Subject: Statewide Transportation Improvement Program/Metropolitan Planning Organization
 Transportation Improvement Program Approvals

Dear Mr. Vanderhoof:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have jointly reviewed and approve the following Metropolitan Planning Organization (MPO) Transportation Improvement Programs, and the Illinois Statewide Transportation Improvement Program (STIP) as noted below.

<u>Area</u>	<u>Years Covered</u>	<u>Policy Board Approval</u>
Champaign	FY23-28	December 12, 2022
Chicago	FY23-28	October 12, 2022
Danville	FY21-24	June 11, 2020
East-West Gateway	FY24-27	August 30, 2023
Illinois STIP	FY24-27	October 2023

In addition, FHWA and FTA acknowledge previously approved amendments as noted below:

February 6, 2024 Approval:

<u>MPO Area</u>	<u>Years Covered</u>	<u>Policy Board Approval</u>
Decatur	FY24-27	July 31, 2023
Peoria/TCRPC	FY24-27	October 4, 2023

December 10, 2023 Approval:

<u>MPO Area</u>	<u>Years Covered</u>	<u>Policy Board Approval</u>
Bi-State	FY24-27	October 23, 2023
DeKalb/DSATS	FY24-28	June 27, 2023
South Beloit/SLATS	FY24-27	May 10, 2023

September 1, 2023 Approval:

<u>MPO Area</u>	<u>Years Covered</u>	<u>Policy Board Approval</u>
Bloomington-MCRPC	FY 24-28	June 23, 2023
Cape Girardeau-SEMPO	FY 24-27	June 21, 2023
Carbondale-SIMPO	FY 24-27	July 10, 2023
Dubuque-DMATS	FY 24-27	August 10, 2023
Kankakee-KATS	FY 24-27	June 28, 2023
Rockford-RIPC	FY 24-27	June 30, 2023
Springfield-SATS	FY 24-27	July 13, 2023

Based on the FHWA, Illinois Division and FTA Region 5 ongoing oversight of the planning activities for the subject MPOs, we find that the transportation planning process of the State and regions substantially meets the planning requirements described in 23 CFR 450. We may now consider project authorization requests related to the STIP and amendment.

If you have any questions, please feel free to contact Betsy Tracy, FHWA at (217) 492-4642.

Sincerely,

KELLEY
BROOKINS

Mr. David Snyder
Division Administrator
Federal Highway Administration
3250 Executive Park Drive
Springfield, Illinois 62703

Dear Ms. Brookins and Mr. Snyder:

The Illinois Department of Transportation (IDOT) hereby submits the attached Statewide Transportation Improvement Program (STIP) for FY 2024-2027 for approval by the Federal Highway Administration and the Federal Transit Administration. The STIP has been developed for all areas of the state in cooperation with appropriate local officials and incorporates the currently approved Transportation Improvement Programs for each of Illinois' 16 Metropolitan Planning Organizations pending 2020 census changes starting in FY 2025.

The publication of the STIP is based on IDOT's program planning process that is guided by policies and goals outlined in the Long Range Transportation Plan (LRTP) last updated in 2019. The STIP is fiscally constrained by year with funding estimates based on anticipated federal, state, and local resources.

This fiscally constrained program represents IDOT's best effort for scheduling transportation improvements that address system needs. Although IDOT intends to proceed with the projects listed; unforeseen events can impact the schedule for individual projects. Among these are funding availability (federal, state, local), project readiness (environmental problems, engineering, land acquisition), and the Department's need to retain programmatic flexibility to address changing conditions and priorities on the state highway and transit systems.

Illinois has followed federally approved public involvement procedures and made a concerted effort to encourage public participation in the programming process. IDOT believes the public involvement satisfies federal requirements. The Department has received ten comments concerning the draft FY 2024-2027 STIP. The comments received were not of such magnitude or scope to necessitate revision or substantial change to IDOT's planning and program development process or the public involvement process.

Ms. Kelley Brookins
Ms. Arlene Kocher

FY 2024-2027 Statewide Transportation Improvement Program

Introduction

The Statewide Transportation Improvement Program (STIP) is a four-year program of highway, transit, and inner city rail projects developed to fulfill the requirements set forth in 49 Code of Federal Regulations (CFR) part 613, subpart B, and 23 CFR part 450, subpart B. These transportation planning regulations require that the STIP be updated at least once every four years. The Illinois Department of Transportation (IDOT) updates the STIP on a three-year cycle.

Each time IDOT updates the STIP, the funding and project information for highway improvements is taken from the first four years of the most recently developed six-year Proposed Highway Improvement Program, also known as the Multi-Year Program (MYP). The MYP is a state required document that is updated annually in the spring and is critical to the development of the STIP. The MYP also serves as a focus for public review and comment in that it is presented to the General Assembly and the public for review and discussion during the appropriation process. Each year between official updates to the STIP (three-year cycle), and after publishing the MYP, IDOT revises the STIP through an amendment to include the most recent funding and project information available.

The Fiscal Year (FY) 2024-2027 STIP is based upon funding and project information taken from the first four years of the FY 2024-2029 MYP. The STIP indicates total transportation improvement costs of \$21.232 billion. This includes \$19.642 billion for highway improvements, \$0.260 billion for transit capital improvements and operating assistance, and \$1.330 billion for intercity rail.

The [FY 2024-2029 Proposed Highway & Multimodal Improvement Program](#), also known as the Multi-Year Program, can be found on IDOT's website at:

[Publication \(illinois.gov\)](#)

The publication of the FY 2024-2027 STIP is based on the department's program planning process which focuses on policies and goals outlined in the Long Range State Transportation Plan (LRTP). The LRTP, most recently revised in 2020 to reflect the Rebuild Illinois Program, complies with all Federal regulations and was developed with input and information from an assessment of needs, Metropolitan Planning Organizations (MPOs), public comments, the Governor, members of the General Assembly, and local officials. The planning process is being carried out in accordance with the requirements of 49 CFR part 613, subpart B, and 23 CFR part 450, subpart B. The STIP is fiscally constrained by year with funding estimates based on anticipated federal, state, and local resources and is consistent with the LRTP. The LRTP is also constrained by the funding resources estimated to be available for the foreseeable future and the tradeoffs that reflect the fiscal capabilities of the department's budget.

The LRTP is posted on the IDOT website at the following link:

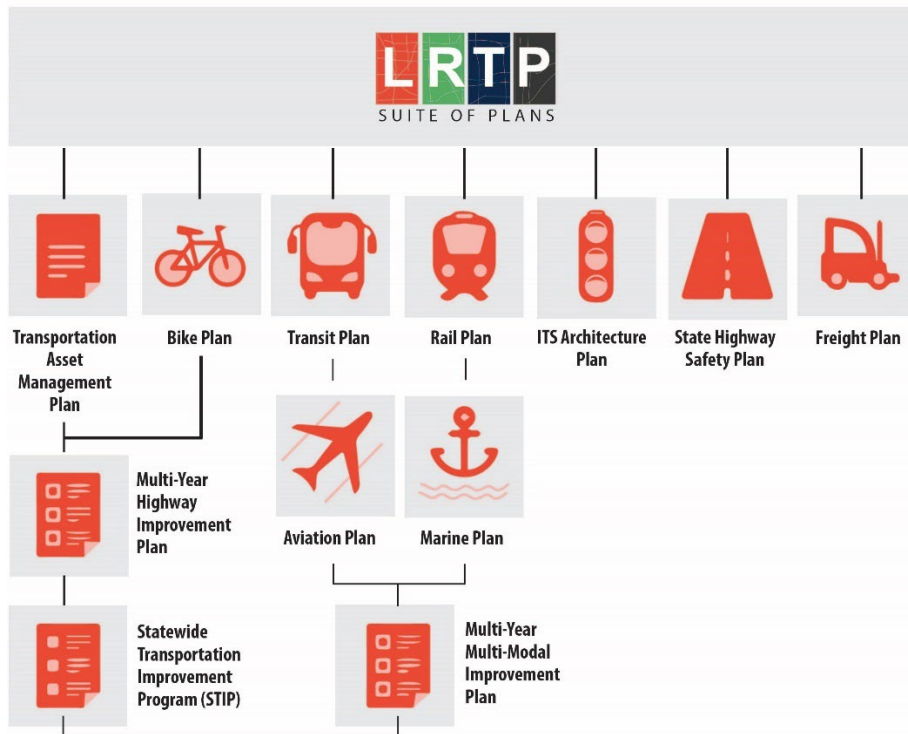

[Long Range Transportation Plan \(illinois.gov\)](#)

Beginning with the FY 2019-2024 MYP and continuing through the FY 2024-2029 MYP, IDOT is working towards performing treatments in all stages of the transportation system's life cycle as prescribed by the Transportation Asset Management Plan (TAMP). The goal is to work toward 80 percent reconstruction and rehabilitation, with 20 percent preservation work based

on the number of miles of roads and square feet of bridges programmed in each district. The preservation work will focus on keeping the good pavements and bridges in a state of acceptable condition before they fall to a lower rating and warrant a higher cost improvement. Small, planned investments in maintenance of our roads and bridges will save the state and taxpayers money in the long run. The FY 2024-2029 MYP weighs the need to preserve the existing system in a state of acceptable condition with the need to enhance or expand the highway network to address congestion and economic development demands. Before being included in the program, improvements are evaluated by the Office of Planning and Programming (OPP) based on goals, needs, and available resources. IDOT's TAMP provides the link between the LRTP and its shorter-term (6-year) bridge and pavement programs in the MYP. The 2024-2029 MYP is the first Multimodal MYP in nearly a decade and it informs and aligns with the STIP.

Once investment levels are established, OPP works with the districts to select projects that will enable IDOT to work towards meeting its performance objectives. To further the department's ability to ensure the correct treatments are being done at the right time during an asset's life cycle and then see the long-term results of this approach. IDOT is implementing an Enterprise Asset Management System. Once the system is in use, the districts will be able to see the best treatments for an asset as well as the optimal mix of projects to obtain the most benefit for the cost. The districts use pavement and bridge condition information and established guidelines to select the projects that best match the intended investments. The final list of projects is incorporated into the STIP.

The following figure illustrates how the programs are connected.

The highway portion of the STIP contains three specific categories which are titled Metropolitan Planning Organization (MPO), Significant, and Grouped. The following describe each category:

MPO Category: The MPO category contains projects that reside in one of the 16 defined MPO boundaries in the State of Illinois. With the 2020 census, Illinois lost two MPO's and gained another. The two MPO's will lose this status at the end of calendar year 2023. This change will be shown in the next update to the STIP. A MPO is an agency created by federal law to provide local elected officials input into the planning and implementation of federal transportation funds to metropolitan areas with populations of greater than 50,000. A MPO must plan for regional transportation planning and expenditures and are responsible for the continuing, cooperative, and comprehensive transportation planning processes for their urbanized area. The policy leadership, committees, professional staff, and consultants, combined with the administrative capability to support MPO planning processes, constitute the core elements of MPO activities. IDOT is a member of the policy board for each MPO in Illinois and is involved in the planning processes that occur at each.

