

WORK ZONE AWARENESS

2025 National Work Zone Awareness Week: *Respect the zone so we all get home.*

From 2019 to 2023 in Illinois

on average, each year there were:

6,298

work zone crashes and

1,600

people injured as a result

Workers are not the only ones injured or killed by work zone crashes.

Of the **157** work zone fatalities in Illinois from 2019 to 2023...

7 were worker fatalities. The rest were road users.

Heavy Vehicles

Look for heavy vehicles entering and leaving work zones. They need more time to slow down and speed up.

In **2023**, nearly **50%** of fatal work zone crashes involved a heavy vehicle.

- Crashes are not always the heavy vehicle's fault.
- Rear-ending one is as deadly as being rear-ended by one.

Safety Tips

- Drop it and drive. →
- Slow down and obey speed limits.
- If possible, move over for workers.
- Pay attention. Conditions can change quickly.
- Give heavy vehicles room to adjust to conditions.
- **Remember:** Traffic backups can occur at any time.

Merging Safely

If lanes are reduced due to road work **and**

○ the road is **not heavily congested**, merge early into the open lane. →

○ there is **heavy congestion or slow traffic**, use either lane up to the reduction, then take turns merging. →
