Comment:

"Conducting over 294,000 traffic stops last year, the Illinois State Police (ISP) remains committed to make Illinois roadways safe for all drivers.

The ISP continues to build on the progress made since implementation of the Traffic Stop Statistical Study in 2004. While gaps between stops and searches and seizure of contraband from minority drivers and white drivers remain, these gaps continue to narrow. The ISP continues to evaluate the data collected and focus training accordingly. In addition, the ISP mandates an annual training on Understanding Perceptions of Biased-Based Policing for all sworn officers. All officers were also provided training on the traffic and pedestrian stop data collection program, effective January 1, 2016. Training entitled Procedural Justice and Police Legitimacy has begun and will be provided to all officers, as well as civilian personnel within the ISP.

Finally, the ISP is making a concerted effort to address perceptions between law enforcement and the general public by continuing to provide ongoing training to its officers and develop relationships with the communities we serve."

Comment:

Due to the unique jurisdiction of the Forest Preserve, we do not not make many traffic stops on our interior roads.

Comment:

Normal, IL and Bloomington, IL are twin cities, separated only by common city streets with no physical or geographic barriers. The estimated minority driving population in Normal, IL (as assigned by IDOT) is 14.55%, compared to 20.79% in Bloomington, IL (as assigned by IDOT). The Normal Police Department conducted nearly 26% of its recorded traffic stops on residents of Bloomington, and just over 27% of its recorded traffic stops were conducted on residents with addresses which were outside of the Bloomington/Normal area. Many residents of Bloomington, IL work, shop, attend school and visit family and friends within the Town of Normal, traveling between the two jurisdictions multiple times every day. Based on shared community borders and resources, the minority driving population of Bloomington/Normal should reflect very similar numbers, therefore it is our position that a minority driving population of 14.55% is comparatively low for the driving community as a whole in Bloomington/Normal and not reflective of the actual driving community. The assigned percentages do not accurately depict the culturally diverse driving population in this community. There are several large employers, as well as multiple colleges and universities all bringing large numbers of temporary residents to the area. This is clearly illustrated through the analysis conducted on the recorded address of drivers stopped in 2015, with nearly equal numbers from Bloomington and Normal and an overwhelming majority of stops effected on drivers outside of the community.

Comment:

"The Northlake Police Department (NPD) remains committed to fair and impartial traffic enforcement as it relates to all regional driving public. The NPD has embraced the many positives that resulted from the implementation of the Public Act and find the data gathered as an important tool in formulating policy, implementing training and promoting transparency. The NPD fully supports the purpose of Traffic Stop Data collection and stands against profiling based on race.

In respect to 2012 Estimated Minority Driving Population benchmarks (EMDP), the NPD argues that the driving population is a transient one, the City of Northlake (Northlake) shares borders and several major roadways with jurisdictions some of which have an over 90% EMDP. Northlake is a proud driving destination for shopping and commerce for many drivers in high percentage EMDP communities. Also, public records compiled by the Illinois Department of Transportation (IDOT) indicate in an average 24 hour period, over 100,000 vehicles travel through roadways of Northlake, over 45,000 directly through a 90% EMDP. The City of Northlake has been assigned a year 2012 EMDP of 59.6%.

Benchmarks developed on behalf of IDOT nearly twelve years ago (2004) are in use today. While NPD is not positioned by law to offer new analyses models or EMDP benchmarks, we feel strongly that EMDP models employed over twelve years ago lack current day driving populations of our city. One example supporting this opinion are public school population records, Northlake's school population studies have steadily held at nearly 80% minority population, 78% for our high school driving age.

The intent of the Traffic Stop Data reports for our city will continue to benefit all stakeholders. The NPD supports updated studies and benchmarks of current and realistic driving demographics taking into account the transient nature of the driving public, as well updated populations of our drivers."

Comment:

"Friday April 29, 2016

This is the Rockford Police Department's response to the 2015 Racial Profiling Study:

As of November 1, 2015, the Rockford Police Department started to issue written warnings in addition to verbal warnings and citations. Since this change was late in the calendar year, and we did not have a mechanism to capture this new information, it is not reflected in our 2015 traffic stop data in the "Outcome of Stop" area. All traffic stops were recorded as either a verbal warning, or a citation. In 2016, the data will reflect all three options for "Outcome of Stop." The report, aside from the specified change, accurately reflects traffic stop data for the Rockford Police Department.

Kim Binder / Becky Bartkowicz Crime Analysis Unit Rockford Police Department 779.500.6613 / 779.500.6612"

Comment:

According to Illinois Department of Transportation, "Getting around Illinois" "Average Daily Traffic Counts," (http://www.gettingaroundillinois.com/gai.htm?mt=aadt#) there are almost 20,000 vehicles that travel through and past the intersection of US Route 20 and Winnebago Road (Commonly known as "Winnebago Corners") on a daily basis. There are several retail establishments immediately south of this particular intersection, which is within the jurisdiction of Winnebago Police Department.