Significant Category: The Significant category contains projects which provide increased capacity, have regional impact or require special funding, and are not in an MPO area. Projects are considered Significant if any one of the following criteria is met: Major Construction, Principal Arterial, Illinois Special Bridge Program, and/or special federal funds. More information about Significant funds can be found on page 21.

All Significant highway projects are summarized by year, type of improvement, funding amount, and programmed amount.

Grouped Category: The Grouped category contains those projects that are neither in the MPO nor in the Significant category.

The transit element of the STIP contains the transit projects that are grouped into operating and capital categories. They are summarized for urbanized areas (population over 50,000), rural-small urban areas, statewide and all regionally significant transportation projects requiring an action by the Federal Highway Administration (FHWA) or the Federal Transit Administration (FTA) regardless of anticipated funding source (local, state or federal).

Transportation programming in metropolitan areas with a population over 50,000 is a collaborative process, led by an MPO and other key stakeholders in the regional transportation system. The current federally approved Transportation Improvement Programs (TIPs) for each of Illinois' 16 MPOs is incorporated into this document by reference. A list of the 16 MPOs is included in Appendix A.

The department has developed the STIP by building upon ongoing programming activities and good working relationships with state and local officials and MPOs. The multi-year and annual highway improvement programs are published each year. These programs plus other normal budget funding for administration and maintenance allow the existing transportation system to be operated and maintained with the revenues that are provided by federal, state and local sources. The multi-year and annual highway improvement programs receive widespread media attention and are made readily available for public review and comment.

Projects included in the STIP can be advanced to or deferred from the first annual element without additional action or approvals. Projects being added to or deleted from the STIP that are of significant scale for individual identification are considered amendments and require an opportunity for public review and comment with final approval by FHWA and/or FTA. The

implementing agency is responsible for public involvement on STIP amendments in accordance with the department's public involvement procedures. The notifications of amendments to the STIP are published on the IDOT website and social media platforms and if needed can be published in the predominant (by circulation) newspapers serving the area impacted by the project being amended.

Copies of STIP amendments and notifications can be found on IDOT's STIP website at: [Statewide Transportation Improvement Program \(illinois.gov\)](http://illinois.gov)

All comments and/or questions regarding the STIP may be sent to: DOT.STIP@Illinois.gov.

Transportation Asset Management Plan and Performance Measures

Transportation Asset Management Plan

MAP-21 established requirements and both the FAST Act and IIJA subsequently continued these requirements for each state to develop a transportation asset management plan (TAMP). The plan is to address the condition of National Highway System (NHS) assets and the overall performance of the system of NHS roads and bridges. The NHS is a network of strategic highways within the United States, including the Interstate Highway System and other roads serving major airports, ports, rail or truck terminals, railway stations, pipeline terminals, and other strategic transportation facilities.

In addition to the TAMP requirement, seven national goals for transportation performance were established in 23 U.S.C 150 (b). The national goals are as follows:

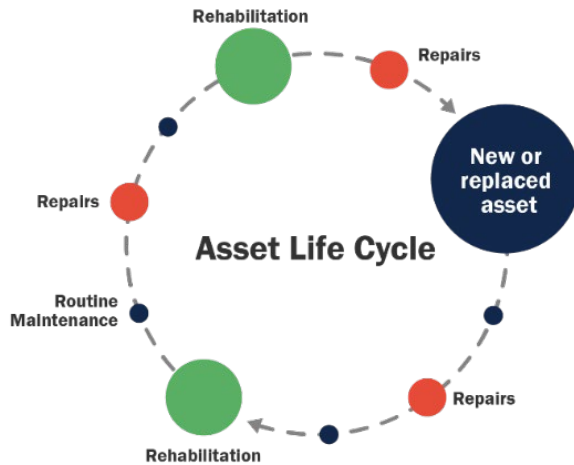

- Safety
- Infrastructure condition
- Congestion reduction
- System reliability
- Freight movement and economic vitality
- Environmental sustainability
- Reduced project delivery delays

Illinois' TAMP was completed in 2019 and updated in 2022. The TAMP expands beyond the NHS to include all pavements and bridges under IDOT's jurisdiction.¹ The TAMP outlines IDOT's process to consider the entire life cycle of roads and bridges in order to maximize the performance of each asset, and therefore the entire highway network. IDOT's TAMP details a 10-year investment strategy in support of the national goals, with specific attention to infrastructure condition. The projects in the FY 2024-2029 MYP and corresponding FY 2024-2027 STIP have been programmed following the life-cycle planning method and investment strategy described in the TAMP.

Under asset management, a data-driven decision process has been developed and implemented that supports the use of analysis tools and life cycle strategies to reduce the rate of system deterioration as cost effectively as possible. The department will continue to address road and bridge needs to ensure our system is safe and will also spend money on low-cost treatments to preserve those roads and bridges and keep them in acceptable condition. A visualization of this process is shown in the figure below.

The goal is to program 80 percent as reconstruction and rehabilitation, and 20 percent as preservation work based on the number of miles of roads and square feet of bridges programmed in each district. The preservation work focuses on keeping the good pavements and bridges in a state of acceptable condition before they fall to a lower rating and warrant a higher cost improvement. Small, planned investments for maintenance of our roads and bridges will save the state and taxpayers money in the long run.

Performance Measures

To measure progress toward the national goals, performance measures have been established by the FHWA in three main areas: safety, infrastructure condition, and system performance. The performance measures allow the FHWA to compare progress across all 50 states, Washington D.C., and Puerto Rico. IDOT’s LRTP presents IDOT’s targets for each of the performance measures.²

IDOT’s TAMP provides the link between the LRTP and its shorter-term (six-year) bridge and pavement programs in the MYP. In accordance with 23 CFR 515.9(h), both the MYP and the MYP derived STIP demonstrate that the TAMP has been integrated into the planning processes beginning in SFY 2019. The current state approved TAMP was determined by the FHWA to meet the requirements of 23 U.S.C. 119 and 23 CFR 515 on January 24, 2023. Annually, IDOT must show that the TAMP has been implemented. On July 26, 2023, the FHWA determined that the funding allocations for the previous 12 months (FY 23) were reasonably consistent with the investment strategies in the 2022 TAMP.

Along with the TAMP, IDOT must also meet federally required performance measures. The measures are more area specific compared to the overall system that the TAMP covers. The performance measures are for the areas of Transit Asset Management, Safety, Infrastructure Condition, and System Performance. For each performance measure established under each of these areas, IDOT must set targets and track their progress in meeting these targets.

FTA was mandated (under MAP–21; Pub. L. 112–141 (2012), codified at 49 U.S.C. 5326) to create a National Transit Asset Management (TAM) System. Section 625.27 requires States to develop a group TAM plan for all subrecipients under the Rural Area Formula Program, authorized under 49 U.S.C. 5311. In July 2016, the FTA released the final ruling to IDOT for implementing the TAM. IDOT is to meet set targets and track the conditions of assets for equipment, facilities, infrastructure, and rolling stock. An assessment of Capital Asset State of Good Repair was completed in 2017. IDOT completed a downstate Transit Asset Management Plan (TAMP) for participating Tier II transit agencies in October 2018. The

² <https://idot.illinois.gov/content/dam/soi/en/web/idot/documents/about-idot/misc/planning/lrtp-appendix-f-tpm-report.pdf>

TAMP informs the annual Transit Capital Needs Assessment (CNA) based on criteria identified during the development of the TAMP and CNA. The TAMP and CNA assist IDOT in setting downstate funding levels for Capital and Operating Programs.

For Safety, IDOT must report on the number of fatalities, number of non-motorized fatalities and non-motorized serious injuries, number of serious injuries, rate of fatalities per 100 million vehicle miles traveled (VMT), and rate of serious injuries per 100 million VMT. The IDOT targets for each of these five Safety performance measures are updated every year by the end of August for inclusion in our Highway Safety Improvement Program.

For Infrastructure Condition, IDOT must define targets and report the specific percentage of interstate pavements in both *Good* and *Poor* condition, non-interstate NHS pavements in both *Good* and *Poor* condition, and NHS bridges in both *Good* and *Poor* condition. IDOT submitted its first Full Performance Period Progress Report on December 16, 2022, documenting its progress during the first 4 years the performance measures were in place. New baseline, 2-year, and 4-year targets were established at the same time and documented in the 2022 Baseline Performance Period Report. The new targets are shown below, in the Infrastructure Condition Performance Targets section.

For System Performance, IDOT must define targets and report on a percentage of person-miles traveled on the interstate and non-interstate NHS, a Truck Travel Time Reliability Index, annual hours of peak hours of excessive delay per capita, percentage of non-single occupancy vehicle travel, and total emission reductions. IDOT updated its targets for each of the six system performance measures on December 16, 2022.

Infrastructure Condition Performance Targets

IDOT's TAMP established targets based on the internal measures in use within IDOT for decades. These targets work alongside the federal performance measures discussed above to ensure the best possible network condition within the limitations of a constrained budget and an aged highway system. The federal measures only apply to pavements and bridges on the National Highway System, while IDOT's internal measures are used for all pavements and bridges on the state system. The federal requirements allow for no more than 5 percent of the interstate system lane miles to be in *Poor* condition and no more than 10 percent of the bridge deck area on the NHS to be considered structurally deficient. The federal targets and conditions achieved using the federal metrics are presented first, followed by IDOT's internal metrics and performance.

Federal Targets

The table below includes the 2-year and 4-year targets set in 2018 and the 4-year adjustment made in 2020 for federal pavement reporting. Note the years are the year the data is collected, not the year the data is submitted to the FHWA. Due to continued uncertainty of the effects of COVID, both funding and the difficulty in delivering the full program, IDOT chose to modify the "Good" targets downward when targets were adjusted in October 2020. Table 4 includes the 2018 through 2021 pavement conditions using the federal performance metrics. Note that the 2019 data (collected) was submitted in 2020 and is therefore compared to the 2-year target. The data collected in 2021 was submitted in March 2022 and compared to the 4-year adjusted targets. The federal pavement results are based on the 2018, 2019, and 2020 Highway Performance Monitoring System (HPMS) report cards, while the 2021 results are based on the preliminary report card.

IDOT's baseline, 2-Year, and 4-Year Pavement Targets for Federal Reporting.

Performance Measure	2021 Baseline (%)	2023 Target (%)	2025 Target (%)
Percent Interstate Pavement in Good Condition	65.7	65.0	66.0
Percent Interstate Pavement in Poor Condition	0.4	1.0	0.7
Percent Non-Interstate NHS Pavement in Good Condition	29.5	29.0	30.0
Percent Non-Interstate NHS Pavement in Poor Condition	8.0	8.9	8.5

IDOT's 2018 through 2022 Pavement Performance for Federal Reporting.

