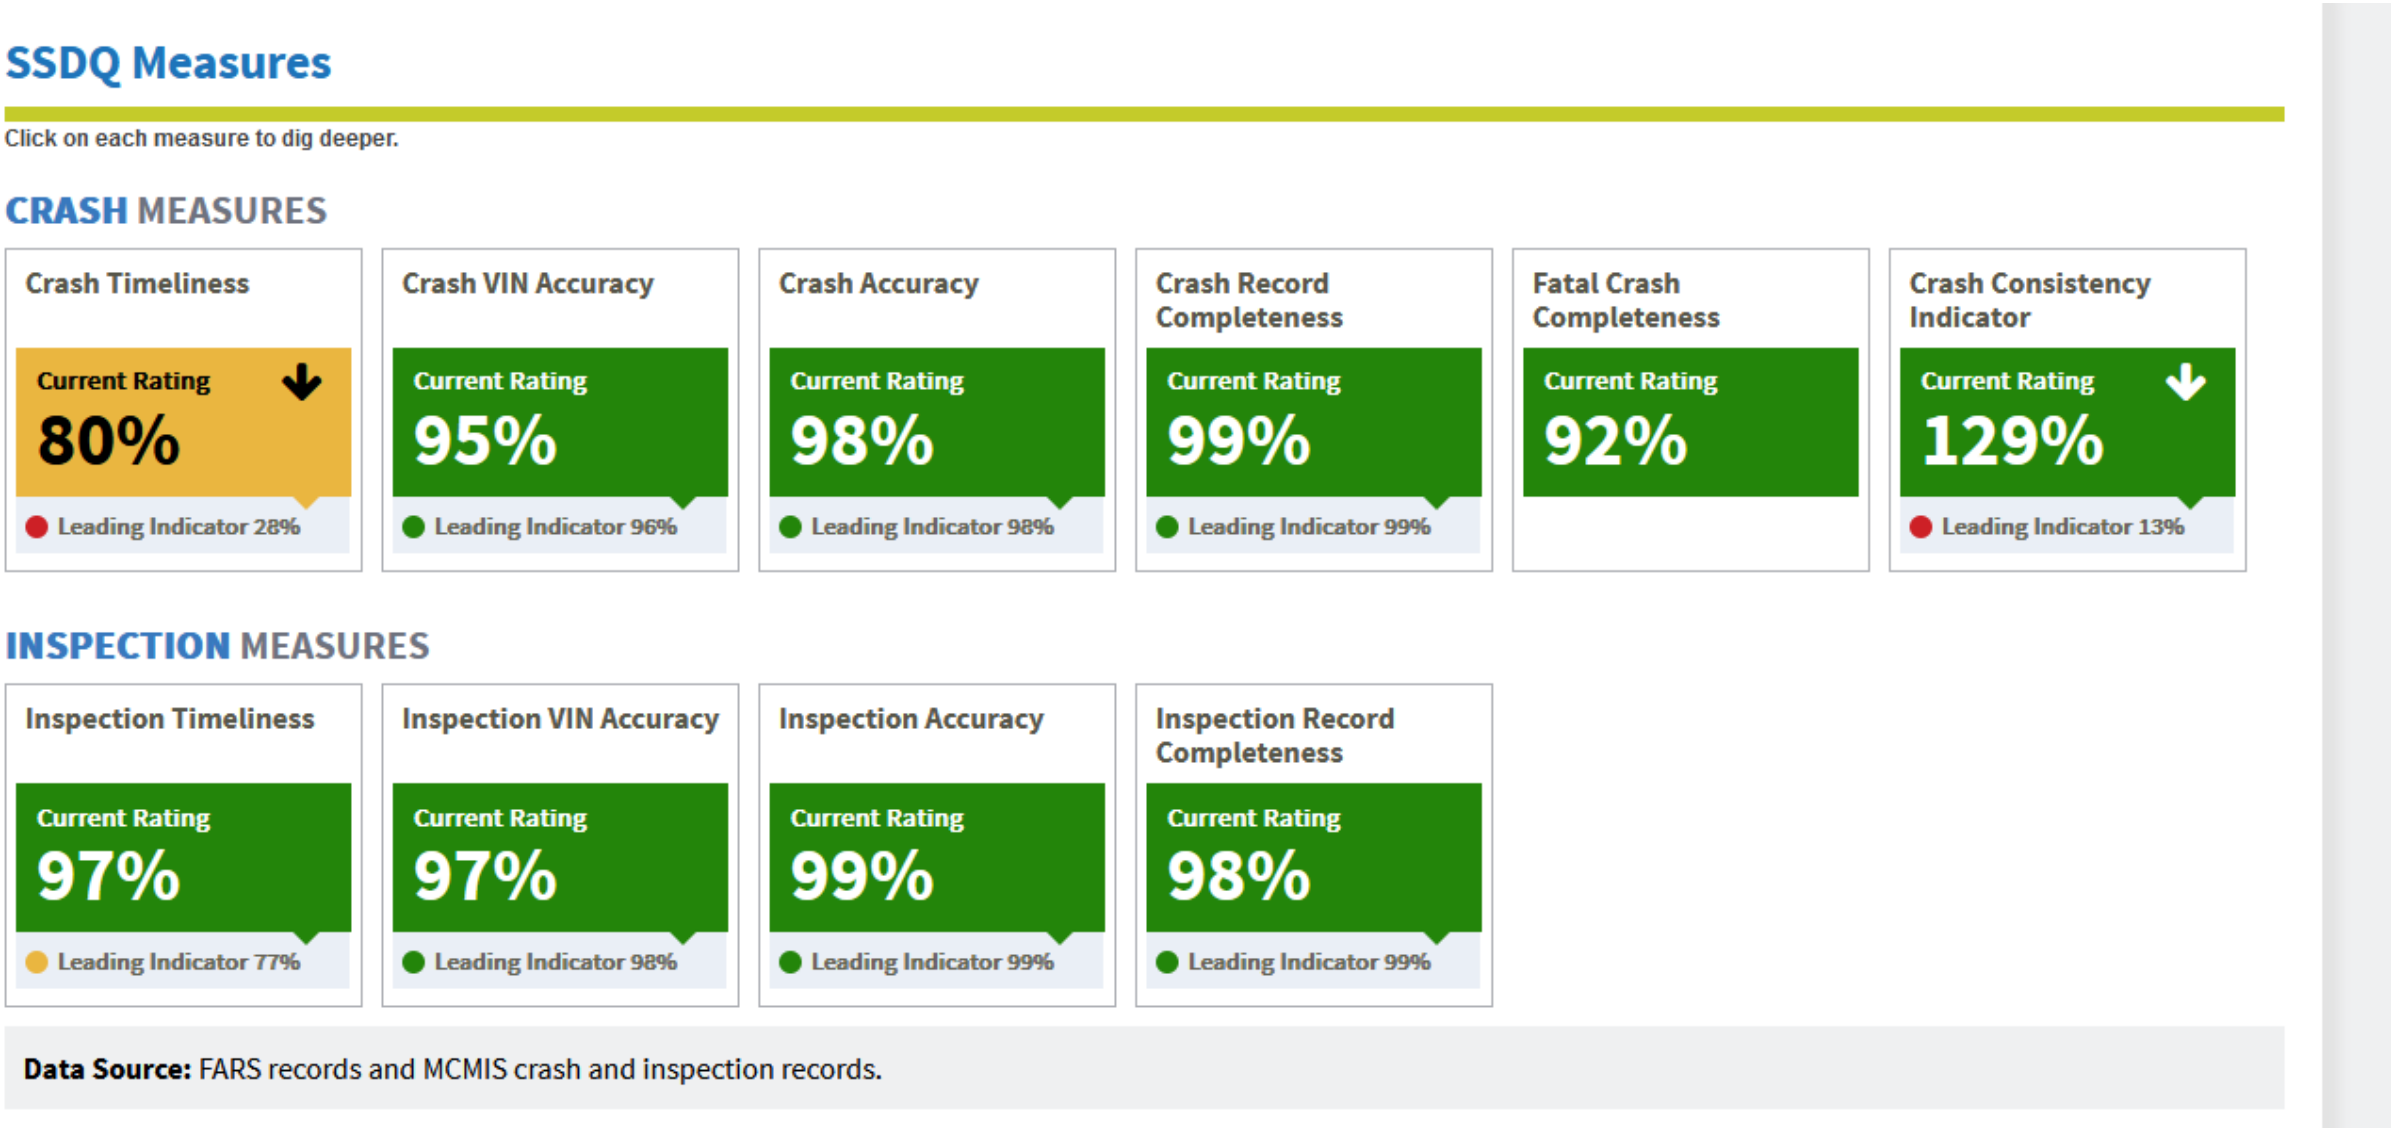
Christine Kobos, FMCSA

FMCSA Updates

"[This] is the current SSDQ measures for the state of IL as of the November data (the most recent update). It has not really changed since our last meeting."



SSDQ Measures

Click on each measure to dig deeper.

CRASH MEASURES

Crash Timeliness	Crash VIN Accuracy	Crash Accuracy	Crash Record Completeness	Fatal Crash Completeness	Crash Consistency Indicator
Current Rating ↓ 80%	Current Rating 95%	Current Rating 98%	Current Rating 99%	Current Rating 92%	Current Rating ↓ 129%
Leading Indicator 28%	Leading Indicator 96%	Leading Indicator 98%	Leading Indicator 99%		Leading Indicator 13%

INSPECTION MEASURES

Inspection Timeliness	Inspection VIN Accuracy	Inspection Accuracy	Inspection Record Completeness
Current Rating 97%	Current Rating 97%	Current Rating 99%	Current Rating 98%
Leading Indicator 77%	Leading Indicator 98%	Leading Indicator 99%	Leading Indicator 99%

Data Source: FARS records and MCMIS crash and inspection records.

FMCSA Updates

"…with the end of the year I pulled the map of nationwide large truck/bus crashes per the data as of November 2023. Illinois currently shows 3.97% of the nation's crashes (4,141 crashes out of 104,329 total). The highest concentration having occurred in Cook county (1,618 of 4,141 or 39.07%) Compared to the nation, 1.55% of the nation's crashes occur in Cook county, so that's a[n] interesting food for thought based on the data as of November."

Roadway Updates

"We are currently working on the Data Quality reviews for year end processing. We will officially close the file on February 29 and then start working on year end reports and data files. Those are normally completed and published by Mid- to Late-April. We are also still working with FHWA on the updated 2020 Census Boundaries. All of the updates have been submitted to FHWA, but we are still waiting for their approval. We are hoping to be able to have these included in our year end files."
