## Comments:

One of the main components in the traffic stop study is the ratio of Minority Traffic Stops to the specific agencies Estimated Minority Driving Population. This ratio is alleged to then hold some significance for determining if an agency is stopping minorities disproportionately. The same concerns remain this year as in years past in that there continues to be no true methodology for determining an agencies estimated minority driving population. An example of such is those agencies that are within two (2) counties, they default to the higher estimated minority driving population. An agency that within just one (1) county is held to a single minority estimated driving population figure. Thereby two (2) agencies that are next to one another and share major roadways and as such similar demographics with their motoring public could have a significant variance in their minority estimated driving populations, thereby potentially indicating a higher ratio in stopping behavior, due to a flawed baseline figure.

In the case of Lake in the Hills for 2009 it is indicated that our minority stopping ratio is 1.33 based upon the minority estimated driving population figure of 10.74. Looking solely at this ratio it would appear that minorities are stopped at a higher rate than their driving population warrants. This is in our opinion an inaccurate assessment. Another system to employ in determining disproportions would be to look at the historical data. With 6 years of data since the study began, Lake in the Hills has maintained consistent stopping percentages as it relates to both Caucasians and Minorities. Our standard deviation with 6 years worth of data for Caucasian stops is 1.46 and 1.41 for Minorities. With such a small deviation in 6 years of data we have confidence in the statistical conclusion that our estimated minority driving population figure is in error and believe that our minority stopping behavior is proportionate.

Comments:

The City of LaSalle has had a large increase of minorities move into the city which is not reflected in the 2000 census. The city also has a large transient population which is also not reflected in the census. Much of this transient population is due to our disproportionate low income and public housing. This study also does not take into account a large amount of recidivism in traffic arrests such as driving while suspended.

Comments:

The Village of Lyons Police Department contests the findings of this study as a basic flaw is evident in the calculations that conclude the Ratio of 3.3. The Estimated Minority Driving Population in the 2009 study is calculated at 16.31 %. We contend that the Minority Driving Population Estimate is currently higher than 16.31%. An obvious correlation between the minority population of the school district can be made and the population of the village which that school district serves. To base our observations we look at our local School District 103. This school system which serves all of Lyons and some adjoining communities, reported in 2009 that 65.2% of students are minority. In 2005 the same school district reported that 51.3% was a minority population. Over a 13.9% increase of minority students have been reported in only 4 years. This study's estimates as to the current population are unrealistic and can not be counted to show a true Minority Driving Population percentage. We are currently awaiting the 2010 Census results which we know will show a sharp increase over the 2000 Census of a minority population. Comments:

There is some error somewhere along the way. It is not possible that we had only 15 stops last year

Comments:

The estimated minority driving population continues to be shown at a rate well below the actual minority population of the town and the area.

Comments:

Friday May 28, 2010

This is the Rockford Police Department's response to the 2009 Racial Profiling Study:

The department does not issue written warnings. This information is reflected in the "Outcome of Stop" area. The department only issues verbal warnings or citations. The report accurately reflects the only two possible outcomes for a traffic stop.

All information on the report is an accurate representation of the 2009 driver stops submitted prior to March 1, 2010. A total of 1,290 records were submitted after that date and are not included in the Illinois State Police analysis but will be included in the Rockford Police Department Bias Free Policing Report for 2009. This difference will have a minimal affect on the ratio of stops and the overall results.

Comments:

The demographics of the population served by the Southern Illinois University Edwardsville Police Department was last reviewed in 2005. A recent review of the University's population showed that the minority population of the University increased from 16.51% in 2005 to 17.63% in 2009.

On May 25, 2010, the Southern Illinois University Edwardsville Police Department provided the pertinent data regarding the increase in the minority population to Dr. Alexander Weiss of Alexander Weiss Consulting, LLC, and requested that the University's minority benchmark be adjusted from 16.51 to 17.63. After reviewing the data, Dr. Weiss granted the request. However, due to the late date of the request, the adjustment will not take effect until 2010. Had the adjustment been applied to the University's 2009 traffic stop data, the Southern Illinois University Edwardsville traffic stop ratio would have been reduced to 1.49.

Comments:

I understand that the Traffic Stop Study was initiated in 2004. During that time many departments have provided data for the study. After six years of data collecting I would think that an overall analysis could be made from the data collected. Being from a small department, valuable time is given to provide the information that is required.

According to the Illinois Traffic Stops Statistics Study 2008 Annual Report, "Six years ago Illinois launched a significant effort to identify racial bias in police traffic stops." If the study is to determine if police officers are being racial, then why do we need to list the address, the vehicle make. All we need is a form which lists the subjects name, city, state, race, reason for stop and outcome of the stop.

Reviewing my report for 2009 shows no indication of the age of the subject, what he was driving, or his address in relationship to the department.

In time of budget crisis among many Illinois Departments, I think the data collected over the last 6 years should be able to determine the origin of the study.