Performance Measure	2018 (%)	2019 (%)	2020 (%)	2021 (%)	Prelim. 2022 (%)
Percent Interstate Pavement in Good Condition	63.8	61.1	64.0	65.7	65.0
Percent Interstate Pavement in Poor Condition	0.4	0.7	0.6	0.4	0.3
Percent Non-Interstate NHS Pavement in Good Condition	24.2	24.3	25.6	29.5	30.5
Percent Non-Interstate NHS Pavement in Poor Condition	8.7	8.6	9.4	8.0	7.6

From the time a project is awarded, constructed, and inspected to update the condition is at least three years. As an example, a project that was awarded in 2018 would be constructed in 2019 and inspected for the first time in 2020.

IDOT began shifting to life-cycle planning as part of asset management in 2018, and the results of that shift began to appear in 2020, with the percent of interstate in good condition increasing nearly 4 percent since 2019. Similarly, the non-interstate NHS pavement in good condition has increased more than 6 percent since 2019.

The next table includes the baseline, 2-year, and 4-year targets set in 2018 and the 4-year adjustment made in 2020 for federal bridge reporting.

IDOT's Baseline, 2-Year, 4-Year, and 4-Year Adjusted Bridge Targets for Federal Reporting.

Performance Measure	2021 Baseline (%)	2023 Target (%)	2025 Target (%)
Percent NHS Bridges in Good Condition	22.8	18.5	15.8
Percent NHS Bridges in Poor Condition	12.4	12.4	12.0

The following table includes the 2018 through 2022 bridge conditions using the federal performance metrics. Similar to pavements, note that the 2019 data (collected) was

submitted in 2020 and is therefore compared to the 2-year target. The data collected in 2021 was submitted in March 2022 and compared to the 4-year revised targets. The federal bridge results are based on the final 2018, 2019, and 2020 National Bridge Inspection Standards (NBIS) submittal, while the 2021 results are based on the preliminary NBIS submittal.

IDOT's 2018 through 2022 Bridge Performance for Federal Reporting.

Performance Measure	2018 (%)	2019 (%)	2020 (%)	2021 (%)	Prelim. 2022 (%)
Percent NHS Bridges in Good Condition	28.1	26.2	23.7	22.8	23.1
Percent NHS Bridges in Poor Condition	13.6	13.3	13.2	12.4	11.1

While the percentage of NHS bridges in good condition has declined, the percentage of bridge deck area in poor condition has slightly improved by more than a full percentage between 2018 and 2021. In accordance with the TAMP, emphasis is placed in the programming process on addressing structurally deficient bridges on the NHS system. The additional funding from the Rebuild Illinois capital program should help to offset the square footage of bridges becoming structurally deficient.

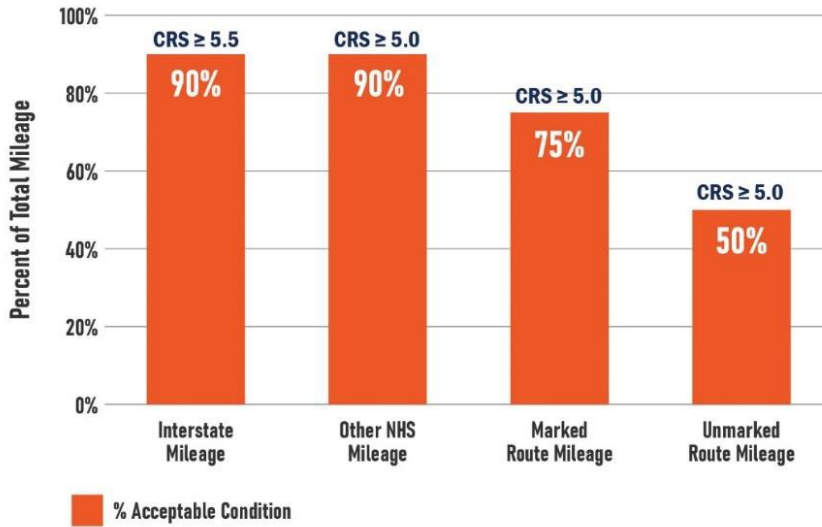

IDOT Internal Targets

Every year, the department conducts a Condition Rating Survey (CRS) to assess pavement condition on the approximately 16,000-mile state highway system. This information is an important tool to assist the department with its pavement management activities. The CRS assigns a value to each segment of roadway to indicate the current condition of the pavement. A lower CRS value indicates the pavement is in worse condition. A higher CRS value means the pavement is in better condition. The department began collecting CRS in 1974 and has collected the data annually on alternating halves of the state, with data collected on the interstates every year.

The chart below shows the acceptable pavement condition levels for all road system types. The acceptable condition levels for all non-interstate, state-maintained roads will be measured against the same standard. The department has determined that the standard for non-interstates will be a Condition Rating Survey (CRS) of 5.0 or higher on a scale of 1.0 to 9.0. Interstates will be held to a higher standard of a 5.5 or higher CRS. Pavements in this condition are considered to be in fair condition, which means that they can be preserved using low-cost preservation treatments.

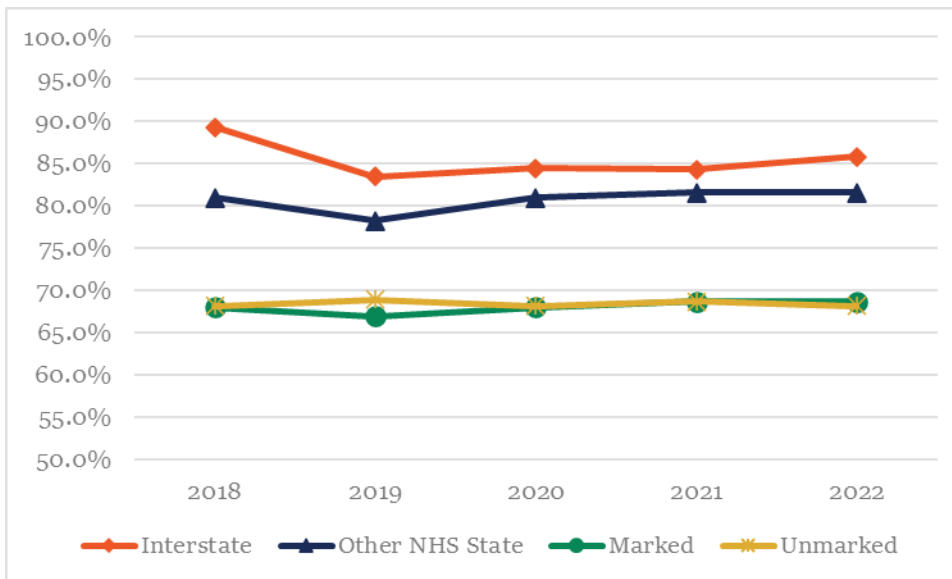

Percent of IDOT's Total Bridge Deck Area Meeting the State

State of Acceptable Condition–Pavements

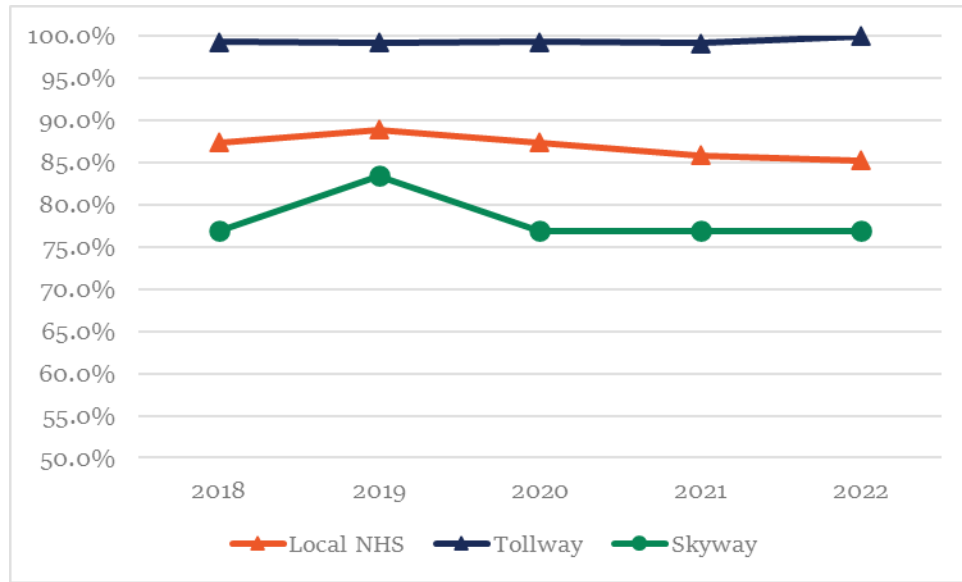

IDOT's State of Acceptable Condition Targets for Pavements.

The following figure includes the 2018 through 2021 pavement conditions using IDOT's internal metrics. The performance in 2018 and 2019 reflects the spending in years prior to the adoption of the Rebuild Illinois capital program. This can be seen in the data for the routes under IDOT's jurisdiction: Interstate, Other NHS State, Marked, and Unmarked. Each of those systems, except Unmarked, hit a low point in condition in 2019 and have improved in the two years since the passage of the capital program and the beginning of implementation of the TAMP. The Unmarked system has been, and continues to be, above its target. The implementation of the TAMP and the Rebuild Illinois program have both had a positive effect on keeping pavement conditions above projections included in the 2019 TAMP.

Percent of IDOT's Pavement Centerline Miles Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

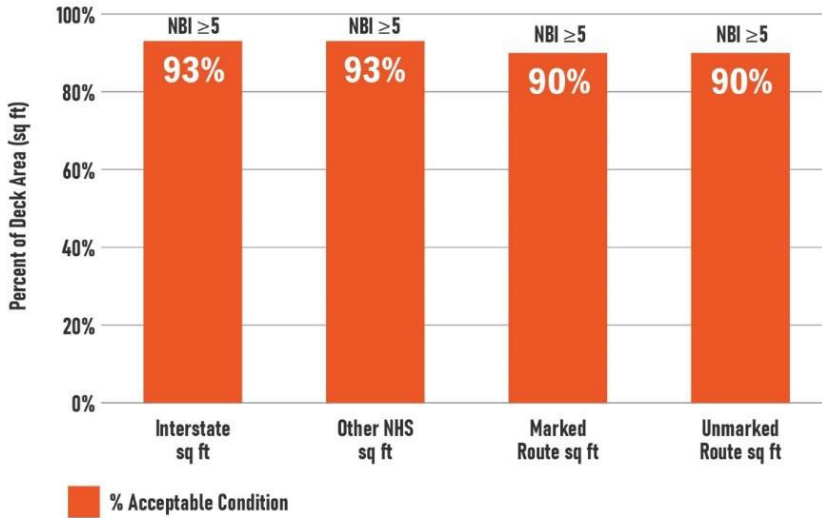

Percent of Other NHS Owners' Pavement Centerline Miles Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

The department manages the state bridge system using a wide-ranging process that incorporates inspection and inventory data, needs analysis and funding allocation methods in order to maximize the use of available funds to address the assigned condition goal. Each bridge is examined by using the structure inspection rating and appraisal data and other criteria, such as accident data, load limits, and traffic volume. The timely and accurate assessment of bridge condition is critical to the identification, selection, and prioritization of bridge needs in the programming process. For each program development cycle, the bridge inventory is re-evaluated for additional bridge candidates for potential inclusion in the multi-year and annual programs as well as to verify changes in the condition and status of the bridges that were included in the previous MYP.

To align more closely with the FHWA, bridges are discussed in terms of square feet of bridge deck area instead of number of bridges. The department uses component ratings for determining the condition of a bridge. A component rating of 5 or higher on a scale of 0 to 9 is used to classify a bridge as being in a state of acceptable condition.

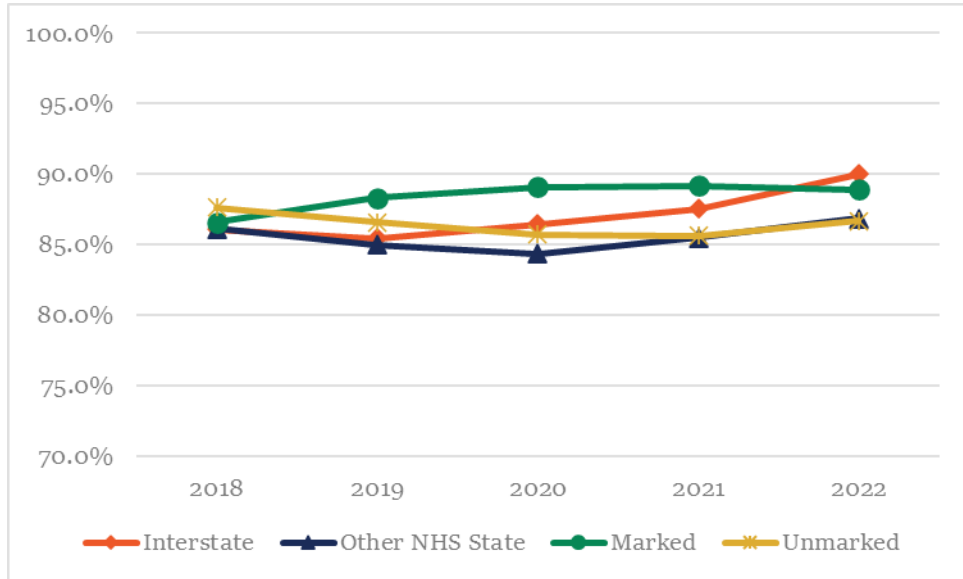

State of Acceptable Condition—Bridges

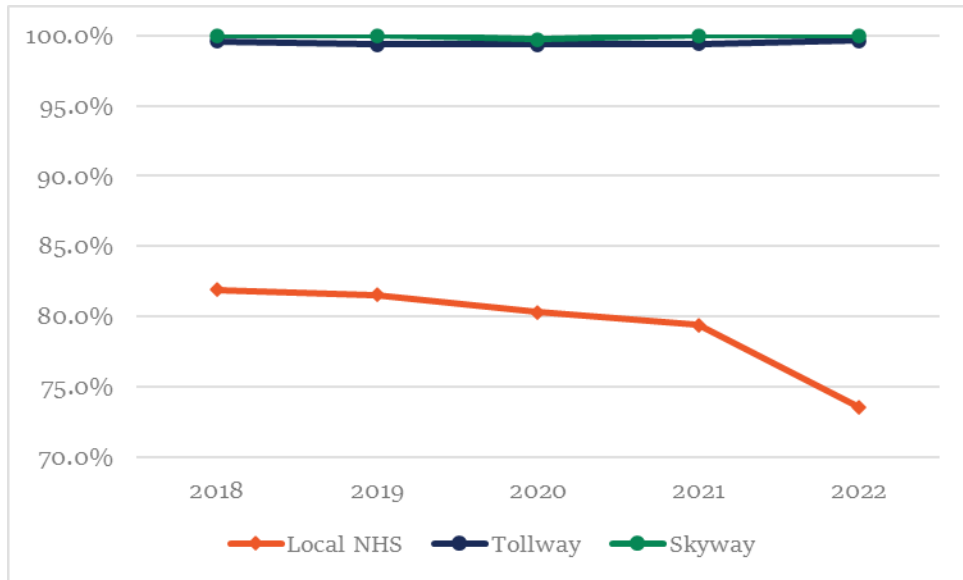

IDOT's State of Acceptable Condition Targets for Bridges.

The figures below include the 2018 through 2022 bridge conditions using IDOT's internal metrics. The 2018 and 2019 performance reflects the spending in years prior to the adoption of the Rebuild Illinois capital program. Similar to pavements, the lowest condition of IDOT's Interstate bridges was in 2019; the condition has improved in each subsequent year. IDOT's Other NHS State routes improved from 2020 through 2022. The Marked system bridges have improved in condition through 2021 and held steady in 2022. The improvement in the NHS bridges due to the implementation of TAMP and the passage of the capital program are encouraging.

While the Illinois Tollway and Chicago Skyway bridges are in excellent condition, the trend in the local agency NHS bridges is concerning. An investigation into the source of the decline in local agency bridge condition has identified the particular agencies with *Poor* bridges. IDOT's Bureau of Programming is coordinating with the Bureau of Local Roads and Streets to identify how many of the *Poor* bridges are currently programmed and if additional guidelines need to be put in place to encourage the local agencies to better manage their NHS bridges.

Percent of IDOT's Total Bridge Deck Area Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

Percent of Other NHS Owners' Total Bridge Deck Area Meeting the State of Acceptable Condition Using IDOT's Performance Metrics.

As discussed in the 2022 TAMP, nearly half of IDOT's bridges are more than 50 years old, and the recent trend has been that more bridges are becoming structurally deficient (SD) each year than are being rehabilitated or replaced. Although this trend has begun to be reversed, it will take a considerable amount of time to reduce the inventory of structurally deficient bridges. While the Rebuild Illinois program has enabled a higher percentage of current NHS SD bridges to be funded, there are many bridges right on the threshold of becoming structurally deficient, which hampers the ability to make progress toward the performance targets.

Projects in Support of Other Performance Measures

In addition to the projects in support of the infrastructure condition performance measures, the MYP and STIP also include projects in support of the other performance measures. In the FY 2024-2029 MYP, 70 percent of spending is in support of infrastructure condition (PM2 performance measures). In addition, 4 percent is devoted to safety projects (PM1 performance measures) and 16 percent is used to make progress with respect to measures of system performance (PM3 performance measures). The remaining 10 percent is applied to other types of projects.

Periodic Evaluation of Facilities Repeatedly Requiring Repair and Reconstruction Due to Emergency Events

As part of the asset management rule, the FHWA created a requirement that reasonable alternatives shall be evaluated for roads, highways, and bridges that have required repair or reconstruction activities on two or more occasions due to emergency events. The process to evaluate projects before they are included in the MYP, and therefore the STIP, is included in the Programming Guidelines. To assist in this evaluation, the Department has created a GIS map that represents all locations that have been damaged at least once since January 1, 1997. All districts have been given access to the map. A process has been established where the Central Bureau of Operations, the Bureau of Programming, and the districts work together to update the map when new emergency events occur.

The procedure outlined in IDOT's TAMP for complying with the emergency events rule is described in more detail in the Programming Guidelines. Before any project may be added to the MYP (state or local), the Emergency Events map must be consulted to determine if two or more prior emergency events have occurred anywhere within the project limits. For identified sites, districts will complete:

- A risk assessment.
- An evaluation of treatment alternatives.
- Adding the recommended treatment, if necessary, into the scope of the project before the project is included in the multi-year plan.

The required evaluations are retained by the districts. The Bureau of Programming maintains a list of the evaluated projects included in each MYP cycle. The only location on the NHS damaged more than once by an emergency event has been programmed for permanent mitigation in FY 2025. There are no projects on non-NHS locations damaged more than once in the current MYP.

STIP Certification

The Illinois Department of Transportation (IDOT), as the Governor's designee, certifies that the transportation planning process is being carried out in accordance with all applicable requirements of the following as described in Section 450.218 of the statewide Planning Regulations dated February 14, 2007 and in accordance with the intent of the IJJA:

1. 23 U.S.C. 135 and 49 U.S.C. 5304;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
3. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
4. Section 1001 (b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
5. 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
6. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
7. Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.
11. 23 CFR part 515, regarding a Total Asset Management Plan and related performance measures.

IDOT also certifies that the transportation planning process is being carried out with consideration of the FHWA approved Strategic Highway Safety Plan approved in 2017. IDOT concurs with the MPO's determination that the air quality conformity analysis has been completed by the necessary MPOs and has been reviewed and accepted by the State of Illinois.

IDOT FINANCIAL PLAN FOR THE PROPOSED HIGHWAY ELEMENT OF THE STIP

The principal financial assumption made for available federal revenue sources for the development of this STIP is the anticipated level of federal revenue sources provided under the IIJA authorizations, which was signed into law November 15, 2021. In addition to these federal funds, anticipated state and local funds available for the life of this STIP have been projected. Under these reasonable financial assumptions, there are sufficient federal, state, and local funds to implement all the projects covered in the FY 2024-2027 STIP and fiscal constraint as required by 23 CFR part 450, subpart B is demonstrated. However, these requirements are deemed sufficiently flexible to permit the selection of projects from the second, third, and fourth year of the STIP to replace projects selected for the first year of the STIP.

Federal Funding: The IIJA requires that the federal-aid highway and federal-aid transit projects in the STIP be based on funding reasonably expected to be available. The federal-aid revenues are based on estimates of apportionment (formula), allocations, high priority project funding, August Redistribution, and the Transportation Infrastructure Finance Innovation Act Redistribution.

Federal-Aid Highway Formula Funding: A surface transportation authorization act (currently the IIJA) provides federal highway funding levels over an established period of time. These authorized funds are then distributed by formulas established in law to the states through an annual apportionment process as authorized by the IIJA. In conjunction with these apportionments, there is an obligation limitation that provides the ceiling for the amount of apportionment the state may obligate through a given fiscal year. The obligation limitations can vary from year to year. As such, IDOT has estimated the obligation limitations for the life of this STIP.

Under the IIJA, IDOT estimates the obligation limitation for the total five-year bill to be \$10.97 billion with an average of \$2.19 billion per year for the life of the current legislation.

Federal-Aid Highway Allocation Funding: Funding available from allocations is included in the STIP. Federal-aid highway allocation funding is distributed to the states by administrative formula or by means of a competitive application. Allocated funds include many varied categories of federal-aid, including, but not limited to, Rebuilding American Infrastructure with Sustainability and Equity (RAISE) and Federal Land Access. Allocations of categorical funding generally are distributed to specific areas of the state. Annual allocations to individual projects or categories of funding are routinely added to the STIP but due to the timing of project identification may require amendments to be processed.

Federal-Aid Highway Earmarked Funding: Earmarks are funds designated by Congress for the completion of specific projects within the state. Earmarked funding is generally subject to its own obligation limitation that is available until spent. The actual level of funding committed to these projects each year varies based on project delivery schedules and rules on spending these funds. To date, the majority of Illinois' SAFETEA-LU earmarked funding has been spent and the projects have been completed. While the FAST Act did not include any new earmarks, the IIJA does include several new earmarks which can be found in Appendix C.

In recent appropriations acts, Congress has included a provision to repurpose certain earmarks based on their age, obligation level, and completion status. This provision allows unused earmark funding to be utilized on designated projects rather than sitting idle or being returned to FHWA. While this provision does provide additional contract authority, it may not provide additional obligation limitation in each instance. Since the repurposing provision is

dependent upon Congressional inclusion in annual appropriations acts, IDOT does not make any assumptions regarding repurposing funds.

Advanced Construction (AC): AC is a federal authorization method that allows IDOT to secure approval from FHWA to construct Federal-aid projects without requiring the associated federal obligation which would use both contract authority and obligation limitation. This allows IDOT to advance projects in anticipation of available contract authority and obligation limitation. To maximize flexibility in use of contract authority and limitation, IDOT establishes all projects in AC status unless a specific federal program funding will not allow it, or the Department deems current funding (obligation) at project onset is the best use of available federal balances. AC projects are converted to current federal funding with the first expenditure of contract authority and when limitation is available. To ensure that the STIP and TIPs reflect the correct status of a project, IDOT notifies both MPO and programming staff when a project is converted, so administrative modifications can be completed.

The Department's use of AC authorizations and conversions complements the intent to maximize the number of federally reimbursable projects. The fiscal constraint model accounts for the level of planned conversions compared to the available obligation limitation, but the Department also forecasts the conversion rate to manage cash flows from federal reimbursements. Under this method, the STIP's fiscal constraint is an approximate amount of planned AC conversions to utilize the estimated annual obligation limitation.

State Funds: Funds for highway projects are primarily generated from motor fuel taxes (MFT), motor vehicle registration (MVR) fees, and bonds. For the FY 2024-2029 MYP, the department continued with increased estimates for state MFT and MVR receipts due to Illinois Senate Bill 1939 being signed into law as part of the Rebuild Illinois capital program. Illinois SB 1939 increased the MFT for the first time since 1990 which was effective July 1, 2019. It also increased the MVR fees to all vehicles which was effective January 1, 2020. Of the first 19¢ collected from motor fuel taxes, 45.6 percent is provided to the state for highway improvements. Of the Rebuild Illinois increase, 48% is provided to the State Construction Account and 20% is provided to Transit through the Capital Improvement Fund. In addition, the state receives reimbursement from the Highway Trust Fund (HTF) and local agencies. Beginning July 2021, a five-year phase in of the state portion of the sales tax on motor fuels will be deposited into the Road Fund instead of the General Fund.

Local Funds: Local funds for highway projects are also generated from MFT. Of the first 19¢ of funds collected from MFT, 54.4 percent is provided to the local agency for highway improvements. Of the Rebuild Illinois increase, 32% is provided to local agencies. Rebuild Illinois bonds were also dispersed in May of 2020, July of 2020, March of 2021, May of 2021, March of 2022, and September of 2022. More information can be found at: <https://idot.illinois.gov/transportation-system/local-transportation-partners/county-engineers-and-local-public-agencies/mft-distribution/index>

Financial Model: The financial model used for development of the MYP is also used for the development of the STIP. The model is designed to account for several factors including but not limited to revenue trends and changes to federal and state law. The Department's revenue is derived primarily from MVR, MFT, HTF reimbursements, and reimbursements from local units of governments.

Although the actual process to determine annual program size is more complicated, in simplified terms IDOT uses a three-step approach:

Step one is to estimate all available revenue sources including state funds from MVR, MFT, and state sales tax on motor fuels, federal funds from reimbursement of existing projects, future funding assumptions, and local project reimbursement. Step two is to subtract expenses which include debt service, operating, administrative, other agency, and those associated with existing construction projects from prior annual program elements. Step three is to appropriately size the annual element to fit within remaining resources to assure fiscal constraint.

Proposed Highway Element for the FY 2024-2027 STIP

As mentioned earlier, Congress distributes authorized federal funds to the states by formulas through an annual apportionment. These apportionments establish an obligation limitation that may vary from year to year. This results in IDOT having to estimate obligation limitations for the life of the STIP. For the FY 2024-2027 STIP, the obligation limitation IDOT is assuming is 100 percent for FY's 2024, 2025, 2026, and 2027. The STIP will be updated annually with current funding assumptions if they should change.

Funding for State Projects

The \$11.513 billion of state funds in the published FY 2024-2029 MYP are utilized for a variety of purposes in program development. For this MYP program \$21.044 billion was allocated to the state highway system and is derived from federal, state, and local funds. The MYP continues to emphasize maintaining existing roads and bridges on the state system while also providing funding for needed congestion mitigation and system expansion projects. The proposed six-year program will maintain 2,867 miles of state highways and replace or rehabilitate 9,225,027 square feet of bridges.

Available revenue for the FY 2024-2027 highway portion of the STIP will total approximately \$19.642 billion which includes \$9.455 billion of federal funds, \$8.689 billion of state funds, \$620 million of re-appropriations and \$878 million of local funds. This program assumes an obligation ceiling of 100 percent of apportioned funds for FYs 2024, 2025, 2026 and 2027. The following table provides a breakdown of anticipated available revenue by fiscal year. Planned AC conversions are included in the total anticipated federal revenue amounts. While State funds account for 44.2% of the total funds in the FY 2024-2027 STIP, projects will be shown split at 80/20 both to maximize Federal funds and allow the flexibility to convert to federal dollars if needed.

FY 2024-2027 Available Revenue (Table 1)
(\$Millions)

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Obligation Limit	\$2,367	\$2,351	\$2,350	\$2,387	\$9,455
State	\$2,027	\$2,612	\$2,484	\$1,566	\$8,689
State Re-appropriations	\$620	\$0	\$0	\$0	\$620
Local	\$230	\$211	\$216	\$221	\$878
TOTAL	\$5,244	\$5,174	\$5,050	\$4,174	\$19,642

The proposed obligations for the highway element of the FY 2024-2027 STIP are summarized in the following table for each category. This program includes \$11.327 billion of projects in the MPO TIP's, \$1.923 billion of projects of significant scale to be identified individually and \$5.958 billion of grouped projects.

FY 2021-2024 Proposed Project Obligations (Table 2)
(\$Millions)

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
MPO TIPs	\$3,019	\$2,912	\$3,088	\$2,308	\$11,327
Significant Projects*	\$516	\$650	\$404	\$353	\$1,923
Grouped Projects*	\$1,505	\$1,612	\$1,375	\$1,440	\$5,932
TOTAL	\$5,040	\$5,174	\$4,867	\$4,101	\$19,182

*(Not in MPO TIPs)

As shown in the above two tables, the obligations are equal to or less than the available funding, and fiscal constraint by fiscal year is demonstrated for this STIP.

FY 2024-2027 Grouped Projects

The following tables represent the grouped projects which are broken into five specific categories which are: Resurfacing, Bridges, Safety, Transportation Alternatives Programs (TAP) and Other. The tables are identified by work type/function and provide anticipated levels of accomplishment with associated dollars shown in millions. All federal aid projects will begin in AC status. Funding is shown at an 80/20 split in order to maximize Federal funds but is subject to change with increase of State funds.

RESURFACING (Table 3)

The resurfacing category includes pavement resurfacing, rehabilitation and/or reconstruction, widening narrow pavements without adding travel lanes, truck-climbing lanes outside the urbanized area, shoulder improvements, increasing sight distance and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Number of Miles	647	477	276	375	1,775
Federal Funds (AC)	\$474	\$441	\$310	\$570	\$1,795
State/Local Funds	\$118	\$110	\$87	\$142	\$457
Total Funds (in Millions)	\$592	\$551	\$397	\$712	\$2,252

BRIDGES (Table 4)

The bridge category includes the repair, rehabilitation or reconstruction of existing bridges, or the construction of a grade separation to replace existing at-grade railroad crossings and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Sq. Ft. of Structures*	323,894	572,246	467,288	277,771	1,641,199
Federal Funds (AC)	\$210	\$366	\$296	\$238	\$1,110
State/Local Funds	\$53	\$92	\$74	\$59	\$278
Total Funds (in Millions)	\$263	\$458	\$370	\$297	\$1,388

*Square Footage of structures was previously showing a total of all categories. Due to better reporting methods, IDOT can now show the square footage that makes up the Grouped Category only to better correlate to the funds projected to be spent.

SAFETY (Table 5)

The safety category includes highway safety or traffic operation improvement projects including signalization and other intersection improvements, skid proofing, railroad/highway crossing improvements, median barrier cable and other associated activities.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$54	\$86	\$98	\$65	\$303
State/Local Funds	\$14	\$22	\$24	\$16	\$76

Total Funds (in Millions)	\$68	\$108	\$122	\$81	\$379
-------------------------------------	-------------	--------------	--------------	-------------	--------------

TRANSPORTATION ALTERNATIVES PROGRAM (TAP) (Table 6)

The TAP category includes state appropriations sized for anticipated readiness for projects selected as part of the Illinois Transportation Enhancement Program (ITEP), Safe Routes to Schools Program and Recreational Trails Program. The Safe Routes to School category includes infrastructure and non-infrastructure activities for enforcement, encouragement, evaluation, educational and engineering efforts to enable and encourage children in primary and secondary schools to walk and bike safely to and from school.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$49	\$50	\$51	\$52	\$202
State/Local Funds	\$62	\$63	\$63	\$63	\$251
Total Funds* (in Millions)	\$111	\$113	\$114	\$115	\$453

*Includes Transportation Management Area (TMA) funding

OTHER (Table 7)

The Other category includes miscellaneous projects, statewide line items, other engineering and land acquisition associated with non-specific projects that can be grouped including emergency relief, lighting, rest areas and weigh stations.

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal Funds (AC)	\$9	\$9	\$9	\$9	\$36
State/Local Funds	\$462	\$373	\$373	\$226	\$1,434
Total Funds (in Millions)	\$471	\$382	\$382	\$235	\$1,470

FY 2024-2027 Significant Projects

The State and Local Highway Project Listing Guide, Glossary, and Fund Types for significant projects and other highway projects are located in Appendix H. Significant projects for the FY 2024-2027 STIP are listed in Appendix I. Projects are considered Significant if any one of the following criteria is met: Major Construction, Principal Arterial, Illinois Special Bridge Program and/or special federal funds; i.e. location-specific federal earmark funding, Carbon Reduction, PROTECT, and COVID funds. The department has provided the estimated schedule for improvements and designated the proposed source of funds to satisfy the IJA requirements. The actual fiscal year in which a project is implemented may change for various reasons. Factors influencing the timing of an improvement include environmental

considerations, land acquisition, plan preparation, utility movements, hazardous waste clean-up, climate, level of public support and available funding. The department has published the FY 2024-2029 MYP program and will work to accomplish all the projects included in that program.

The website address for the FY 2024-2029 Proposed Highway Improvement Program is: [Publication \(illinois.gov\)](http://illinois.gov)

Amendments and Modifications to the STIP

An amendment will occur for projects being added or deleted from the STIP that fall within the Significant Category and will require an opportunity for a 15-day public review and comment period and approval by FHWA. The implementing state or local agency will be responsible for public involvement on STIP amendments. The 15-day comment period is for state and local projects outside of an MPO area; projects within an MPO area must follow the MPO’s public involvement procedures. In addition, amendments are required when cost changes for significant projects exceed the percentages listed. For example, if the cost of the project is \$5M and it is increased to \$6.250M which is a 25 percent increase, an amendment is required.

Requirements for amendments are based on the percent of change from cost as shown below.

<u>Percent Change</u>	<u>Federal Project of Project Group Cost (\$1,000)</u>
100%	\$0 - \$999
50%	\$1,000 - \$4,999
25%	\$5,000 - \$9,999
20%	\$10,000 or greater

An administrative modification occurs when federally funded projects within the Significant category have minor scope, fund type, project limit changes or project cost changes that do not exceed the percentages listed above. IDOT is required to submit administrative modifications to FHWA for informational purposes.

Projects with Special State Appropriation

Local SAFETEA-LU Earmarks

Separate state appropriation from FY 2007 remains available for local SAFETEA-LU High Priority Project (HPP) earmarks, which includes the required match. The remaining earmarks are listed in Appendix B.

Congressionally Designated Spending

Project listings were approved in both FFY 2022 (Public Law 117-103) and FY 2023 (Public Law 117-328). The federal share of these projects is to be governed by 23 U.S.C. 120. The projects are shown in Appendix C.

IDOT FINANCIAL PLAN FOR THE PROPOSED TRANSIT ELEMENT OF THE STIP

Federal Programs: Federal funds are available for transit projects through Chapter 53 of the Infrastructure Investment and Jobs Act (IIJA). This Act authorizes funding for FFY 2022-2026. Each year the FTA publishes interim guidance as part of its annual apportionments notice of funding. The Department utilizes the FTA published apportionments to determine allocations and direct apportionments.

Section 5307 & 5340: These urbanized area formula funds are available to urbanized areas for planning, capital, and operating assistance. An urbanized area is an incorporated area with a population of 50,000 or more that is designated as such by the U.S. Department of Commerce, Bureau of the Census. These funds are apportioned to the states on the basis of population and as of the 2020 US Census, housing density. The Department apportions these funds to small urban grantees (transit agencies) which allows them to apply directly to the FTA for these funds. The 5307 designated recipients reflect these funds in their individual Transportation Improvement Plans (TIPs) and are not included in the IDOT charts below. IDOT has the responsibility of contract and fund use oversight which is met through grant monitoring through the FTA's grant management system.

Section 5309: Fixed Guideway Capital Investment Grants provides discretionary funding for fixed guideway investments such as new and expanded rapid commuter rail, light rail, streetcars, bus rapid transit and ferries, as well as corridor-base bus rapid transit investment that emulate the features of rail. There are four categories of eligible projects under the program: 1) New Start; 2) Small Starts; 3) Core Capacity; and 4) Programs of Interrelated Projects. Large urban transit agencies such as the Chicago Transit Authority and Bi-State MetroLink apply directly to the FTA for these funds and are wholly responsible to the FTA for compliance and oversight of these funds.

Section 5310: Enhanced Mobility of Seniors and Individuals with Disabilities funds are used to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding transportation mobility options. IDOT uses these funds for the purchase of paratransit vehicles supporting these efforts through the Consolidated Vehicle Procurement (CVP) program. IDOT is the designated state agency to receive and disperse these formula funds for rural areas (population under 50,000) and small urbanized areas (population of 50,000–199,999). Funds for large urbanized areas (population over 200,000) are apportioned directly to those respective urbanized areas by FTA. Some of these large urbanized areas designate a portion of their formula to IDOT for paratransit vehicles in their area, and those funds are included in the IDOT charts below.

Section 5311: Rural area (population under 50,000) funds are available for general public transportation in non-urbanized areas for operating, capital, administrative, and planning expenses. IDOT administers these funds through agreements with local governmental agencies.

Section 5339: Grants for Bus and Bus Facilities funds are used to replace, rehabilitate, and purchase buses and related equipment and to construct or rehabilitate bus-related facilities including technological changes, innovations, or to modify low or no emission vehicles or facilities. This program has a formula component and a competitive component. Grantees (transit agencies) apply directly to FTA for the competitive funds. IDOT is the designated state agency to receive and disperse Section 5339 formula funds for rural areas (population under 50,000) and small urbanized areas (population of 50,000–199,999). IDOT has the responsibility of contract and fund use oversight for projects awarded under the formula funding, which is met through concurrence procedures, reviewing plans, and invoices and may include on-site inspections.

CARES Act: On March 27, 2020, President Trump signed the Coronavirus Aid, Relief, and Economic Security (CARES) Act into law. The CARES Act provides recipients of urbanized area (5307) and rural area (5311) formula programs with additional funding to support capital, operating, and other expenses generally eligible under those programs to prevent, prepare for, and respond to COVID-19. In Illinois, the 5307 program received approximately \$1.585 billion and the 5311 program received approximately \$57 million. Funding is provided at a 100-percent federal share, with no local match required.

CRRSA ACT: On December 27, 2020, the Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA) was signed into law. The CRRSA, similar to the CARES Act, provides recipients of urbanized area (5307) and rural area (5311) formula programs with additional funding to support capital, operating, and other expenses generally eligible under those programs to prevent, prepare for, and respond to COVID-19. The CRRSA directs recipients to prioritize payroll and operational needs.

ARP ACT: On March 11, 2021, the American Rescue Plan Act was signed into law to support the nation's public transportation systems. The ARPA funds are awarded for use in the same manner as CARES and CRRSA. ARPA, when combined with CARES and CRRSA provided 132% of 5307 recipients 2018 operating expenses and 140-150% of 5311 recipients 2018 operating expenses.

State Funding: Funding is provided by legislative authorizations for capital programs and is available for transit projects. Series B Bonds are issued by the state to fund capital transit projects and are also used to match FTA capital funded projects for rural and small urban transit agencies.

The Rebuild Illinois capital improvement program created a new Multi-modal Transportation Bond Fund, Downstate Mass Transportation Capital Improvement Fund, and Regional Transportation Authority Capital Improvement Fund. Collectively, these new authorization programs added approximately \$4.5 Billion to statewide capital programs over a six-year period.

The state provides significant operating assistance to 56 transit systems across the state through the Downstate Operating Assistance Program (DOAP) as authorized and apportioned by the general assembly and reimburses up to 65% of eligible operating expenses.

Local Funding: Local operating funds for transit projects are generated from a variety of sources which are: 1) Metro East Sales Tax in the Metro East area of St. Louis. St. Clair County and Madison County levy a sales tax to assist in funding their operating expenses; 2) Various downstate local sources which allows downstate transit providers to receive revenues from dedicated property taxes to local government appropriations; and 3) Farebox Revenue which are the transit system funds collected from the riders for using the transit service.

Transportation Development Credits: A state is permitted to use certain toll revenue capital expenditures as a credit toward the non-federal matching share of highway programs authorized by Title 23 U.S.C. and the non-federal matching share (soft match) of transit projects eligible under/authorized by Title 49 U.S.C. The program allows the State DOT or any eligible mass transportation carrier upon approval by the State DOT, as defined in ILCS 20/2705, to use Transportation Development Credits (TDCs) to cover all or a portion of the non-federal share on any highway project authorized by Title 23 U.S.C. or any transit project authorized by Title 49, Chapter 53, U.S.C. TDCs do not provide any additional funding, rather they are used in place of non-federal matching funds making the project 100% federally funded.

FY 2024-2027 PROPOSED TRANSIT ELEMENT OF THE STIP

The Transit Element of the STIP accounts for \$259.552 million in federal and state funding. The Department anticipates receipt of Federal apportionments from the Federal Transit Administration (FTA) for Federal Fiscal Years 2024-2027 of \$193.069 million. The Department will use \$66.481 million in state and local funding as well as TDC funding to match the anticipated federal funds. The following table provides a breakdown of available funds by fiscal year.

**FY 2024-2027 Funding (Table 8)
(\$Thousands)**

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal	\$79,495	\$37,789	\$37,857	\$37,926	\$193,067
State	\$26,121	\$13,453	\$13,453	\$13,453	\$66,480
TDCs*	\$3,034	\$3,047	\$3,061	\$3,075	\$12,217
TOTAL	\$105,616	\$51,242	\$51,310	\$51,379	\$259,547

*TDCs are excluded from Totals

The following table summarizes the programming of the anticipated FFY2024–2027 apportionments. The program includes \$101.27 million identified for rural transit operating assistance and \$91.79 million programmed for capital projects. In addition, \$12.21 million in TDCs have been programmed.

**FY 2024-2027 Program (Table 9)
(\$Thousands)**

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Operating	\$33,624	\$22,551	\$22,551	\$22,551	\$101,277
Capital	\$45,871	\$15,238	\$15,305	\$15,375	\$91,789
State	\$26,121	\$13,453	\$13,453	\$13,453	\$66,480
TDCs*	\$3,034	\$3,047	\$3,061	\$3,075	\$12,217
TOTAL	\$105,616	\$51,242	\$51,309	\$51,379	\$259,546

*TDCs are excluded from Totals

The Section 5307 small urban federally funded projects are programmed in the MPO’s TIPs for that metropolitan region. The amount of federal funds is known or reasonably

expected to be available for the program of projects and demonstrate that the transit projects are fiscally constrained. Additional information on individual MPO's and their local TIPs can be found through IDOT's Local Planning webpage under the tab of "Quick Links".

<https://idot.illinois.gov/transportation-system/local-transportation-partners/local-planning/index>.

Project listings can be found under the "Project Listings" tab at:
[Statewide Transportation Improvement Program \(illinois.gov\)](#)

IDOT FINANCIAL PLAN FOR THE PROPOSED INTERCITY RAIL ELEMENT OF THE STIP

Federal Capital Funding: Federal funds are available for intercity passenger rail capital projects through Federal Railroad Administration (FRA) competitive grant programs. IDOT currently administers FRA grants awarded through the American Recovery and Reinvestment Act (ARRA) of 2009, Omnibus Appropriations Acts of 2009 (FY 2009) and 2010 (FY 2010), and Consolidated Rail Infrastructure and Safety Improvements (CRISI) Program of 2017. All of the FRA competitive grant funding is provided on a reimbursement basis. These grants require a state funding match that varies from 0% to 50% depending on the grant, which is funded by state Series B Bonds.

ARRA: The ARRA legislation included a federal funding expiration corresponding to the end of the FFY 2017 (September 30, 2017). The ARRA grants administered by IDOT include a Tapered Match grant modification that permit the grant's FRA funds to be spent first, by the expiration date and then the state matching funds to follow. FRA funds expire in the SFY 2017, but the Tapered Match currently allows these ARRA grants to use the state funding match through SFY 2024.

Omnibus Appropriations Acts and CRISI: The legislation in the Omnibus Appropriations Acts of 2009 and 2010 and the CRISI Program of 2017 do not have a federal funding expiration date. The FY 2009, FY 2010, and CRISI grants administered by IDOT anticipate funding through SFY 2024.

State Capital Funding: Funding is provided by legislative authorizations for intercity passenger rail capital programs through two funds which are approved by IDOT: the Federal High Speed Rail Trust Fund (433 Fund) issued to provide positive cash-flow for FRA grants; and Series B Bonds issued by the state to fund capital intercity passenger rail projects and are primarily used to match FRA funds. The FRA grants require IDOT to pay vendors (i.e. consultants, railroads, local municipalities) the federal portion of FRA grants via the 433 Fund and then receive reimbursement from FRA funds.

In 2019, the State of Illinois passed the Rebuild Illinois Capital Infrastructure Bill that provided additional capital for passenger rail projects throughout the state, including new monies for the Chicago to Quad Cities Intercity Passenger Rail Expansion, the Chicago to Rockford Intercity Passenger Rail Expansion, the Chicago to Carbondale Passenger Rail Improvement Project, and for the Springfield 10th Street Rail Consolidation Project.

State Operating Funding: Funding is provided by legislative authorizations for operations of intercity passenger rail programs by state road fund appropriations on an annual basis. These programs include operations of the existing Amtrak state-supported services (i.e. Chicago-

Champaign-Carbondale, Chicago-Galesburg-Quincy, Chicago-Normal-Springfield-St. Louis, and Chicago-Milwaukee) and maintenance of the Chicago-Normal-Springfield-St. Louis High Speed Rail corridor.

Funding for a new one daily round trip Amtrak state-supported service between Chicago-Milwaukee, WI-St. Paul, MN is anticipated to commence in FY 2024 in partnership with Wisconsin and Minnesota DOTs and with significant operating funding assistance granted to Wisconsin to administer for the route, from an FRA Route Restoration and Enhancement grant. Funding for operation of the new Chicago-Rockford service, anticipated to commence in FY2027 with Metra as the operator, will require additional state road fund appropriation on an annual basis.

FY 2024-2027 Proposed Intercity Rail Element of the STIP

Passenger rail in Illinois is comprised of intercity, commuter rail, and light and heavy rail transit. However, the Passenger Rail Improvement and Investment Act (PRIIA) of 2008 defined passenger rail as consisting of intercity and commuter rail.

The State of Illinois has contracted with Amtrak to subsidize passenger rail service since 1971. PRIIA requires an equitable arrangement of cost sharing between Amtrak and state or public agency partners that provide funding for short-distance intercity passenger rail services. By agreement with Amtrak, the State of Illinois supports the operation of trains on three routes between Chicago and downstate Illinois: Chicago and St. Louis (Lincoln Service), Chicago to Carbondale (Saluki/Illini), and Chicago to Quincy (Carl Sandburg/Illinois Zephyr). In addition, Illinois and the State of Wisconsin jointly support seven daily round trip trains between Chicago and Milwaukee on the Hiawatha Service. The state's operating subsidy with Amtrak was approximately \$53 million in SFY 2023. In FY 2023, ridership increased 17% from FY 2022's 3.5 million riders, with a total of 4.1 million riders at Illinois stations in FY 2023. Ridership continues to recover in the aftermath of the COVID-19 pandemic. Before the pandemic, ridership in FY 2019 was near 6.1 million riders. Illinois brought back full train service frequencies in July 2021. In early FY 2023, there were sporadic disruptions in service due to nationwide staffing and resource issues with the service operator, Amtrak, but those conditions have normalized without service interruptions heading into FY 2024.

Since the ARRA 2010 grant that initially funded the Chicago-St. Louis High Speed Rail Project (\$1.2 billion), Illinois' signature high-speed rail route has received an additional \$300 million of federal and state funds for corridor improvements between Joliet and St. Louis. The Chicago-St. Louis corridor now features much improved safety with 4-quadrant gates at grade crossings and Positive Train Control (PTC) with increased top speeds of 110 mph.

In addition, Illinois and a consortium of partner Midwest states (Michigan, Missouri, and Wisconsin) has procured and placed into service 33 new Siemens Charger locomotives for intercity passenger rail services. The same consortium of Midwest states has procured and begun placing new Siemens Venture passenger cars into service in FY 2022, which will continue through FY 2024 as the final cars are delivered and commissioned into service.

Additional federal and state funds, including state funds from the Rebuild Illinois Capital Infrastructure Bill, have been applied to these other passenger rail projects of significance:

- Chicago to Quad Cities Intercity Passenger Rail Expansion which totals \$448 million of federal and state funding for construction of necessary improvements to establish Amtrak passenger rail service to Moline including a new intermediate station in Geneseo;

- Chicago to Rockford Intercity Passenger Rail Expansion which totals \$275 million of state funding for construction of necessary improvements to establish Metra passenger rail service by 2027 to Rockford including new intermediate stations in Elgin, Huntley, and Belvidere;
- Chicago to Carbondale Passenger Rail Improvement Project which totals \$100 million of state funding for construction of improvements to improve on-time performance of the route; and
- Springfield 10th Street Rail Consolidation Project which totals \$122 million of state funding for the consolidation of rail traffic on the 10th Street corridor in Springfield.

The FY 2024-2027 intercity rail portion of the STIP totals \$1,333.0 million. The federal portion of the program represents \$152.6 million of the total funding, with the state contributing \$1,180.4 million. The 2024-2027 STIP-Intercity Rail is included in Appendix D. The following tables provide a breakdown by fiscal year.

FY 2024-2027 Available Funding (Table 10)
(\$Millions)

FUND SOURCE	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
Federal	36.2	52.6	63.8	0.0	152.6
State	183.9	253.1	374.4	369.0	1,180.4
TOTAL	220.1	305.7	438.2	369.0	1,333.0

FY 2024-2027 Proposed Expenditure (Table 11)
(\$Millions)

	FY 2024	FY 2025	FY 2026	FY 2027	FY 2024-2027
TOTAL	220.1	305.7	438.2	369.0	1,333.0

State Planning and Research

The FHWA approved \$43.1 million in State Planning and Research (SPR) funds and \$29.3 million in Metropolitan Planning (PL) funds for FY 2024 on July 27, 2023. The SPR-PL work program provides for the continuation of the state and metropolitan transportation planning programs for the period from July 1, 2023 through June 30, 2024. This category includes a state planning work program and supplemental work programs for urbanized areas over 200,000 population. Below is the estimated apportionment of SPR and PL funds per the FAST Act apportionment tables.

FY 2024-2027 Funding (Table 12)
(\$Millions)

Fiscal Year	SPR FUNDS	PL FUNDS
FY 24	\$43.1	\$29.3
FY 25	\$38.5	\$30.2
FY 26	\$39.3	\$31.1
FY 27	\$40.1	\$32.0
TOTAL	\$161.0	\$122.6

Outreach

Public involvement is an important component of all transportation system plans and programs. In Illinois, public input on transportation issues is sought and considered on a continuous and ongoing basis. The STIP is the culmination of the programming process. Therefore, public involvement activities associated with the STIP build on public involvement efforts conducted by the Department on the MYP and by local MPOs throughout the programming process.

Outreach for FY 2024-2029 MYP had continued opportunities for members of the general public to become involved in transportation planning. It is IDOT's intent to continue providing current information through social media such as Facebook and Twitter. Additionally, IDOT's Office of Planning and Programming (OP&P) has implemented a website where the general public can fill out comment sheets with their questions and concerns on the MYP. This allows all members of the general public the chance to be involved in the planning process. IDOT and OP&P continue to refine the MYP Outreach process to stay current with public formats. The Outreach information can be found under the Public Outreach section at: [Statewide Transportation Improvement Program \(illinois.gov\)](https://www.illinois.gov/transportation/STIP)

23 CFR part 450, subpart B requires that the public be offered an opportunity to review and comment on the draft STIP prior to FHWA taking approval action on the STIP. IDOT must provide citizens, affected public agencies and jurisdictions, employee representatives of transportation or other affected agencies, private providers of transportation, freight shippers, users of public transit and other interested parties a reasonable opportunity to review and comment on the proposed STIP. As such, while the outreach for the annual MYP directly ties to outreach for the STIP, IDOT also publishes the draft STIP and makes it available to the public for review and comment for a minimum of 30 days (15 days if amended). The various MPO's throughout the state are responsible for public outreach on projects within their TIP's.

In accordance with federal requirements, the STIP is published with reasonable notification of its availability for review through regionally significant newspapers, public outreach throughout the state, including the Illinois State Fair in Springfield (except for 2020 when cancelled due to COVID-19), Twitter, Facebook and IDOT's website. Also, the Department provided internet access of the Draft STIP to the county board chairman of all 102 Illinois counties, asking for assistance from appropriate members of their staff who work with populations of interest. This effort should increase the opportunity for low-income and minority populations to interact with and comment on the STIP. An electronic version is available through the Illinois Document Depository library system and on the IDOT website which is: [Statewide Transportation Improvement Program \(illinois.gov\)](https://www.illinois.gov/transportation/STIP)

Written comments regarding the FY 2024-2027 STIP should be forwarded to the Office of Planning and Programming in Springfield at the following address using the form on page 31:

**Illinois Department of Transportation
Office of Planning and Programming
2300 S. Dirksen Parkway, Room 307
Springfield, Illinois 62764**

Individuals can also email at DOT.STIP@Illinois.gov or contact the Department concerning planning, programming and public involvement issues at 1-800-493-3434.

IDOT welcomes public comment on the draft STIP as well as all transportation issues. The Department responds to telephone inquiries, letters, and e-mail comments for all issues. The Public Review and Comment form on page 31 is provided for public use but is not necessary. A record of comments and responses is maintained by the Office of Planning and Programming.

In addition, the department responds to hundreds of letters and inquiries from the general public, legislators, congressmen and various groups annually regarding the status of projects and various transportation related topics and issues.

The Department will continue to explore various opportunities for review and comment to ensure public participation. The Department is committed to continuing good faith efforts to encourage and obtain public participation in the STIP as well as all program development process. The Department's efforts exceed the requirements for public involvement in 23 CFR part 450, subpart B. The Department actively seeks public input throughout the transportation decision-making process from the earliest stages through the development and implementation of specific solutions.

Special Appropriations

The 94th Illinois General Assembly passed a special appropriation to cover local SAFETEA-LU earmarks and required match for High Priority Projects and Transportation Improvement Projects. The funding of these particular projects is dependent upon when the local agency is prepared to move forward with the projects. Listed below are the remaining local federal earmarks programmed in the STIP timeframe in district order.

District 6

Bill No.	Earmark Amount	Bill Language	Improvements	Total Cost	Project Number
1984	1,200,000	The extension of MacArthur Blvd. from Wabash to Iron Bridge Road, Springfield	Paving, Widening & Resurfacing	462,000	6-10245-0200
4058	1,000,000	Expand US 67, Brighton to Bunker Hill Road, Macoupin County	Reconstruction	2,500,000	6-10059-0010
4110	1,000,000	Expansion of US 67 from Brighton to Bunker Hill Road in Macoupin County			

FFY 2022/2023 Congressionally Directed Spending

FFY 2022 Congressionally Directed Spending (Table 13)

Account	Project	Recipient	Amount
Highway Infrastructure Programs	St. Clair County - Greenmount Road from Lebanon Avenue to South of Frank Scott Parkway Widening		\$2,500,000
Highway Infrastructure Programs	St. Clair County - Greenmount Road from Route 161 to Lebanon Avenue Widening		\$2,500,000
Highway Infrastructure Programs	Barrington - Pedestrian Grade Separation at Main Street and the Canadian National Railroad		\$500,000
Highway Infrastructure Programs	Deer Park Boulevard - Road Program		\$614,000
Highway Infrastructure Programs	Iron Bridge Road to MacArthur Boulevard Extension		\$3,000,000
Highway Infrastructure Programs	Grand Avenue and George Street Traffic Safety Enhancement		\$650,000

Highway Infrastructure Programs	Cedar Lake Road Realignment and Downtown Round Lake Improvement Project	IL	\$4,000,000
Highway Infrastructure Programs	Beach Park Pedestrian and Bicycle Safety Project	IL	\$1,720,000
Highway Infrastructure Programs	Kendall County Extension Environmental Impact Statement	IL	\$4,800,000
Transit Infrastructure Grants	All Stations Accessibility Program: Green Line Oak Park and Ridgeland Stations	Chicago Transit Authority	\$3,000,000
Transit Infrastructure Grants	Illinois Electric Paratransit Vehicle Program	IDOT	\$1,000,000
Transit Infrastructure Grants	Chicago Transit Authority Bus Security Shield Implementation Project	Chicago Transit Authority	\$1,000,000
Transit Infrastructure Grants	Metra Zero Emission Locomotive Commuter Rail Pilot	Metra Commuter Railroad	\$1,500,000
Transit Infrastructure Grants	Southeastern Illinois Rides Mass Transit District Technology Upgrades	Rides Mass Transit	\$1,200,000
Transit Infrastructure Grants	Illinois Electric Bus and Charging Infrastructure Program	IDOT	\$6,715,000
Transit Infrastructure Grants	Battery-electric Paratransit Pace Bus Fleet	Pace-Suburban Bus Division	\$1,000,000
Transit Infrastructure Grants	Pace Bolingbrook Park-n-Ride Facility	Pace-Suburban Bus Division	\$1,200,000
Transit Infrastructure Grants	Pace Bus—Harlem Ave and Cermak Rd Transit Signal Priority Project	Pace-Suburban Bus Division	\$840,000
Transit Infrastructure Grants	Pace 95th Street Transit Signal Priority	Pace-Suburban Bus Division	\$840,000
Transit Infrastructure Grants	Zero-Emissions Pace Bus Fleet	Pace-Suburban Bus Division	\$1,920,000

FY 2024-2027 Intercity Rail Program (Table 15)
(\$ Millions)

Corridor	Project Location and Description	Est. Cost	Est. FY
Chicago to St. Louis	Joliet – Alton: Improve signals, tracks, grade crossings, passenger equipment to permit 110 mph service; additional reliability improvements and new equipment deliveries.	\$185.6	FY 2024-2027
Chicago – Quad Cities IPR Expansion	Construct new track connection near Wyanet, a train layover facility, and other improvements necessary to establish Amtrak-operated service.	\$405.6	FY 2024-2027
Chicago – Rockford IPR Expansion	Construct necessary improvements to establish Metra-operated passenger rail service between Chicago and Rockford with intermediate stations in Elgin, Huntley, and Belvidere.	\$274.0	FY 2024-2027
Chicago – Carbondale Improvements	Construct necessary improvements between Chicago and Carbondale to improve on-time performance of the service.	\$99.0	FY 2024-2027
Springfield 10 th Street Rail Consolidation	Construct improvements to consolidate rail through Springfield along the 10 th Street rail corridor	\$42.0	FY 2024-2026
Chicago Terminal Planning Study	Study with partners, FRA, Metra, and Chicago DOT to analyze existing and proposed Amtrak, Metra, and freight operations in the Chicago Terminal area.	\$6.0	FY 2024-2027

FY 2024-2027 Federal Lands

The FHWA's Eastern Federal Lands Highway Division has approved the following projects for the State of Illinois using the Federal Lands Access Program and Federal Lands Transportation Program.

Federal Lands Access Program (Table 16)

District	County	Description	Improvements	Programmed Amount
1	Will	Midewin National Tallgrass Prairie, Abraham Lincoln National Cemetery	New bike path construction	\$335,000
2	Carroll	Upper Mississippi River	Feasibility study on Great River Trail extension	\$150,000
7	Moultrie	Lake Shelbyville	Roadway reconstruction raising existing road profile	\$400,000
9	Franklin	Rend Lake	Infrastructure Improvements including public restrooms, fishing piers, boat ramp with dock, etc.	\$350,000
9	Hardin	Shawnee National Forest	Removal of a Low Water Concrete Crossing and a 15" diameter CMP	\$400,000
9	Williamson	Crab Orchard National Wildlife Refuge	2 miles of asphalt overlay, aggregate wedge shoulder, guardrail, raised pavement markers, striping and signage	\$700,000

Federal Lands Transportation Program (Table 17)

District	County	Description	Improvements	Programmed Amount
1	McHenry	Hackmatack National Wildlife Refuge	Construct access off Highway 173	\$100,000
8	Calhoun	Two Rivers National Wildlife Refuge	Trailhead Replacement	\$254,298
9	Williamson	Crab Orchard National Wildlife Refuge	Match Funding	\$400,000
9	Williamson	Crab Orchard National Wildlife Refuge	Campground/Prairie Creek	\$1,000,000
9	Williamson	Crab Orchard National Wildlife Refuge	Line 6 Road	\$500,000

Emergency Relief for Federally Owned Roads (Table 18)

District	County	Description	Improvements	Programmed Amount
7	Shelby	Lake Shelbyville	Remove & replace two wooden bridges, and steps on the Chief Illini Trail.	\$3,109,540

Recreational Trails Program (Table 19)

A Memorandum of Understanding between the Illinois Departments of Transportation and the Illinois Department of Natural Resources (IDNR) was signed on 04/25/18, which states that IDNR will oversee both the scope of projects and the financial aspects of the Recreational Trails Program (RTP), however funding will continue to pass through IDOT.

Below is a listing of all Recreational Trails projects outside of an MPO area. All projects within an MPO area are included in this document by reference.

IDOT District	Project Sponsor	Project Title	County	Improvement	Description	RTP Funds Amount	Total Cost
2	Freeport Park District	Jane Addams Trail	Stephenson	Recreational Trail Improvements	Bridge Rehab and Bridge Replacement	\$200,000	\$250,000
3	Lowry, Jimmy	The Cliffs Acquisition	LaSalle	Recreational Trail Improvements	Acquisition of 125 Acres	\$612,000	\$765,000
3	Illinois Assoc. of Snowmobile Clubs	Snowmobile Trail Maint. and Operations	McDonough	Recreational Trail Improvements	Tail Markings and equipment maintenance	\$158,400	\$198,000
4	Village of Germantown Hills	Village Park Rec. Trail	Woodford	Recreational Trail Improvements	Construction of trail for 0.25 miles and parking lot, 20 foot bench area with trash cans.	\$200,000	\$320,000
7	Effingham County	TREC Phase VI-C	Effingham	Recreational Trail Improvements	Construction of trails to connect to existing 5 miles of trails	\$200,000	\$250,000

Total RTP Funds amount: \$1,370,400.00

Total Cost amount: \$1,783,000.00

Danville/Carbondale-Marion Transit Listing

Due to DATS and SIMPO ceasing MPO status at the end of the 2023 calendar year, the following approved transit projects are listed from the corresponding TIP's.

Danville Area Transportation Study (Table 20)

Provider	Project Number	Project	Fund	Agency \$	State \$	Federal \$	Total \$
Danville Mass Transit	DMT-25-01	Operating Assistance	5307	\$0	\$2,417,000	\$1,301,000	\$3,718,000

2024-2027 State and Local Highway Project Listing Guide

Projects identified for FY 2024-2027 are listed on the following pages. The lists are comprised of Significant projects for each of the department's nine geographical districts. The listing will be State Significant projects by District then Local Significant projects by District. Within the project listing the following sequence is used:

1. Interstate marked routes in ascending numerical order
2. US marked routes in ascending numerical order
3. Illinois marked routes in ascending numerical order
4. Unmarked routes in alphabetical order by street name

The listing of projects is arranged in six columns:

Route/Street	County	Location	Improvements	Est. Cost	Projected Programming Year/Project ID
Identifies the marked route(s) street name	Identifies County	Identifies limits, length and location of the project	Identifies type of improvement	Identifies the estimated cost in current dollars and fund type to be used	Identifies the estimated fiscal year / Project Number

STATE AND LOCAL HIGHWAY PROJECT LISTINGS

The remaining pages will list all state and local projects in the STIP with the following format:

District 2 state projects categorized as Significant.

District 3 state projects categorized as Significant.

District 4 state projects categorized as Significant.

District 5 state projects categorized as Significant.

District 6 state projects categorized as Significant.

District 7 state projects categorized as Significant.

District 8 state projects categorized as Significant.

District 9 state projects categorized as Significant.

District 2 local projects categorized as Significant.

District 3 local projects categorized as Significant.

District 4 local projects categorized as Significant.

District 5 local projects categorized as Significant.

District 6 local projects categorized as Significant.

District 7 local projects categorized as Significant.

District 8 local projects categorized as Significant.

District 9 local projects categorized as Significant.
